CONTENTS.

REPORT:— Page

Preliminary Measures taken to carry out the provisions of the Acts for the Registration of Births, Deaths, and Marriages in Ireland, ... 5–8

POPULATION, MARRIAGES, BIRTHS, DEATHS, and EMIGRATION in 1864, . . . 8

Marriages—their Number and Proportion to the Population, ... 8

Minors, Widowers and Widows, and Signatures to Marriage Registers, . . . 8–9

Ages of Persons Married, ... 9

Proportional Number (1) of Marriages, (2) of Persons Married who wrote their Names in the Registers, (3) of Persons not of Full Age, and (4) of Re-marriages, in each Registration Division in 1864. (Table I.), ... 9

Marriages (1) of Roman Catholics, (2) of Protestants, and the total Number registered in each Quarter of the Year, ... 9–10

Marriages of Protestants from 1845 to 1864, celebrated *according* and *not according* to the Rites of the Established Church. (Table II.), ... 10

Buildings registered for the Solemnization of Protestant Marriages. (Table III.), . 10–13

Marriages by Registrars' Licence, and by Presbyterian Ministers' Licence, . . . 13

Births registered in 1864, ... 14

Deaths registered in 1864, ... 14–15

Emigration from each Province during the year 1864, ... 15

Meteorological Observations, ... 15–16

Remarks on Defective Registration, ... 16–17

Compulsory Vaccination, ... 17

SUMMARY OF THE QUARTERLY REPORTS, 1864:

First Quarter, ending March 31st, ... 18–21

Second Quarter, ending June 30th, ... 21–26

Third Quarter, ending September 30th, ... 27–32

Fourth Quarter, ending December 31st, ... 32–38

Table of Meteorological Observations for the year 1864, ... 39

Estimated Population of Ireland from 1801 to 1864, ... 40

ABSTRACTS:—

Marriages registered in Ireland in each of the Divisions and Superintendent Registrars' Districts, also in each Province and County, in 1864, distinguishing Roman Catholic from Protestant Marriages, and giving the Total Number registered in each Quarter of the Year; the Conjugal Condition of Persons Married; the Number of Minors, and of those who signed the Registers by Marks, ... 42–51

Ages of 25,164 Persons married in 1864, distinguishing those of Bachelors, Spinsters, Widowers, and Widows, ... 52–53

Marriages, Births, and Deaths registered in each of the Divisions and Superintendent Registrars' Districts, and in each Province and County in 1864; also Births and Deaths, and Excess of Births over Deaths in each of the Registrars' Districts of Ireland, distinguishing the Sexes and Illegitimate Births throughout, ... 54–77

Births registered in the Divisions and Superintendent Registrars' Districts, and in the Provinces and Counties (distinguishing Males and Females) in each of the Four Quarters of 1864, ... 80–89

Deaths registered in each of the Four Quarters of 1864 (distinguishing Males and Females), in Divisions and Superintendent Registrars' Districts, also in Provinces and Counties, 90–99

Deaths of Males and Females at different Ages registered in 1864, in Divisions and Superintendent Registrars' Districts, also in Provinces and Counties, . . . 100–107

Causes of Death of Males and Females in Ireland, at different periods of life, in 1864, . 108–115

Supplementary Table of Causes of Death of Males and Females, at different periods of life, in 1864, ... 116–119

Causes of Death of Males and Females in Ireland, and in each of the Divisions in 1864, . 120–127

Page

Deaths from several Zymotic and other Causes in 1864, in the Divisions and Superintendent Registrars' Districts, and in the Provinces and Counties, . . . 128–131

APPENDIX.

Letter to the Registrar-General on the Causes of Death in Ireland in 1864, from William M. Burke, Esq., F.C.P.I., ... 135–138

A.—Circular Letter from the Registrar-General to the Magistracy, Clergy, Editors of Papers, and others requesting their co-operation in carrying out the provisions of the Registration Acts; also Copy of a Notice enclosed therein, stating the Acts required to be done for the purpose of registering Births, Deaths, and Marriages, . . . 139–144

B.—Notice to Captains and Commanding Officers of British Vessels, regarding Registry of Births and Deaths at Sea, ... 144–145

C.—General Specification for a Register Office and Strong Closet, ... 146

D.—General Rule respecting the Qualifications of Superintendent Registrars of Births, Deaths, and Marriages, ... 146–147

E.—General Rule respecting the Qualifications of Registrars of Births, Deaths, and Marriages, 147–148

F.—Circular Letter from the Registrar-General to the Chairman and Board of Guardians of each Union in Ireland, enclosing Copies of Circulars to the Clerk of each Union, and to the Medical Officer of each Dispensary District, requesting them to state whether they intended to accept the Office of Superintendent Registrar, and of Registrar of Births, Deaths, and Marriages, respectively; also enclosing Copies of the General Rules, and soliciting their aid and co-operation in carrying out the provisions of the Registration Acts, ... 148–149

G.—Circular Letter from the Registrar-General to the Registrars of Births, Deaths, and Marriages, directing them to furnish blank Forms of Certificate of Marriage to those Parish Priests who should make application for them, ... 149

Index of Superintendent Registrars' Districts, and of Registrars' Districts, . . . 150–156

REPORT

TO

His Excellency JOHN POYNTZ, EARL SPENCER, K.G., &c., &c.,

Lord Lieutenant-General and General Governor of Ireland.

MAY IT PLEASE YOUR EXCELLENCY,—

As directed by the provisions of the 26 Vic., cap. 11, sec. 49; the 26 & 27 Vic., cap. 90, sec. 16; and the 7 & 8 Vic., cap. 81, sec. 56, I have the honour to transmit to your Excellency, in order that the same may be laid before Parliament, General Abstracts relating to the Births, Deaths, and Marriages registered in Ireland during the year 1864, being my first Report under the Acts for the Registration of Births, Deaths, and Roman Catholic Marriages, and my fifteenth Report under the 7 & 8 Vic., cap. 81, for the Registration of Protestant Marriages of every denomination.

A General Abstract of the number of Births, Deaths, and Marriages, registered in the year 1864, was presented to Parliament in the Session of 1865, in accordance with the Acts referred to. The Report now submitted contains detailed Tables of the ages and condition of persons married, of Births, distinguishing legitimate from illegitimate; and of Deaths, and their causes.

The Acts for the Registration of Births and Deaths, and Roman Catholic Marriages, came into operation on the 1st of January, 1864, but that for the Registration of Protestant Marriages has been in force since the 1st of April, 1845.

In order to give publicity to the requirements of the 26 Vic., cap. 11, and 26 & 27 Vic., cap. 90, it was provided that "a Notice," setting forth the acts required to be done for the purpose of registering Births, Deaths, and Marriages, should be prepared by the Registrar-General, and furnished by him to all Boards of Guardians, for publication throughout the several Poor Law Unions. This notice was prepared and furnished as directed by the Statutes. With a view to increase the publicity to be given to this Notice, I had, with the approval of the Inspector-General of Constabulary, and the Commissioners of Metropolitan Police, copies of it displayed for a considerable period at all the police stations throughout Ireland. I also had the Notice* printed in the form of a pamphlet, and copies sent by Post to every magistrate, to the clergy of all denominations, to medical practitioners, to editors of papers, and to many other persons of influence, who were requested by me to make known to the people in their respective localities, the great importance and advantage of complying with the new enactments, and it is very satisfactory to me to state that my request was very favourably received and generally acted upon.

With the object of having the Births and Deaths of the military carefully registered, the Deputy Adjutant-General was furnished with a sufficient supply of these Notices for use at the several stations of the army serving in Ireland. To secure the Registration of Births and Deaths of the Irish occurring at sea, I communicated with the Lords

* A copy of the Notice is given at page 139.

of the Admiralty on the subject, furnishing copies of a special notice* for distribution to the captains and other persons in command or in charge of British vessels, which notices their Lordships were so good as to cause to be distributed and published in such manner as to them seemed best for carrying out the law. I was also assisted by the Commissioners of Customs in this matter.

For the purposes of Registration, the country has been divided under the Act, into Superintendent Registrars' Districts—co-extensive with the well defined boundaries of the Poor Law Unions—and into Registrars' Districts —co-extensive with the Dispensary Districts formed under the Medical Charities Act. These districts the Registrar-General, with the approval of the Lord Lieutenant, has the power of altering should it be found necessary.

The Clerks of Poor Law Unions, in virtue of their office, may become the Superintendent Registrars, and the Medical Officers of Dispensary Districts the Registrars of Births, Deaths and Marriages. These officers hold their appointments during the pleasure of the Registrar-General. The number of Superintendent Registrars' Districts in 1864 was 163, and of Registrars' Districts, 770. In some cases two or more medical officers were acting in one Dispensary District. In these Districts, with a few exceptions, a portion of the District was allotted for registration purposes to each of the medical officers. One District (Ballinrobe) was formed into two, the new District being called "Cappaghduff." This division became necessary for the convenience of the inhabitants, who would otherwise have had to travel a considerable distance to register the Births and Deaths occurring in their families, owing to the original District being intersected by a large lake.

Although there were 770 Districts there were only 756 Registrars. In 20 instances one medical officer had charge of two adjoining Districts. 698 of the Medical officers of Dispensaries accepted the office of Registrar of Births, Deaths and Marriages, and 6 that of Registrar of Births and Deaths only. 26 Registrars of Births, Deaths and Marriages, and 6 Registrars of Marriages were appointed by the Guardians on the refusal of the Medical Officers of the Dispensary Districts to act as Registrars. Of the 32 Registrars appointed by the Guardians, 4 belonged to the Medical profession; 8 were Relieving Officers, 1 was a Poor-rate Collector, 5 were farmers, 4 were in trade; 2 were described as teachers; 6 were returned as clerks, agents, or other occupations; and 2 were stated to have had no occupation.

With a view to the safe custody of the Registers when filled, the 26 Vic., cap. 11, sec. 20, enacted that the Guardians of each Union should provide and uphold, out of the Rates, a Register Office according to a plan to be approved of by the Registrar-General, which Register Office might be made in some part of the existing Poorhouse. To carry out this provision I placed myself in communication with the Poor Law Commissioners, in order that a general plan for an office might be prepared "which, while the principal requirements should, as far as possible, be uniform in all, such modifications might be admitted in detail as the peculiarities of structure of the several workhouses, or other circumstances, might render necessary." Accordingly a plan and specification† were obligingly prepared by the Commissioners, and approved of by me, the general features of the plan requiring that the Register Office should be isolated from the rest of the Workhouse buildings, and that it should consist of two rooms, one to be used by the

* For copy of this notice, see page 144.

† For copy of the general specification, see page 146.

public, the other as a fireproof Strong Closet, shelved for the reception of the Registers and Indexes. A plan and specification of each office, having the features of this general plan, were then either prepared or sanctioned by the Commissioners.

As soon as each plan had been approved of by me, the Poor Law Commissioners required the Guardians of the Union to provide the office in accordance therewith, so that within a reasonable time Register Offices were provided in every Union in Ireland, except one—Cahersiveen—in which Union the Workhouse is a considerable distance from the town, rendering it more convenient to the public that the office should, for the present, be held in the town in a place provided by the Guardians, the Registers being kept in an iron box, until a suitable site for a Register Office can be procured.

The Registers of Births, Deaths and Marriages in the custody of the District Registrars are preserved in iron boxes furnished to them under the provisions of the Act, so that due precautions have been taken for the safety of these important records whilst in the hands of the Registrars, as also after they come into the custody of the Superintendent Registrars.

Register Books, printed forms, ink, and other requisites, were furnished to the Superintendent Registrars and Registrars some time before the Acts came into operation, to enable these officers to be fully prepared to discharge their duties. Coroners have also been supplied with printed forms of Certificate of Finding of Jury, to enable them to return, in a uniform manner, for insertion in the Registers, the particulars relating to the deaths of persons upon whom inquests are held.

In order to secure uniformity in the registry of the causes of death, I furnished to each Registrar and medical practitioner in Ireland a copy of Dr. Farr's Nosology, at present used in connexion with the Registration of deaths in England and Wales; and, with a view to procure the co-operation of the medical profession throughout the country, I communicated with the Presidents of the King and Queen's College of Physicians, and of the Royal College of Surgeons, also with the Governor of the Apothecaries' Hall of Ireland, soliciting their assistance, and I am happy to state that I received assurances on the part of each of these bodies of their willingness to aid me in attaining accurate and uniform returns of the causes of death.

For public information and guidance, each Registrar has been required by the Act to affix on some conspicuous place, on or near the outer door of his known place of business (generally the Dispensary of the district), a notice setting forth the district for which he acts as Registrar, his name and that of his deputy, and the days and hours during which he will attend at such place on Registration business. Each Superintendent Registrar has been required to place a like notice on or near the outer door of his office. I have also, as directed by the Statute, caused every Superintendent Registrar to publish extensively in his district a list of the names, places of abode, and the known places of business, of every Registrar of Births, Deaths, and Marriages under his superintendence, and also his own name and place of business.

With respect to Roman Catholic Marriages, the 26 & 27 Vic., cap. 90 directs that parties about to contract marriage shall produce to the clergyman celebrating the marriage a certificate, to be procured by the husband from the Registrar, and filled up, as far as possible by that officer with the particulars required to be registered, which certificate the

parties married, the witnesses, and the officiating clergymanare required to sign. When so filled up the certificate is to be returned within three days to the Registrar by the husband, under a penalty of ten pounds.

With a view to facilitate the registration of marriages under the Act referred to, I, at the special request of several dignitaries of the Roman Catholic Church, and with the approval of the Law Officers of the Crown —(who at that time were the Right Hon. Thomas O'Hagan, M.P., and James A. Lawson, esq., Q.C.)—instructed the District Registrars to furnish each parish priest, who should apply for them, with blank forms of certificate to be duly filled, signed, and forwarded to the Registrar on the occasion of a marriage, thus saving the husband the trouble and inconvenience of procuring from the Registrar a form of certificate *previous* to his marriage, as required by the Statute.* I also furnished the Roman Catholic clergymen in Ireland with copies of the Act relating to the Registration of marriages celebrated by them, in order that the requirements of the law might be known to them previous to the Act coming into operation.

GENERAL SUMMARY.

The *estimated* population in the middle of 1864 was 5,675,307; the number of persons whose marriages were registered, 54,812; of marriages, 27,406; of children born alive, whose births were registered, 136,414; of deaths registered, 93,144. The emigrants from Ireland during the year amounted to 114,169.

MARRIAGES.

The marriages of 27,406 men and 27,406 women were registered during 1864; being in the proportion of 0·48 marriages to every 100 persons, or of 1 marriage to every 207 persons, of the *estimated* population.

1,032 men and 4,976 women contracted marriage before they had attained their twenty-first year. The proportion of males married under age was 3·77; of females, 18·16 per cent. The proportions in England and Wales in 1864 were—males, 6·62, and females, 20·09 per cent. In Scotland the proportions were 7·46 males and 21·99 per cent. females.

Of widowers, 2,941 were re-married, and of widows, 1,556; the proportion being 10·73 per cent. of widowers, and 5·68 per cent. of widows, to the total marriages. The like proportions in England and Wales were 13·84 widowers, and 9·07 per cent. widows. In Scotland the proportions were, widowers, 11·38 and widows, 5·02 per cent.

According to the provisions of the Registration Acts, every registry of a marriage is required to be signed by the parties married, two witnesses, and the officiating clergyman. A test of the elementary education of the persons contracting marriage is thus afforded by comparing the number who write their names in the registers, with the number who only make a mark. Of 54,812 persons married, 24,352 (10,574 men and 13,778 women) signed the register with marks; this is in the proportion of 44·4 per cent., or 1 in every 2·59 of the males, and 1 in every 1·99 of the females married.

* For copy of Circular issued on this subject, see page 149.

The like rates in England and Wales for the same year were 1 in 4·3 males, and 1 in 3·09 females; and in Scotland 1 in 8·72 males and 1 in 4·19 females.

The marriage registers contain a column in which the age of each of the persons married is required to be inserted; but as it is sufficient to state whether the parties are "of full age" or "minors," the precise age at marriage is not generally inserted in the entries. The exact ages of both parties were specified in 12,582 instances. Of these 11,291 were bachelors and 11,913 spinsters. 1,291 were widowers and 669 widows. The largest number of wives were married between 21 and 30—the number being 7,550, or more than one-half of the whole number whose ages are recorded. The largest number of husbands—7,770—is also found to have been married between 21 and 30 years of age.

Three hundred and forty-nine bachelors were married to widows, both of whose ages at the time of marriage are recorded. Of these 191 of the widows and 165 of the bachelors married between 25 and 35 years of age. Of 971 widowers who married spinsters, 475 of the latter were between 25 and 35 years of age; whilst the largest number of the widowers on their re-marriages ranged chiefly between 30 and 45.

Of widowers and widows married, whose ages at the time of marriage are stated, there were 320 couples. Of these the largest number of widows appears to have been between 40 and 50, and of widowers between 45 and 55. Sixteen widowers and four widows were married when they were above 70 years old.

The proportion per cent. of marriages to the estimated population, and of persons married who wrote their names in the registers; also of minors, widowers, and widows, for the several registration divisions are given in the following table:—

TABLE I.—*The Proportional Number of Marriages in the Eight Divisions of Ireland during the year* 1864, *of Persons who Signed their Names, of Persons not of Full Age, and of Re-marriages.*

8	South-Western, "	·501	56·8	44·8	4·05	21·63	11·27	6·89

The extent and position of each of these divisions are specified at pages 18 to 20.

Of the total number of marriages registered (27,406) 18,819 were celebrated by Roman Catholic clergymen, and entered in the registers by the Registrars in accordance with the 26th and 27th Vic., cap. 90; and 8,587

marriages were of the Protestant persuasions. Of these 4,761 were in churches and chapels of the Established Church, 2,514 in Presbyterian Meeting-houses, 192 in "Registered Buildings," 1,109 in the Registrars' offices, 10 according to the usages of the Society of Friends; and 1 marriage was of members of the Jewish persuasion. Of the entire number of marriages in 1864 there were contracted in the quarter ending the last day of March, 9,602; of June, 6,023; of September, 5,512; of December, 6,269.

The following table gives a statement showing in continuation of the return in my report for 1863, the number of marriages solemnized in Ireland under the Marriages Act of 1844, distinguishing the mode of celebration:—

TABLE II.—*The Number of Marriages (registered under 7 & 8 Vic., c. 81), in each Year, from 1st April, 1845, to 31st December, 1864, and the Mode in which the Marriages were solemnized.*

Years ended 31st December	Marriages. According to the Rites of the Established Church. Special Licence.	Licence.	Banns.	Registrar's Certificate.	Not stated by which of the foregoing Forms.	Total. There is not any return made to me of the places of worship belonging to Roman Catholics in which marriages are celebrated; but under the 7th & 8th Vic., cap. 81, I am enabled to state as regards other religious persuasions, that there were 1,451 Churches and Chapels of the Established Church, 573 registered Presbyterian Meeting-houses, and 188 Registered Buildings belonging to various denominations, in which marriages might lawfully be solemnized, on the 31st December, 1864. During the year 1864

* The 7 & 8 Vic., c. 81, came into operation 1st April, 1845.

there was an increase of ten in the number of such places in the Established Church; of 10 in the Presbyterian Church, and of 15 in other religious communities. The "Registered Buildings" belong to the following denominations:—

Denominations.	Number of Places of Worship.
Wesleyan Methodists,	96
Reformed Presbyterians,	33
Independents,	21
Baptists,	11
Seceders,	9
United Presbyterians,	5
Moravians or United Brethren,	5
Methodists New Connexion,	5
Church Methodists,	1
Covenanters,	1
Evangelical Union,	1
Total,	188

The following Table shows by Divisions and Registrars' Districts the number of places of worship in which marriages (under the 7 & 8 Vic., cap. 81) may be solemnized in each District or Union, distinguishing the religious denominations:—

TABLE III.—*The Number of Churches and Chapels of the Established Church, of Registered Presbyterian Meeting Houses, and of Registered Buildings, by Divisions and Registrars' Districts:—*

Registrars' Districts.	Churches and Chapels of the Established Church.	Registered Presbyterian Meeting-houses (sec. 7).	Registered Buildings (sec. 27).	Total.	Registrars' Districts. During the year 1864 there were issued by the Registrars 691 Licences for Marriage in Registered Buildings, and in the Registrars' offices by civil contract.

The number of Marriage Licences issued by the several Presbyterian bodies is given in the following summary :—

Presbytery or Synod.	Number of Licensing Ministers on 31st December, 1864.	Number of Registered Meeting-houses on 31st December, 1864.	Number of Licences issued.
1. General Assembly of the Presbyterian Church in Ireland,	114	532	2,472
2. Remonstrant Synod of Ulster,	8	22	53
3. Presbytery of Antrim,	4	10	32
4. United Presbytery or Synod of Munster,	4	4	—
5. Northern Presbytery of Antrim,	1	5	12
Total,	131	573	2,569

BIRTHS.

The births registered in Ireland during 1864, amounted to 136,414. Of these, 70,075 were males, and 66,339 females, being in the proportion of 105·6 boys to every 100 girls. In England, in the same year, the like number of males to 100 females was 104·2; and in Scotland 104·4.

The rate per cent. of births to the *estimated* population was 2·404. In England the rate was 3·564, and in Scotland 3·634.

There were 5,180 illegitimate births, of which 2,631 were those of males, and 2,549 females. The proportion to the total number of births being 3·8 in every 100. The rate in England was 6·4, and in Scotland 9·9 per cent. The highest rates, 6·2 and 5·1, of illegitimate children in every 100 born, occurred in the North Eastern and South Eastern Divisions respectively.

The following table shows the proportion of legitimate and illegitimate births registered in each of the eight Divisions in 1864.

TABLE IV.—*The Per-centage of Legitimate and Illegitimate Births registered in Ireland during the year* 1864, *by Divisions.*

Divisions.	Proportion per cent. of Legitimate Births.	Illegitimate Births.	Divisions.	Legitimate Births.	Illegitimate Births.
North-Eastern,	93·8	6·2	South Midland,	95·7	4·3
North-Western,	96·4	3·6	Western,	98·1	1·9
Eastern,	96·6	3·4	South-Eastern,	94·9	5·1
North Midland,	97·3	2·7	South Western,	97·6	2·4

30,179 births were registered during the quarter ended 31st March; 38,715 during that ended 30th June; 33,877 during that ended 30th September; and 33,643 during that ended 31st December.

DEATHS.

The deaths registered in 1864 numbered 93,144, of which 46,346 were males, and 46,798 females, being in the proportion of 1·641 per cent. of the *estimated* population, or in a ratio of 1 registered death to every 61 persons. The proportion in England for the same year was 2·386 per cent., or 1 in 42; and in Scotland 2·386 per cent., or 1 in 42.

The following table shows the per-centage of mortality at different ages:—

TABLE V.—*The Mortality per Cent. at each Age-period, according to the Registration of Deaths in Ireland, during the Year* 1864, *by Sexes.*

Sexes.	Ages.											
	0—	5—	10—	15—	25—	35—	45—	55—	65—	75—	85—	95 and upwards
Males,	28·65	4·23	2·32	7·57	6·19	5·78	7·76	11·51	12·30	10·11	2·97	·61
Females,	25·20	4·28	2·37	6·90	6·55	6·03	7·80	11·81	13·74	11·23	3·36	·73
Males and Females,	26·92	4·25	2·34	7·24	6·37	5·91	7·78	11·66	13·02	10·68	3·16	·67

Of the total persons whose deaths were registered during the year 26·92 in every 100 were children under 5 years old—of these 28·65 per cent. were boys, and 25·20 per cent. girls. 13·69 per cent. of the men, and 15·32 per cent. of the women, whose deaths were registered had passed their 75th year. 61 males and 73 females in every 10,000 of the persons whose deaths were registered were stated in the returns to be over 95 years of age.

EMIGRATION.

During the year 1864 the number of persons who left the ports of Ireland amounted to 114,169; of these 60,692 were males and 53,477 females. Of the whole number 19,790, or 17·3 per cent., were from Leinster; 48,397, or 42·4 per cent., from Munster; 19,853, or 17·4 per cent., from Ulster; and 18,121, or 15·9 per cent., from Connaught: 8,008 persons, or 7·0 per cent., did not state the county or province to which they belonged.

METEOROLOGY.

The following meteorological observations, taken at the Ordnance Survey office,* Phœnix Park, Dublin, during the year 1864, have been furnished by Captain Wilkinson, R.E., by direction of the Superintendent of the Ordnance Survey.

The mean value of the barometrical readings during the year 1864, was 29·763 inches; for the first quarter it was 29·725 inches, for the second quarter 29·838 inches, for the third 29·804 inches, and for the fourth quarter it was 29·686 inches. The highest reading during the year (30·587 inches) occurred on the 6th November, at 9.30 A.M., the wind at the time blowing from the S.E.; the lowest reading also occurred in November—the instrument on the 13th of that month, at 9.30 P.M., marking only 28·390 inches; the wind blowing from the same point.

The mean temperature of the air for the year was 49·0°; the mean for the first quarter was 40·2°, for the second 53·6°, for the third 57·8°, and for the fourth quarter 44·4°. The maximum registered by the thermometer was 81·4°, which occurred in August; and the minimum reading was 14·8°, registered in January; geraniums, calceolarias, &c., &c., which remained out of doors were killed by the frost on the 4th of this month, up to which date they were fresh and green, and in many cases in bloom; the frost was more intense during this month than it had been since December, 1859. On the afternoon of the 19th March a large yellow butterfly was seen flying about the garden attached to the Ordnance Survey Office, Phœnix Park.

The nights during the latter part of the month of May were unusually cold. On the 21st of August the minimum temperature on grass was 28·7°, nearly 3½ degrees below freezing point; the maximum in the sun's rays was 84·2°, showing a range for the day of 55·5°. During the month of December the temperature on the grass was below 32° on 16 nights, viz., 7th, 8th, 9th, 15th, 16th, 18th, 19th, 20th, 21st, 23rd, 24th, 25th, 26th, 27th, 30th, and 31st.

* Latitude, 53° 21′ 44″·65 North. Longitude, 6° 21′ 6″·35 West. Height above the sea, 158·8 feet.

The rainfall during the year measured only 25·487 inches; of which quantity 5·227 fell during the first quarter, 4·083 during the second, 4·137 during the third, and 12·040 during the last quarter. The greatest rainfall in 24 hours was 1·696 inches, which occurred in October. The wind blew from the east during the year much more frequently than usual, viz., 69 days. It blew on 21 days from N., 31 days from N.E., 21 days from S.E., 23 days from S., 93 days from S.W., 79 days from W., and 24 days from N.W., at 9.30 A.M.*

As regards the working of the measures for the Registration of Births, Deaths, and Marriages in Ireland, judging from the number of each of these events recorded in 1864, I consider that many Births, Deaths, and Marriages have not been registered.

In several instances prosecutions have been resorted to with some advantage; but notwithstanding the exertions made to induce a general compliance with the law throughout the country, numerous cases of neglect to register births and deaths have been reported to me by the District Registrars, but frequently at too late a period after their occurrence to allow of the parties being proceeded against at the Petty Sessions.

I regret to add that the registration of marriages under the 26th & 27th Vic., cap. 90, is not at all satisfactory in some Districts, owing to the Clergy who have celebrated the marriages having declined to sign the necessary certificates.

The marriages solemnized under the provisions of the 7th & 8th Vic., cap. 81, which came into operation in 1845, are, I believe, all registered.

The following are the ratios of Births, Deaths, and Marriages to population in different countries compared with the ratio in Ireland in 1864:—

Countries.	Ratio to Population.		
	Births.	Deaths.	Marriages.
IRELAND,	1 in 42	1 in 61	1 in 207
England,	1 „ 28	1 „ 42	1 „ 116
Scotland,	1 „ 28	1 „ 42	1 „ 137
Sweden,	1 „ 30	1 „ 50	1 „ 145
Prussia (Old Provinces),	1 „ 24	1 „ 38	1 „ 116
Hanover,	1 „ 30	1 „ 44	1 „ 124
Wurtemburg,	1 „ 23	1 „ 31	1 „ —
Hanse Towns: Bremen,	1 „ 28	1 „ 37	1 „ 105
Holland,	1 „ 30	1 „ 42	1 „ 127
France,	1 „ 38	1 „ 44	1 „ 127
Spain,	1 „ 26	1 „ 32	1 „ 127
Austria (exclusive of Hungary),	1 „ 25	1 „ 31	1 „ 121

It will be seen from the foregoing figures, compiled from the Statistical

* Two days each in the months of January and February, and one day in June, were returned as "calm." See the Meteorological Table, page 39.

Tables published by the Board of Trade, how incomplete was Registration in Ireland in 1864, and comparing the number of Births, Deaths, and Marriages recorded in that year with those since annually registered, I regret to state that there appears but little improvement in the subsequent years:—

		1864.	1865.	1866.	1867.	1868.
Registered.	Births,	136,414	145,227	146,237	144,318	146,108
	Deaths,	93,144	93,738	93,598	93,911	86,803
	Marriages,	27,406	30,684	30,151	29,796	27,753

COMPULSORY VACCINATION.

I beg to say that I have supplied the necessary registers and forms to the District Registrars in accordance with the provisions of the Act, 26th and 27th Vic., cap. 52—the operation of which Act has been so very successful under the superintendence of the Poor Law Commissioners.

Following this Report are summaries of the Quarterly Reports issued in 1864, and in the Appendix a letter addressed to me by Dr. Burke, the Superintendent of Medical Statistics, respecting the causes of death—to which I beg to refer.

I am much indebted to the Poor Law Commissioners, and also to the Registrars-General of England and Scotland, for their valuable aid on all occasions when I sought their co-operation and advice regarding the various measures referred to.

I greatly regret that it has not been in my power to submit this Report at an earlier period, but the many difficulties which attend the introduction of new measures, more especially of those so extensive in their provisions and operation as the Registration of the Births, Deaths, and Marriages of a numerous population, will, I hope, in some degree plead my apology for the delay.

I have the honour to be

Your Excellency's

Very faithful servant,

WILLIAM DONNELLY,

Registrar-General.

GENERAL REGISTER OFFICE,

Dublin, 31st March, 1869.

Quarterly Reports.

First Quarter.

SUMMARY OF THE QUARTERLY REPORTS, 1864.

First Quarter—January, February, March.

The Superintendent Registrars' Districts or Unions have, for statistical purposes, been grouped into eight divisions, which may be briefly described as follows:—

No. I. The North-Eastern Division—is situated altogether in the province of Ulster, and contains 20 Unions or Superintendent Registrars' Districts, extending over an area of 2,328,305 statute acres, or 3,638 square miles; its population by the Censrs in 1861, amounted to 1,124,041, or 309 persons to the square mile.

This division may be topographically described by a line passing southward from Lough Foyle through the Counties of Londonderry, Tyrone, and Armagh, to Lough Bawn, in the County of Monaghan, and thence eastward to Carlingford Lough, the north and east being on the seaboard.

This division comprises the whole of the Counties of Antrim and Down, and portions of the Counties of Londonderry, Tyrone, Armagh, and Monaghan. It contains Belfast and other manufacturing towns.

The number of births registered in this division during the first quarter of the year 1864 amounted to 5,821, being equal to an annual ratio of 1 in 48, estimated on the population of 1861; and the number of deaths registered during the same period amounted to 6,075, being equal to an annual mortality of 1 in every 46 of the population in 1861, varying from 1 in 31 in the Union of Belfast to 1 in 59 in that of Castleblayney.

No. II. The North-Western Division—is bounded on the east by the division last described, from Lough Foyle to a point a little south of Six Mile Cross, in the County of Tyrone, and may be described by a line drawn thence S.W. through the County of Fermanagh to the south of Enniskillen, embracing that portion of the north-west angle of the County of Cavan belonging to the Enniskillen Union, into the County of Leitrim, crossing Lough Allen, thence into the County of Sligo, to a point situated to the southward of the town of Ballymote, and thence extending north to Ballysadare Bay; the remainder of the division is bounded by the sea. It contains Loughs Erne and Derg, and part of Lough Allen, and large portions of it are mountainous.

This division is situated partly in Ulster and partly in Connaught, and includes the entire of the County of Donegal, portions of the Counties of Cavan, Fermanagh, Londonderry, and Tyrone, in the province of Ulster; and parts of Leitrim and Sligo, in the province of Connaught. It contains 17 Superintendent Registrars' Districts or Unions, covering an area of 2,392,501 statute acres, or 3,738 square miles. In 1861 the population amounted to 574,745, or 154 persons to the square mile.

The number of births registered in this division during the quarter ending the 31st March amounted to 2,502, or an annual ratio of 1 in 57 of the population just mentioned. The number of deaths registered was 2,540, affording a similar ratio. The highest rate of mortality was in the Union of Londonderry—it amounted to 1 in 38 of the population in 1861.

No. III. The Eastern Division—is situated in the provinces of Leinster and Ulster; it extends along the Irish Sea and St. George's Channel, from Warrenspoint, in the County of Down, to the south of Cahore Point, in the County of Wexford, stretching inland about 25 miles, and embracing the Counties of Louth, Dublin, and Wicklow, and portions of the Counties of Carlow, Cavan, Kildare, Meath, and Wexford; together with small portions of the Counties of Armagh and Monaghan. It contains 19 Unions or Superintendent Registrars' Districts, and covers an area of 1,993,016 statute acres, or 3,114 square miles; and in 1861 had a population of 829,569, or 266 persons to the square mile.

The number of births registered in this division during the quarter ending March 31st, was 4,269, representing an annual ratio of 1 in 49, estimated on the popula-

tion in 1861. The number of deaths registered during the same period amounted to 4,694, or an annual mortality of 1 in 44, varying from 1 in 36 in the North Dublin and South Dublin Unions, to 1 in 66 in the Union of Rathdrum, and 1 in 67 in that of Kells.

Quarterly Reports.
First Quarter.

No. IV. The North Midland Division—is situated in the provinces of Leinster, Ulster, and Connaught, and extends southward from its junction with the "North-Western" division near Six Mile Cross, in the County of Tyrone, to Tyrrellspass, in the County of Westmeath. Virginia, in the County of Cavan, is situated on its eastern border, and Tulsk, in the County of Roscommon, on its western. It embraces the County of Longford, and portions of the Counties of Cavan, Fermanagh, Leitrim, Meath, Monaghan, Roscommon, and Westmeath; that part of the County of Tyrone included in the Clogher Union, and a very small portion of the County of Galway, situated in the Roscommon Union, and amounting to 4,689 statute acres.

There are 18 Unions or Superintendent Registrars' Districts in this division, extending over an area of 2,019,408 statute acres, or 3,155 square miles; and the population in 1861 was 575,289, or 182 persons to the square mile.

The number of births registered during the quarter amounted to 2,694, being equal to an annual ratio of 1 in 53, calculated on the population of 1861. The number of deaths registered during the same period was 2,455, or an annual mortality of 1 in 59, varying from 1 in 46 in the Union of Athlone to 1 in 70 in that of Oldcastle.

No. V. The South Midland Division—situated in the provinces of Leinster and Munster, extends from the Hill of Down, in the county of Meath, southward to Borris, in the County of Carlow. Its southern boundary may be described by a line drawn thence to New Birmingham, in the County of Tipperary, and from that point south to Fethard, in the same County, thence westward to the northern base of the Galty mountains, and extending thence in a north-westerly direction to Pallasgreen, in the County of Limerick. On the east it is bounded by the "Eastern" division, and on the west by the "Western" and the "South Western" divisions. It embraces the King's and Queen's Counties, and portions of the Counties of Carlow, Kildare, Kilkenny, Limerick, Meath, Tipperary, and Westmeath. It contains 17 Unions or Superintendent Registrars' Districts, occupying an area of 2,361,709 statute acres, or 3,690 square miles; the population, in 1861, was 515,272, or 140 persons to the square mile.

The number of births registered in this division during the quarter ending 31st March amounted to 2,672, or an annual ratio of 1 in 48, estimated on the population in 1861, being similar to the average in the North-Eastern division. The number of deaths registered during the same period was 2,493, affording an annual mortality of 1 in 52, varying from 1 in 39 in the Union of Kilkenny to 1 in 86 in the Union of Borrisokane.

No. VI. The Western Division.—This Division extends southwards from Sligo and Killala Bays to the northern bank of the River Shannon, lying westward of Limerick, the extreme points, north and south, being Benwee Head, in the County of Mayo, and Loop Head, in the County of Clare, a distance in or about 120 miles, which, however, does not represent the extent of seaboard, the western coast being indented by numerous bays and inlets. This division has been extended much more inland than the eastern division, as from its exposure to the Atlantic Ocean, and the prevalence of westerly winds (which blow for nearly three-fourths of the year), the climate must be affected for a considerable distance inland; the Unions situated on the extreme east are Boyle, Castlereagh, Glennamaddy, Mountbellew, Ballinasloe, and Portumna.

This division embraces nearly the whole of the province of Connaught, and almost the whole of the County of Clare, in the province of Munster. It contains 31 Unions or Superintendent Registrars' Districts, covering an area of 4,088,459

Quarterly Reports.

First Quarter.

statute acres, or 6,388 square miles; and the population in 1861 was 822,878, or 129 persons to the square mile.

The number of births registered in this division during the quarter amounted to 3,669, being equal to an annual ratio of 1 in 56, estimated on the population in 1861. The number of deaths registered during the same period amounted to 2,937, or 1 in 70, varying from 1 in 48 in the Union of Ballinasloe to 1 in 122 in the Union of Belmullet.

No. VII. The South-Eastern Division.—This division extends from its junction with the "Eastern" division southward of Cahore Point, in the County of Wexford, along the eastern and southern coasts to the east of Cork Harbour, and is bounded on the north by the South Midland division. It embraces the County of Waterford; nearly the whole of the County of Wexford; parts of the counties of Carlow, Kilkenny, and Tipperary; that portion of the County of Limerick (38,550 acres) comprised in the Mitchelstown Union, and a portion of the eastern side of Cork County. It contains 16 Unions or Superintendent Registrars' Districts, extending over an area of 1,826,172 statute acres; or 2,853 square miles; and its population in 1861 amounted to 500,957, or 176 persons to the square mile.

The number of births registered in this division during the quarter ending 31st March amounted to 2,947, affording an annual ratio of 1 in 42, estimated on the number of inhabitants in 1861; and the number of deaths registered during the same period was very similar, viz., 2,926, representing an annual mortality of 1 in 43, ranging from 1 in 35 in the Union of Carrick-on-Suir to 1 in 68 in that of Mitchelstown.

No. VIII. The South-Western Division—extends along the southern and western coasts from Cork Harbour to the River Shannon, and embraces the County of Kerry, nearly the whole of the Counties of Cork and Limerick, and a small portion of the County of Clare, comprised in the Limerick Union.

The south-western division contains 25 Unions or Superintendent Registrars Districts, covering 3,313,071 statute acres, or 5,177 square miles; and the population in 1861 was 855,813, or 165 persons to the square mile.

The number of births registered in this division during the quarter ending 31st March last, amounted to 5,605, being equal to an annual ratio of 1 in 38, estimated on the population in 1861; and the number of deaths registered during the same period was 3,923, affording an annual mortality of 1 in 55, calculated on the population in 1861, varying from 1 in 45 in the Union of Limerick to 1 in 95 in the Union or Superintendent Registrar's District of Cahersiveen.

SUMMARY OF IRELAND.

Population.—The area of Ireland (exclusive of the larger rivers, lakes, and tideways) amounts, according to the Ordnance Survey, to 20,322,641 statute acres, and the population by the Census in 1861 being 5,798,967, the number of persons to the square mile at that period was, therefore, 183; varying considerably in the eight divisions into which the country has been divided in the following tables. The two divisions most densely populated are the "North-Eastern," (309 persons to the square mile) and the "Eastern," (266); the former containing the only large manufacturing district in Ireland, and the latter, the Metropolis; the other divisions range as follows with regard to the number of persons to the square mile—the "North Midland," 182; the "South-Eastern," 176; the "South-Western," 165; the "North-Western," 154; the "South Midland," 140; and the "Western," 129.

Marriages.—The number of marriages *registered* in Ireland during the three months ending 31st March amounted to 9,602, being equal to an annual ratio of 1 in every 151 of the population in 1861.

Quarterly Reports.
First Quarter.

Births.—The total number of births registered in Ireland during the quarter ending the 31st March, amounted to 30,179, being at the annual rate of 1 in 48, estimated on the population in 1861. The division in which the largest number of births, in proportion to the population, was registered was the "South-Western," the ratio being 1 in 38; the other divisions range in the following order—the "South-Eastern," 1 in 42; the "South Midland," and the "North-Eastern," each, 1 in 48; the "Eastern," 1 in 49; the "North Midland," 1 in 53; the "Western," 1 in 56; and the "North-Western," 1 in 57.

Deaths.—The total number of deaths registered in Ireland during that quarter of the year 1864 at present under consideration, amounted to 28,043, which is equal to an annual mortality of 1 in 52, estimated on the number of inhabitants in 1861. The divisions in which the mortality was greatest, in comparison with their population, were the "South-Eastern," and "Eastern," which afforded returns respectively equal to 1 in 43 and 1 in 44 of their inhabitants in 1861; the other divisions follow thus—the "North-Eastern," 1 in 46; the "South Midland," 1 in 52; the "South-Western," 1 in 55; the "North-Western," 1 in 57; the "North Midland," 1 in 59; and the "Western," 1 in 70.

The following statement presents at a glance the order in which the eight divisions range with regard to density of population, and comparative number of births and of deaths to the population in 1861:—

Divisions.	Number of Persons to the Square Mile.	Annual Ratio to Population in 1861. Births.		Deaths.	
1. North-Eastern,	309	South-Western,	1 in 38	South-Eastern,	1 in 43
2. Eastern,	266	South-Eastern,	„ 42	Eastern,	„ 44
3. North Midland,	182	South Midland,	„ 48	North-Eastern,	„ 46
4. South-Eastern,	176	North-Eastern,	„ 48	South Midland,	„ 52
5. South-Western,	165	Eastern,	„ 49	South-Western,	„ 55
6. North-Western,	154	North Midland,	„ 53	North-Western,	„ 57
7. South Midland,	140	Western,	„ 56	North Midland,	„ 59
8. Western,	129	North-Western,	„ 57	Western,	„ 70

From this it will be seen that the "North-Eastern" division which ranks *first* with respect to density of population, comes *fourth* as regards the comparative number of births to the population, and *third* as regards the number of deaths; that the "South-Western" division, which ranks *first* with regard to the number of births in proportion to its population, comes *fifth* both as to density of population and number of deaths registered during the quarter in comparison with its population; and that the "South-Eastern" division, which ranks *first* with regard to the number of deaths registered when compared with the number of its inhabitants, comes *fourth* as to density of population, and *second* with regard to the comparative number of births to its population.

Second Quarter.—April, May, June.

Second Quarter.

Marriages.—The number of marriages *registered* in Ireland during the three months ending the 30th of June, amounted to 6,023, being equal to an annual rate of 1 marriage to every 241 of the population. The number returned during the previous quarter amounted to 9,602, which afforded an annual ratio of 1 in every 151 of the population.* Although it is probable that many marriages may not have been *registered* during either period, still the great disproportion between the numbers in each quarter may be, in some degree, accounted for by the fact that a large proportion of Roman Catholic marriages takes place before Lent.

Births.—That the number of births *registered* during the second quarter—ending June 30th—should much exceed the number *registered* during the previous quarter, is a result which was anticipated; for although every effort was made

* According to the Census of 1861.

Quarterly Reports. — Second Quarter.

to inform the public that the Registration Act would come into operation on the 1st of January, it could not be expected that *all* the births which occurred during the *first* quarter would be registered within it. Many, perhaps from ignorance, failed to register the births; while others, though aware of the existence of the Act, either from negligence or to avoid trouble, did not comply with its provisions. As the time allowed to intervene from the birth of a child previous to notice being given to the Registrar is *twenty-one days*, it may be assumed that a moiety of the births which occur during the last twenty-one days of the quarter, instead of being then registered, appear on the register of the following quarter.

The number of births *registered* during the three months ending on the last day of March, amounted to 30,179, which afforded an annual ratio of 1 birth in every 48 of the population;* the number *registered* during the following three months, ending on June 30th, amounted to 38,715; showing an increase of 8,536 on the previous quarter, and affording an annual ratio of 1 birth in every 37 of the population.*

If the numbers registered during the two quarters be added together, the sum of the births registered during the six months will afford an annual ratio of 1 in every 42 of the population;* but in reference to this calculation it must be borne in mind that very many of the births which occurred during the last twenty-one days of the second quarter, were not registered before the commencement of the third quarter, and are, therefore, not included.

The number of births registered in each of the eight Divisions into which the country has been divided, for statistical purposes, will be subsequently noticed.

Deaths.—The number of deaths *registered* during the quarter ending March 31st was 28,043, which afforded an annual ratio of 1 in every 52, of the population.* The number *registered* during the quarter ending June 30th amounted to 24,155, showing a decrease of 3,888, and affording an annual ratio of 1 in every 60 of the population.* The decrease of the mortality during the second quarter may be attributed to the mildness of the season. During the first three months of the year the weather was very severe, and the mortality amongst the aged and infirm was consequently great. This accords with the returns of the Registrars-General England and Scotland.

Taking the number of deaths *registered* during the two quarters, it is found to yield an annual ratio of 1 death in every 56 of the population.*

The number of deaths *registered* in the several Divisions will be noticed in the following pages.

METEOROLOGICAL OBSERVATIONS.

The months of April, May, and June were of a mild character.

The mean height of the barometer during the quarter, at the Ordnance Survey Office, Phœnix Park, Dublin, was 29·838 inches, the mean maximum was 30·135, and the mean minimum 29·376. The mean temperature of the air was 53·6°, the mean maximum having been 73·9°, and the mean minimum 31·3°. The mean of the dry bulb during the quarter was 54·5°. The average monthly rain-fall was 1·361 inches.

NUMBER OF BIRTHS AND DEATHS REGISTERED IN EACH DIVISION.

No. I. North-Eastern Division.—The number of births registered in this division during the quarter ending the 30th of June amounted to 8,235, being equal to an annual ratio of 1 in every 34 of the population;* the number registered during the previous quarter was 5,821, thus showing an increase of 2,414 for the second quarter.

* According to the Census of 1861.

Quarterly Reports.

Second Quarter.

The Union or Superintendent Registrar's District of Belfast had the largest number of births registered during the quarter, and also the greatest relative proportion, the annual ratio afforded being 1 in 25; in the Unions of Larne, Lisburn, and Newtownards, the ratio was 1 in 31; in Banbridge, 1 in 32; in Lurgan, 1 in 33; and in the other unions of this division the ratio was greater than 1 in 40, with the exception of Ballymoney, in which it was 1 in 44; Cookstown and Dungannon, 1 in 43 each; and Newtownlimavady, where the birth-rate was as low as 1 in 52.

The number of deaths registered in this division during the second quarter amounted to 5,369, affording an annual ratio of 1 in 52 of the population,* and being a decrease of 706 when compared with the number registered during the previous quarter.

The populous Union of Belfast, as a matter of course, had the largest number of deaths registered during the quarter; but when compared with the population, the mortality did not equal that which occurred in the Union of Newtownards. In the latter Union the number of deaths registered was equal to an annual ratio of 1 in every 38 of the inhabitants, and in Belfast it was 1 in 39.

No. II. North-Western Division.—The births registered in this division during the quarter ending 30th June amounted to 3,259, affording an annual ratio of 1 in 44 of the population.* The number registered during the previous quarter amounted to 2,502, thus showing an increase of 757.

In proportion to the population, the greatest number of births was registered in the Union of Castlederg, the annual ratio being 1 in 33; in Ballyshannon the ratio was 1 in 37; the number of births registered in the Unions of Manorhamilton and Sligo afforded an annual ratio of 1 in 38 each; in the Unions of Dunfanaghy, Omagh, Strabane, and Stranorlar, the annual ratio afforded in each was 1 in 39; in the Unions or Superintendent Registrars' Districts of Donegal and Glenties, the number of births *registered* during the quarter afforded an annual ratio of only 1 in 61 each; and in the Union of Millford the number *registered* only yielded an annual ratio of 1 in 64 of the inhabitants.*

The number of deaths registered during the quarter amounted to 2,339, affording an annual ratio of 1 in 61; the number registered during the previous quarter amounted to 2,540, thus showing a decrease of 201 between the first and second quarters. The Union of Omagh afforded the highest rate of mortality, the number of deaths registered during the quarter affording an annual ratio of 1 in 46; next follows the union of Strabane, the annual ratio being 1 in 47; then Castlederg, 1 in 52; Letterkenny and Londonderry, 1 in 53 each; Inishowen, 1 in 56; Gortin and Stranorlar, 1 in 57; Dunfanaghy, 1 in 59, &c.

No. III. Eastern Division.—The number of births (5,731) registered in this division during the quarter was 1,462 in excess of that registered during the previous quarter, and afforded an annual ratio of 1 in 36 of the population therein.* The Union of Dublin North afforded the highest birth-rate, being equal to 1 in 32 per annum; in the Unions of Bailieborough and Balrothery the number registered was equal to 1 in 33 each; in Gorey, Rathdown, and Shillelagh, 1 in 34 each; and in Dublin South and Rathdrum, 1 in 35 each; the other Unions in this division ranged from this rate to 1 in 46, with the exception of Dunshaughlin, where the number of births *registered* during the quarter would only give an annual ratio of 1 in every 61 of the population.*

The number of deaths registered during the quarter amounted to 3,812, yielding an annual ratio of 1 in 54 of the inhabitants.* The number registered during the previous quarter was 4,694, thus showing a decrease of 882 between the two quarters. The highest rate of mortality was in the Metropolitan Unions or Superintendent Registrars' Districts of North and South Dublin, both of which yielded an annual ratio of 1 in 45; in Drogheda the ratio was 1 in 50. In the

* According to the Census of 1861.

Quarterly Reports.

Second Quarter.

Union or Superintendent Registrar's District of Dunshaughlin, the number of deaths *registered* during the quarter was only equal to an annual ratio of 1 in 86.

No. IV. North Midland Division.—The number of births registered in this division during the quarter amounted to 3,514, being equal to an annual ratio of 1 in 41 of its inhabitants.* The number registered during the previous quarter was 2,694, evidencing an increase of 820 between the first and second quarters.

The Union or Superintendent Registrar's District of Athlone had the largest number of births registered, in proportion to its population,* the annual ratio afforded being 1 in 31, and the Union of Clones had the least number of births registered, in comparison with its inhabitants,* the number registered yielding only an annual ratio of 1 in 51. The last-named union had also the least proportionate number of births registered in the division during the preceding quarter.

The number of deaths registered during the quarter was 1,940, affording a death-rate of only 1 in every 74 of the population.* The number registered during the previous quarter was 2,455, thus showing a decrease of 515 between the first and second quarters. The number of deaths *registered* in all the Superintendent Registrars' Districts constituting this division was *very low*, in comparison with the population, with the exception of Athlone, in which, however, the mortality equalled only 1 in 56.

No. V. South Midland Division.—The number of births registered in this division during the quarter ending 31st of March was 2,672. The number registered during the quarter at present under consideration amounted to 3,138, thus showing an increase of 466 on the quarter, and yielding an annual ratio of 1 in every 41 of the inhabitants.*

The Union or Superintendent Registrar's District of Castlecomer had, comparatively with its population, the largest number of births registered, the annual ratio afforded being 1 in 33. The births *registered* in the Union of Donaghmore only equalled 1 in 61.

The deaths registered in this division during the quarter ending on the 30th of June amounted to 2,113, affording an annual ratio of 1 in 61 of the population.* The number registered during the previous quarter was 2,493. The decrease, therefore, amounted to 380.

In the Union or Superintendent Registrar's District of Kilkenny the number of deaths registered during the quarter afforded an annual ratio as high as 1 in 43—being the highest rate of mortality in any Union in Ireland with the exception of Carrick-on-Suir, Belfast, and Newtownards. The number of deaths *registered* in the Superintendent Registrar's District of Borrisokane afforded an annual ratio of only 1 in 101; and in that of Roscrea only 1 in 93.

No. VI. Western Division.—The number of births registered in this division during the quarter amounted to 4,860, affording an annual ratio of 1 in 42 of the population.* The number registered during the previous quarter was 3,669. The increase, therefore, between the births registered in the first and second quarters of the year was 1,191.

The Superintendent Registrars' Districts or Unions comprised in this division vary considerably in the density of their population, and a striking difference is observable in the ratios afforded by the number of births registered in the several unions or Superintendent Registrars' Districts. For instance, in five Unions the birth-rate exceeded 1 in 35; in two Unions it was 1 in 35; in five Unions it was between 1 in 35 and 1 in 40; and in the remainder it varied from that ratio to 1 in 71—which was the annual ratio represented by the births *registered* in the Union of Glennamaddy.

The number of deaths registered in this division during the quarter amounted to 2,609, yielding an annual ratio of 1 in 79 of the inhabitants,* and being 328 less than the number registered during the previous quarter. The number of deaths

* According to the Census of 1861.

registered in the following Unions afforded very low annual ratios, viz. :—Swineford, 1 in 115; Ballyvaghan, 1 in 114; Castlebar, 1 in 109; Glennamaddy, 1 in 108; Tobercurry, 1 in 106; and Ballinrobe, 1 in 101.

No. VII. South-Eastern Division.—The number of births registered in the "South-Eastern" Division during the quarter ending the 30th June amounted to 3,437, being an increase of 490 when compared with the number registered during the previous quarter, and yielding an annual ratio of 1 in 36 of its inhabitants.*

In the Superintendent Registrar's District of Kilmacthomas the birth-rate was as high as 1 in 25, and in Enniscorthy, 1 in 31; while in the Union of Callan it was as low as 1 in 47.

The number of deaths registered in this division during the quarter amounted to 2,421, being a decrease of 505 on the previous quarter, but affording an annual ratio of 1 in 52 of the inhabitants.*

The number of deaths registered in the Union or Superintendent Registrar's District of Carrick-on-Suir afforded the annual ratio of 1 in 37, being the highest mortality in any Union in Ireland during the second quarter of 1864. The deaths *registered* in the Union or Superintendent Registrar's District of Mitchelstown afforded a ratio of only 1 in 72.

No. VIII. South-Western Division.—The number of births registered in this division during the quarter amounted to 6,541, affording an annual ratio of 1 in 33 of the population.* The number registered during the previous quarter was 5,605, or 936 less than the number registered during the second quarter. The number of births registered in the several Superintendent Registrars' Districts of this Division was remarkably uniform when compared with the population in each.

The number of deaths registered in this division during the quarter ending the 30th of June amounted to 3,552, being a decrease of 371 when compared with the number registered during the previous quarter, and yielding an annual ratio of 1 in 60 of its inhabitants in 1861.

In the Union or Superintendent Registrar's District of Newcastle the annual ratio was 1 in 49, and in Cork it was 1 in 51; whereas in the Union of Bantry the number of deaths *registered* during the quarter afforded only an annual ratio of 1 in 95; in Cahersiveen and Dingle the ratio was 1 in 90 each; and in Clonakilty, 1 in 83.

COMPARISON OF RESULTS BY DIVISIONS.

Births.—Comparing one division with another, as regards the number of births registered during the quarter ending 30th June, in proportion to the number of inhabitants, it is found that the "South-Western" had the highest birth-rate—1 in 33, annually. The other divisions follow thus:—The "North-Eastern," 1 in 34; the "Eastern," 1 in 36; the "South-Eastern," 1 in 36; the "North Midland," 1 in 41; the "South Midland," 1 in 41; the "Western," 1 in 42; and the "North-Western," 1 in 44. The following statement shows the annual birth-rate and the order of the several Divisions for the quarters ending 31st March and 30th June respectively:—

Quarter ending 31st March, 1864.	Quarter ending 30th June, 1864.	Quarter ending 31st March, 1864.	Quarter ending 30th June, 1864.
1. South-Western, 1 in 38	South-Western, 1 in 33	5. Eastern, . . 1 in 49	North Midland, 1 in 41
2. South-Eastern, „ 42	North-Eastern, „ 34	6. North Midland, „ 53	South Midland, „ 41
3. South Midland, „ 43	Eastern, . . „ 36	7. Western, . . „ 56	Western, . . „ 42
4. North-Eastern, „ 48	South-Eastern, „ 36	8. North-Western, „ 57	North-Western, „ 44

* According to the Census of 1861.

Quarterly Reports.

Second Quarter.

From this it will be observed that the "South-Western" Division had the highest birth-rate during both quarters, and that the "Western" and the "North-Western" came in the same numerical order on both occasions.

Deaths.—Comparing the divisions with regard to the number of deaths registered during the months of April, May, and June, in proportion to the population, the "South-Eastern" appears as having the highest rate of mortality, the annual ratio afforded being 1 in 52. The other divisions come in the following order:—The "North-Eastern," 1 in 52; the "Eastern," 1 in 54; the "South-Western," 1 in 60; the "South Midland," 1 in 61; the "North-Western," 1 in 61; the "North Midland," 1 in 74; and the "Western," 1 in 79. The numerical order of the divisions as regards rate of mortality, during the quarters ending March 31st and June 30th, respectively, was as follows:—

Quarter ending 31st March, 1864.	Quarter ending 30th June, 1864.	Quarter ending 31st March, 1864.	Quarter ending 30th June, 1864.
1. South-Eastern, 1 in 43	South-Eastern, 1 in 52	5. South-Western, 1 in 55	South Midland, 1 in 61
2. Eastern, . . „ 44	North-Eastern, „ 52	6. North-Western, „ 57	North-Western, „ 61
3. North-Eastern, „ 46	Eastern, . . „ 54	7. North Midland, „ 59	North Midland, „ 74
4. South Midland, „ 52	South-Western, „ 60	8. Western, . . „ 70	Western, . . „ 79

PROVINCES.

The following Table shows by Provinces, the number of births and deaths registered during the first and second quarters of the year, and the number registered during the six months, together with the annual ratio to the population:—

Registration Provinces.	Quarter ending 31st March, 1864.				Quarter ending 30th June, 1864.				Half-year ending 30th June, 1864.			
	Births.		Deaths.		Births.		Deaths.		Births.		Deaths.	
	Number.	Ratio, 1 in	Number.	Ratio, 1 in	Number.	Ratio, 1 in	Number.	Ratio, 1 in	Number.	Ratio, 1 in	Number.	Ratio, 1 in
Leinster, .	7,281	49	7,667	47	9,462	38	6,434	56	16,743	43	14,101	51
Munster, .	9,467	40	7,332	52	10,999	35	6,308	61	20,466	37	13,640	56
Ulster, .	9,269	52	9,631	50	12,784	38	8,518	57	22,053	44	18,149	53
Connaught, .	4,162	55	3,413	67	5,470	42	2,895	78	9,632	47	6,308	72

From the above Table it will be seen that during the quarter ending 30th June there were registered in the province of Munster 10,999 births, affording an annual ratio of 1 in 35 of the population;* in Ulster 12,784 births were registered, and in Leinster 9,462—in both instances representing an annual ratio of 1 in 38 of the inhabitants;* and in Connaught the number registered was 5,470, being equal to an annual birth-rate of 1 in 42 of its inhabitants.*

Taking the total number of births registered during the six months, the annual ratio to the population afforded by Munster appears to be 1 in 37; by Leinster 1 in 43; by Ulster, 1 in 44; and by Connaught, 1 in 47. When considering the number registered during the six months, it must be borne in mind, as before stated, that many of the births which occurred during the last twenty-one days of the second quarter are not included.

The number of deaths registered in Leinster during the three months which ended on 30th June, amounted to 6,434, being equal to an annual ratio of 1 in 56 of the inhabitants;* the number registered in Ulster was 8,518, or 1 in 57; in Munster, 6,308, or 1 in 61; and in Connaught, 2,895, or 1 in 78.

The number of deaths *registered* in the province of Leinster, during the six months, equalled an annual ratio of 1 in 51 of the population therein;* in Ulster, 1 in 53; in Munster, 1 in 56; and in Connaught, 1 in 72.

* According to the Census of 1861.

Third Quarter—July, August, September.

Quarterly Reports. — Third Quarter.

Marriages.—The marriages *registered* during the three months ending September 30th, 1864, amounted to 5,512, being equal to an annual ratio of 1 marriage to every 263 of the population of Ireland.* In the first quarter the number amounted to 9,602, during the second quarter the number *registered* was 6,023, making for the nine months a total of 21,137, equal to an annual ratio of 1 in 206.

Births.—The number of births *registered* during the quarter ending September the 30th was 33,877, representing an annual ratio of 1 in 43 of the population.* The number returned during the first quarter of the year amounted to 30,179, or an annual ratio of 1 in 48 of the population;* and the number returned during the second quarter amounted to 38,715 or an annual birth-rate of 1 in 37.

The total number of births *registered* in Ireland during the first three quarters of the year amounted to 102,771, yielding an annual ratio of 1 in 42 of the population.*

Deaths.—The number of deaths *registered* during the quarter ending the 30th of September was 19,191, or an annual ratio of 1 death in every 76 of the population.* The number *registered* during the first quarter of the year amounted to 28,043, or an annual death-rate of 1 in 52; and the number *registered* during the quarter ending the 30th of June amounted to 24,155, or 1 in 60 per annum.

The total number of deaths *registered* during the nine months from the 1st of January to the 30th of September 1864, amounted to 71,389, being equal to an annual ratio of 1 in every 61 of the population.*

METEOROLOGICAL OBSERVATIONS.

The following meteorological observations were taken at the Ordnance Survey Office, Phœnix Park, Dublin, during the months of July, August, and September, 1864.

The mean height of the barometer for the quarter was 29·804 inches; the highest reading was 30·371 inches, which occurred on August 15th, at 9·30 A.M., the wind E.S.E.; the minimum reading (29·081 inches) was on September 16th, at 3·30 P.M., with a southerly wind blowing at the time.

The mean temperature during the three months was 57·8°; the maximum height of the mercury (81·4°) was on August 14th, and the minimum (33·0°) was on August 21st. The mean of the dry bulb for the quarter was 58·8°; the mean for the month of July being 61·6°; for August 58·7°; and for September 56·2°. The rainfall during the quarter measured only 4·137 inches, being nearly one-half less than the fall during the corresponding quarter of 1863, which was 7·591 inches. The prevailing winds during the three months were westerly and south-westerly.

During the three months the wind blew on 7 days from the north, 11 days from the north-east, 10 days from the east, 1 day from the south-east, 6 days from the south, 27 days from the south-west, 24 days from the west, and 6 days from the north-west.

July.—During this month the mean height of the barometer was 29·796 inches; the highest reading (30·097 inches) occurred on the 7th at 9·30 P.M., the wind N.W.; the lowest reading (29·304 inches) was on the 2nd at 3.30 P.M., the wind at the time blowing from the west. The mean temperature of the month was 60·6° (80·9° to 40·5°); the 18th was the warmest day, and the 13th was the coldest night. The greatest rainfall in 24 hours (·272 inch) was on the 2nd. Rain fell on 9 days. The greatest amount of ozone (·7) was on the 2nd, and the least amount (·1) was on the 19th and 26th; the mean ozone for the month was ·2.

* According to the Census of 1861.

Quarterly Reports.

Third Quarter.

August.—The mean height of the barometer during the month of August was 29·936 inches; the maximum reading (30·371 inches) was on the 15th at 9.30 A.M, the wind E.S.E.; the minimum (29·383) was on the 30th at 9.30 P.M., the wind S.W. The mean height of the thermometer was 57·1°, varying from 81·4° to 33°; the warmest day was on the 14th, and the coldest night was on the 21st. The greatest rainfall in 24 hours (·314 inch) was on the 27th; it rained on 13 days. The greatest amount of ozone (·9) was on the 27th; the least amount (0) was on the 11th; the mean for the month was ·3.

On the 21st, the minimum temperature on the grass was 28·7° (nearly 3½ degrees of frost), and the maximum in the sun's rays was 84·2°; thus showing a range for the day of 55·5°.

September.—The mean height of the barometer during this month was 29·679 inches; the highest reading (30·240 inches) was on the 28th at 9·30 P.M., it being at the time "calm;" the lowest reading (29·081 inches) was on the 16th, at 3·30 P.M., the wind blowing from the south. The mean temperature was 55·8°, varying from 71·2° to 37·4°; the warmest day was on the 6th, and the coldest night was on the 15th; the maximum heat in the sun (90·5°) was on the 26th, and the minimum on the grass (33·3°) was on the 15th. The greatest rainfall in 24 hours (·379 of an inch) was on the 5th; it rained on 22 days. The maximum amount of ozone was ·8; the minimum was ·2, and the mean for the month was ·4.

NUMBER OF MARRIAGES, BIRTHS, AND DEATHS REGISTERED IN EACH OF THE EIGHT DIVISIONS.

No. I. North-Eastern Division.—The number of marriages registered in this division during the quarter ending 30th September amounted to 1,447, being equal to an annual ratio of 1 marriage in every 194 of the population.*

The number of births *registered* in this division during the quarter ending the 30th September was 7,017; the number *registered* during the first quarter of the year amounted to 5,821, and during the second quarter to 8,235. The total number *registered* during the three quarters amounted to 21,073, affording an annual ratio of 1 birth in every 40 of the population* of the division.

The deaths *registered* during the months of July, August, and September, amounted to 4,114; the number *registered* during the first quarter of the year was 6,075, and during the second quarter, 5,369; the total number *registered* during the nine months was 15,558, being equal to an annual ratio of 1 death in every 54 of the population.*

No. II. North-Western Division.—The marriages registered in this division during the third quarter amounted to 384, or an annual ratio of 1 marriage in every 374 of the population.*

The number of births *registered* in this division during the quarter ending the 30th of September amounted to 2,943; the number *registered* during the first quarter of the year amounted to 2,502, and during the second quarter to 3,259; the total number *registered* during the nine months amounted to 8,704, which is equal to an annual ratio of 1 birth to every 50 of the population.*

The deaths *registered* during the quarter ending the 30th of September numbered 1,738; the number *registered* during the first three months of the year was 2,540; and during the second quarter, 2,339; the total number *registered* during the nine months being 6,617, yielding an annual ratio of 1 in 65 of the population* in this division.

No. III. Eastern Division.—The marriages registered in this division during the third quarter amounted to 1,233, or an annual ratio of 1 marriage in every 168 of the population.*

* According to the Census of 1861.

Quarterly Reports.

Third Quarter.

The number of births *registered* during the quarter ending the 30th of September amounted to 5,320; the number *registered* during the first quarter of the year was 4,269, and during the second quarter, 5,731; the total number *registered* during the three quarters amounted to 15,320, or an annual ratio of 1 in 41 of the population.*

The number of deaths *registered* during the third quarter was 3,235; during the first quarter of the year the number *registered* was 4,694, and during the second quarter it was 3,812. The total number of deaths *registered* during the nine months was 11,741, affording an annual ratio of 1 death in every 53 of the population.*

No. IV. North Midland Division.—The marriages registered in this division during the third quarter amounted to 378, or an annual ratio of 1 marriage in every 380 of the population.*

The number of births *registered* during the third quarter of the year amounted to 3,085; the number *registered* during the first quarter was 2,694, and during the second quarter, 3,514; making together for the nine months 9,293, and yielding an annual ratio of 1 birth in every 46 of the population.*

The number of deaths *registered* during the quarter amounted to 1,550; the number *registered* during the first quarter of the year was 2,455, and during the second, 1,940; making a total of 5,945 deaths *registered* during the nine months, and affording an annual ratio of 1 death in every 73 of the population.*

No. V. South Midland Division.—The marriages registered in this division during the third quarter amounted to 408, or an annual ratio of 1 marriage in every 316 of the population.*

The number of births *registered* during the quarter ending 30th September was 2,684; the number *registered* during the first three months of the year amounted to 2,672, and the number *registered* during the second three months was 3,138; making a total for the nine months of 8,494, the annual ratio being 1 in every 45 of the population.*

The number of deaths *registered* during the third quarter was 1,753; the number *registered* during the first quarter of the year amounted to 2,493, and during the second quarter the deaths *registered* amounted to 2,113. The total number *registered* during the three quarters amounted to 6,359, yielding an annual ratio of 1 death in every 61 of the population.*

No. VI. Western Division.—The marriages registered in this division during the third quarter amounted to 386, or an annual ratio of 1 marriage in every 533 of the population.*

The number of births *registered* during the quarter ending September 30th amounted to 4,816; the number *registered* during the quarter ending 31st of March was 3,669, and during that ending 30th June, 4,860, making the total number *registered* during the three quarters 13,345, being equal to an annual ratio of 1 birth to every 46 of the population.*

The number of deaths *registered* during the quarter was 2,061; the number *registered* during the first quarter of the year was 2,937, and during the second quarter, 2,609; making the total number of deaths *registered* during the nine months 7,607, or an annual ratio of 1 death in every 81 of the population.*

No. VII. South-Eastern Division.—The marriages registered in this division during the third quarter amounted to 514, or an annual ratio of 1 marriage in every 244 of the population.*

The births *registered* in this division during the quarter ending September the 30th numbered 2,861; the number *registered* during the first quarter of the year

* According to the Census of 1861.

Quarterly Reports.

Third Quarter.

was 2,947, and during the second quarter, 3,437; during the nine months there were *registered* 9,245 births, yielding an annual ratio of 1 birth to every 41 of the population.*

The deaths *registered* during the quarter amounted to 1,859; the number of deaths *registered* during the first quarter of the year was 2,926, and during the second quarter, 2,421; making the total number of deaths *registered* during the first three quarters of the year, 7,206, affording an annual ratio of 1 death in every 52 of the population* of this division.

No. VIII. South-Western Division.—The marriages registered in this division during the third quarter amounted to 762, or an annual ratio of 1 marriage in every 281 of the population.*

The number of births *registered* in this division during the quarter ending 30th September amounted to 5,151; the number *registered* during the first quarter of the year was 5,605; and during the second quarter, 6,541. The total number of births *registered* during the nine months amounted to 17,297, yielding an annual ratio of 1 birth to every 37 of the population.*

The number of deaths *registered* during the quarter was 2,881; the number *registered* during the first quarter of the year was 3,923; during the second quarter 3,552; and the total number *registered* during the three quarters amounted to 10,356, which affords an annual ratio of 1 death to every 62 of the population.*

COMPARISON OF RESULTS BY DIVISIONS.

Births.—Comparing one division with another as to the number of births *registered* in proportion to their population,* the following is the result for the quarter of the year ending 30th September:—The "Eastern" division ranks first, with an annual ratio of 1 in 39; the other divisions come in the following order:—the "North-Eastern," 1 in 40; the "South-Western," 1 in 42; the "Western," 1 in 43; the "South-Eastern," 1 in 44; the "North Midland," 1 in 47; the "South Midland," 1 in 48; and the "North-Western," 1 in 49.

Taking the number of births *registered* during the nine months ending 30th September, the divisions range thus as to annual birth-rate:—the "South-Western," 1 in 37; the "North-Eastern," 1 in 40; the "Eastern" and the "South-Eastern," 1 in 41 each; the "South Midland," 1 in 45; the "North Midland," and the "Western," 1 in 46 each; and the "North-Western," 1 in 50.

The following statement shows the annual birth-rate and the order of the EIGHT DIVISIONS for the quarters ending 31st March, 30th June, and 30th September, respectively, and for the three quarters taken together:—

Quarter ending 31st March, 1864.	Quarter ending 30th June, 1864.	Quarter ending 30th Sept., 1864.	Nine Months ending 30th Sept., 1864.
1. South-Western, 1 in 38	South-Western, 1 in 33	Eastern, . . 1 in 39	South-Western, 1 in 37
2. South-Eastern, „ 42	North-Eastern, „ 34	North-Eastern, „ 40	North-Eastern, „ 40
3. South Midland, „ 48	Eastern, . . „ 36	South-Western, „ 42	Eastern, . . „ 41
4. North-Eastern, „ 48	South-Eastern, „ 36	Western, . . „ 43	South-Eastern, . „ 41
5. Eastern, . . „ 49	North Midland, „ 41	South-Eastern, . „ 44	South Midland, „ 45
6. North Midland, „ 53	South Midland, „ 41	North Midland, „ 47	Western, . . „ 46
7. Western, . . „ 56	Western, . . „ 42	South Midland, „ 48	North Midland, „ 46
8. North-Western, „ 57	North-Western, „ 44	North-Western, „ 49	North-Western, „ 50

From the above it will be observed that the "South-Western" Division, which had the largest number of births registered in proportion to its population,* during the first and second quarters of the year, held third place as to the number registered during the third quarter, and that there is but one division which held the same position for the three quarters—namely, the "North-Western," which ranked eighth upon each occasion.

* According to the Census of 1861.

Quarterly Reports.

Third Quarter.

Deaths.—Comparing the divisions with regard to the number of deaths registered in each during the quarter ending 30th September 1864, in proportion to the population therein,* the following is the result:—The "Eastern" ranks first, with an annual ratio of 1 in 64; the others follow thus:—the "South-Eastern," 1 in 67; the "North-Eastern," 1 in 68; the "South Midland," 1 in 73; the "South-Western," 1 in 74; the "North-Western," 1 in 83; the "North Midland," 1 in 93; and the "Western," 1 in 100.

During the nine months ending 30th September, 1864, the number of deaths *registered* in each division afforded the following annual ratios:—the "South-Eastern," 1 in 52; the "Eastern," 1 in 53; the "North-Eastern," 1 in 54; the "South Midland," 1 in 61; the "South-Western," 1 in 62; the "North-Western, 1 in 65; the "North Midland," 1 in 73; and the "Western," 1 in 81.

The numerical order of the EIGHT DIVISIONS as regards annual rate of mortality is shown by the following statement:—

Quarter ending 31st March, 1864.		Quarter ending 30th June, 1864.		Quarter ending 30th Sept., 1864.		Nine Months ending 30th Sept., 1864.	
1. South-Eastern,	1 in 43	South-Eastern,	1 in 52	Eastern,	1 in 64	South-Eastern,	1 in 52
2. Eastern,	„ 44	North-Eastern,	„ 52	South-Eastern,	„ 67	Eastern,	„ 53
3. North-Eastern,	„ 46	Eastern,	„ 54	North-Eastern,	„ 68	North-Eastern,	„ 54
4. South Midland,	„ 52	South-Western,	„ 60	South Midland,	„ 73	South Midland,	„ 61
5. South-Western,	„ 55	South Midland,	„ 61	South-Western,	„ 74	South-Western,	„ 62
6. North-Western,	„ 57	North-Western,	„ 61	North-Western,	„ 83	North-Western,	„ 65
7. North Midland,	„ 59	North Midland,	„ 74	North Midland,	„ 93	North Midland,	„ 73
8. Western,	„ 70	Western,	„ 79	Western,	„ 100	Western,	„ 81

Thus it will be seen that the three divisions touching on the eastern coast had the largest number of deaths *registered*, in proportion to their population, during each of the three quarters; that the "South Midland" stood fourth, and the "South-Western" fifth in the first and third quarters, and changed places in the second quarter; and that the "North-Western," the "North-Midland," and the "Western," came respectively sixth, seventh, and eighth upon each occasion.

PROVINCES.

The following table shows, by provinces, the number of births and deaths *registered* during the first, second, and third quarters of the year, together with the annual ratio to the population:—

Registration Provinces.	Quarter ending 31st March, 1864.				Quarter ending 30th June, 1864.				Quarter ending 30th Sept., 1864.			
	Births.		Deaths.		Births.		Deaths.		Births.		Deaths.	
	Number.	Ratio, 1 in	Number.	Ratio, 1 in	Number.	Ratio, 1 in	Number.	Ratio, 1 in	Number.	Ratio, 1 in	Number.	Ratio, 1 in
Leinster,	7,281	49	7,667	47	9,462	38	6,434	56	8,521	42	5,269	68
Munster,	9,467	40	7,332	52	10,999	35	6,308	61	8,714	44	5,105	75
Ulster,	9,269	52	9,631	50	12,784	38	8,518	57	11,113	43	6,486	74
Connaught,	4,162	55	3,413	67	5,470	42	2,895	78	5,529	41	2,331	97

Births.—It will be seen from the above table that during the first quarter of the year there were *registered* in the province of LEINSTER 7,281 births; during the second quarter, 9,462; and during the third quarter, 8,521; making a total for the nine months of 25,264 births, or an annual ratio of 1 in every 42 of the population of the province.* In the province of MUNSTER, 9,467 births were *registered* during the first quarter, 10,999 during the second, and 8,714 during the third quarter; making together 29,180 births *registered* during the nine months, which is equal to an annual ratio of 1 in every 39 of its population.* In the province of ULSTER there were *registered* during the first quarter 9,269 births, 12,784 during

* According to the Census of 1861.

Quarterly Reports.

Third Quarter

the second, and 11,113 during the third quarter; making a total for the nine months of 33,166, yielding an annual ratio of 1 in every 44 of the inhabitants.* In the province of CONNAUGHT there were *registered* during the first quarter 4,162 births, 5,470 during the second, and 5,529 during the third quarter; making a total of 15,161 births *registered* during the nine months ending 30th September, 1864, a number equal to an annual ratio of 1 in every 45 of its population.*

Thus it is found that, as regards the number of births *registered* in proportion to the population, during the nine months, the provinces range as follows:—Munster first, with 1 in 39 per annum; Leinster second, with 1 in 42; Ulster third, with 1 in 44; and Connaught fourth, with 1 in 45.

Deaths.—There were *registered* in the province of LEINSTER during the first quarter of the year, 7,667 deaths, 6,434 during the second, and 5,269 during the third quarter; making a total for the nine months of 19,370 deaths, equal to an annual ratio of 1 death in every 55 of its population.* In the province of MUNSTER 7,332 deaths were *registered* during the first quarter, 6,308 during the second, and 5,105 during the third; making a total for the nine months of 18,745, which affords an annual ratio of 1 in every 61 of the inhabitants.* In the province of ULSTER 9,631 deaths were *registered* during the first three months, 8,518 during the second, and 6,486 during the third; making a total of 24,635 deaths *registered* during the nine months, which is equal to an annual ratio of one in every 59 of its inhabitants.* In the province of CONNAUGHT there were *registered* during the first quarter 3,413 deaths, 2,895 during the second, and 2,331 during that ending on 30th September; making a total of 8,639 deaths *registered* during the nine months, and being equal to an annual ratio of 1 in every 79 of the population.*

The provinces rank as follows, with regard to the number of deaths *registered* during the nine months in proportion to the population:*—Leinster first, with an annual ratio of 1 in 55; Ulster second, 1 in 59; Munster third, 1 in 61; and Connaught last—the number of deaths *registered* in that province affording an annual ratio of only 1 in every 79 of its population.*

Fourth Quarter.

Fourth Quarter.—October, November, December.

Marriages.—The marriages *registered* during the last quarter of 1864 amounted to 6,269, being equal to an annual ratio of 1 marriage to every 231 of the population.*

Births.—The births *registered* in the quarter ending December 31st, 1864, amounted to 33,643, affording an annual ratio of 1 birth to every 43 of the population.* The number during the first quarter was 30,179, giving a yearly ratio of 1 in 48; the number in the second quarter amounted to 38,715, equal to 1 in 37; and the number *registered* during the third quarter was 33,877, or 1 in 43 of the population.*

Deaths.—The deaths *registered* during the quarter ending December 31st were 21,755, being equivalent to an annual ratio of 1 death in every 67 of the population.* The number *registered* in the first quarter amounted to 28,043, or 1 in 52; in the second quarter to 24,155, or 1 in 60; and during the third quarter the number *registered* was 19,191, giving an annual ratio of 1 in 76 of the population.*

METEOROLOGICAL OBSERVATIONS.

During the last quarter of the year the mean height of the barometer at the Ordnance Survey Office, Phœnix Park, Dublin, was 29·686 inches; the highest reading (30·587 inches) occurred on the 6th November, at 9.30 A.M., wind S.E.; the minimum reading (28·390 inches) was on the 13th of the same month, at 9.30 P.M., the wind at the time blowing from the same point.

* According to the Census of 1861.

Quarterly Reports.

Fourth Quarter.

The mean temperature of the air during the last quarter was 44·4°; the maximum registered by the thermometer was 61·1°; and the minimum was 17·2°.

The rainfall during the quarter measured 12·040 inches; of this quantity, 6·167 inches, or more than one-half, fell during the month of October.

There was an unusual prevalence of easterly winds during the quarter, it having blown from that point on 24 days, viz., on 14 days in October, 5 in November, and 5 in December.

October.—The mean height of the barometer during this month was 29·706 inches; the highest reading (30·333 inches) was on the 11th, at 9.30 A.M., the wind blowing from the north; and the lowest reading (28·724 inches) was on the 19th, at 3.30 P.M., wind N.W. The mean temperature of the air for the month was 49·3°, the maximum being 61·1°, and the minimum 33·0°; the 16th was the warmest day, and the 20th the coldest night. The mean of the dry bulb was 49·2°, and of the wet bulb, 47·0°. The maximum heat in sun was 74·2°, and the minimum on grass was 28·6°. The number of days on which rain or snow fell was 17. The rainfall measured 6·167 inches; the greatest amount in 24 hours was 1·696 inches. The maximum ozone was 1·0; the minimum, ·0; and the mean ·5. On 14 days during the month the wind blew from the east at 9.30 A.M.

November.—The mean height of the barometer during the month of November was 29·556 inches; the highest reading (30·587 inches) was on the 6th, at 9·30 A.M., the wind at the time blowing from the south-east; the lowest reading (28·390 inches) was on the 13th, at 9.30 P.M., the wind S.E. The mean temperature in air was 43·5°; the maximum registered during the month was 60·0°, and the minimum, 27·8°; the 17th was the warmest day, and the 23rd was the coldest night. The mean of the dry bulb was 43·6°, and of the wet bulb, 42·0°. The maximum heat in sun was 66·2°, and the minimum on grass was 23·0°. The rain which fell during this month measured 3·311 inches; the greatest rainfall in 24 hours was ·646 of an inch; the number of days on which rain or snow fell was 22. The maximum ozone was 1·0, the minimum ·1, and the mean ·6. The wind blew on 6 days from the west, on 8 days from south-west, on 3 days from north-west, and on 5 days from the east, at 9.30 A.M.

December.—During this month the mean height of the barometer was 29·796 inches; the maximum reading (30·463 inches) was on the 24th at 9.30 A.M., wind W.; the minimum reading (29·118) occurred on the 11th at 9.30 A.M., wind S.S.W. The mean temperature of the air was 40·4°; the maximum being 55·2°, and the minimum 17·2°. The mean of the dry bulb was 39·9°, and of the wet bulb 38·0°; the maximum heat in sun was 60·2°, and the minimum on grass was 16·2°. The 3rd was the warmest day, and the 19th was the coldest night. The rainfall during the month measured 2·562 inches; the greatest quantity of rain in 24 hours was ·681 of an inch. The maximum ozone was 1·0, the minimum ·0, and the mean ·4. The prevailing winds were westerly and south-westerly; the wind was easterly on 5 days, at 9.30 A.M.

NUMBER OF MARRIAGES, BIRTHS, AND DEATHS, REGISTERED IN EACH OF THE EIGHT DIVISIONS.

No. I. North-Eastern Division.—The number of marriages *registered* in this division during the quarter ending December 31st, amounted to 1,858, being equal to an annual ratio of 1 marriage in every 151 of the population.

The number of births *registered* in this division in the first quarter of the year was 5,821; during the second quarter, 8,235; in the third quarter, 7,017, and during the fourth quarter, 7,330; making a total for the year of 28,403, being equal to a ratio of 1 in every 39·6 of the population. The Union or Superintendent Registrar's District of Belfast had the largest number of births *registered* during the year

Quarterly Reports.

Fourth Quarter.

in proportion to the population, the ratio afforded being as high as 1 in 31·0. In the Union of Newtownlimavady, the ratio was 1 in 51·7, and in Ballymoney, 1 in 50·2.

The number of deaths *registered* in this division during the first quarter of the year amounted to 6,075; in the second quarter, to 5,369; during the third quarter, to 4,114; and during the fourth quarter, to 4,696; making a total for the year of 20,254, affording a ratio of 1 in every 55·5 of the population.* The rate of mortality in Belfast Union during the year was equal to 1 in every 38·2 of the population.* In Newtownards the death-rate was 1 in 46·7, while in the Union of Ballymoney the number of deaths *registered* afforded a ratio of only 1 in 71·3; in Kilkeel, 1 in 65·9; in Ballymena, 1 in 65·9; in Magherafelt, 1 in 65·6; and in Castleblayney, 1 in 65·5.

In this division, fever, chiefly typhus, was very prevalent during the last quarter of the year. The Registrar of the Draperstown District, Magherafelt Union observed:—"Among the deaths were 3 from typhus fever, which disease was imported from Scotland."

No. II. North-Western Division.—The number of marriages *registered* in this division during the quarter ending December 31st, was 599, being equal to an annual ratio of 1 marriage to every 240 of the population.*

During the first quarter of the year, the number of births *registered* in this division, amounted to 2,502; during the second quarter, to 3,259; during the third quarter, to 2,943; and during the fourth quarter, to 3,027; making a total for the year of 11,731, affording a ratio of 1 in 49·0 of the population.* In the Union or Superintendent Registrar's District of Castlederg, the birth-rate was 1 in 38·8, whereas in *Donegal and Glenties the birth-rate was respectively only* 1 *in* 66·6 *and* 1 *in* 62·1.

The number of deaths *registered* in this division during the first quarter of the year amounted to 2,540; during the second quarter to 2,339; during the third quarter to 1,738; and during the fourth quarter, to 1,813; making a total of 8,430, equal to a ratio of 1 in 68·2 of the population.*

Typhus fever was prevalent in this division during the fourth quarter, especially in Londonderry, where scarlatina also was prevalent.

No. III. Eastern Division.—The number of marriages *registered* in this division during the quarter ending December 31st amounted to 1,164, affording an annual ratio of 1 marriage in every 178 of the population.*

The number of births *registered* during the first quarter of the year amounted to 4,269; during the second quarter, to 5,731; during the third quarter, to 5,320; and during the fourth quarter, to 5,022; making a total of 20,342 births *registered* during the year, affording a ratio of 1 in 40·8 of the population.* The Union or Superintendent Registrar's District of Dublin North, had the greatest number of births *registered* in proportion to population, the ratio being 1 in 34·2. The union in which the smallest number of births in proportion to the population was *registered* was Dunshaughlin, the ratio being only 1 in 58·8.

The number of deaths *registered* in this division in the first quarter of the year amounted to 4,694; in the second, to 3,812; in the third quarter, to 3,235; and during the fourth quarter, to 3,762; making a total for the year of 15,503, or 1 in every 53·5 of the population.* The Union or Superintendent Registrar's District of Dublin South, had the largest number of deaths in proportion to the population, the ratio afforded being 1 in every 43·3; the number registered in the Union of Dublin North, was equal to 1 in 44·2. The number of deaths *registered* in the Kells Union amounted to only 1 in 83·6; in Rathdrum Union, to 1 in 75·1; in Navan, to 1 in 74·3; in Dunshaughlin, to 1 in 73·9; and in Bailieborough, to 1 in 72·6.

Fever (chiefly typhus) was prevalent in many of the districts of the "Eastern" division during the fourth quarter.

* According to the Census of 1861.

Quarterly Reports.

Fourth Quarter.

No. IV. North Midland Division.—The number of marriages *registered* in this division during the quarter ending December 31st was 470, or an annual ratio of 1 marriage to 306 of the population.*

The number of births *registered* in the first quarter of the year amounted to 2,694 ; during the second quarter, to 3,514 ; in the third, to 3,085 ; and during the fourth quarter, to 2,985 ; making a total of 12,278 births registered during the year, being equal to a ratio of 1 birth to every 46·9 of the population.* The number of irths registered during the year in the Union of Athlone was equal to 1 in 39·9 of the population ;* in Oldcastle, to 1 in 42·2 ; and in Roscommon, to 1 in 42·7 ; while the number *registered* in Clones equalled only 1 in 56·1 ; Mullingar, 1 in 54·6 ; Bawnboy, 1 in 53·7 ; Lisnaskea, 1 in 52·3 ; and in Clogher, 1 in 51·6.

The number of deaths *registered* in the first quarter of the year amounted to 2,455 ; during the second quarter, to 1,940 ; in the third quarter, to 1,550 ; and during the fourth quarter, to 1,766 ; making a total of 7,711 deaths *registered* during the year, and affording a ratio of 1 in 74·6 of the population.* The highest death-rate (1 in 57·8) in any of the districts in this division was in Athlone ; in Mohill the number of deaths *registered* equalled only 1 in every 93·8 of the population.*

No. V. South Midland Division.—The number of marriages *registered* in this division during the quarter ending December 31st amounted to 463, being equal to an annual ratio of 1 in 278 of the population.*

The number of births *registered* in the first quarter of the year was 2,672 ; during the second quarter, 3,138 ; in the third quarter, 2,684 ; and during the fourth quarter, 2,504 ; making a total of 10,998 births *registered* during the year, and affording a ratio of 1 in 46·9 of the population.* In the Unions of Castlecomer and Tipperary the number of births registered in proportion to the population* was the same, viz., 1 in 39·4. In the Union or Superintendent Registrar's District of *Borrisokane, the number of births registered during the year affords a ratio of only* 1 *in* 61·9 *of the population.**

The number of deaths *registered* in the first quarter of the year was 2,493 ; during the second quarter, 2,113 ; in the third quarter, 1,753 ; and during the fourth quarter, 1,909 ; making a total of 8,268 deaths *registered* during the year, and yielding a ratio of 1 death in every 62·3 of the population.* In the Union of Kilkenny the number of deaths registered during the year afforded a ratio of 1 in 46·1 of the population ;* whereas in the Union of Borrisokane the *ratio was only* 1 *in* 92·8.

The prevailing epidemics in the "South Midland" division, during the fourth quarter, were fever, scarlatina, and whooping cough.

No. VI. Western Division.—The number of marriages *registered* in this division during the quarter ending December 31st amounted to 457, affording an annual ratio of 1 in 450 of the population.*

The number of births *registered* in the first quarter of the year amounted to 3,669, during the second quarter to 4,860, in the third quarter to 4,816, and during the fourth quarter to 5,140 ; making a total of 18,485 births *registered* in this division during the year, and affording a ratio of 1 birth to every 44·5 of the population.* In the Unions of Oughterard and Clifden the number of births registered during the year afforded the very remarkable ratio of 1 birth to every 30·6 and 30·9 of the population* respectively. As this birth-rate is so very high, in comparison with the other unions in this division, it has been thought desirable to give a detailed statement of the number of births registered in each Registrar's district of the two unions, which is as follows :—

Oughterard Union.				Clifden Union.			
Registrars' Districts.	Population in 1861.	No. of Births registered in 1864.	Ratio to Population.	Registrars' Districts.	Population in 1861.	No. of Births registered in 1864.	Ratio to Population.
Cloonbur,	5,749	178	1 in 32·3	Clifden,	12,087	388	1 in 31·1
Oughterard,	6,070	172	,, 35·3	Rinvyle,	4,791	157	,, 30·5
Lettermore,	6,653	254	,, 26·2	Roundstone,	8,122	265	,, 30·6

* According to the Census of 1861.

Quarterly Reports. — Fourth Quarter.

It will be seen from the foregoing that the birth-rate in the Clifden Union, although high, is very uniform, whereas in the Union of Oughterard the high rate is made up by the very unusual ratio in the Registrar's District of Lettermore, where the birth-rate during the year was 1 in 26·2 of the population.*

The number of deaths *registered* in the Western Division in the first quarter of the year was 2,937; during the second quarter, 2,609; in the third quarter, 2,061; and during the fourth quarter, 2,345; making a total of 9,952 deaths registered during the year, and affording a ratio of 1 in 82·7 of the population.* With the exception of the Unions of Galway and Mountbellew, in each of the unions forming this division, the death-rate was less than 1 in 60 of the population.* In four Unions—Castlebar, Glennamaddy, Swineford, and Tobercurry—the number of deaths *registered* during the year did *not amount to* 1 in every 100 *of the population.**

The "Zymotic" diseases most prevalent in this division, during the fourth quarter, were scarlatina, fever, and measles. Whooping cough from which the Island of Inishmore, in the district of Arran, had been free for nine years, appeared during the fourth quarter, and became epidemic.

No. VII. South-Eastern Division.—The number of marriages *registered* in this division during the quarter ending December 31st, amounted to 565, affording an annual ratio of 1 in every 222 of the population.*

The number of births *registered* in the first quarter of the year was 2,947; during the second quarter, 3,437; in the third quarter, 2,861; and during the fourth quarter, 2,626; making a total of 11,871 births *registered* during the year, and yielding a ratio of 1 in 42·2 of the population,* varying from 1 in 34·1 in the Union of Kilmacthomas, to 1 in 48·1 in the Union of Callan.

The number of deaths *registered* in the first quarter of the year was 2,926; during the second quarter, 2,421; in the third, 1,859; and during the fourth, 2,166; making a total of 9,372 deaths registered during the year, and affording a ratio of 1 in 53·5 of the population.* The number of deaths registered during the year in the Union of Carrick-on-Suir exceeded the number of births, and yielded a ratio of 1 in 41·3; in the Union of Clonmel, the ratio was 1 in 45·1; while in the Unions of Mitchelstown, Fermoy, and Clogheen, the death-rate was only 1 in 74·3, 1 in 63·0, and 1 in 62·3 respectively.

Fever and scarlatina were prevalent during the fourth quarter, throughout the "South-Eastern" division.

No. VIII. South-Western Division.—The number of marriages *registered* in this division during the quarter ending December 31st amounted to 693, affording an annual ratio of 1 marriage to every 309 of the population.*

During the first quarter of the year the number of births *registered* was 5,605; in the second quarter, 6,541; during the third quarter, 5,151; and in the fourth quarter, 5,009; making a total of 22,306 births registered during the year, and yielding a ratio of 1 to 38·4 of the population,* ranging from 1 in 31·3 in Millstreet Union, and 1 in 32·4 in Newcastle Union, to 1 in 48·2 in the Union of Croom, and 1 in 48·4 in that of Rathkeale.

The number of deaths *registered* in the first quarter of the year was 3,923; in the second quarter, 3,552; in the third quarter, 2,881, and in the fourth quarter, 3,298, making a total of 13,654 deaths registered during the year, and being equal to a ratio of 1 in every 62·7 of the population.* In the Union or Superintendent Registrar's District of Cork the number of deaths registered during the year afforded a ratio of 1 in 53·5; in Limerick the ratio afforded was 1 in 56·2. *In the following four unions, viz., Bantry, Cahersiveen, Croom, and Listowel, the ratio was respectively* 1 *in* 90·2, 1 *in* 102·9, 1 *in* 83·0, *and* 1 *in* 83·2.

Fever and scarlatina were prevalent in the "South-Western" division during the fourth quarter.

* According to the Census of 1861.

COMPARISON OF RESULTS BY DIVISIONS.

Births.—Comparing one division with another, as to the number of births registered in proportion to their population, during the quarter ending December 31st, 1864, it is found that the North-Eastern division ranks first, the ratio being 1 in 38; the other divisions follow thus:—the Western, 1 in 40; the Eastern, 1 in 41; the South-Western, 1 in 43; the North-Western, 1 in 47; the South-Eastern, 1 in 48; the North Midland, 1 in 48; and the South Midland, 1 in 51.

The numerical order of the EIGHT DIVISIONS *as regards the annual Rate represented by the Number of Births registered during each quarter of the year* 1864, *is shown in the following statement*:—

Quarter ending 31st March, 1864.	Quarter ending 30th June, 1864.	Quarter ending 30th Sept., 1864.	Quarter ending 31st Dec., 1864.
1. South-Western, 1 in 38	South-Western, 1 in 33	Eastern, . . 1 in 39	North-Eastern, 1 in 38
2. South-Eastern, „ 42	North-Eastern, „ 34	North-Eastern, „ 40	Western, . . „ 40
3. South Midland, „ 48	Eastern, . . „ 36	South-Western, „ 42	Eastern, . . „ 41
4. North-Eastern, „ 48	South-Eastern, „ 36	Western, . . „ 43	South-Western, „ 43
5. Eastern, . . „ 49	North Midland, „ 41	South-Eastern, „ 44	North-Western, „ 47
6. North Midland, „ 53	South Midland, „ 41	North Midland, „ 47	South-Eastern, . „ 48
7. Western, . . „ 56	Western, . . „ 42	South Midland, „ 48	North Midland, „ 48
8. North-Western, „ 57	North-Western, „ 44	North-Western, „ 49	South Midland, „ 51

From the foregoing it will be observed that the South-Western division, which ranked first in the first and second quarters of the year, occupied the third place in the third quarter, and the fourth place in the last quarter; while the Western division which occupied the seventh place in the first and second quarters, rose to the fourth place for the third quarter, and to the second place for the last quarter. The North-Western division, which held the last place during the first, second, and third quarters, ranked fifth in the last quarter. Taking the total number of births registered during the year, the divisions rank as follows:—

1. South-Western, ... 1 in 38·4	5. Western, ... 1 in 44·5
2. North-Eastern, ... „ 39·6	6. South Midland . . . . „ 46·9
3. Eastern, ... „ 40·8	7. North Midland, ... „ 46·9
4. South-Eastern, ... „ 42·2	8. North-Western, ... „ 49·0

Deaths.—Comparing the divisions, with regard to the number of deaths registered in each during the quarter ending December 31st, the following is the result:—The "Eastern" ranks first, with an annual ratio of 1 in 55; the others follow thus:—the "South-Eastern," 1 in 58; the "North-Eastern," 1 in 60; the "South-Western," 1 in 65; the "South Midland," 1 in 67; the "North-Western," 1 in 79; the "North Midland," 1 in 81; and the "Western," 1 in 88.

The following Statement shows the EIGHT DIVISIONS, *arranged according to the annual Rate of Mortality represented by the number of deaths registered in each quarter of the year* 1864—

Quarter ending 31st March, 1864.	Quarter ending 30th June, 1864.	Quarter ending 30th Sept., 1864.	Quarter ending 31st Dec., 1864.
1. South-Eastern, 1 in 43	South-Eastern, 1 in 52	Eastern, . . 1 in 64	Eastern, . . 1 in 55
2. Eastern, . . „ 44	North-Eastern, „ 52	South-Eastern, . „ 67	South-Eastern, . „ 58
3. North-Eastern, „ 46	Eastern, . . „ 54	North-Eastern, „ 68	North-Eastern, „ 60
4. South Midland, „ 52	South-Western, „ 60	South Midland, „ 73	South-Western, „ 65
5. South-Western, „ 55	South Midland, „ 61	South-Western, „ 74	South Midland, „ 67
6. North-Western, „ 57	North-Western, „ 61	North-Western, „ 83	North-Western, „ 79
7. North Midland, „ 59	North Midland, „ 74	North Midland, „ 93	North Midland, „ 81
8. Western, . . „ 70	Western, . . „ 79	Western, . . „ 100	Western, . . „ 88

From the above it may be observed that the mortality in proportion to the population, in each of the four quarters of the year, was highest in the three divisions situated on the eastern coast. Little change took place in the numerical order of the divisions during the four quarters; the South-Western held the fifth place in the first and third quarters, and the South Midland the fourth place in the first and third quarters; in the second and fourth quarters the order was reversed, the South-Western holding the fifth place, the South

* According to the Census of 1861.

Quarterly Reports.

Fourth Quarter.

Midland the fourth. In the third and fourth quarters the divisions ranked the same with regard to mortality, in proportion to the population,* except the South-Western and South Midland which changed places. It will be observed that in each of the divisions the rate of mortality was greater during the last quarter than it had been during the third quarter of the year. With regard to the total number of deaths registered in each of the divisions during the year, the numerical order is as follows:—

1. South-Eastern,	1 in 53·5	5. South-Western,	1 in 62·7
2. Eastern,	„ 53·6	6. North-Western,	„ 68·2
3. North-Eastern,	„ 55·5	7. North Midland,	„ 74·6
4. South Midland,	„ 62·3	8. Western,	„ 82·7

PROVINCES.

The following tables show, by quarterly periods, the number of births and deaths *registered* in each of the four PROVINCES during the year 1864, and the ratio to the population:—

Table showing by Provinces and Quarterly Periods the number of Births registered in Ireland during the year 1864, *and the Ratio to the Population.**

REGISTRATION PROVINCES.	Quarter ending 31st Mar., 1864.		30th June, 1864.		30th Sept., 1864.		31st Dec., 1864.		Total, Year 1864.

1822	6,892,708	3,384,674	3,508,034								

NOTE.—This table has been constructed for the years 1801 to 1831—By adopting the rates of increase of the male and female population between 1821 and 1831, as shown by the Irish Census Reports of 1831—the first complete Census of Ireland having been taken in 1821.

1832 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; the difference between the number arrived at by this computation and the *actual* number by the Census of 1851 was divided over the intervening years in proportion to the number of recorded deaths and the number of emigrants.

1852 to 1861—The English birth and death rates, as above, were used, deducting the number of emigrants according to the returns obtained by the Registrar-General for Ireland, and apportioning the difference as explained for the last period.

1862 to 1864—The English birth and death rates, as above, were employed in the calculations for each year, deducting the number of emigrants according to the returns received by the Registrar-General for Ireland.

ANNUAL ABSTRACTS

OF

MARRIAGES, BIRTHS, AND DEATHS.

1864.

ABSTRACT OF MARRIAGES.—Marriages *registered* in Ireland, pursuant to the

DIVISIONS AND SUPERINTENDENT REGISTRARS' DISTRICTS.*		Area in Statute Acres, exclusive of the larger Rivers, Lakes, and Tideways.	Population, 1861.	TOTAL MARRIAGES. Note.—Wherever the minus sign is prefixed to the number in the column headed "Excess of Births over Deaths," it denotes that the Births in the Superintendent Registrar's District, instead of exceeding the Deaths, were, in fact, *less than the Deaths*, to the extent stated.

* See note (†) page 42.

* The *Registration Counties* consist of groups of Superintendent Registrars' Districts or Poor Law Unions. Whenever a District or Union extends into more than one County, it is assigned wholly to that County in which the greater portion of the population is located; hence all the *Registration* Counties differ more or less from the Counties *Proper*.

† See note (†) page 42.

NOTE.—The Registrars' Districts are sub-divisions of the Unions or Superintendent Registrars' Districts, and are identical with the Dispensary Districts of the same names.

The letter *W* denotes that the Registrar's District contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.

Wherever the minus sign (—) is prefixed to the numbers given in the column headed "Excess of Births over Deaths," it denotes that the births in the Registrar's District, instead of exceeding the deaths, were, in fact, *less than the deaths*, to the extent stated.

I.—NORTH-EASTERN DIVISION.—BIRTHS AND DEATHS, 1864—REGISTRARS' DISTRICTS—*continued.*

IRELAND.—SUPPLEMENTARY TABLE of the

[In the foregoing Tables all the Diseases, either having a distinct character, or fatal to any considerable number of persons, are classified under 114 heads; some of which, however, include groups of very distinct diseases,—such as are fatal to only a *few persons*, or *diseases* which are often confounded with other diseases. The rule has been to refer the distinct diseases to heads under which the cases were so numerous that the additional numbers would not interfere with the calculated proportions. Where it is desired, partial correction,

[*continued at page* 118.]

CAUSES of DEATH at different Periods of Life, in the Year 1864.

however, can now be made by means of the following Supplementary Tables, containing many of the deaths from distinct diseases, such as mumps, epistaxis, dry gangrene, polypus, rickets, bronchocele, &c., &c., and deaths from other forms of disease, such as softening of the brain (necrencephalus), which are returned in many cases under other heads, as paralysis, &c.

These Tables are an extension of the Tables of Causes of Death in Ireland, pp. 108 to 115.]

* The *Registration Counties* consist of groups of Superintendent Registrars' Districts or Poor Law Unions. Whenever a District or Union extends into more than one County, it is assigned wholly to that County in which the greater portion of the population is located; hence all the *Registration* Counties differ more or less from the Counties *Proper*.

LETTER to the REGISTRAR-GENERAL on the CAUSES of DEATH in IRELAND, from WILLIAM M. BURKE, F.C.P.I.

YEAR 1864.

SIR,

I have the honour of submitting to you some brief observations on the assigned causes of the deaths *registered* in Ireland during the year 1864.

I think it advisable to italicise the word "registered," for there can be no doubt that the number of deaths registered very imperfectly represents the total deaths which occurred during the year.

I. ZYMOTIC DISEASES.

The number of deaths resulting from zymotic diseases amounted to 19,064, or 1 in every 4·9 of the total deaths, and showing a mortality of 3·4 in every 1,000 of the estimated population.* Fever proved fatal in 5,152 instances, being in the proportion of 1 in every 18·1 of the total deaths. Typhus, typhoid fever or typhia, relapsing fever or typhinia, and infantile remittent fever, are all tabulated under the head of fever. The forms of fever most prevalent during the year were typhus and typhoid, the former proving most fatal. The relapsing fever or typhinia, which was so general during the famine years, has not been frequently observed of late. Of the persons whose deaths were ascribed to fever, 2,676 were males, and 2,476 females.

Scarlatina, a disease which chiefly attacks young people, and frequently proves rapidly fatal, caused 2,605 deaths, being in the proportion of 1 in every 35·8 of all the deaths registered. Epidemics of scarlatina were reported from various districts. Amongst those which suffered most were the Unions of Galway, Oughterard, and Ballinrobe, in the western division; and Tralee and Kenmare in the south-western division.

Diarrhœa killed 1,962 persons, or 1 in every 47·5 of the total deaths. Croup was the cause of 1,936 deaths—1,019 males and 917 females; this disease appears to be more fatal in Ireland than in England or Scotland, since 1 in every 48·1 of the total deaths resulted from croup; whereas, according to the Reports of the Registrars-General of England and Scotland for the year 1864, the proportional number of deaths from croup were, in England, 1 in every 73, and in Scotland 1 in every 53. The deaths from whooping cough numbered 1,735—777 males and 958 females. Diphtheria caused 661 deaths; it was very prevalent in the north-eastern division.

Small-pox proved fatal in 854 instances. Of the deaths from small-pox 318 occurred in the north-eastern division (of which number 105 occurred in the Union of Belfast); 110 in the north-western; the remainder being distributed throughout the other divisions.

Hydrophobia caused 7 deaths—6 males and 1 female.

Three men and 1 woman died from glanders.

* The population of Ireland in the middle of the year 1864 is estimated as 5,675,207.

II. Constitutional Diseases.

The number of deaths referred to constitutional diseases amounted to 17,751, or 1 in every 5·2 of the total deaths registered, and 3·1 to every 1,000 of the estimated population.

The number of persons who fell victims to phthisis, or pulmonary consumption, amounted to 9,735—4,740 males and 4,995 females. In both sexes the majority of deaths from phthisis occurred between the ages of 15 and 35 years.

2,272 deaths—997 males and 1,275 females—were tabulated under the head of dropsy, which is generally a secondary affection, depending on some visceral disease, and not a disease *per se*.

Of the deaths from cancer (1,498), 664 were of males, and 834 of females; between the ages of 55 and 75 cancer proved most fatal to males, and to females between 45 and 65.

Tabes mesenterica proved fatal to 1,667 persons, the majority of whom were under 5 years of age.

Hydrocephalus, another scrofulous disease, chiefly affecting children, furnished 1,060 deaths.

1,224 deaths were returned simply as from scrofula.

III. Local Diseases.

To this class of diseases 33,445 deaths were referred, being in the proportion of 1 in every 2·8 of the total deaths, and affording a ratio of 5·9 deaths to 1,000 of the estimated population.

From diseases of the nervous system there died 8,852 persons—4,825 males, and 4,027 females; of these nearly one-half the number (3,981) were ascribed to convulsions, the majority of the victims being children under 1 year old.

The deaths from apoplexy of males exceeded those of females by 148. The proportional number of deaths from apoplexy to the total deaths was 1 in every 112·2.

Paralysis proved equally fatal to males and females.

Of the deaths from diseases of the nervous system 1,182 were returned under the head of brain disease unspecified.

Diseases affecting the organs of circulation contributed 2,877 deaths; 39 males, and 29 females died from pericarditis or inflammation of the covering of the heart; aneurism caused 89 deaths—65 males, and 24 females; the remaining deaths from diseases of the organs of circulation were equally distributed between males and females—the deaths of men being only 2 more than those of women.

15,433 deaths—7,564 males, and 7,869 females—were attributed to diseases of the respiratory organs.

One in every 8·5 of the deaths registered was assigned to bronchitis, which disease killed 10,929 persons—5,104 males, and 5,825 females—thus showing the mortality among the latter as greater by 721 than in the former.

Pneumonia, or inflammation of the lungs, proved more fatal to men than to women, the respective numbers being 1,208 and 795.

1,074 deaths were returned as caused by asthma; 375 by pleurisy; 148 by laryngitis; and 904 were referred to lung disease unspecified.

The various diseases of the organs of digestion terminated fatally in 4,682 instances—2,534 males, and 2,148 females. Though gastritis, or inflammation of the stomach is not often met with in practice, yet 180 deaths were attributed to that disease. Inflammation of the bowels (enteritis) was the cause of 612 deaths. 270 deaths were referred to peritonitis, or inflammation of the serous covering of the intestines.

The deaths of 259 males and 155 females, were ascribed to ileus, under which heading deaths from obstruction of the bowels, constipation, &c., were included.

1,163 deaths were vaguely returned as caused by stomach diseases unspecified. Hepatitis or inflammation of the liver is stated to have been the cause of 162 deaths; jaundice of 240; and liver disease, unspecified, of 938.

The mortality from diseases of the urinary organs was more than three-fold greater among men than women; the deaths of males numbering 743 against 217 females.

Of the above number, 210 were caused by nephria or Bright's disease; 28 by nephritis or inflammation of the kidneys; 109 by diabetes.

Two males and 185 females died from diseases of the organs of generation.

Diseases of the organs of locomotion caused 205 deaths—117 males and 88 females.

Two hundred and forty-nine deaths were attributed to diseases affecting the integumentary system; of these, 19 were referred to phlegmon, 97 to ulcer, and the remainder to skin diseases unspecified.

IV. Developmental Diseases.

Under the above heading were tabulated 13,668, or 1 in every 6·8 of the total deaths, and representing a rate of mortality of 2·4 to 1,000 of the estimated population.

Two hundred and forty-six children who were prematurely born, died; 14 died from cyanosis, none having survived the fifth year. Spina bifida caused 17 deaths; the deaths of 42 children were returned under the head of other malformations; and 231 children were cut off during the period of dentition.

Twelve deaths were ascribed to paramenia or disordered menstruation.

The deaths from childbirth amounted to 606; and if the deaths from metria, or puerperal fever, be added, the total deaths resulting from child-bearing, will have been 879, so that for every 155 births registered, one mother died.

Eight thousand seven hundred and fifty-eight persons were said to have died of old age—3,603 men, and 5,155 women.

To atrophy and debility 3,742 deaths were attributed.

V. Violent Deaths.

The deaths of 4 persons in every 10,000 of the estimated population resulted from violence. The total number registered under the head of violent deaths was 2,210 or 1 in every 42·1 of all the deaths returned.

One thousand nine hundred and forty-two of the violent deaths were ascribed to accidental causes; 608 from fractures and contusions; 24 from gunshot wounds; 18 from cuts or stabs; 619 persons lost their lives by burns or scalds—285 males

and 334 females; 1 in every 150·5 of the total deaths registered, was from the effects of fire.

Accidental poisoning was the cause of 25 deaths.

The deaths from accidental drowning amounted to 440—344 males and 96 females.

71 deaths were caused by suffocation.

A man aged 38, and a woman aged 75, were killed by lightning.

The particular kind of accident was not specified in 137 instances.

Forty-eight deaths, including 13 cases of infanticide, were tabulated under the head of murder and manslaughter, 25 being referred to the former.

The deaths from suicide amounted to 84—64 males and 20 females; the number of persons who died by self-destruction was 15 to 1,000,000 of the estimated population.

The suicidal means resorted to were—gunshot wounds, 4 males; cuts or stabs, 18 males and 4 females; poison, 2 males and 1 female; drowning, 6 males and 5 females; hanging, 23 males and 7 females; and in the instances of 11 males and 3 females, the means adopted to commit suicide were not stated in the returns.

Two men were executed during the year.

One hundred and thirty-six of the violent deaths were not classed.

In 502 instances of sudden death, the cause was not ascertained.

The cause of death was unspecified, or so ill-defined as not to admit of classification in 6,504 instances, being equal to 1 in 14·3, or nearly 7 per cent. of the total deaths.

The non-specification of the cause of death varied in the returns from the eight divisions. In the North Midland Division the cause of death was ill-defined in 1 in 10; in the South-Eastern, 1 in 10·5; North-Western, 1 in 10·8; South-Western, 1 in 12·7; Western, 1 in 13·6; North-Eastern, 1 in 15; South-Midland, 1 in 18·6; while in the Eastern Division in only 1 in 33·7 of the deaths was the cause unspecified or ill-defined.

I have the honour to be,

Sir,

Your obedient servant,

W. M. BURKE.

To

The Registrar-General.

APPENDIX A.

CIRCULAR LETTER from the REGISTRAR-GENERAL to the Magistracy, the Clergy of all Denominations, the Members of the Public Press, and also to all other Subjects of Her Most Gracious Majesty in Ireland of every Rank and Class :—

MY LORDS AND GENTLEMEN,

I venture, on public grounds, respectfully to solicit your valuable and friendly aid in carrying out the provisions of the very important measures referred to in the accompanying Notice.

If now honoured by your generous support,—as I have been on so many occasions during the last nineteen years,—I confidently trust that Ireland will fully participate in the numerous advantages resulting from a general system of Registration of the Births, Deaths, and Marriages of her population, which experience has already shown to be of such incalculable value in England and Scotland,—and the great National importance of which, both in a Social and Sanitary point of view, it is scarcely possible to over estimate.

I have the honour to be,
My Lords and Gentlemen,
Your faithful and obliged Servant,

WILLIAM DONNELLY,
Registrar General.

GENERAL REGISTER OFFICE, DUBLIN,
December 7th, 1863.

NOTICE by the REGISTRAR-GENERAL of BIRTHS, DEATHS, and MARRIAGES: Furnished under the provisions of the Act 26th Vic., cap. 11, for the Registration of Births and Deaths;—the Act 26th and 27th Vic., cap. 90, to provide for the Registration of Marriages celebrated by the Roman Catholic Clergy;—and the Act 26th and 27th Vic., cap. 52, to make Compulsory the practice of Vaccination in Ireland.

Acts required to be done for the purpose of Registering any Birth or Death, occurring in Ireland, on and after the First day of January, 1864.

REGISTRATION OF BIRTHS AND DEATHS—26TH VIC. CAP. 11.

DISTRICTS.

Registration Districts.—On and after the First day of January, 1864, each Dispensary District of a Poor Law Union will be a Registrar's District for the Registration of Births and Deaths, until the same shall be sub-divided by the Registrar-General, in case it be found necessary for public convenience to make any sub-division. In the event of any alteration being made in a District, such alteration shall be published by the Registrar-General within the Union in which the District is situated, and elsewhere, as may be deemed expedient. The several Dispensary Districts which comprise a Poor Law Union will form a Superintendent Registrar's District, except in such cases as the Boundaries may be altered by the Registrar-General, with the approval of the Lord Lieutenant, of which due notice will be given.

Registrars.

Registrars of Births and Deaths.—The Medical Officer of each Dispensary District will be the Registrar of Births and Deaths within the said District. In the event of the Medical Officer declining to act as Registrar, the Guardians of the Union in which such District is situated shall appoint a fit person to the Office of Registrar. Notice of all Changes in the Office of Registrar will be given by advertisement in some Newspaper circulating in the County in which the District is situated. The Registrar is required to cause his name, with the addition of Registrar of Births and Deaths, and the Days and Hours at which he will attend his Residence or place of Business, to be fixed in some conspicuous position on or near the Outer-door of his Dwelling-house or known place of business. A list of the Names and Residences, or known place of Business of every Registrar of Births and Deaths under his superintendence shall be printed and published by the Superintendent Registrar. Births and Deaths may be Registered at a Dispensary Station or Vaccination Station, or at the place of Residence of the person or persons giving information to the Registrar of the District.

Registration of Births.

Information to be given respecting Births.—The persons required to give Information as to the Birth of any Child born in Ireland, on and after the First day of January, 1864, are the following:—

1. The Parents or Parent; or,
   In case of the death or inability of the Parents or Parent,
2. The Occupier of the House or Tenement in which, to his or her knowledge, such Child was born; or,
3. The Nurse; or,
4. Any person present at the Birth of such Child.

The particulars required to be stated to the Registrar are—

1. The Date and Place of Birth.
2. The Name (if any).
3. The Sex.
4. The Name and Surname, and Dwelling-place of Father.
5. The Name and Surname, and Maiden Surname of Mother.
6. The Rank, Profession, or Occupation of Father.

Each entry in the Register of Births must be signed by the Informant and the Registrar, and must show the qualification and residence of the person by whom the Information is given, and also the date of Registry.

Notices of all Births must be given to the Registrar of the District *within twenty-one days next after the Birth.* All persons required by this Act failing to give Notice of any Birth *within twenty-one days* will be liable to a penalty of *Twenty Shillings.* Information must be given to the Registrar of the several particulars required to be Registered upon the personal or written requisition of the Registrar at some Dispensary Station or Vaccination Station in his District, or at the Residence of the Parents or Persons giving Information, *within Three Calendar Months,* under a Penalty of *Forty Shillings.*

The Name given in Baptism may be Registered *within Six Calendar Months after Registration of the Birth,* by the Parent or Guardian of such Child, or other person procuring such Name to be given, on the delivery to the Registrar or Superintendent Registrar of the District in whose custody the Register of the Birth of the Child may then happen to be, of a Certificate according to Form C. in the said Act, signed by the Clergyman, Minister, or Officiating person who shall have performed the Rite of Baptism.

In the case of the Parents of any child not recognizing the Sacrament of Baptism, or Infant Baptism, when a Name shall have been given to such Child by its Parents or Guardians other than that by which it may have been Registered, such Parents or Guardians, *within Six Months after the Birth shall have been Registered,* may

deliver to the Registrar or Superintendent Registrar in whose custody the Register of the Birth of the Child may then happen to be, a Certificate according to Form F. to the said Act annexed, signed by such Parents or Guardians.

A Fee of *One Shilling* is payable to the Clergyman or other person from whom the Certificate as aforesaid is procured, and a Fee of *One Shilling* to the Registrar or Superintendent Registrar for Registering the Name of the Child.

After Six Calendar Months such Certificate as aforesaid shall be delivered to the Registrar or Superintendent Registrar, only with the written authority of one or more Justice or Justices of the Peace presiding at the Petty Sessions of the District in which such Parents or Guardians reside, or in the Police District of Dublin Metropolis, of one or more Divisional Justice or Justices within the said District A fee of *One Shilling* is payable to the Registrar or Superintendent Registrar on Registering the Name of such Child from the said Certificate.

Registry of Births after Three Months.—When the Birth of a Child shall not have been Registered within Three Months from the time it was Born, the person present at the Birth of the Child, or the Father or Mother, or Guardian thereof, may, *within* Six Calendar Months next after the Birth of such Child, make, before the Superintendent Registrar, a Declaration, in writing, of the particulars required to be known touching the Birth of such Child, according to the best of his or her knowledge and belief, and the Registrar shall, in the presence of the Superintendent Registrar, Register the Birth of such Child, on payment of a Fee of 2*s.* 6*d.* to the Superintendent Registrar, and of 2*s.* 6*d.* to the Registrar, unless the delay in the Registry of such Birth shall have been occasioned by default of the Registrar.

Limitation of the Time of Registry of Births.—After the expiration of Six Months following the Birth of any Child, no Registrar is authorized to Register the Birth of such Child.

New-born Children found Exposed.—Any person finding exposed any New-born Child is required to give Notice thereof to the Registrar.

Children Born at Sea.—The Births of Children, of Irish Parents, Born at Sea, are required to be notified to the Registrar-General, Dublin, by the Captain or Commanding Officer of every British Vessel, in which such Birth may take place, whereupon it will be entered in a book called "*The Marine Register Book of Births*," kept in the Office of the Registrar-General.

Children Born in Foreign Countries.—The Births of Children, of Irish Parents, which shall take place in Foreign Countries, if certified in the prescribed Form by the British Consul of the Country or District in which such Birth shall take place, will be entered in a book to be called "*The Foreign Register*," kept for the purpose by the Registrar-General.

Improper Registry of Birth after Six Months.—Persons knowingly causing to be Registered in any other way than is by the Act required, after the expiration of Three Months following the Birth, or after the expiration of Six Months from the Birth of the Child, except in the case of Children Born at Sea, or in a Foreign Country, shall be liable to a Penalty of *Five Pounds*.

Registration of Deaths.

Information to be given respecting Deaths.—On and after the First day of January, 1864, Information as to every Death which shall take place in Ireland is required to be given to the Registrar of the District in which the death has occurred, by the following persons:—

1. Some person present at the Death; or,
2. In attendance during the last illness of the person deceased; or,
3. The Occupier of the house or Tenement in which the Death took place; or. If the Occupier be the person who shall have died—then,
4. Some one or more persons residing in the house where the Death has occurred; or, if the Death has not happened in a house; then, by
5. Any person present at, or having a knowledge of, the circumstances attending such Death.

Notice of the Death must be delivered to the Registrar *within Seven Days next after its occurrence*, under a penalty of *Twenty Shillings*, in case of failure to give such Notice. The particulars to be Registered concerning such Death must be communicated to the Registrar, upon his personal or written Requisition, *within Fourteen Days after the day of the Death*, under a Penalty of *Forty Shillings* in case of failure.

The Registrar will attend, personally, to receive the necessary Information at some Dispensary or Vaccination Station within his District, or at the Residence of the person giving the Information.

The following are the particulars to be Registered —

1. The Date and Place of Death.
2. The Name and Surname of the Deceased.
3. The Sex.
4. The Condition as to Marriage, *i.e.*, Bachelor, Spinster, Widower, or Widow.
5. His or Her Age, last Birth-day.
6. The Rank, Profession, or Occupation.
7. The Certified cause of Death, and the Duration of Illness.

Each entry in the Register of Deaths must be signed by the Informant and the Registrar, and must show the qualification and residence of the person by whom the Information is given, and also the date of Registry.

Medical Certificate of Death.—Every duly qualified Medical Practitioner is required to forward to the Registrar, *within Seven Days after the Death* of the person whom he shall have attended in his last Illness, a Certificate setting forth the cause of Death. Forms of Certificate will be supplied by the Registrars of Births and Deaths.

Dead Bodies found Exposed.—The Coroner, in every case of a Dead Body found Exposed, shall give Notice to the Registrar of the District where the same was found, and if an Inquest is held on such Dead Body, the Jury shall inquire as to the particulars to be Registered concerning the Death, and the Coroner shall communicate the Finding of the Jury to the Registrar.

Deaths at Sea.—The Deaths of Her Majesty's *Irish* Subjects Dying at Sea, on Board of British Vessels, must be communicated to the Registrar-General, DUBLIN, by the Captains or Commanding Officers of Vessels on board of which such Deaths shall happen, the Deaths are then Registered by the Registrar-General, in "*The Marine Register Book of Deaths.*"

Deaths in Foreign Countries.—The Deaths of *Natives of Ireland*, which shall take place in Foreign Countries, if intimated to the Registrar-General within Twelve Months, duly Certified by the British Consul of the Country or District in which such Death has taken place, will be entered in a book kept in the General Register Office, to be called "*The Foreign Register.*"

*** *False Information.*—Every person wilfully giving False Information, touching any of the particulars required to be known and Registered, as to any Birth or Death, shall be subject to the same Pains and Penalties as if Guilty of Perjury—Sec. 55.

REGISTRATION OF MARRIAGES

Celebrated in Ireland by the Roman Catholic Clergy on and after the First day of January, 1864—26th and 27th Vic., cap. 90.

On and after the First day of January, 1864, any person whose Marriage is to be Celebrated by a Roman Catholic clergyman, is required to procure from the Registrar of the District, and to produce to the Clergyman by whom the Marriage

may be solemnized, a Certificate in which shall be inserted the following particulars:—

1. The Date when Married.
2. The Name and Surname of each of the parties Married.
3. Their respective ages.
4. Their condition, *i.e.*, whether Bachelor, Spinster, Widower, or Widow.
5. Their Rank, Profession, or Occupation.
6. The Residence of each of the parties at the time of their Marriage.
7. The Name and Surname of the Father of each of the parties.
8. The Rank, Profession, or Occupation, of the Father of each of the parties Married.

Every such Certificate must state the place in which the Marriage was solemnized, and be *signed by the officiating Clergyman, and also by the parties Married, and by two Witnesses.*

Every person whose Marriage has been celebrated by a Roman Catholic Clergyman, must, *within three days after his or her Marriage*, deliver, or send by Post, the Certificate containing the necessary particulars, to the Registrar of the District wherein the Marriage was solemnized. In case of failure to deliver or send such Certificate to the Registrar, the Husband shall be liable to a Penalty not exceeding *Ten Pounds.* Persons having their Marriage Registered as aforesaid, may obtain a Certified Copy of the Registry, on payment of the Fee of *Three Shillings and Sixpence.*

COMPULSORY VACCINATION—26TH AND 27TH VIC., CAP. 52.

Registration of all Children Successfully Vaccinated on and after the First day of January, 1864.

On and after the 1st day of January, 1864, each Registrar of Births and Deaths is required to Register every case of successful Vaccination occurring within his District. To enable him so to do, the Medical Practitioner by whom the *Vaccination* shall have been *successfully performed*, shall transmit to such Registrar a Certificate to that effect. Search may be made in the Register Book, and a Certified Copy of any Entry therein may be obtained on payment of *One Shilling for each Search*, and *Sixpence* for each Certificate.

Every Registrar of Births and Deaths is required to give Notice to the Father or Mother, or in the event of the Death, Illness, Absence, or Inability from Sickness or otherwise, of the Father or Mother, to the person having the care, nurture, or custody, of any Child whose Birth has been Registered, but whose successful Vaccination has not been Registered as aforesaid, requiring that the said Child shall be Vaccinated, and stating the days, hours, and places at which the Medical Officer will attend for the purpose of Vaccination. If, after such Notice, the Father, Mother, or person having the care of the said Child, shall not cause it to be Vaccinated, the party offending shall forfeit a sum not exceeding *Ten Shillings.*

Every Registrar failing to Register any case of successful Vaccination duly certified to him, or who shall Register the Vaccination of a Child which shall not have been successfully Vaccinated, shall forfeit a sum not exceeding *Twenty Shillings* for each such case.

PENALTIES REFERRED TO IN THE FOREGOING NOTICE.

BIRTHS AND DEATHS—26 VIC., CAP. 11.

1. Any person failing to give notice of a Birth *within Twenty-one days*, or of a *Death within Seven days*, after these events, respectively, is liable to a Penalty of *Twenty Shillings.*—Sec. 60.

2. Any person failing to give the necessary information on being required so to do, by the Registrar of Births and Deaths, as to *Births within Three Months*, and as to *Deaths within Fourteen Days*, is liable to a Penalty of *Forty Shillings*.—Sec. 61.

3. Any person failing to give notice of finding exposed any New-born Child, or Dead Body, is liable to a Penalty of *Twenty Shillings*.—Sec. 62.

4. Any person wilfully giving, or causing to be given, any false information to the Registrar respecting any Birth or Death, will be subject to the *same pains and penalties* as if Guilty of Perjury.—Sec. 55.

5. Any person improperly procuring the Registry of the Birth of a Child after Six Months from its Birth, is liable to a Penalty of *Five Pounds*.—Sec. 59.

6. Persons are not liable to the Penalty of *Twenty Shillings* for Non-service of notice on the Registrar of Births and Deaths, if the Notice shall have been sent, properly addressed, through the Post Office.—Sec. 63.

MARRIAGES.—26 AND 27 VIC., CAP. 90.

1. Every Husband failing to deliver to the Registrar of Marriages a Certificate of his Marriage, *within three days* after its celebration, will be liable to a Penalty of *Ten Pounds*.—Sec. 11.

2. Any person inserting or causing to be inserted in any Certificate of Marriage any false entry relating thereto, will be subject to the *same Pains and Penalties* as if Guilty of Perjury.—Sec. 22.

COMPULSORY VACCINATION.—26 AND 27 VIC., CAP. 52.

1. All persons having the care of Infants are required to have them Vaccinated *within Six Months after Birth*, under Penalty of *Ten Shillings*.—Sec. 8.

2. Every Registrar failing to Register any case of successful Vaccination certified to him, or who shall Register the Vaccination of any Child who has not been *successfully Vaccinated*, shall forfeit a sum not exceeding *Twenty Shillings*.

☞ Copies of all Forms and Certificates referred to in the foregoing Notice, may be procured from the Registrars of Births, Deaths, and Marriages, of the several Districts.

WILLIAM DONNELLY,
Registrar-General.

General Register Office, Dublin,
30th November, 1863.

APPENDIX B.

NOTICE to all CAPTAINS and COMMANDING OFFICERS of British Vessels, regarding REGISTRY of BIRTHS and DEATHS at SEA.

The Registrar-General of Births, Deaths, and Marriages in Ireland, hereby begs to direct the attention of all Captains or Commanding Officers of British Vessels to the following Provisions of the Act of the 26th Vic., cap. 11, intitled "An Act for the Registration of Births and Deaths in Ireland," namely—

In the 39th Section it is enacted, that—

"If any child of an *Irish* parent shall be born at sea after the Thirty-first day of *December*, One Thousand Eight Hundred and Sixty-three, on board of a *British* vessel, the Captain or Commanding Officer of such vessel shall forthwith make a minute in the log book or otherwise of the several particulars hereby required to be registered touching the Birth of such child, so far as the same may be known, and of the name of the vessel in which the Birth took place, and shall on the arrival of such vessel in any port of the United Kingdom, or by any other earlier opportunity, send a certified copy of such minute through the Post Office to the Registrar-General in *Dublin*, who shall

file the same, and shall cause a true and correct copy thereof, verified by his own signature, to be entered in a book to be kept for that purpose in the General Register Office, to be called the 'Marine Register Book of Births;' and the Registrar-General shall keep such book with the other Registers according to the provisions of this Act."

In the 40th Section of the same Act it is enacted, that—

"If any of Her Majesty's *Irish* subjects shall die at sea on board of a *British* vessel after the said Thirty-first day of *December*, One Thousand Eight Hundred and Sixty-three, the Captain or Commanding Officer of the vessel on board of which such Death shall have happened shall forthwith make a minute in the log book or otherwise of the several particulars herein required to be inserted in the Register touching such Death, so far as the same may be known, and of the name of the vessel wherein such Death took place, and shall, on the arrival of such vessel in any port of the United Kingdom, or by any other earlier opportunity, send a certified copy of such minute through the Post Office to the Registrar-General in *Dublin*, who shall file the same, and shall cause a true and correct copy thereof to be entered in a book to be kept for that purpose in the General Register Office, to be called the 'Marine Register Book of Deaths;' and the Registrar-General shall keep such book with the other Registers according to the provisions of this Act."

The following are the Schedules containing the particulars required to be inserted in the Register, so far as the same may be known :

186 , Birth of a Child at Sea, on Board of *

Date and Place of Birth.	Name (if any).	Sex.	Name and Surname and Dwelling-place of Father.	Name and Surname and Maiden Surname of Mother.	Rank or Profession of Father.	Signature of the Captain or Commanding Officer of the Vessel.

* 186 , Death at Sea, on Board of *

Date and Place of Death.	Name and Surname.	Sex.	CONDITION (Whether Married, Bachelor, Spinster, Widower, or Widow).	Age last Birthday.	Rank, Profession, or Occupation.	Cause of Death and Duration of Illness.	Signature of the Captain or Commanding Officer of the Vessel.

The Minute should be made without delay, in the Ship's log, of all cases of Birth or Death which may occur in the Vessel, and a copy of such Minute, certified in the following manner, or to the like effect, must, on the arrival of such Vessel in any port in the United Kingdom, or by any other earlier opportunity, be sent through the Post Office, addressed to "The Registrar-General of Births, Deaths, and Marriages, General Register Office, Dublin."

"I hereby certify that this is a true copy of the Minute made in the log of * on the day of 186 .

"Witness my hand, this day of 186 .

{ *Captain or*
{ *Commanding Officer*

of * ."

NOTE.—The word "*Irish*" includes only natives of Ireland; the word "*British*" includes vessels belonging to all parts of the British Empire.

* Here state the name of the Vessel.

Appendix C.

General Specification for a "Register Office," &c., to be "made in some part of the existing Poorhouse."

Register Office.—One of the Probationary Wards is to be appropriated entirely to the purposes of a Register Office; and of one portion of the room a Strong Closet is to be built off and strengthened with additional walling, as shown in the accompanying plan.

The fittings in the Probationary Ward are to be all removed, and replaced by fittings suitable to the purposes of the office.

A new boarded floor is to be laid down, the walls to be cleaned of the white-wash, and plastered, a deal skirting to be fixed round the room, the ceiling to be lathed and plastered.

A plain stone chimney-piece and hearthstone, and a plain strong half-register fire-grate are to be provided for the fire-place.

The window to have inch-ledged shutters and fastenings, and a deal window-board.

Strong Closet.—The Strong Closet is to have a flagged floor, and to be arched over, one window with iron frame and iron casement (to open), stone sill, jamb and head inch round iron bars outside, very securely fixed in head and sill of opening, the casement to have secure fastening. The inside is to be fitted up with three rows of iron shelving fixed securely on strong iron bearers.

The doorway to the Strong Closet is to have a strong iron door and frame, and strong closet door lock and two keys. Three openings, twelve inches by six inches, are to be formed in the wall between the "Register Office" and Strong Closet, and two iron perforated plates in each, one in each face of the wall for ventilation. The walling and arching to be plastered.

Appendix D.

General Register Office, Dublin.

General Rule respecting the Qualifications of Superintendent Registrars of Births and Deaths, and also of Marriages, under the Acts 26 Vic., cap. 11; and 26 & 27 Vic., cap. 90.

Whereas by an Act passed in the 26th year of the Reign of Her present Majesty, intituled "An Act for the Registration of Births and Deaths in Ireland," it is enacted "that the Clerk of the Union for the time being shall, if he shall think fit to accept such office, and have such qualifications as the Registrar-General may by any General Rule declare to be necessary, be the Superintendent Registrar thereof, and that in the event of his refusal or disqualification to act in that capacity, the Guardians of the Union shall appoint a person, with such qualifications as the Registrar-General may by any General Rule declare to be necessary, to be the Superintendent Registrar." And whereas by an Act passed in the 26th and 27th years of the reign of Her present Majesty, cap. 90, intituled "An Act to provide for the Registration of Marriages in Ireland," it is enacted that the Superintendent Registrar of Births and Deaths appointed, and acting from time to time, shall, if he think fit to accept the office, be the Superintendent Registrar of Marriages under said Act. Therefore, in pursuance of the provisions of the said Acts, and by virtue of the power and authority vested in me as Registrar-General, I do hereby declare the following General Rule, as necessary to be observed touching the qualifications of all and

every person who shall accept, or be appointed to the office of Superintendent Registrar of Births and Deaths, or of Superintendent Registrar of Marriages, under the provisions of the said Acts, that is to say—

General Rule.—1. Every Superintendent Registrar shall reside, or have a known place of business within the district for which he is appointed, and shall not be a member of any Board of Guardians by which he shall be appointed Superintendent Registrar, unless upon a representation to be made in writing, and signed by two-thirds of the members of such Board, it shall be made to appear to my satisfaction—to be signified under my hand—that there is no person resident within the district capable and willing to undertake the said office of Superintendent Registrar; and he shall not be engaged in any profession or occupation which may be considered by the Registrar-General as incompatible with the discharge of his duties.

2. Every Superintendent Registrar shall be above the age of twenty-three years, and shall not be an uncertified bankrupt, or have applied for, or obtained within twelve calendar months before his acceptance of, or appointment to, the office of Superintendent Registrar, the benefit of any Act or Acts of Parliament for the Relief of Insolvent Debtors.

3. Every Superintendent Registrar shall be prepared to comply with the regulations which may from time to time be made and approved for the discharge of his duties, under the provisions of the said Acts.

And I do hereby reserve to myself as Registrar-General, as aforesaid, the power of revoking, altering, or varying this General Rule, or any portion thereof, and of substituting any other in place thereof, as it may hereafter appear to me to be necessary for the interests of the public service.

In witness whereof I have hereunto set my hand, this Twenty-first day of November, in the year of our Lord 1863.

WILLIAM DONNELLY, *Registrar-General.*

APPENDIX E.

General Register Office, Dublin.

GENERAL RULE respecting the QUALIFICATIONS of REGISTRARS of BIRTHS and DEATHS, and also of MARRIAGES, under the Acts 26 Vic., cap. 11; and 26 & 27 Vic., cap. 90.

WHEREAS by an Act passed in the 26th year of the Reign of Her present Majesty, intituled "An Act for the Registration of Births and Deaths in Ireland," it is enacted that "the Medical Officer for the time being of each Dispensary District not subdivided, as aforesaid, shall, if he shall think fit to accept such office, and have such qualifications as the Registrar-General may by any General Rule declare to be necessary, be the Registrar of the said district," and that, "in the event of his refusal or disqualification to act in that capacity, the Guardians of the Union in which such Dispensary District is situated shall appoint a person with such qualifications as the Registrar-General may by any General Rule declare to be necessary, to be the Registrar of such district." And whereas by an Act passed in the 26th and 27th years of the reign of Her present Majesty, cap. 90, intituled "An Act to provide for the Registration of Marriages in Ireland," it is enacted that the Registrar of Births and Deaths appointed, and acting from time to time, shall, if he shall think fit to accept the office, be the Registrar of Marriages under said Act. Therefore, in accordance with the provisions of the said Acts, and by virtue of the authority given to me as Registrar-

General, I hereby declare the following General Rule, as necessary to be observed regarding the qualifications of every person who shall accept or be appointed to the office of Registrar of Births and Deaths, or of Registrar of Marriages, under the said Acts, that is to say—

General Rule.—1. Every Registrar shall reside or have a known place of business within the district for which he is appointed Registrar, and shall not be a member of any Board of Guardians by which he shall be appointed Registrar, unless upon a representation to be made in writing, and signed by two-thirds of the members of such Board, it shall be made to appear to my satisfaction—to be signified under my hand—that there is no person resident within the district capable and willing to undertake the said office of Registrar; and he shall not be engaged in any profession or occupation which may be considered by the Registrar-General as incompatible with the discharge of his duties as Registrar.

2. Every Registrar shall be above the age of twenty-three years, and shall not be an uncertificated bankrupt, or have applied for, or obtained, within twelve calendar months before his acceptance of, or appointment to, the office of Registrar, the benefit of any Act or Acts of Parliament for the Relief of Insolvent Debtors.

3. Every Registrar shall be prepared to comply with the Regulations made and approved for the discharge of his duties, under the provisions of the said Acts.

And I do hereby reserve to myself, as Registrar-General, the power of revoking or altering this General Rule, or any portion thereof, and of substituting any other, as may hereafter appear to me to be necessary for the interests of the public service.

In witness whereof I have hereunto set my hand, this Twenty-first day of November, in the year of our Lord 1863.

WILLIAM DONNELLY, *Registrar-General.*

APPENDIX F.

General Register Office, Dublin,
23*rd November*, 1863.

GENTLEMEN,

I beg to enclose the copy of a circular to the Clerk of your Board, in which I request him to inform me whether it is his intention to accept the office of Superintendent Registrar of Births and Deaths, and also that of Superintendent Registrar of Marriages, under the option given to him by the Acts for the Registration of Births and Deaths, 26 Vic., cap. 11, and for the Registration of Marriages, 26 & 27 Vic., cap. 90.

I also enclose the copy of a circular addressed by me to the Medical Officer of each Dispensary District within your Union, in which I request these gentlemen to inform me whether it is their intention to accept the office of Registrar of Births and Deaths, and also of Marriages, under the option given to them by the Acts above named.

In case it may become necessary for the Guardians to elect a Superintendent Registrar, or a Registrar of Births and Deaths, or of Marriages for any district, I herewith send copies of the "General Rules" declared by me under the provisions of the said Acts, setting forth the qualifications requisite in persons holding the office of Superintendent Registrar, and that of Registrar of Births and Deaths, and Marriages; and I beg to inform you that no person accepting, or appointed to such offices, will be entitled to hold the same, unless he shall possess the qualifications required by said Rules, or by any future "General Rules" which may be declared by me to be necessary for the interests of the public service.

I venture, on public grounds, to solicit your valuable aid and co-operation in carrying out the important provisions of the Acts for the Registration of Births and Deaths, and Marriages, above referred to, which will come into operation on the 1st January, 1864, and of which I herewith forward copies—the receipt of which I beg you will be so good as to acknowledge.

I have the honour to be, gentlemen, your faithful servant,

WILLIAM DONNELLY, *Registrar-General.*

The Chairman and Board of Guardians
of the Union of ———

APPENDIX G.

REGISTRATION of MARRIAGES celebrated by the ROMAN CATHOLIC CLERGY, 26 and 27 Vic., cap. 90.

General Register Office, Dublin,
31st *December*, 1863.

SIR,

I request you will furnish each Parish Priest within your District—who may apply to you for the same—with *six blank* Forms of Certificates of Marriage, which you will carefully take from the Certificate Book forwarded to you, and also with *six* of the printed Envelopes, addressed to "The Registrar of Births, Deaths, and Marriages."

By this course—which has been strongly recommended to me by many Dignitaries of the Roman Catholic Church, and approved of by the Law Officers of the Crown—the convenience of the Catholic Population, especially those of the poorer classes, will be greatly promoted in regard to the Registration of their Marriages.

A *further supply* of Certificates *will be forwarded on your application*—from which *blank Forms* will be furnished by you, from time to time, to those Parish Priests within your District who may require them. You will request each Rev. Gentleman obtaining the Certificates to give you a receipt for them, (on the accompanying Forms), in order that you may be able to account to me for all the Certificates entrusted to your care; and you will furnish me, at the end of each month, with the Names and Addresses of those Clergymen to whom you supply them. You will observe they are on *Water-marked* paper, with the words "Certificate of Marriage" printed thereon.

I beg to say that I feel assured you will discharge the duties of your office with zeal, discretion, and courtesy, and thus largely contribute to the success of the very Important Measures, in the carrying out of which you have so readily undertaken to assist by accepting the office of Registrar.

I am, Sir,

Your obedient Servant,

WILLIAM DONNELLY,
Registrar-General.

To

The Registrar of
Births, Deaths, and Marriages.

INDEX OF SUPERINTENDENT REGISTRARS' DISTRICTS.

Topographical Description of the Eight Divisions, ... xxxiii
Estimated Population of Ireland from 1801 to 1865, ... xxxv

ABSTRACTS:—

Marriages registered in Ireland in each of the Divisions and Superintendent Registrars' Districts, also in each Province and County, in 1865, distinguishing Roman Catholic from Protestant Marriages, and giving the Total Number registered in each Quarter of the Year; the Conjugal Condition of Persons Married; the Number of Minors, and of those who signed the Registers by Marks, ... 2–11

Ages of 27,820 Persons married in 1865, distinguishing those of Bachelors, Spinsters, Widowers, and Widows, ... 12, 13

Marriages, Births, and Deaths registered in each of the Divisions and Superintendent Registrars' Districts, and in each Province and County in 1865; also Births and Deaths, and Excess of Births over Deaths in each of the Registrars' Districts of Ireland, distinguishing the Sexes and Illegitimate Births throughout, ... 14–37

Page

Births registered in the Divisions and Superintendent Registrars' Districts, and in the Provinces and Counties (distinguishing Males and Females) in each of the Four Quarters of 1865, ... 40–49

Deaths registered in each of the Four Quarters of 1865 (distinguishing Males and Females), in Divisions and Superintendent Registrars' Districts, also in Provinces and Counties, 50–59

Deaths of Males and Females at different Ages registered in 1865, in Divisions and Superintendent Registrars' Districts, also in Provinces and Counties, . . . 60–67

Causes of Death of Males and Females in Ireland, at different periods of life, in 1865, . 68–75

Supplementary Table of Causes of Death of Males and Females, at different periods of life, in 1865, ... 76–79

Causes of Death of Males and Females in Ireland, and in each of the Divisions in 1865, . 80–87

Deaths from several Zymotic and other Causes in 1865, in the Divisions and Superintendent Registrars' Districts, and in the Provinces and Counties, ... 88–91

APPENDIX.

Letter to the Registrar-General on the Causes of Death in Ireland in 1865, from WILLIAM M. BURKE, Esq., F.C.P.I., 95–98

Index of Superintendent Registrars' Districts, and of Registrars' Districts, 99–105

REPORT

TO

His Excellency JOHN POYNTZ, EARL SPENCER, K.G., &c., &c.,
Lord Lieutenant-General and General Governor of Ireland.

MAY IT PLEASE YOUR EXCELLENCY,—

As directed by the provisions of the 26 Vic., cap. 11, sec. 49, the 26 & 27 Vic., cap. 90, sec. 16, and the 7 & 8 Vic., cap. 81, sec. 56, I have the honour to transmit to your Excellency, in order that the same may be laid before Parliament, General Abstracts of the Births, Deaths, and Marriages registered in Ireland during the year 1865.

A General Abstract of the number of Births, Deaths, and Marriages, registered in the year 1865, was presented to Parliament in the Session of 1866. The Report now submitted contains detailed Tables of the ages and condition of persons married, of Births, distinguishing legitimate from illegitimate; and of Deaths, and their causes.

The Acts for the Registration of Births and Deaths, and Roman Catholic Marriages, came into operation on the 1st of January, 1864, but that for the Registration of Protestant Marriages of all denominations has been in force since the 1st of April, 1845.

For the purposes of Registration, the country has been divided into 163 Superintendent Registrars' Districts—co-extensive with the Poor Law Unions—and into 770 Registrars' Districts, which, with a few exceptions, are of equal extent, with the Dispensary Districts formed under the Medical Charities Act. Of the Registrars, 713 are Medical Officers of Dispensary Districts. In twenty-one instances a Medical Officer is Registrar for two Districts, the remaining (36) have been appointed by the Boards of Guardians.

GENERAL SUMMARY.

The *estimated* population in the middle of 1865 was 5,641,086; the persons whose marriages were registered, amounted to 61,604; the number of marriages being 30,802; children born alive whose births were registered, amounted to 144,970; and the number of deaths registered was 93,154. The emigrants from Ireland during the year 1865 amounted to 101,497. In the previous year—1864—there were *registered* 27,406 marriages, 136,414 births, and 93,144 deaths; the number of emigrants was 114,169.

MARRIAGES.

30,802 marriages were registered during 1865; being in the proportion of ·546 marriages to every 100 persons, or of 1 marriage to every 183 persons, of the *estimated* population. The ratio in England was 1 in 113, or ·884 per cent., and in Scotland 1 in 133 or ·753 per cent. of the estimated population.

1,027 men and 5,129 women contracted marriage before they had attained their twenty-first year. The proportion of males married under age was 3·33; of females, 16·65 per cent. The proportions in England and Wales in 1865 were—males, 6·69, and females, 20·08 per cent. In Scotland the proportions were 7·16 males and 21·26 per cent. females.

Of widowers, 3,321, and of widows, 1,763 were re-married; the proportion being 10·78 per cent. of widowers, and 5·72 per cent. of widows, to the total marriages. The like proportions in England and Wales were 13·93 widowers, and 9·24 per cent. widows. In Scotland the proportions were, widowers, 11·50, and widows, 5·26 per cent.

According to the provisions of the Registration Acts, every registry of a marriage is required to be signed by the parties married, two witnesses, and the officiating clergyman. A test of the elementary education of the persons contracting marriage is thus afforded by comparing the number who write their names in the registers, with the number who make a mark. Of 61,604 persons married in 1865, 28,359 (12,445 men and 15,914 women) signed the registers with marks; being in the proportion of 46·0 per cent., or 1 in every 2·48 of the males, and 1 in every 1·94 of the females married.

The like rates in England and Wales for the same year were 1 in 4·45 males, and 1 in 3·21 females; and in Scotland 1 in 8·75 males and 1 in 4·50 females.

The marriage registers contain a column in which the age of each of the parties married is inserted; but as the law only requires it to be stated whether the parties are "of full age" or "minors," the precise age at marriage is not always entered in the registers. In 1865 the exact ages of both parties were given in 13,910 instances. Of these 12,540 were bachelors, and 13,196 spinsters; 1,370 were widowers, and 714 widows. The largest number of wives was married between 21 and 30—the number being 8,480, or more than one-half of the whole number whose ages are recorded. The largest number of husbands—8,526—is also found to have been married between 21 and 30 years of age.

Three hundred and seventy bachelors were married to widows, both of whose ages at the time of marriage are recorded. Of these, 186 of the widows and 176 of the bachelors married between 25 and 35 years of age. Of 1,026 widowers who married spinsters, 483 of the latter were between 25 and 35 years of age; whilst the largest number of the widowers on their re-marriages ranged chiefly between 30 and 45.

Of widowers and widows married, whose ages at the time of marriage are stated, there were 344 couples. Of these the largest number of widows appears to have been between 40 and 50, and of widowers between 45 and 55. Fifteen widowers and two widows were married when they were above 70 years old.

The proportion per cent. of marriages to the estimated population, and of persons married who wrote their names in the registers; also of minors,

widowers, and widows, are given in the following table, for the several registration divisions:—

TABLE I.—*The Proportional Number of Marriages in the Eight Divisions of Ireland during the years* 1864 *and* 1865, *of Persons who Signed their Names, of Persons not of Full Age, and of Re-marriages.*

The extent and position of each of these divisions are specified at page xxxiii.

Of the total number of marriages registered (30,802) 21,782 were celebrated by Roman Catholic clergymen, and entered in the register books by the Registrars in accordance with the 26th and 27th Vic., cap. 90; and 9,020 marriages were of the various Protestant persuasions. Of the latter marriages 5,064 were in churches and chapels of the Established Church, 2,709 in Presbyterian Meeting-houses, 165 in "Registered Buildings," 1,062 in the Registrars' offices, 15 according to the usages of the Society of Friends, and 5 marriages were of members of the Jewish persuasion. Of the entire number of marriages in 1865 there were contracted in the quarter ending the last day of March, 12,308; of June, 5,659; of September, 5,854; of December, 6,981.

The following table gives a statement showing in continuation of the return in my report for 1864, the number of marriages solemnized in Ireland under the Marriages Act of 1844, distinguishing the mode of celebration:—

TABLE II.—*The Number of Marriages registered under 7 & 8 Vic., c. 81, in each Year, from 1st April, 1845, to 31st December, 1865, and the Mode in which the Marriages were solemnized.*

Years ended 31st December	Marriages. According to the Rites of the Established Church. Special Licence.	Licence.	Banns.	Registrar's Certificate.	Not stated by which of the foregoing Forms.	Total.	Not according to the Rites of the Established Church. In Registered Presbyterian Meeting-houses.	In Registered Buildings.	In the Registrars' Offices.	Society of Friends.	Jews.	Total.	Total Marriages.

There is not any return made to me of the places of worship belonging to Roman Catholics in which marriages are celebrated; but under the provisions of the 7th & 8th Vic., cap. 81, I am enabled to state respecting other religious persuasions, that there were 1,454 Churches and Chapels of the Established Church, 574 registered Presbyterian Meeting-houses, and 192 Registered Buildings belonging to various denominations, in which marriages might lawfully be solemnized, on the 31st December, 1865. During the year 1865 there was an increase of three in the number of such places in the Established Church; of one in the Presbyterian Church, and of four in other religious communities. The "Registered Buildings" belong to the following denominations:—

Denominations.	Number of Places of Worship.
Wesleyan Methodists,	99
Reformed Presbyterians,	33
Independents,	21
Baptists,	12
Seceders,	9
United Presbyterians,	5
Moravians or United Brethren,	5
Methodists New Connexion,	5
Church Methodists,	1
Covenanters,	1
Evangelical Union,	1
Total,	192

* The 7 & 8 Vic., c. 81, came into operation 1st April, 1845.

The following Table shows by Divisions and Registrars' Districts the number of places of worship in which marriages (under the 7 & 8 Vic., cap. 81) may be solemnized in each District or Union, distinguishing the religious denominations:—

During the year 1865 there were issued by the Registrars, 736 Licences for Marriage in Registered Buildings, and in the Registrars' offices.

The number of Marriage Licences issued by the licensing Ministers of the several Presbyterian bodies is given in the following summary:—

Presbytery or Synod.	Number of Licensing Ministers on 31st December, 1865.	Number of Registered Meeting-houses on 31st December, 1865.	Number of Licences issued.
1. General Assembly of the Presbyterian Church in Ireland,	114	533	2,604
2. Remonstrant Synod of Ulster,	7	22	57
3. Presbytery of Antrim,	4	10	29
4. United Presbytery or Synod of Munster,	4	4	[illegible]
5. Northern Presbytery of Antrim,	1	5	12
Total,	130	574	2,704

BIRTHS.

The births registered in Ireland during 1865, amounted to 144,970. Of these, 74,386 were males, and 70,584 females, being in the proportion of 105·4 boys to every 100 girls. In England, in the same year, the number of males to 100 females whose births were registered was 104·0; and in Scotland 106·1.

The rate per cent. of births to the *estimated* population was 2·570. In England the rate was 3·564, and in Scotland 3·605.

There were 5,370 illegitimate births, of which 2,757 were those of males, and 2,613 females; the proportion to the total number of births being 3·7 in every 100. The rate in England was 6·2, and in Scotland 9·9 per cent. The highest rates, 6·4 and 5·2, of illegitimate children in every 100 born, occurred in the North-Eastern and South-Eastern Divisions respectively.

The following table shows the proportion of legitimate and illegitimate births *registered* in each of the eight Divisions in 1864 and 1865.

TABLE IV.—*The Per-centage of Legitimate and Illegitimate Births registered in Ireland during the years* 1864 *and* 1865, *by Divisions.*

Divisions.	Proportion per cent. of Legitimate Births.		Proportion per cent. of Illegitimate Births.	
	1864	1865	1864	1865
North-Eastern,	93·8	93·6	6·2	6·4
North-Western,	96·4	96·8	3·6	3·2
Eastern,	96·6	96·9	3·4	3·1
North Midland,	97·3	97·5	2·7	2·5
South Midland,	95·7	96·4	4·3	3·6
Western,	98·1	98·3	1·9	1·7
South-Eastern,	94·9	94·8	5·1	5·2
South-Western,	97·6	97·5	2·4	2·5

38,320 births were registered during the quarter ended 31st March; 39,109 in that ended 30th June; 34,045 during that ended 30th September; and 33,496 in that ended 31st December.

DEATHS.

The deaths registered in 1865 amounted to 93,154, of which 46,246 were males, and 46,908 females, being in the proportion of 1·651 per cent. of the *estimated* population, or in the ratio of 1 *registered* death to every 61 persons. The proportion in England for the same year was 2·339 per cent., or 1 in 43; and in Scotland 2·260 per cent., or 1 in 44.

The following table shows the per-centage of mortality at different ages :—

TABLE V.—*The Mortality per Cent. at each Age-period, according to the Registration of Deaths in Ireland, during the Years* 1864 *and* 1865, *by Sexes.*

Sexes.		Ages.											
		0—	5—	10—	15—	25—	35—	45—	55—	65—	75—	85—	95 and upwards.
Males,	1864	28·65	4·23	2·32	7·57	6·19	5·78	7·76	11·51	12·30	10·11	2·97	·61
	1865	29·13	4·51	2·32	7·58	6·38	5·88	7·76	10·76	12·44	9·62	3·04	·58
Females,	1864	25·20	4·28	2·37	6·90	6·55	6·03	7·80	11·81	13·74	11·23	3·36	·73
	1865	25·89	4·62	2·41	7·07	6·64	6·13	7·84	11·24	13·62	10·53	3·25	·76
Males and Females,	1864	26·92	4·25	2·34	7·24	6·37	5·91	7·78	11·66	13·02	10·68	3·16	·67
	1865	27·50	4·57	2·37	7·32	6·51	6·00	7·80	11·00	13·03	10·08	3·15	·67

Of the persons whose deaths were registered during the year 27·50 in every 100 were children under 5 years old—of which 29·13 per cent. were males, and 25·89 per cent. females. 13·24 per cent. of the men, and 14·54 per cent. of the women, whose deaths were registered had passed their 75th year. 58 of the males and 76 of the females in every 10,000 were stated in the returns to have been over 95 years of age.

EMIGRATION.

During the year 1865 the number of emigrants who left the ports of Ireland amounted to 101,497; of these 55,214 were males and 46,283 females. Of the whole number 20,524, or 20·2 per cent., were from Leinster; 37,426, or 36·9 per cent., from Munster; 22,301, or 22·0 per cent. from Ulster; and 12,477, or 12·3 per cent., from Connaught: 8,769 persons, or 8·6 per cent., did not state the county or province to which they belonged.

METEOROLOGY.

The following meteorological observations, taken at the Ordnance Survey office,* Phœnix Park, Dublin, during the year 1865, have been furnished by Captain Wilkinson, R.E., by direction of the Superintendent of the Ordnance Survey.

The barometer was highest during the year 1865, at 9.30, A.M., on the 15th of December, when it stood at 30·827,—the wind blowing from the S.W.; it was lowest on the 14th of January, at the same hour, with the wind from the W.N.W.,—when it was 28·540 inches.

The highest temperature in the air during the year was 83·9° on the 22nd of June, and the lowest 20·4° on the 20th of January. Rain or snow fell on 178 days, being nearly six months of wet days in the year; the greatest rain-fall in 24 hours was 1·355 inches on the 10th of August, with the wind from the S.W. The prevailing wind was from the W., from which point it blew for 99 days; from the S.W. it came for 75 days; from E., 60; S., 26; S.E., 25; N., 25; N.E., 23; and N.W., 18; and it was calm on 14 days at 9·30, A.M. The total pressure of the W. wind was

* Latitude, 53° 21′ 44″·65 North. Longitude, 6° 21′ 6″·35 West. Height above the sea, 158·8 feet.

147·58 lbs., being an average of 1·49 lbs. to the square foot. The strongest wind blew from the S.W. on the 30th December, when the pressure was 36 lbs. per square foot.

I beg here to repeat the observations made in my Report to your Excellency for 1864, with respect to the working of the Acts for the Registration of Births, Deaths, and Marriages in Ireland, as I regret to state the numbers of these events registered in 1865 do not show any satisfactory increase compared with the previous year:—

"In several instances prosecutions have been resorted to with some advantage; but notwithstanding the exertions made to induce a general compliance with the law throughout the country, numerous cases of neglect to register births and deaths have been reported to me by the District Registrars, but frequently at too late a period after their occurrence to allow of the parties being proceeded against at the Petty Sessions.

"I regret to add that the registration of marriages under the 26th & 27th Vic., cap. 90, is not at all satisfactory in some Districts, owing to the Clergy who have celebrated the marriages having declined to sign the necessary certificates.

"The marriages solemnized under the provisions of the 7th & 8th Vic., cap. 81 which came into operation in 1845, are, I believe, all registered.

"The following are the ratios of Births, Deaths, and Marriages to population in different countries compared with the ratio in Ireland in 1864 [and 1865]:—

Countries.	Ratio to Population.		
	Births.	Deaths.	Marriages.
IRELAND [in 1864],	1 in 42	1 in 61	1 in 207
IRELAND [in 1865],	[1 in 39]	[1 in 61]	[1 in 183]
England,	1 „ 28	1 „ 42	1 „ 116
Scotland,	1 „ 28	1 „ 42	1 „ 137
Sweden,	1 „ 30	1 „ 50	1 „ 145
Prussia (Old Provinces),	1 „ 24	1 „ 38	1 „ 116
Hanover,	1 „ 30	1 „ 44	1 „ 124
Wurtemburg,	1 „ 23	1 „ 31	1 „ —
Hanse Towns: Bremen,	1 „ 28	1 „ 37	1 „ 105
Holland,	1 „ 30	1 „ 42	1 „ 127
France,	1 „ 38	1 „ 44	1 „ 127
Spain,	1 „ 26	1 „ 32	1 „ 127
Austria (exclusive of Hungary),	1 „ 25	1 „ 31	1 „ 121

"It will be seen from the foregoing figures, compiled from the Statistical Tables published by the Board of Trade, how incomplete was Registration in Ireland in 1864, and comparing the number of Births, Deaths, and Marriages recorded in that year with those since annually registered, I regret to state that there appears but little improvement in the subsequent years:—

Registered.	1864.	1865.	1866.	1867.	1868.
Births,	136,414	144,970	146,237	144,318	146,108
Deaths,	93,144	93,154	93,598	93,911	86,803
Marriages,	27,406	30,802	30,151	29,796	27,753"

Following this Report are summaries of the Quarterly Reports issued in 1865, and the Appendix contains a letter addressed to me by Dr. Burke the Superintendent of Medical Statistics, respecting the causes of death—to which I beg to refer.

have the honour to be
Your Excellency's
Very faithful servant,

William Donnelly,
Registrar-General.

General Register Office,
Dublin, 31st August, 1869.

SUMMARY OF THE QUARTERLY REPORTS, 1865.

Quarterly Reports.

First Quarter—January, February, March.

First Quarter.

Marriages.—There were 12,308 marriages *registered* in Ireland during the quarter ending 31st March, 1865, being equal to an annual ratio of 1 marriage to every 115, or ·873 per cent. of the estimated population; of these marriages, 10,172 were between Roman Catholics (26 and 27 Vic., cap. 90), and 2,136 between Protestants (7 and 8 Vic., cap. 81).

The number of marriages *registered* in the corresponding quarter of 1864 was 9,602—7,385 Roman Catholic and 2,217 Protestant—the return for the first quarter of the year 1865 showing an increase of 2,787 in the former, and a decrease of 81 in the latter. The increase in the number of Roman Catholic marriages is probably owing to the fact that the Act 26 and 27 Vic., cap. 90, only came into operation on the 1st January, 1864, and that some marriages were not *registered* during the first quarter of that year.

Births.—The births *registered* during the quarter ending 31st of March amounted to 38,320, representing an annual ratio of 1 birth in every 36·8 of the estimated population. The number *registered* during the corresponding quarter of the year 1864 was 30,179, thus showing an increase of 8,141 between the two periods. A portion of this increase must be attributed to the fact of some of the births which occurred at the close of the first quarter of 1864 (the first year of Registration), not having been *registered* until the beginning of the second quarter (21 days being allowed to elapse after a birth before the person responsible for registering it becomes liable to a fine of twenty shillings).

Notwithstanding the increase in the number of births between the first quarter of 1864 and the corresponding quarter of 1865, still, from the ratio which the number of births *registered* in some of the Superintendent Registrars' districts bears to the population, it is evident that, in very many instances, the provisions of the Registration Act were not complied with.

Deaths.—The deaths *registered* during the first three months of 1865 amounted to 29,259, or an annual mortality of 1 in 48·2 of the estimated population. The number *registered* during the corresponding quarter of 1864 was 28,043.

Emigration.—The number of persons leaving the ports of Ireland, who stated to the Enumerators "that it was *not their intention to return*," amounted, during the first quarter of 1865, to 15,848—8,654 males and 7,194 females—being 11,777, or 43 per cent. less than the number who left during the corresponding period of 1864.

Decrease of the Population.—The births *registered* during the quarter, as already stated, amounted to 38,320; the deaths to 29,259, and the number of emigrants to 15,848; it would, therefore, appear that the population of Ireland decreased during the three months by 6,787, being the excess of the deaths over the births added to the number of emigrants.

PRICES OF PROVISIONS AND PAUPERISM.

The price, in Dublin, of the 4 lb. loaf during the thirteen weeks of the quarter was 5½*d.* It was 6*d.* during the corresponding period of 1864.

The average price of oatmeal, at the Dublin Corn Exchange, was 11*s.* 9*d.* per cwt. during the quarter, ranging from 11*s.* 2*d.* in the seventh week to 12*s.* 6*d.* in the last week; the average price in the corresponding period of 1864 was 11*s.* per cwt., varying from 10*s.* 5*d.* in the last week of the quarter to 13*s.* in the fifth week.

The prices of potatoes at Dublin Market during the first quarter of 1865 averaged

Quarterly Reports.

First Quarter.

from 3*s.* 1*d.* to 3*s.* 7*d.* per cwt.; in the first three months of 1864 the average was 2*s.* 6*d.* to 3*s.* 3*d.*

The average price of beef at the Dublin Cattle market during the first three months of 1865, ranged from 54*s.* 6*d.* to 68*s.* per cwt. During the first quarter of 1864 the average prices were from 51*s.* 6*d.* to 64*s.* 6*d.* per cwt.

The average weekly number of persons in Ireland receiving in-door relief during the first quarter of 1865 was 61,895. During the first quarter of 1864 the average number was somewhat greater (64,059). During both periods the smallest number receiving in-door relief was in the first week in January, and the greatest number during the latter end of February. The average number receiving out-door relief during the first three months of 1864 was 9,822. In the corresponding period of 1865 the average number increased to 11,296.

HEALTH OF THE PEOPLE.

The mortality, which is invariably greatest in the first quarter of the year, was in some localities excessively high during the months of January, February, and March of the year 1865.

The increased mortality in these localities may be referred to two causes: in the first place, to the inclemency of the weather, and, in the second, to the prevalence of fever, scarlatina, small-pox and other zymotic diseases.

As to the first cause, the inclemency of the weather: from the meteorological returns furnished by Captain Wilkinson, it may be observed that the mean temperature of the air for the quarter ending March 31, 1865, was 38·9° Fahrenheit; whereas during the corresponding quarter of the year 1864 it was 40·2°, or 1·3° higher.

The lower temperature necessarily swelled the list of deaths from bronchitis and other pulmonary affections, especially amongst the aged and those of tender years.

Bronchitis proved very fatal throughout the country, and the following notes from Registrars will illustrate the lethal character of this disease to the old and the very young.

The Registrar of the Pomeroy district, in the Union or Superintendent-Registrar's district of Cookstown, states that "more than three-fourths of the mortality was caused by chest affections, the average of the ages being 80 years."

The Registrar of the district of Aughnacloy, Union of Clogher, observes, "The increase of the deaths is among the aged, caused, in my opinion, by the severity of the winter. One person died aged 110 years, another aged 100, 7 between 80 and 90, and nine between 70 and 80."

Of the 17 deaths which took place in No. 2, Boyle district, Boyle Union, 10 were of children under 5 years of age, and 4 were of persons 60 years and upwards. Many other instances might be cited, were it necessary, to show how destructive cold weather is to the very young and the very old. Phthisis, or pulmonary consumption, carried off a great many; and pneumonia, or inflammation of the lungs, was, in many districts, very fatal.

With reference to the second cause of increased mortality during the quarter, *i.e.*, the prevalence of fever and other zymotic diseases—fever of a typhus type was the epidemic most general and most fatal throughout the country. Typhus was much more fatal in some districts than in others; invariably in the districts where sanitary precautions were not attended to the mortality from fever was greatest. Typhoid fever, typhia, or enteric fever, proved fatal in some parts of the country. The Registrar of the Cappoquin district, in the Union of Lismore, reported (April, 1865):—"Typhoid, typhia, or enteric fever, is spreading; it attacks chiefly children, and patients debilitated by other maladies; many old people also have died of it, but in them the symptoms are obscure, and the death usually referred to influenza, bronchitis, phthisis, &c. Some cases resembling relapsing fever, typhinia, or famine fever." In a few districts typhinia resulted in death.

Very many deaths were attributed to scarlatina. In almost all the returns furnished by Registrars some deaths were ascribed to this disease. In many parts of the country it proved very fatal. For instance, in the district of Oldcastle, in the Union of Oldcastle, the Registrar reported "scarlatina has prevailed in this district for the last six weeks; 4 deaths have resulted. In one house 3 children, the entire family, were cut off in four days." *Quarterly Reports.* First Quarter.

In the district of Bangor, in the Superintendent Registrar's district of Belmullet, the Registrar states that "the deaths were high, the district having been visited by an epidemic of scarlet fever, known as scarlatina maligna, of a most virulent type, which caused 28 deaths (the total for the district was 52), but it is now happily on the decline;" and in the Registrar's district of Killeter, in the Union of Castlederg, "four persons, members of one family, were cut off within ten days."

Many deaths resulted from measles. Croup and whooping-cough were very fatal; the former most so in the north-eastern division, the latter in the south-western.

From small-pox many deaths ensued. Nearly all those who perished had been unprotected by vaccination.

Some few of the Registrars reported that the sanitary condition of their districts was attended to; but, in the majority of the notes, complaints were made as to the utter neglect of sewerage, cleansing, or any other measure which might tend to the healthfulness of the localities.

THE WEATHER.

The mean height of the barometer at the Ordnance Survey Office, Phœnix Park, Dublin, during the quarter was 29·651 inches (that of the corresponding quarter of 1864 was 29·725 inches); the highest reading (30·423 inches) occurred on the 10th February, at 9.30 A.M., wind E.S.E.; the minimum reading (28·357 inches) was on the 14th January, at 9.30 A.M., wind W.N.W.

The mean temperature of the air during the quarter was 38·9° (in the corresponding period of 1864 it was 40·2°); the maximum registered by the thermometer was 60·9°; and the minimum was 20·4°. The temperature on the grass was below 32° on 24 nights of the month of January, on 13 nights in February, and on 19 nights in March.

The rain-fall during the quarter measured 5·979 inches (in the corresponding quarter of 1864 it was 5·227 inches). The greatest rain-fall was in the month of February, when 2·788 inches were registered.

There was a prevalence of westerly winds, as it blew from that direction on 34 days, viz., on 11 days in January, 11 days in February, 12 days in March; and from S.W. on 15 days—9 days in January, 5 days in February, and 1 day in March, at 9.30 A.M.

NUMBER OF MARRIAGES, BIRTHS, AND DEATHS, REGISTERED IN EACH OF THE EIGHT DIVISIONS

Into which Ireland has been divided for Statistical Purposes.

Marriages.—The number of marriages (2,802) registered in the South-Western Division during the quarter ending 31st March, represents an annual ratio of 1 marriage to every 74 of the estimated population. This very high rate is owing to the custom which prevails amongst the Roman Catholic population, of having a large proportion of the marriages of the year celebrated immediately before the commencement of the Lenten Season. The annual ratio afforded by the number of marriages registered in this division during the last quarter of the year 1864 was only 1 in every 302 of the estimated population. In the Western Division the marriages

Quarterly Reports.

First Quarter.

registered in the first quarter of 1865 equalled an annual ratio of 1 in every 84 of the population against a ratio of but 1 in 441 in the last quarter of 1864.

The Eastern division is that in which the marriages registered during the quarter ending 31st March afford the lowest annual ratio, namely, 1 in every 170 of the population. The number of marriages registered in this division during the quarter ending 31st December, 1864, equalled an annual ratio of 1 in every 174.

The following statement shows the order in which the eight divisions stand with regard to the number of MARRIAGES *in proportion to the estimated population (Quarter ending 31st March, 1865) :—*

Divisions.	Ratio.	Divisions.	Ratio.
1. South-Western,	1 in 74	5. North-Western,	1 in 138
2. Western,	,, 84	6. South Midland,	,, 139
3. South-Eastern,	,, 100	7. North-Eastern,	,, 158
4. North Midland,	,, 130	8. Eastern,	,, 170

Births.—The birth-rate during the first quarter was highest in the "South-Western" division, the births *registered* (6,273) affording a ratio of 1 birth to every 33 of the *estimated* population ; the birth-rate was highest in this division during the first quarter of 1864 also.

The numerical order of the Eight Divisions as regards the annual Rate represented by the number of BIRTHS *registered during the* FIRST *quarter of* 1864 *and* 1865, *is shown in the following statement :—*

Quarter ending 31st March, 1864.		Quarter ending 31st March, 1865.	
Divisions.	Ratio.	Divisions.	Ratio.
1. South-Western,	1 in 37	South-Western,	1 in 33
2. South-Eastern,	,, 42	North-Eastern,	,, 34
3. South Midland,	,, 47	South-Eastern,	,, 37
4. North-Eastern,	,, 47	Eastern,	,, 37
5. Eastern,	,, 48	Western,	,, 38
6. North Midland,	,, 52	North-Western,	,, 40
7. Western,	,, 55	North Midland,	,, 41
8. North-Western,	,, 56	South Midland,	,, 42

The birth-rate was considerably higher in all the divisions during the first quarter of 1865 than it was in the corresponding quarter of the previous year. The greatest increase was in the "Western" division, which rose from 1 in 55 for the first quarter of 1864, to 1 in 38 for the corresponding quarter of 1865 ; in the "North-Eastern," which had 1 in 47 for 1864, and 1 in 34 for 1865 ; and in the "North-Western," in which the rate increased from 1 in 56 to 1 in 40.

Deaths.—The number of deaths (5,050) *registered* during the quarter, in the "Eastern" division, afforded the highest rate of mortality in proportion to the population, the ratio represented being 1 in 40. As heretofore the three divisions lying along the eastern coast had the highest rate of mortality.

The following statement shows the Eight Divisions, arranged according to the annual RATE OF MORTALITY *afforded by the number of Deaths registered during the* FIRST *quarter of* 1864 *and* 1865 :—

Quarter ending 31st March, 1864.		Quarter ending 31st March, 1865.	
Divisions.	Ratio.	Divisions.	Ratio.
1. South-Eastern,	1 in 42	Eastern,	1 in 40
2. Eastern,	,, 43	South-Eastern,	,, 42
3. North-Eastern,	,, 45	North-Eastern,	,, 44
4. South Midland,	,, 51	South Midland,	,, 51
5. South-Western,	,, 53	South-Western,	,, 51
6. North-Western,	,, 55	North Midland,	,, 54
7. North Midland,	,, 57	North-Western,	,, 55
8. Western,	,, 69	Western,	,, 61

The death-rate was the same in the South-Eastern, the South Midland, and the North-Western divisions, and was somewhat higher in all the others during the first quarter of 1865 than it was in the corresponding quarter of 1864.

Quarterly Reports.

First Quarter.

PROVINCES.

The following table shows the number of marriages *registered* in each of the four Provinces during the quarter ending 31st March, 1865; and the number of births and deaths *registered* during the quarters ending 31st March, 1865, and 1864, with the ratio to the population.

Table showing by Provinces, the number of Marriages registered during the quarter ending 31st March, 1865, and the number of Births and Deaths registered during the quarters ending 31st March, 1865, and 1864, with the ratio to the Population.

Registration Provinces.	Marriages.		Births.				Deaths.			
	Quarter ending 31st March, 1865.		Quarter ending				Quarter ending			
			31st Mar., 1865.		31st Mar., 1864.		31st Mar., 1865.		31st Mar., 1864.	
	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.
Leinster, . . .	2,197	1 in 158	8,960	1 in 39	7,281	1 in 48	8,125	1 in 43	7,667	1 in 46
Munster, . . .	4,564	81	10,566	35	9,467	40	7,486	50	7,332	51
Ulster, . . .	3,025	155	13,048	36	9,269	51	9,825	48	9,631	49
Connaught, . . .	2,522	88	5,746	38	4,162	53	3,823	58	3,413	65

Marriages.—The marriages *registered* in the province of Leinster during the quarter ending 31st March, 1865, amounted to 2,197 a number equal to an annual ratio of 1 marriage to every 158 of the *estimated* population. In Munster there were registered 4,564 marriages, or 1 in every 81; in Ulster 3,025, or 1 in every 155; and in Connaught 2,522, or 1 in every 88 of the population.

Births.—The births *registered* during the first quarter of 1865 in Leinster, amounted to 8,960, or 1 in 39 of the population, against 1 in 48 during the corresponding quarter of 1864; in Munster, to 10,566, or 1 in 35, against 1 in 40; in Ulster, to 13,048, or 1 in 36, against 1 in 51; and in Connaught, to 5,746, or 1 in 38, against 1 in 53 for the corresponding quarter of 1864.

Deaths.—The number of deaths *registered* during the first quarter in Leinster, was 8,125, or 1 in 43 of the population, against 1 in 46 for the corresponding quarter of 1864; in Munster it was 7,486, or 1 in 50 against 1 in 51; in Ulster, it was 9,825, or 1 in 48, against 1 in 49; and in Connaught, 3,823, or 1 in 58, against 1 in 65 for the first quarter of 1864.

Second Quarter.—April, May, June.

Second Quarter.

Marriages.—The marriages *registered* in Ireland in the quarter ending the 30th June, 1865, amounted to 5,659, being equal to an annual ratio of 1 in every 249, or ·401 per cent. of the *estimated* population; of these marriages, 3,564 were between Roman Catholics (under the 26 and 27 Vic., cap. 90), and 2,095 between Protestants (under the 7 and 8 Vic., cap. 81)—the former number affording an annual ratio of 1 in 307 of the Roman Catholic population, and the latter of 1 in 150 of the Protestant population. The number of marriages *registered* in the corresponding quarter of 1864 was 6,023—4,091 of Roman Catholics and 1,932 of Protestants—being 364 more than were registered during the second quarter of 1865.

Quarterly Reports.

Second Quarter.

Births.—The number of births *registered* during the quarter ending 30th June amounted to 39,109—19,988 boys and 19,121 girls—affording an annual ratio of 1 in 36·1 or 2·77 per cent. of the *estimated* population. The number of births *registered* in the corresponding quarter of 1864 was 38,715.

Deaths.—There were 24,250 deaths *registered* during the quarter—12,093 males and 12,157 females—being equal to an annual ratio of 1 in every 58·2 or 1·72 per cent. of the *estimated* population. The number of deaths *registered* during the corresponding quarter of 1864 was 24,155.

Emigration.—The number of persons leaving the ports of Ireland, who stated to the Enumerators "that it was *not their intention to return*," amounted, during the first quarter of 1865, to 15,848; during the second quarter the number was 37,588—20,175 males and 17,413 females—of whom 13,335 left during the month of April, 14,263 in May, and 9,990 in June. The number of emigrants who left during the second quarter of 1864 was 48,802, or 11,214 more than in the second quarter of 1865

Decrease of the Population.—The number of emigrants who left Ireland during the first quarter of the year 1865 was more by 6,787 than the excess of births over deaths. The number of births *registered* during the second quarter, as already stated, amounted to 39,109, and the deaths to 24,250, showing an excess of 14,859 births over deaths, which if deducted from the number of emigrants, would show a further reduction in the population of 22,729, or a diminution during the first six months of the year of 29,516 persons.

PRICES OF PROVISIONS, AND PAUPERISM.

Sixpence was the price of the 4lb. loaf in Dublin during each week of the second quarter of 1865 and 1864. The average price of oatmeal per cwt. during the second quarter of 1865 was 14*s.* 1*d.*, the prices being very uniform throughout each week of the quarter; during the corresponding quarter of 1864, the average price was but 10*s.* 6*d.* The average prices per cwt. of potatoes, ranged from 3*s.* 2*d.* to 3*s.* 11*d.*; in the corresponding quarter of 1864 they were somewhat lower, viz., 2*s.* 11*d.* to 3*s.* 8*d.* Beef maintained a high price throughout the quarter, ranging from 55*s.* to 67*s.* 6*d.* per cwt., against 53*s.* to 65*s.* 6*d.* during the corresponding period of 1864.

The number of persons in Ireland receiving in-door relief on Saturdays during the second quarter of 1865, averaged 54,852, being 3,115 less than the average number in the corresponding period of 1864. The number relieved on Saturday in the first week of the second quarter of 1865 was 60,100, which gradually decreased to 50,670, which was the number on Saturday, 1st July. The average number of persons in receipt of out-door relief was greater during the second quarter of 1865, than in the corresponding period of 1864; the respective numbers being 10,565 and 9,149. Of the persons receiving in-door relief during the second quarter of 1865, ·9 per cent. were located in asylums for the blind and the deaf and dumb and in extern hospitals. In the quarter ending 2nd July, 1864, the per-centage was ·8.

HEALTH OF THE PEOPLE.

The health of the people was satisfactory throughout the quarter, owing to comparative freedom from epidemical diseases.

Small-pox appeared in a few districts. The beneficial effects of vaccination are well illustrated by the following notes. The Registrar of Crumlin district, in the Union of Antrim, remarks:—"There were a good many cases of small-pox in the district, but in *no case was the disease fatal or even severe where the patient had been*

previously vaccinated, and in every instance those parties who had been re-vaccinated lately escaped the disease altogether, although in several cases members of the same family were ill of small-pox at the time;" eight of the 32 deaths registered in the Clonmany district, in the Union of Inishowen, were caused by this disease; the Registrar reports that 7 of the persons had not been vaccinated, and that the remaining case was accompanied by acute bronchitis. Four deaths from this cause occurred in the Glendermot district of the Londonderry Union; and 4 deaths occurred in the Cork north city district—the persons had not been vaccinated.

Diphtheria prevailed in some of the districts in the north-eastern and north-western divisions. Three deaths resulted from this cause in the Registrar's district of Antrim. There were 2 deaths from it in the district of Tanderagee, in the Union of Banbridge. It is reported to have been epidemic at Bushmills, in the Union of Coleraine; 4 deaths from it were there registered. Four deaths from this disease occurred in Coal Island, Dungannon Union, and 4 in Glenavy, in the Union of Lisburn.

Deaths from Scarlatina occurred in most of the districts. It was particularly fatal throughout the western and south-western divisions.

Fever is reported to have been very prevalent at Carrick-on-Suir; at Ballintra, in Ballyshannon; and at Killeter, in Castlederg. It was also prevalent in the district of Fanad, in Millford: the Registrar states that it was imported from Glasgow by labourers.

The Registrar of the Dromore district, Union of Banbridge, states that of the 38 deaths registered during the quarter, 16 were caused by consumption—a disease which he attributes to want of pure air in the dwellings of the people; he suggests the passing of a "Compulsory Ventilation Act."

It is gratifying to observe that some of the Registrars were able to report improvements in the sanitary condition of their districts; amongst those districts may be mentioned Lisburn; Moynalty, in the Union of Kells; Glengarriff, in Bantry Union; Ballincollig, in Cork Union; portions of Cork City; Maguiresbridge, in Lisnaskea; Galway; &c. On the other hand, a long list of places is to be found in the notes, concerning which the Registrars felt it their duty to complain; amongst these may be noticed—Portglenone, in the Union of Ballymena, "the weavers' shops being often as damp as ill-drained cellars, and very frequently occupied as sleeping-rooms;" the village of Legoniel, in the Registrar's district of Shankill, Union of Belfast; Hillsborough, in Lisburn; Newtownards; Fintona, in Omagh, in which, the Registrar reports, "3 deaths from fever occurred in one house where the sanitary arrangements were defective;" Ballymote, in Sligo, the Registrar stating that "the sanitary arrangements of both town and district are in total neglect for want of proper authorities to look after such arrangements;" Carlingford, in Dundalk, the Registrar remarking on the non-observance of the "Nuisances Removal Act;" Stillorgan, in Rathdown, in which the village of Newtownpark is stated to be defective in drainage and sewerage; Carrick-on-Suir, with regard to which it is stated, "the sanitary condition of this town is (July, 1865) in a very bad state, it is in a low position, and very much in need of proper sewerage; some of the houses are over-crowded and badly ventilated;" Kilmeadan, in Waterford, in which a prevalence of typhus fever is attributed to the noxious vapours given off from the cesspools opposite the doors of the houses.

The Registrar of the Bangor district, in Belmullet Union, says, "11 deaths in the register are ascribed to scarlatina and its consequences; it is still (July, 1865) lurking about this district, owing, I believe, to the filthy state in which the people here keep their houses;" and the Registrar of Milltown Malbay, in Ennistimon, states that between 50 and 60 cases of "Pythogenic fever" visited his district, and that he "failed in no instance to trace the cause to defective sanitary arrangements in the sewerage about the houses or the wells from which their water supply was drawn."

Quarterly Reports.

Second Quarter.

THE WEATHER.

The mean height of the barometer at the Ordnance Survey Office, Phœnix Park, Dublin, during the quarter was 29·916 inches (in the second quarter of 1864 it was 29·871 inches); the highest reading (30·378 inches) was on the 13th June, at 9.30 A.M., wind N.; and the lowest (29·223 inches) on the 29th May, at 9.30 P.M., wind S.S.W.

The mean temperature of the air during the quarter was 54·8° (in the corresponding quarter of 1864 it was 53·6°); the maximum registered by the thermometer was 83·9°; and the minimum was 31·2°. The temperature on the grass was below 32° on 4 nights only, during the quarter, viz. :—1st, 10th, 15th, and 24th April.

The rain-fall during the quarter ending 30th June, measured 5·816 inches, it was only 4·083 inches in the corresponding portion of 1864. The greatest rain-fall was in the month of May, when 3·578 inches were registered.

The wind blew on 15 days from N.E.; on as many as 22 days from E.; on 16 days from S.W.; and on 17 days from W., at 9.30 A.M.

NUMBER OF MARRIAGES, BIRTHS, AND DEATHS REGISTERED IN EACH OF THE EIGHT DIVISIONS.

Marriages.—The North-Eastern Division was that in which the largest number of marriages in proportion to the estimated population was *registered* during the quarter ending 30th June; the number registered amounted to 1,597, equal to an annual ratio of 1 in 171; the number *registered* in the Eastern Division during the quarter was 1,160, affording a ratio of 1 in 174 of its population. The number of marriages *registered* in the Western Division amounted to 444 affording a ratio of only 1 in 451 of the inhabitants, whereas the number registered during the quarter ending 31st March, yielded a ratio of 1 in 84.

The following statement shows the order in which the Eight Divisions stand with regard to the number of MARRIAGES *in proportion to the population (Quarter ending 30th June,* 1865) :—

Divisions.	Ratio.	Divisions.	Ratio.
1. North-Eastern,	1 in 171	5. North-Western,	1 in 307
2. Eastern,	,, 174	6. South Midland,	,, 334
3. South-Eastern,	,, 253	7. North Midland,	,, 335
4. South-Western,	,, 286	8. Western,	,, 451

Births.—The birth-rate during the second quarter was highest in the North-Eastern division and lowest in the Western division, the annual ratios represented in those divisions being, respectively, 1 in 31 and 1 in 43 of the population. The number of births registered in each division varies but little from the number registered in the corresponding quarter of 1864, when the annual ratios ranged from 1 in 32 in the South-Western division to 1 in 43 in the North-Western.

The numerical order of the Eight Divisions as regards the annual Rate represented by the number of BIRTHS *registered during the* SECOND *quarter of* 1864 *and* 1865, *is shown in the following statement :—*

Quarter ending 30th June, 1864.		Quarter ending 30th June, 1865.	
Divisions.	Ratio.	Divisions.	Ratio.
1. South-Western,	1 in 32	North-Eastern,	1 in 31
2. North-Eastern,	,, 33	South-Western,	,, 32
3. Eastern,	,, 35	Eastern,	,, 36
4. South-Eastern,	,, 36	South-Eastern,	,, 36
5. North Midland,	,, 40	North Midland,	,, 40
6 South Midland,	,, 40	North-Western,	,, 40
7. Western,	,, 41	South Midland,	,, 42
8. North-Western,	,, 43	Western,	,, 43

Quarterly Reports.

Second Quarter.

Deaths.—The annual rate of mortality represented by the number of deaths registered in each division during the second quarter of 1865, varies from 1 in every 49 of the population in the Eastern division to 1 in every 75 in the Western. In the corresponding quarter of 1864, the death-rate ranged from 1 in 51 to 1 in 77, the highest mortality having been in the South-Eastern division, and the lowest, as in the second quarter of 1865, in the Western. As in each previous quarter since the commencement of Registration, the three divisions lying along the eastern coast had the highest rates of mortality.

The following statement shows the Eight Divisions, arranged according to the annual RATE OF MORTALITY *afforded by the number of Deaths registered during the* SECOND *quarter of* 1864 *and* 1865:—

Quarter ending 30th June, 1864.		Quarter ending 30th June, 1865.	
Divisions.	Ratio.	Divisions.	Ratio.
1. South-Eastern,	1 in 51	Eastern,	1 in 49
2. North-Eastern,	„ 51	North-Eastern,	„ 50
3. Eastern,	„ 53	South-Eastern,	„ 52
4. South-Western,	„ 59	South-Western,	„ 61
5. South Midland,	„ 60	South Midland,	„ 62
6. North-Western,	„ 60	North-Western,	„ 64
7. North Midland,	„ 73	North Midland,	„ 70
8. Western,	„ 77	Western,	„ 75

Comparing the mortality in each division during the second quarter of 1865 with that during the corresponding quarter of 1864, it is seen that the more important differences appear in the Eastern division, where the death-rate rose from 1 in 53 to 1 in 49, and in the North-Western division, in which it fell from 1 in 60 to 1 in 64.

PROVINCES.

The number of marriages registered in each of the four provinces during the quarter ending 30th of June, 1865, and the numbers of births and deaths registered in each province during the quarters ending 30th June, 1865, and 30th June, 1864, together with the annual ratio to the population, are shown in the following table:—

Table showing by Provinces, the number of Marriages registered during the quarter ending 30th June, 1865, *and of Births and Deaths* REGISTERED *during the quarters ending 30th June,* 1865, *and* 1864, *and the ratio to the Population.*

Registration Provinces.	Marriages.		Births.				Deaths.			
	Quarter ending 30th June, 1865.		Quarter ending				Quarter ending			
			30th June, 1865.		30th June, 1864.		30th June, 1865.		30th June, 1864.	
	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.
Leinster,	1,662	1 in 209	9,138	1 in 38	9,462	1 in 37	6,660	1 in 52	6,434	1 in 54
Munster,	1,225	304	10,931	34	10,999	34	6,143	61	6,308	59
Ulster,	2,223	211	13,801	34	12,784	37	8,447	56	8,518	55
Connaught,	549	403	5,239	42	5,470	41	3,000	74	2,895	77

Marriages.—The number of marriages registered in the province of Leinster during the quarter ending 30th June, amounted to 1,662, a number equal to an annual ratio of 1 in 209 of the population; in Ulster the ratio was 1 in 211, the number registered being 2,223; in Munster the ratio was 1 in 304, the number of

Quarterly Reports.

Second Quarter.

marriages being 1,225; there were only 549 marriages registered in Connaught, the ratio afforded by that number being but 1 in 403, whereas in the quarter ending 31st March the ratio in the two last-named provinces was 1 in 81 and 1 in 88, respectively—which may perhaps in some degree be accounted for by the usage among the Roman Catholic population, of having their marriages celebrated immediately before Lent, that is, during the first quarter of the year.

Births.—From the above table it will be seen that the number of births registered in the province of Leinster during the quarter ending 30th June, 1865, was 9,138; the annual ratio afforded being 1 birth in every 38 of the population against a ratio of 1 in 37 in the corresponding quarter of 1864; in Munster there were registered 10,931 births, or 1 in 34 of the population against 1 in 34 in the corresponding quarter of 1864; in Ulster 13,801, or 1 in 34 against 1 in 37; and in Connaught 5,239, or 1 in 42 against 1 in 41.

The provinces rank in the same order in the two quarters, viz.:—Munster, Ulster, Leinster, Connaught—Munster having the highest birth-rate.

Deaths.—The number of deaths registered in the province of Leinster during the second quarter of 1865 was 6,660—a number equal to an annual ratio of 1 death in 52 of the population; the ratio afforded by the deaths registered during the corresponding quarter of 1864 was 1 in 54. In Munster, there were registered 6,143 deaths, or 1 in 61 of the population against 1 in 59 for the quarter ending 30th June, 1864; in Ulster 8,447, or 1 in 56, against 1 in 55; and in Connaught 3,000, or 1 in 74 against 1 in 77, for the corresponding quarter of 1864.

The following was the order of the provinces with regard to mortality in proportion to population in the two quarters:—Leinster, Ulster, Munster, Connaught—Leinster having the highest mortality.

Third Quarter.

Third Quarter.—July, August, September.

Marriages.—The marriages *registered* in Ireland during the quarter ending September 30th amounted to 5,854, affording an annual ratio of 1 in 241, or ·415 per cent. of the *estimated* population; of these marriages, 3,613 were between Roman Catholics (under the 26 and 27 Vic., cap. 90); the Protestant marriages (under the 7 and 8 Vic., cap. 81) amounted to 2,241; the former number affords an annual ratio of 1 marriage to every 303 of the Roman Catholic population, and the latter 1 in every 140 of the Protestant population. The number of marriages *registered* in the corresponding period of 1864 was 5,512—3,397 of Roman Catholics and 2,115 of Protestants.

Births.—34,045 births were *registered* during the third quarter of 1865—17,522 males and 16,523 females—affording an annual ratio of 1 in every 41·4, or 2·41 per cent. of the *estimated* population; the number *registered* in the corresponding quarter of 1864, was 33,877.

Deaths.—The number of deaths *registered* during the quarter ending the 30th September amounted to 18,632—9,406 males and 9,226 females—being equal to an annual ratio of 1 in every 75·7, or 1·32 per cent. of the *estimated* population. The number *registered* in the corresponding quarter of 1864 was 19,191.

Emigration.—The number of persons who left the ports of Ireland, stating to the Enumerators "that it was their intention *not to return*," amounted, during the quarter ending the 30th September, 1865, to 27,661, being 5,523 more than the number during the corresponding period of 1864; the increase in July amounting to 667; in August, to 1,760; and in September, to 3,096. Of the 27,661 persons who emigrated during the quarter, 14,730 were males, and 12,931 females.

Quarterly Reports.

Third Quarter.

Estimated Decrease of the Population.—There would appear to have been a decrease of 12,248 in the population of Ireland, *estimated* according to the returns of births and deaths *registered* and of emigration received for the third quarter of 1865, the deaths (18,632) and the number of emigrants (27,661) amounting to 46,293, whereas the number of births *registered* was only 34,045. The estimated decrease of population in the first quarter of the year was 6,787; during the second quarter it was 22,729; and in the third quarter, as already stated, it was 12,248, making a total decrease for the *nine* months of 41,764 persons.

PRICES OF PROVISIONS AND PAUPERISM.

Provisions, in general, were higher in Dublin during the third quarter of 1865 than during the corresponding period of 1864. The price of Messrs. R. Manders and Co.'s 4lb. loaf, which was 6*d.* in the first week of the quarter in 1864, fell to 5½*d.* in the last, while, in the first week of the third quarter of 1865 it was 6*d.*, and in the last week 6½*d.*; the rise in the price took place in the tenth week. The *average* price of oatmeal at the Dublin Corn Exchange, for the third quarter of 1864, was but 10*s.* 8*d.*; for the third quarter of 1865 it was 15*s.* 3*d.*, ranging from 14*s.* 3*d.* to 17*s.*, the latter being the average price in the week ending Saturday, 19th August.

The price of potatoes, at the Dublin potato market, for the third quarter of 1865 was 2*s.* 8*d.* to 4*s.* per cwt.; in the corresponding quarter of 1864 it was somewhat lower, being from 2*s.* 7*d.* to 3*s.* 10*d.*

Beef maintained a very high price during the quarter, the range of price per cwt., during the quarter at the Dublin cattle market, being 56*s.* 6*d.* to 67*s.* 6*d.*; the highest weekly quotation, 60*s.* to 72*s.*, was for the week ending 2nd September. The *average* price of beef for the third quarter of 1864 was 51*s.* to 62*s.* 6*d.* per cwt.

The number of persons in Ireland receiving in-door relief weekly, during the third quarter of 1865, averaged 46,632, being 3,266 less than the average for the corresponding quarter of 1864; the number receiving in-door relief on Saturday, 8th July, was 50,085; the number for Saturday, the 30th September, was 45,384. In the first week of the corresponding quarter of 1864 the number was 54,079; and in the last week it was 48,535. The number of persons receiving out-door relief was greater in each week of the third quarter of 1865 than in the corresponding weeks of the third quarter of 1864; the weekly average number in the third quarter of 1865, was 9,093, against 7,717 for the corresponding period of 1864.

HEALTH OF THE PEOPLE.

The comparative freedom from epidemic disease, the fine dry weather, and, in general, the good wages and employment of the working classes, all combined to render the quarter ended September 30th unusually healthy.

The mortality during the quarter was less than in the corresponding period of 1864, and much below that of the quarter ended June 30th, 1865.

Fever, which for a considerable time had been prevalent in many parts of the country, was the cause of few deaths, and these chiefly occurred in localities where *sanitary precautions were wholly neglected*, and in which, owing to the continued dry weather, the supply of water was deficient.

The deaths from small-pox were comparatively few, and nearly all the persons who succumbed to the disease had *not been vaccinated*. In the Superintendent Registrar's district of Gortin (Plumb Bridge district), two persons who had not

Quarterly Reports — Third Quarter.

been vaccinated died from small-pox. The Registrar of Westport states that—"Small-pox made its appearance, but caused only one death, a child who *had not been vaccinated.*" The decrease in the mortality from small-pox may be justly attributed to the Compulsory Vaccination Act. Many of the Registrars refer with satisfaction to the efficient manner in which the provisions of the Act are carried out.

Scarlatina prevailed in some districts, and, as usual, was very fatal wherever the sewerage and other sanitary precautions were defective, for example, in the Union of Banbridge (Dromore district), out of 36 deaths, 10 were referred to scarlatina; the Registrar writes:—"The last-mentioned disease (scarlatina) prevailed in an unusually fatal form during the months of August and September, and was found in almost every case to be *associated with the existence of abominable cesspools and collections of filth about the doors, and under the windows of the houses; the houses also being generally damp and ill-ventilated.* One instance, in particular, which I was obliged to lay before the Board of Guardians, is worthy of note, as showing, with tolerable certainty, the relation these pestilential vats bear to the propagation of scarlet fever. In the midst of a cluster of houses situated on a badly-drained hillside, about two miles from Dromore, were four or five rare specimens of cesspools or gutters, *the stench from which was truly unbearable.* Scarlatina entered three of the families almost simultaneously, and when I visited the place, 7 cases were prostrated by the fever, and one child already dead. Compulsory measures were at once instituted for the speedy removal of the filth, and the filling up and covering over the pits, and *immediately* the progress of the endemic was arrested; those already ill gradually recovered, and no new case ensued subsequent to the removal of the nuisance."

In the Bray district, Rathdown Superintendent Registrar's district, 16 of the deaths were referred to scarlatina. The Registrar remarks:—"Supply of water, ventilation of houses and sewerage, *very defective in this district amongst the poor.*" In the Superintendent Registrar's district of Ennis, (Ennis district No. 1), of 110 deaths registered, 50 were caused by scarlatina. The Registrar states that "*the disease has confined itself almost exclusively to the ill-ventilated and filthy parts of the town.*" Scarlatina also prevailed in the adjoining districts, viz., Ennistimon and Newmarket. The majority of the deaths in the Clarina district (Superintendent Registrar's district of Limerick) were caused by scarlatina.

Diarrhœa was more than usually prevalent, and some cases of the ordinary autumnal cholera proved fatal; those cases which were attended with cramps, and were reported by the Registrars as closely resembling the Asiatic cholera, generally recovered. Diarrhœa caused 131 deaths in the Dublin Registration District during the quarter; of this number 55 were of infants under one year old, and 27 were of children between one and five years old.

The Registrar of Keady (Armagh) states that whooping-cough attacked many persons in advanced life. "In one case; an old lady, aged 80 years, is labouring under it in a severe form."

Some very old persons died during the quarter;—for example—in the Fintona district 5 had attained the age of 80 years; a man aged 100 died in the Milltown district (Mullingar Union), the Registrar states that "he could read without glasses up to the day of his death." Of those who died in the Moyne district (Thurles Union), 2 were upwards of 90, 5 over 80, and 3, 70 years and upwards. In the Clonmoyle district (Macroom Union) a widow had attained the age of 100, and a farmer 102 years. In the Loughrea district 4 of those who died were upwards of 80 years old; and in the Whitechurch district (Dungarvan Union) there died a centenarian.

Some of the Registrars referred with satisfaction to the improved sanitary condition of their districts; *but very many complained loudly of their filthy and utterly neglected state.*

As all matters connected with the maintenance of the health of the country are now so frequently brought under public notice, and as it is now universally admitted

that fever, cholera, and all other epidemics commit the greatest ravages where sanitary measures are neglected, it is justly to be expected that those who have the power, such as Municipal Corporations, &c., will see the necessity of appointing competent officers of health throughout the country.

THE WEATHER.

The mean height of the barometer at the Ordnance Survey Office, Phœnix Park, Dublin, during the quarter was 29·820 inches; (in the corresponding period of 1864 it was 29·804 inches); the highest reading (30·487 inches) was on the 24th September, at 3.30 P.M., wind E.; and the lowest (29·187 inches) was on the 11th August, at 9.30 A.M., wind W.S.W.

The mean temperature of the air during the quarter ended 30th September was 60·8°, which is 3° higher than that of the corresponding part of 1864 (57·8°), and higher than that of the third quarter of any year since 1835, in which year it reached 61·2°. The maximum registered by the thermometer (81·6°) occurred on the 15th September, and the minimum (36·5°) on the 22nd of the same month.

The rain-fall during the quarter measured 6·318 inches: it was only 4·137 inches in the corresponding part of 1864. In the half-year ended 30th September the rain-fall amounted to 12·134 inches; in the corresponding period of 1864 it was only 8·220 inches. The greatest monthly rain-fall during the quarter was in August, when 4·209 inches were registered.

The wind blew on 26 days from S.W., on 27 days from W., and on 15 days from E., at 9.30 A.M. On three days in September the air was calm at that hour.

NUMBER OF MARRIAGES, BIRTHS, AND DEATHS, REGISTERED IN EACH OF THE EIGHT DIVISIONS.

Marriages.—The number of marriages registered in the Eastern Division during the third quarter of 1865, afforded the highest annual ratio, viz.:—1 in 157 of the *estimated* population; in the North-Eastern Division the ratio was 1 in 164; in the North Midland Division the ratio was only 1 in 365; and in the Western Division 1 in 463.

The following statement shows the order in which the Eight Divisions stand, with regard to the number of MARRIAGES, *in proportion to the estimated population* (*Quarter ending 30th September*, 1865):—

Divisions.	Ratio.	Divisions.	Ratio.
1. Eastern,	1 in 157	5. North-Western,	1 in 314
2. North-Eastern,	,, 164	6. South Midland,	,, 320
3. South-Eastern,	,, 240	7. North Midland,	,, 365
4. South-Western,	,, 281	8. Western,	,, 463

Births.—The North-Eastern Division afforded the highest birth-rate for the quarter, the ratio being 1 in 36; the ratio in this division for the corresponding quarter of 1864 was 1 in 39.

The ratio in the Eastern Division for the third quarter of 1864, was 1 in 38; in the corresponding quarter of 1865 it was 1 in 40. The North-Western Division increased its birth-rate from 1 in 48, for the quarter ending 30th September, 1864, to 1 in 46 for the corresponding quarter of 1865; and the Western Division from 1 in 42 to 1 in 40. The birth-rate in the South-Midland Division was the same for both quarters, viz., 1 in 47.

Quarterly Reports.

Third Quarter.

The numerical order of the Eight Divisions as regards the annual Rate represented by the number of BIRTHS *registered during the* THIRD *quarter of* 1864 *and* 1865, *is shown in the following statement:—*

Quarter ending 30th September, 1864.		Quarter ending 30th September, 1865.	
Divisions.	Ratio.	Divisions.	Ratio.
1. Eastern,	1 in 38	North-Eastern,	1 in 36
2. North-Eastern,	„ 39	Eastern,	„ 40
3. South-Western,	„ 41	Western,	„ 40
4. Western,	„ 42	South-Western,	„ 42
5. South-Eastern,	„ 43	South-Eastern,	„ 45
6. North Midland,	„ 46	North Midland,	„ 45
7. South Midland,	„ 47	North-Western,	„ 46
8. North-Western,	„ 48	South Midland,	„ 47

Deaths.—The annual rate of mortality shown by the number of deaths *registered* in the Eastern Division during the quarter, was 1 in 59, which was the highest ratio afforded by any of the Eight Divisions; the deaths *registered* in the Western Division represent an annual ratio of only 1 in 95 of the population for the third quarter, and represented only 1 in 98 for the corresponding quarter of 1864. The death-rate in the South Midland Division, was 1 in 72 for the third quarter of 1864, against 1 in 83 for the corresponding quarter of 1865; in the South-Western, 1 in 73 against 1 in 78; in the North-Western, 1 in 81 against 1 in 88; and in the South-Eastern, 1 in 66 against 1 in 71.

The following statement shows the Eight Divisions, arranged according to the annual RATE OF MORTALITY *afforded by the number of Deaths registered during the* THIRD *quarter of* 1864 *and* 1865:—

Quarter ending 30th September, 1864.		Quarter ending 30th September, 1865.	
Divisions.	Ratio.	Divisions.	Ratio.
1. Eastern,	1 in 63	Eastern,	1 in 59
2. South-Eastern,	„ 66	North-Eastern,	„ 67
3. North-Eastern,	„ 67	South-Eastern,	„ 71
4. South Midland,	„ 72	South-Western,	„ 73
5. South-Western,	„ 73	South Midland,	„ 83
6. North-Western,	„ 81	North-Western,	„ 88
7. North Midland,	„ 91	North Midland,	„ 91
8. Western,	„ 98	Western,	„ 95

PROVINCES.

The number of marriages registered in each of the four provinces during the quarter ending 30th September, 1865, and the numbers of births and deaths registered in each province during the quarters ending 30th September, 1865, and 30th September, 1864, together with the annual ratio to the *estimated* population, are shown in the following table:—

Table showing by Provinces, the number of Marriages registered during the quarter ending 30th September, 1865, *and of Births and Deaths* REGISTERED *during the quarters ending 30th September,* 1865, *and* 1864, *and the Ratio to the estimated Population.*

Registration Provinces.	Marriages.		Births.				Deaths.			
	Quarter ending 30th September, 1865.		Quarter ending				Quarter ending			
			30th Sept., 1865.		30th Sept., 1864.		30th Sept., 1865.		30th Sept., 1864.	
	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.
Leinster,	1,765	1 in 197	8,125	1 in 43	8,521	1 in 41	5,467	1 in 64	5,269	1 in 66
Munster,	1,327	280	8,533	44	8,714	43	4,709	79	5,105	73
Ulster,	2,248	209	11,783	40	11,113	42	6,187	76	6,486	73
Connaught,	514	430	5,604	39	5,529	40	2,269	97	2,331	95

Quarterly Reports.

Third Quarter.

Marriages.—The number of marriages *registered* in the Province of Leinster during the third quarter of 1865 amounted to 1,765, a number affording an annual ratio of 1 in 197 of the *estimated* population; in Munster the number of marriages was 1,327 or 1 in 280 of the population; in Ulster 2,248 or 1 in 209; and in Connaught 514, or only 1 in 450 of the population.

Births.—The births registered in the province of Leinster during the quarter ending 30th September, amounted to 8,125, a number affording an annual ratio of 1 in 43 of the population; in the corresponding quarter of 1864 the ratio was 1 in 41; the number of births *registered* in Munster during the quarter was 8,533, equal to an annual ratio of 1 in 44 against a ratio of 1 in 43 in the third quarter of 1864; in Ulster the number was 11,783, or 1 in 40 against 1 in 42; and in Connaught, 5,604, or 1 in 39 against 1 in 40.

From the foregoing statement it will be observed that the province of Connaught had the highest birth-rate for the third quarter of both 1864 and 1865, and the province of Munster the lowest.

Deaths.—There were registered in the province of Leinster, during the quarter ending 30th September, 5,467 deaths—the annual ratio afforded being 1 in 64 against 1 in 66 for the corresponding quarter of 1864; in Munster the deaths registered were 4,709, or 1 in 79 against 1 in 73 for the third quarter of 1864; in Ulster they were 6,187, or 1 in 76 against 1 in 73; and in Connaught, 2,269, or 1 in 97 against 1 in 95 for the corresponding quarter of 1864.

Thus it will be seen that the number of deaths *registered* in each of the provinces, with the exception of Leinster, yielded a lower ratio in the third quarter of 1865 than in the corresponding quarter of 1864. In both quarters the death-rate was highest in Leinster, and lowest in Connaught.

Fourth Quarter.—October, November, December.

Fourth Quarter.

Marriages.—There were 6,981 marriages *registered* in Ireland during the fourth quarter of 1865, a number affording an annual ratio of 1 in every 202 or ·495 per cent. of the *estimated* population. Of this number, 4,433 were between Roman Catholics, representing a ratio of only 1 marriage in every 247 of Roman Catholics, and 2,548 were between Protestants, affording a ratio of 1 in every 123 of the Protestant population. The number of marriages registered in the corresponding quarter of the year 1864 was 6,269.

Births.—The number of births *registered* during the last quarter of the year 1865, amounted to 33,496—17,153 males and 16,343 females—affording an annual ratio of 1 in every 42·1, or 2·37 per cent. of the *estimated* population; during the corresponding quarter of 1864, the number *registered* was 33,643.

Deaths.—The deaths *registered* during the fourth quarter amounted to 21,013—10,483 males and 10,530 females—affording an annual ratio of 1 death in every 67·1 or 1·49 per cent. of the population. The number *registered* during the last quarter of the year 1864 was 21,755.

Emigration.—The number of persons who left the ports of Ireland, according to the returns obtained by the Enumerators, amounted, during the quarter ended December 31st, to 20,400, showing an increase of 4,796 (3,917 males and 879 females) when compared with the number who emigrated during the corresponding quarter of 1864. Of the 20,400 persons who left the country during the quarter, 11,655 were males, and 8,745 females.

Quarterly Reports.

Fourth Quarter.

Estimated Decrease of the Population.—The number of births *registered* during the quarter, as before stated, having been 33,496; the deaths, 21,013; and the number of emigrants (according to the returns obtained), 20,400;—a decrease of 7,917 would, therefore, appear to have taken place in the population during that period.

PRICES OF PROVISIONS AND PAUPERISM.

During the fourth quarter of 1865 the average price of bread in Dublin was 7*d.* the 4lb. loaf, showing an advance of 1½*d.* per 4 lbs. as compared with the corresponding period of 1864. Oatmeal, the price of which averaged in the last quarter of 1864, 10*s.* 10*d.* per cwt., rose during the corresponding quarter of 1865 to 15*s.* 1*d.* per cwt. The average price of potatoes was also higher when compared with corresponding period of 1864; in the quarter ended December 31st, 1865, the average price of potatoes in the Dublin market was from 2*s.* 9*d.* to 3*s.* 8*d.* per cwt., and during the last quarter of 1864 the average price was 2*s.* 2*d.* to 3*s.* 4*d.* per cwt. Prime beef averaged lower (63*s.* 6*d.* per cwt.) than during the corresponding quarter of 1864, when the average price was 65*s.* 6*d.* per cwt.; on the other hand inferior beef was 1*s.* per cwt. higher.

The number of persons in Ireland receiving in-door relief weekly, during the quarter ended December 31st, 1865, averaged 49,457, being a decrease of 4,310 when compared with the corresponding period of the year 1864. The average number of persons receiving out-door relief during each week of the last quarter of the year 1865 was 8,859, being 1,292 more than the average number who received out-door relief during the fourth quarter of the year 1864.

HEALTH OF THE PEOPLE.

The quarter ended December 31st, was notably healthy; this may be ascribed to three causes—1st to the general subsidence of zymotic diseases; 2ndly, to the mildness of the season; and 3rdly, to the greater demand for labourers, and the consequent increased rate of wages.

Fever, though prevalent in some districts, was not so fatal as during the first nine months of the year; and in other localities where it had prevailed to a large extent, it nearly altogether disappeared.

Scarlatina, though very fatal in those parts of the country where sanitary precautions are neglected, was mostly of a mild type. Thus in the Registrar's District of Delgany (Rathdown Union) 44 cases occurred, "but all terminated favourably."

To the very satisfactory results arising from the working of the Compulsory Vaccination Act, many of the Registrars bear willing testimony—nearly all the deaths ascribed to small-pox having occurred in individuals who had *not been previously vaccinated.* There were 18 cases of small-pox in the Ballymoney Dispensary District. "Two deaths occurred; in each case the form was confluent, and the patient *not vaccinated.*" The Registrar of Belfast District, No. 4, states, that out of 253 deaths "I have not had one case of small-pox, and I believe the Compulsory Vaccination Act is working well."

The Registrar of the Whitechurch District (Dungarvan Union) observes that "there were no cases of small-pox, during the quarter, which may be attributed to the Compulsory Vaccination Act, which is working most satisfactorily."

Measles proved less fatal during this than the preceding quarter, and fewer deaths were attributed to whooping-cough.

Very many of the Registrars again complained of their districts being utterly neglected in a sanitary point of view. They alluded to the high death-rate in those parts where sewerage and other hygienic measures were not resorted to.

On the other hand, the medical officers of those districts where sanitary improvements had taken place, with satisfaction recorded the beneficial results.

Quarterly Reports.

Fourth Quarter.

THE WEATHER.

The mean height of the barometer at the Ordnance Survey Office, Phœnix Park, Dublin, during the quarter was 29·674 inches (in the corresponding period of 1864 it was 29·686 inches; the highest reading (30·644 inches) was on the 15th December, at 9.30 P.M., wind S.W.; and the lowest (28·394 inches) was on the 22nd November, at 9.30 A.M., wind N.W.

The mean temperature of the air during the last quarter of 1865 was 46·5° (during the corresponding period of 1864 it was 44·4°); the maximum registered by the thermometer (71·8°) occurred on the 3rd October, and the minimum (27·3°) on the 21st of the same month.

The rain-fall during the quarter measured 10·112 inches; in the last quarter of 1864 it was 12·040 inches. The greatest monthly rain-fall during the quarter was in November, when 3·533 inches were registered. The rain-fall in October only measured 3·291 inches, against 6·167 inches in the corresponding month of 1864.

The wind blew on 21 days from W.; 18 days from S.W.; 9 days from S.; 9 days from S.E.; and 13 days from E., at 9.30 A.M. The air was calm on 7 days at that hour.

NUMBER OF MARRIAGES, BIRTHS, AND DEATHS REGISTERED IN EACH OF THE EIGHT DIVISIONS.

Marriages.—The North-Eastern Division had the highest marriage rate during the fourth quarter of 1865, the number registered affording an annual ratio of 1 in every 126 of the *estimated* population. In the Eastern Division the annual ratio represented by the number of marriages registered was 1 in every 152, while in the South-Western Division the ratio was only 1 in 278, and in the Western but 1 in every 363 of the estimated population.

The following statement shows the order of the Eight Divisions with regard to the number of MARRIAGES *in proportion to the estimated population* (*Quarter ending 31st December*, 1865):—

Divisions.	Ratio.	Divisions.	Ratio.
1. North-Eastern,	1 in 126	5. North Midland,	1 in 254
2. Eastern,	,, 152	6. South Midland,	,, 256
3. North-Western,	,, 224	7. South-Western,	,, 278
4. South-Eastern,	,, 238	8. Western,	,, 363

Births.—The Births *registered* during the last quarter of 1865 in the North-Eastern Division amounted to 7,349, affording an annual ratio of 1 in 37 of the *estimated* population; in the corresponding quarter of 1864 the ratio was 1 in 38; in the South Midland Division the ratio afforded was only 1 in 52 against 1 in 50 for the corresponding period of 1864.

The order of the Eight Divisions as regards the Annual Rate represented by the number of BIRTHS *registered during the* FOURTH *quarter of* 1864 *and* 1865, *is shown the following statement:*—

Quarter ending 31st December, 1864.		Quarter ending 31st December, 1865.	
Divisions.	Ratio.	Divisions.	Ratio.
1. North-Eastern,	1 in 38	North-Eastern,	1 in 37
2. Western,	,, 39	Western,	,, 40
3. Eastern,	,, 40	South-Western,	,, 40
4. South-Western,	,, 42	Eastern,	,, 43

7. North Midland,	,, 47	South-Eastern,	,, 46
8. South Midland,	,, 50	South Midland,	,, 52

Quarterly Reports.

Fourth Quarter.

Deaths.—The Eastern Division had the highest death-rate during the fourth quarter, the annual ratio afforded being 1 in 51 of the estimated population; in the corresponding quarter of 1864 the death-rate in this division was 1 in 54. In the North Midland Division the deaths *registered* during the fourth quarter of 1865 represent an annual ratio of but 1 in 83, against 1 in 80 for the fourth quarter of 1864; in the North-Western Division the ratio was only 1 in 84, against 1 in 78; and in the Western it was only 1 in 90, against 1 in 86 for the corresponding quarter of 1864.

The following statement shows the Eight Divisions arranged according to the annual RATE OF MORTALITY *afforded by the number of Deaths registered during the* FOURTH *Quarter of* 1864 *and* 1865.

Quarter ending 31st December, 1864.		Quarter ending 31st December, 1865.

Marriages.—The number of marriages *registered* in the province of Leinster during the fourth quarter of 1865 amounted to 1,960, a number representing an annual ratio of 1 in every 177 of the estimated population; in Munster the number was 1,281 or 1 in 290; in Ulster 3,076 or 1 in 153; and in Connaught 664 or only 1 in 333.

Births.—The births (7,437) *registered* in Leinster during the fourth quarter of 1865 afford an annual ratio of only 1 in 47 of the estimated population—in the

corresponding quarter of 1864 the ratio was 1 in 45. In Munster there were registered 8,710 births—a number equal to an annual ratio of 1 in 43 (a similar ratio to that afforded by the number registered in the fourth quarter of 1864); in Ulster the number was 11,729 or 1 in 40 against 1 in 40 for the corresponding quarter of 1864; and in Connaught 5,620 or 1 in 39, against 1 in 41.

Deaths.—There were 6,062 deaths registered in the province of Leinster during the fourth quarter of 1865, the annual ratio afforded being 1 in 57—in the fourth quarter of 1864 the ratio was 1 in 58. In Munster there were registered 5,491 deaths or 1 in 68 of the estimated population, against 1 in 65 for the corresponding quarter of 1864; in Ulster, 6,959 or 1 in 67, against 1 in 65; and in Connaught, 2,501, or only 1 in 88, against 1 in 83 for the fourth quarter of 1864.

Topographical Description of the Eight Divisions into which Ireland has been divided in the foregoing Tables.

No. I. The North-Eastern Division.—This division may be described by a line passing southward from Lough Foyle through the counties of Londonderry, Tyrone, and Armagh, to Lough Bawn, in the county of Monaghan, and thence eastward to Carlingford Lough; the north and east being on the seaboard.

No. II. The North-Western Division is bounded on the east by the division just described, from Lough Foyle to a point a little south of Six Mile Cross, in the county of Tyrone, and may be described by a line drawn thence S.W. through the county of Fermanagh to the south of Enniskillen, embracing that portion of the north-west angle of the county of Cavan belonging to the Enniskillen Union, into the county of Leitrim, crossing Lough Allen, thence into the county of Sligo, to a point situated to the southward of the town of Ballymote, and thence extending north to Ballysadare Bay; the remainder of the division is bounded by the sea. It contains Loughs Erne and Derg, and part of Lough Allen, and large portions of it are mountainous.

No. III. The Eastern Division is situated in the provinces of Leinster and Ulster; it extends along the Irish Sea and St. George's Channel, from Warrenspoint, in the county of Down, to the south of Cahore Point, in the county of Wexford, stretching inland about twenty-five miles, and embracing the counties of Louth, Dublin, and Wicklow, and portions of the counties of Carlow, Cavan, Kildare, Meath, and Wexford; together with small portions of the counties of Armagh and Monaghan.

No. IV. The North Midland Division is situated in the provinces of Leinster, Ulster, and Connaught, and extends southward from its junction with the "North-Western" division near Six Mile Cross, in the county of Tyrone, to Tyrrellspass, in the county of Westmeath. Virginia, in the county of Cavan, is situated on its eastern border, and Tulsk, in the county of Roscommon, on its western.

No. V. The South Midland Division, situated in the provinces of Leinster and Munster, extends from the Hill of Down, in the county of Meath, southward to Borris, in the county of Carlow. Its southern boundary may be described by a line drawn thence to New Birmingham, in the county of Tipperary, and from that point south to Fethard, in the same county, thence westward to the northern base of the Galty Mountains, and in a north-westerly direction, to Pallasgreen, in the county of Limerick. On the east it is bounded by the "Eastern" division, and on the west by the "Western" and the "South-Western" divisions.

Quarterly Reports.

Fourth Quarter.

No. VI. The Western Division.—This division extends southwards from Sligo and Killala Bays to the northern bank of the River Shannon, lying westward of Limerick; the extreme points, north and south, being Benwee Head, in the county of Mayo, and Loop Head, in the county of Clare, a distance in or about 120 miles, which, however, does not represent the extent of seaboard, the western coast being indented by numerous bays and inlets. This division has been extended much more inland than the eastern division, as from its exposure to the Atlantic Ocean, and the prevalence of westerly winds (which blow for nearly three-fourths of the year), the climate must be affected for a considerable distance inland; the Unions situated on the extreme east are Boyle, Castlereagh, Glennamaddy, Mountbellew, Ballinasloe, and Portumna.

No. VII. The South-Eastern Division.—This division extends from its junction with the "Eastern" division southward of Cahore Point, in the County of Wexford, along the eastern and southern coasts to the east of Cork Harbour, and is bounded on the north by the South Midland division. It embraces the County of Waterford; nearly the whole of the County of Wexford; parts of the counties of Carlow, Kilkenny, and Tipperary; that portion of the County of Limerick (38,550 acres) comprised in the Mitchelstown Union, and a portion of the eastern side of Cork County.

No. VIII. The South-Western Division extends along the southern and western coasts from Cork Harbour to the River Shannon, and embraces the County of Kerry, nearly the whole of the Counties of Cork and Limerick, and a small portion of the County of Clare, comprised in the Limerick Union.

POPULATION OF IRELAND (including Army, Navy, and Merchant Seamen on shore and in port) *estimated* to the middle of each of the Years 1801 to 1865 :—

NOTE.—This table has been constructed for the years 1801 to 1831—By adopting the rates of increase of the male and female population between 1821 and 1831, as shown by the Irish Census Reports of 1831—the first complete Census of Ireland having been taken in 1821.

1832 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; the difference between the number arrived at by this computation and the *actual* number by the Census of 1851 was divided over the intervening years in proportion to the number of recorded deaths and the number of emigrants.

1852 to 1861—The English birth and death rates, as above, were used, deducting the number of emigrants according to the returns obtained by the Registrar-General for Ireland, and apportioning the difference as explained for the last period.

1862 to 1865—The English birth and death rates, as above, were employed in the calculations for each year, deducting the number of emigrants according to the returns received by the Registrar-General for Ireland.

ANNUAL ABSTRACTS

OF

MARRIAGES, BIRTHS, AND DEATHS.

1865.

* The *Registration Counties* consist of groups of Superintendent Registrars' Districts or Poor Law Unions. Whenever a District or Union extends into more than one County, it is assigned wholly to that County in which the greater portion of the population is located; hence all the *Registration* Counties differ more or less from the Counties *Proper*.

† See note (†) page 2.

3	Crossmaglen,	30,529	14,191	395	218	204	191	8	8	104	114	177

NOTE.—The Registrars' Districts are sub-divisions of the Unions or Superintendent Registrars' Districts, and are identical with the Dispensary Districts of the same names, except in a few instances.

The letter *W* denotes that the Registrar's District contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.

Wherever the minus sign (—) is prefixed to the numbers given in the column headed "Excess of Births over Deaths," it denotes that the births in the Registrar's District, instead of exceeding the deaths, were, in fact, *less than the deaths*, to the extent stated.

* Including six Registration Districts. † Including three Registration Districts.

IRELAND.—SUPPLEMENTARY TABLE of the

[In the foregoing Tables all the Diseases, either having a distinct character, or fatal to any considerable number of persons, are classified under 114 heads; some of which, however, include groups of very distinct diseases,—such as are fatal to only a *few persons*, or *diseases* which are often confounded with other diseases. The rule has been to refer the distinct diseases to heads under which the cases were so numerous that the additional numbers would not interfere with the calculated proportions. Where it is desired, partial correction,

[*continued at page* 78.]

CAUSES of DEATH at different Periods of Life, in the Year 1865.

however, can now be made by means of the following Supplementary Tables, containing many of the deaths from distinct diseases, such as mumps, epistaxis, dry gangrene, polypus, rickets, bronchocele, &c., &c., and deaths from other forms of disease, such as softening of the brain (necrencephalus), which are returned in many cases under other heads, as paralysis, &c.

These Tables are an extension of the Tables of Causes of Death in Ireland, pp. 68 to 75.]

* The *Registration Counties* consist of groups of Superintendent Registrars' Districts or Poor Law Unions. Whenever a District or Union extends into more than one County, it is assigned wholly to that County in which the greater portion of the population is located; hence all the *Registration* Counties differ more or less from the Counties *Proper*.

† See note (†) page 2. ‡ According to the Census of 1861.

LETTER to the REGISTRAR-GENERAL on the CAUSES of DEATH in IRELAND in 1865, from WILLIAM M. BURKE, Esq., F.C.P.I., ... 95–98

Index of Superintendent Registrars' Districts, and of Registrars' Districts, . . 99–105

Letter to the Registrar-General on the Causes of Death in Ireland, from William M. Burke, F.C.P.I.

Year 1865.

Sir,

I have the honour of bringing under your notice an analysis of the causes assigned for the deaths *registered* in Ireland during the year 1865.

I. Zymotic Diseases.

Of the deaths registered, 19,802 were referred to zymotic diseases, being 1 in every 4·7 of the total deaths, and showing that, in every 1,000 of the estimated population, 3·5 died from zymotic diseases.

The deaths from fever amounted to 5,283, or 1 in every 17·6 of the total deaths. Under the head of fever, the deaths from typhus, typhoid, or enteric, relapsing fever or typhinia, and infantile remittent fever are included. Of the persons whose deaths were caused by fever, 2,748 were males, and 2,535 were females.

Scarlet fever proved more fatal by 1,078 deaths than in the year preceding. The number of deaths registered from this disease amounted to 3,683, or 1 in every 25·3 of the total deaths registered. The divisions which suffered most from this scourge were the western and the south-western.

Diarrhœa proved fatal in 2,139 instances, against 1,962 in the year 1864, and showing a proportion of 1 to every 43·6 of the total deaths.

1,861 deaths, or 1 in every 50·1 of all the deaths, resulted from croup.

To whooping cough, 1,596 deaths—657 males and 849 females—were ascribed.

Measles caused 1,036 deaths, being 406 more than were registered in the year preceding.

Diphtheria caused 480 deaths. This disease proved most fatal in the north-eastern division.

The deaths from small-pox exhibit a remarkable decrease. In the year 1864 the deaths registered from small-pox amounted to 854, whereas during the year 1865 the deaths from this disease only reached 461, or 46 per cent. less than in the preceding year, when the Compulsory Vaccination Act came into operation.

Four males and 1 female died from hydrophobia.

Nine deaths resulted from glanders—all the victims were males.

II. Constitutional Diseases.

The deaths tabulated under the head of constitutional diseases amounted to 18,046, being in the proportion of 1 in every 5·2 of all the deaths, and 3·2 in every 1,000 of the estimated population.

Phthisis, or pulmonary consumption, caused 10,176 deaths—4,928 males, and 5,248 females. The decennial period, in which the greatest number fell victims to phthisis, was from the 15th to the 25th year.

To dropsy, which is so frequently but a fragment or symptom of some organic disease, 2,004 deaths (883 males, 1,121 females) were referred.

1,601 deaths resulted from cancer: of these 692 were males, and 909 females.

Tabes mesenterica was the assigned cause of death in 1,592 instances.

Hydrocephalus caused 1,108 deaths.

Under the head of scrofula 1,252 deaths were tabulated.

III. Local Diseases.

The number of deaths attributed to local diseases amounted to 32,554, or 1 in every 2·9 of all the deaths, and showing a ratio of 5·8 deaths to 1,000 of the estimated population.

Diseases of the nervous system contributed 8,846 deaths—4804 males, and 4,042 females; about one-half of these were ascribed to convulsions. The deaths from apoplexy numbered 1,018—595 males, and 423 females. 1,840 deaths were referred to paralysis; of these 897 were males, and 943 females. Cephalitis, or inflammation of the brain, &c., caused 567 deaths; of these 223 occurred in the north-eastern division. Under the head of brain disease unspecified 799 deaths were returned, against 1,182 in the year 1864.

Diseases of the circulatory organs caused 2,922 deaths; of these, 89 deaths (54 males, and 35 females) resulted from pericarditis or inflammation of the membrane investing the heart; 103 deaths were caused by aneurism—79 males, and 24 females. 2,730 deaths (1,423 males, and 1,307 females) were returned under the head of heart disease unspecified.

Diseases of the organs of respiration, exclusive of pulmonary consumption, caused 14,429 deaths—7,112 males, 7,317 females. Bronchitis proved fatal in 10,389 instances—4,879 males, 5,510 females. Inflammation of the lungs was the cause of 1,817 deaths—1,118 males, and 699 females. To asthma 890 deaths were attributed; 450 to pleurisy; and 171 to laryngitis. Under the head of lung disease unspecified 712 deaths were returned, against 904 so returned in the year 1864.

4,736 deaths (2,608 males, and 2,128 females) were attributed to diseases of the digestive organs. Inflammation of the bowels caused 598 deaths—360 males, and 238 females. Peritonitis was fatal in 270 instances—136 males, and 134 females; 239 deaths were ascribed to gastritis or inflammation of the stomach. From ileus, which includes deaths from obstruction of the bowels, constipation, &c., there died 432—288 males, and 144 females. To diseases of the stomach unspecified 1,104 deaths were attributed. Inflammation of the liver is the cause assigned for 258 deaths; jaundice for 239; and liver disease unspecified 863.

The deaths from diseases of the urinary organs amounted to 1,002—746 males, and 256 females. Of the deaths from diseases of the urinary organs, 38 were referred to inflammation of the kidneys; 201 to nephria or Bright's disease; 49 to stone in the bladder; 59 to inflammation of the bladder; 106 to diabetes; and 427 to kidney disease unspecified.

Diseases of the organs of generation resulted in 174 deaths—4 males, and 170 females.

To diseases of the organs of locomotion 203 deaths were attributed—118 males and 85 females.

Under the head of diseases of the integumentary system 242 deaths were returned, viz., 12 from phlegmon; 100 from ulcer; and 130 from skin disease unspecified.

IV. Developmental Diseases.

The number of deaths referred to diseases incidental to the development of the body amounted to 15,264, or 1 in every 6·1 of the total deaths, or 2·7 deaths in every 1,000 of the estimated population.

To premature birth 241 deaths were referred; 18 to cyanosis; of these latter 13 died under 1 year old, 2 between 1 and 2 years, 1 between 2 and 3 years, 1 between 3 and 4 years, and 1, a male, who died in the Roscrea Workhouse, had attained the unusual age of 27 years. Spina bifida caused 22 deaths; 22 were returned under the head of "other malformations;" and 349 deaths were ascribed to teething.

Twenty-three deaths were returned as caused by paramenia or disordered menstruation.

The number of women who died in childbirth amounted to 644; by adding the deaths from metria or puerperal fever, it will be found that the total deaths *registered* from child-bearing amounted to 928, so that, according to the number of births registered during the year, the death of 1 mother occurred to every 156 children born.

Old age is the cause assigned for the deaths of 9,702 persons—4,045 males, and 5,657 females.

To atrophy and debility 4,243 deaths—2,025 males, and 2,218 females—were attributed.

V. Violent Deaths.

The deaths from violence recorded during the year amounted to 2,183, or 4 deaths in every 10,000 of the estimated population, and 1 in every 42·7 of the total deaths.

Of the above deaths, 1,987 were the result of accident, viz., 682 from fractures and contusions; 38 from gunshot wounds; 48 from cuts or stabs; 509 from burns or scalds—248 males, and 261 females. Of the total deaths registered, 1 in every 183 was from the effects of fire; of the 248 males who perished from fire and its effects 180 were under five years old; and of the 261 females 158 were under 5 years old. Accidental poisoning caused 17 deaths. 482 persons—383 males, and 99 females were accidentally drowned. To suffocation 71 deaths were referred. A like number of deaths from suffocation occurred in the previous year. Of the 71 persons whose deaths were caused by suffocation, 37 were infants under 1 year old. In 140 instances the nature of the accident which caused death was not specified.

69 deaths—47 males, and 22 females—were tabulated under the head of homicide; of these 25 were infants.

The deaths from suicide amounted to 77—58 males, and 19 females, or 14 persons out of 1,000,000 of the estimated population, perished by their own hands.

The means adopted for self-destruction were—gunshot wounds, 5 men; cuts and stabs, 17 men and 4 women; drowning, 7 men and 4 women; hanging, 19 men and 11 women; and in the cases of 10 men the mode of self-destruction was not stated in the returns.

Two men were executed during the year.

Of the violent deaths 48 were not classed. The number of violent deaths unclassed in the year 1864 amounted to 134.

Of 452 sudden deaths returned, the cause was unascertained.

In 4,853 instances, or 1 in 19·2 of the total deaths, the cause of death was unspecified, or so ill-defined as not to admit of classification in the tables. This exhibits an improvement on the previous year, when 6,504, or 1 in 14·3 of the deaths were so returned.

I have the honour to be,
Sir,
Your obedient servant,
W. M. BURKE.

To
The Registrar-General.

INDEX OF SUPERINTENDENT REGISTRARS' DISTRICTS.

ABSTRACTS:—

Marriages registered in Ireland in each of the Divisions and Superintendent Registrars' Districts, also in each Province and County, in 1866, distinguishing Roman Catholic from Protestant Marriages, and giving the Total Number registered in each Quarter of the Year; the Conjugal Condition of Persons Married; the Number of Minors, and of those who signed the Registers by Marks, ... 2–11

Ages of 25,784 Persons married in 1866, distinguishing those of Bachelors, Spinsters, Widowers, and Widows, ... 12, 13

Marriages, Births, and Deaths registered in each of the Divisions and Superintendent Registrars' Districts, and in each Province and County in 1866; also Births and Deaths, and Excess of Births over Deaths in each of the Registrars' Districts of Ireland, distinguishing the Sexes and Illegitimate Births throughout, ... 14–38

Page

Births registered in the Divisions and Superintendent Registrars' Districts, and in the Provinces and Counties (distinguishing Males and Females) in each of the Four Quarters of 1866, ... 40–49

Deaths registered in each of the Four Quarters of 1866 (distinguishing Males and Females), in Divisions and Superintendent Registrars' Districts, also in Provinces and Counties, 50–59

Deaths of Males and Females at different Ages registered in 1866, in Divisions and Superintendent Registrars' Districts, also in Provinces and Counties, ... 60–67

Causes of Death of Males and Females in Ireland, at different periods of life, in 1866, . 68–75

Supplementary Table of Causes of Death of Males and Females, at different periods of life, in 1866, ... 76–79

Causes of Death of Males and Females in Ireland, and in each of the Divisions in 1866, . 80–87

Deaths from several Zymotic and other Causes in 1866, in the Divisions and Superintendent Registrars' Districts, and in the Provinces and Counties, ... 88–91

APPENDIX.

Letter to the Registrar-General on the Causes of Death in Ireland in 1866, from William M. Burke, Esq., F.C.P.I., ... 95–98

Copy of Circular relating to Registration of Roman Catholic Marriages, . 98

Index of Superintendent Registrars' Districts, and of Registrars' Districts, 99–105

REPORT

TO

His Excellency JOHN POYNTZ, EARL SPENCER, K.G., &c., &c.,

Lord Lieutenant-General and General Governor of Ireland.

MAY IT PLEASE YOUR EXCELLENCY,—

As directed by the provisions of the 26 Vic., cap. 11, sec. 49, the 26 & 27 Vic., cap. 90, sec. 16, and the 7 & 8 Vic., cap. 81, sec. 56, I have the honour to transmit to your Excellency, in order that the same may be laid before Parliament, General Abstracts of the Births, Deaths, and Marriages registered in Ireland during the year 1866.

A General Abstract of the number of Births, Deaths, and Marriages, registered in the year 1866, was presented to Parliament in the Session of 1867. The Report now submitted contains detailed Tables of the ages and condition of persons married, of Births, distinguishing legitimate from illegitimate; and of Deaths, and their causes.

The Acts for the Registration of Births and Deaths, and Roman Catholic Marriages, came into operation on the 1st of January, 1864, but that for the Registration of Protestant Marriages of all denominations has been in force since the 1st of April, 1845.

For the purposes of Registration, the country has been divided into 163 Superintendent Registrars' Districts—co-extensive with the Poor Law Unions—and into 772 Registrars' Districts, which, with a few exceptions, are of equal extent with the Dispensary Districts formed under the Medical Charities Act.

GENERAL SUMMARY.

The *estimated* population of Ireland in the middle of 1866 was 5,582,625; the persons whose marriages were registered, amounted to 60,242; the number of marriages being 30,121; children born alive whose births were registered, amounted to 146,090; and the number of deaths registered was 93,027. The emigrants from Ireland during the year 1866 amounted to 99,467. In the previous year—1865—there were *registered* 30,802 marriages, 144,970 births, and 93,154 deaths; the number of emigrants was 101,497.

MARRIAGES.

30,121 marriages were registered during 1866, being in the proportion of ·540 marriages to every 100 persons, or of 1 marriage to every 185 persons, of the *estimated* population. The ratio in England was 1 in 113, or ·885 per cent., and in Scotland 1 in 133 or ·751 per cent. of the estimated population.

922 men and 4,613 women contracted marriage before they had attained their twenty-first year. The proportion of males married under age was 3·06; of females, 15·31 per cent. The proportions in England and Wales in 1866 were—males, 6·69, and females, 20·03 per cent. In Scotland the proportions were 7·20 males and 20·69 per cent. females.

Of widowers, 3,180, and of widows, 1,691 were re-married; the proportion being 10·56 per cent. of widowers, and 5·61 per cent. of widows,

to the total marriages. The like proportions in England and Wales were 13·91 widowers, and 9·40 per cent. widows. In Scotland the proportions were, widowers, 11·96, and widows, 5·60 per cent.

According to the provisions of the Registration Acts, every registry of a marriage is required to be signed by the parties married, two witnesses, and the officiating clergyman. A test of the elementary education of the persons contracting marriage is thus afforded by comparing the number who write their names in the registers, with the number who make a mark. Of 60,242 persons married in 1866, 26,596 (11,630 men and 14,966 women) signed the registers with marks; being in the proportion of 44·1 per cent.—38·6 per cent. of the males, and 49·7 per cent. of the females married.

The like rates in England and Wales for the same year were 21·6 per cent. of males, and 30·0 per cent. of females; and in Scotland 11·22 of males and 22·00 per cent. of females.

The marriage registers contain a column in which the age of each of the parties married is inserted; but as the law only requires it to be stated whether the parties are "of full age" or "minors," the precise age at marriage is not always entered in the registers. In 1866 the exact ages of both parties were given in 12,892 instances. Of these 11,619 were bachelors, and 12,265 spinsters; 1,273 were widowers, and 627 widows. The largest number of wives was married between 21 and 30—the number being 7,985, or more than one-half of the whole number whose ages are recorded. The largest number of husbands—7,914—is also found to have been married between 21 and 30 years of age.

298 bachelors were married to widows, both of whose ages at the time of marriage are recorded. Of these, 160 of the widows and 140 of the bachelors married between 25 and 35 years of age. Of 944 widowers who married spinsters, 430 of the latter were between 25 and 35 years of age; whilst the largest number of the widowers on their re-marriages ranged chiefly between 30 and 45.

Of widowers and widows married, whose ages at the time of marriage are stated, there were 329 couples. Of these the largest number of widows appears to have been between 40 and 50, and of widowers between 50 and 60. 12 widowers and 1 widow were married when they were above 70 years old.

With respect to Roman Catholic Marriages, the 26 & 27 Vic., cap. 90, directs that parties about to contract marriage shall produce to the clergyman celebrating the marriage a certificate, to be procured from the Registrar, filled up as far as possible by that officer with the particulars necessary to be registered, which certificate the parties married, the witnesses, and the officiating clergyman are required to sign. When so filled up the certificate is to be returned within three days to the Registrar by the husband, under a penalty of ten pounds.

With a view to facilitate the registration of marriages under the Act referred to, and at the special request of several dignitaries of the Roman Catholic Church,—with the approval of the Law Officers of the Crown—(who at that time were the Right Hon. Thomas O'Hagan, M.P., and James A. Lawson, esq., Q.C.)—I instructed the District Registrars to furnish to each parish priest, who should apply for them, forms of certificate to be duly filled, signed, and forwarded to the Registrar on the occasion of a marriage, thus saving the husband the inconvenience of procuring from the Registrar a form of certificate *previous* to his mar-

riage, as required by the Statute.* I also furnished all the Roman Catholic clergy in Ireland with copies of the Act above referred to, in order that the requirements of the law might be known to them previous to coming into operation.

The proportion per cent. of marriages to the estimated population, and of persons married who wrote their names in the registers; also of minors, widowers, and widows, are given in the following table, for the several registration divisions:—

TABLE I.—*The Proportional Number of Marriages in the Eight Divisions of Ireland during the years* 1864, 1865, *and* 1866, *of Persons who Signed their Names, of Persons not of Full Age, and of Re-marriages.*

The extent and position of each of these divisions are specified at page xxxv.

Of the total number of marriages registered (30,121) 21,211 were celebrated by Roman Catholic clergymen, and entered in the register books by the Registrars in accordance with the 26th and 27th Vic., cap. 90; and 8,910 marriages were of the various Protestant persuasions. Of the latter marriages 5,006 were in churches and chapels of the Established Church, 2,697 in Presbyterian Meeting-houses, 245 in "Registered Buildings," 946 in the Registrars' offices, 14 according to the usages of the Society of Friends, and 2 marriages were of members of the Jewish persuasion. Of the entire number of marriages in 1866 there were contracted in the quarter ending the last day of March, 11,992; of June, 6,081; of September, 5,566; of December, 6,482.

* For copy of Circular issued on this subject, see page 98.

The following table gives a statement showing in continuation of the return in my report for 1865, the number of marriages solemnized in Ireland under the Marriages Act of 1844, distinguishing the mode of celebration:—

TABLE II.—*The Number of Marriages registered under 7 & 8 Vic., c. 81, in each Year, from 1st April, 1845, to 31st December, 1866, and the Mode in which the Marriages were solemnized.*

Years ended 31st December	Marriages. According to the Rites of the Established Church. Special Licence.	Licence.	Banns.	Registrar's Certificate.	Not stated by which of the foregoing Forms.	Total.	Not according to the Rites of the Established Church. In Registered Presbyterian Meeting-houses.	In Registered Buildings.	In the Registrars' Offices.	Society of Friends.	Jews.	Total.	Total Marriages.

There is not any return made to me of the places of worship belonging to Roman Catholics in which marriages are celebrated; but under the provisions of the 7th & 8th Vic., cap. 81, I am enabled to state respecting other religious persuasions, that there were 1,458 Churches and Chapels of the Established Church, 574 registered Presbyterian Meeting-houses, and 200 Registered Buildings belonging to various denominations, in which marriages might lawfully be solemnized, on the 31st December, 1866. During the year 1866 there was an increase of four in the number of such places in the Established Church; and of eight in other religious communities. The "Registered Buildings" belong to the following denominations:—

Denominations.	No. of Places of Worship.	Denominations.	No. of Places of Worship.
Wesleyan Methodists, . .	108	Methodists New Connexion, .	5
Reformed Presbyterians, . .	33	Church Methodists, . . .	1

During the year 1866 there were issued by the Registrars, 744 Licences for Marriage in Registered Buildings, and in the Registrars' offices.

The number of Marriage Licences issued by the licensing Ministers of the several Presbyterian bodies is given in the following summary:—

Presbytery or Synod.	Number of Licensing Ministers on 31st December, 1866.	Number of Registered Meeting-houses on 31st December, 1866.	Number of Licences issued.
1. General Assembly of the Presbyterian Church in Ireland,	116	534	2,642
2. Remonstrant Synod of Ulster,	8	21	48
3. Presbytery of Antrim,	4	10	34
4. United Presbytery or Synod of Munster,	4	4	–
5. Northern Presbytery of Antrim,	1	5	11
Total,	133	574	2,735

BIRTHS.

The births registered in Ireland during 1866, amounted to 146,090. Of these, 75,095 were males, and 70,995 females, being in the proportion of 105·8 boys to every 100 girls. In England, in the same year, the number of males to 100 females whose births were registered was 104·3; and in Scotland 105·5.

The rate per cent. of births to the *estimated* population was 2·617. In England the rate was 3·554, and in Scotland 3·60.

There were 4,569 illegitimate births, of which 2,506 were those of males, and 2,363 females; the proportion to the total number of births being 3·3 in every 100. The rate in England was 6·0, and in Scotland 10·2 per cent. The highest rates, 5·7 and 4·6, of illegitimate children in every 100 born, occurred in the North-Eastern and South-Eastern Divisions respectively.

The following table shows the proportion of legitimate and illegitimate births *registered* in each of the eight Divisions in 1864, 1865, and 1866.

TABLE IV.—*The Per-centage of Legitimate and Illegitimate Births registered in Ireland during the years* 1864, 1865, *and* 1866, *by Divisions.*

Divisions.	Proportion per cent. of Legitimate Births.			Proportion per cent. of Illegitimate Births.		
	1864.	1865.	1866.	1864.	1865.	1866.
IRELAND,	96·2	96·3	96·7	3·8	3·7	3·3
North-Eastern,	93·8	93·6	94·3	6 2	6·4	5·7
North-Western,	96·4	96·8	96·7	3·6	3·2	3·3
Eastern,	96·6	96·9	97·3	3·4	3·1	2·7
North Midland,	97·3	97·5	97·8	2·7	2·5	2·2
South Midland,	95·7	96·4	96·2	4·3	3·6	3·8
Western,	98·1	98·3	98·6	1·9	1·7	1·4

South-Western,	97·6	97·5	97·7	2·4	2·5	2·3

40,002 births were registered during the quarter ended 31st March; 38,785 in that ended 30th June; 33,581 during that ended 30th September; and 33,722 in that ended 31st December.

DEATHS.

The deaths registered in 1866 amounted to 93,027, of which 46,140 were males, and 46,887 females, being in the proportion of 1·666 per cent. of

the *estimated* population, or in the ratio of 1 *registered* death to every 60 persons. The proportion in England for the same year was 2·361 per cent., or 1 in 42; and in Scotland 2·263 per cent., or 1 in 44.

The following table shows the per-centage of mortality at different ages:—

TABLE V.—*The Mortality per Cent. at each Age-period, according to the Registration of Deaths in Ireland, during the Years* 1864, 1865, *and* 1866, *by Sexes.*

Sexes.		Ages.											
		0—	5—	10—	15—	25—	35—	45—	55—	65—	75—	85—	95 and upwards.
Males,	1864	28·65	4·23	2·32	7·57	6·19	5·78	7·76	11·51	12·30	10·11	2·97	·61

	1865	25·89	4·62	2·41	7·07	6·64	6·13	7·84	11·24	13·62	10·53	3·25	·76
	1866	24·11	4·56	2·51	7·12	7·03	6·45	7·62	11·45	13·61	11·16	3·55	·83
Males and Females,	1864	26·92	4·25	2·34	7·24	6·37	5·91	7·78	11·66	13·02	10·68	3·16	·67
	1865	27·50	4·57	2·37	7·32	6·51	6·00	7·80	11·00	13·03	10·08	3·15	·67
	1866	26·03	4·70	2·49	7·14	6·86	6·18	7·73	11·19	12·94	10·66	3·37	·71

Of the persons whose deaths were registered during the year 26·03 in every 100 were children under 5 years old—of whom 27·99 per cent. were males, and 24·11 per cent. females. 13·93 per cent. of the men, and 15·54 per cent. of the women, whose deaths were registered had passed their 75th year. 58 of the males and 83 of the females in every 10,000 were stated in the returns to have been over 95 years of age.

EMIGRATION.

During the year 1866 the number of emigrants who left the ports of Ireland amounted to 99,467; of these 59,561 were males and 39,906 females. Of the whole number 17,379, or 17·5 per cent., were from Leinster; 36,971, or 37·2 per cent., from Munster; 26,259, or 26·4 per cent. from Ulster; and 12,439, or 12·5 per cent. from Connaught: 6,419 persons, or 6·4 per cent., did not state the county or province to which they belonged.

Of the emigrants in 1866, 13·6 per cent. were under 15 years of age; 75·3 per cent. were 15 to 35 years old; 10·4 per cent. were 35 and upwards; and the ages of ·7 per cent. were not specified in the returns.

METEOROLOGY.

The following is an abstract of the meteorological observations taken during the year 1866, at the Ordnance Survey Office,* Phœnix Park, Dublin, kindly furnished by Captain Wilkinson, R.E.

The barometer was highest during the year, at 9.30 A.M., on 24th January, when it stood at 30·673 inches, the wind blowing from S.W.; it was lowest on 23rd March, at 9.30 P.M., with the wind from S.E., when it was 28·663 inches.

The highest temperature in the air was 80·7,° on 13th July, and the lowest was 17·5°, on the 1st March.

Rain or snow fell on 216 days; the greatest rain-fall in 24 hours was ·975 in., on 18th June, with wind blowing N.W.; the total amount registered was 26·857 inches.

* Latitude 53° 21′ 44·65″ north; longitude 6° 21′ 6·35″ west. Height above the sea 158·8 feet. From the 1st January, 1865, inclusive, the barometer has been corrected for altitude, as well as reduced to 32° Fahrenheit.

The prevailing wind was from the W., from which point it blew on 107 days; it was from S.W. on 84 days; on 26 days from N.W.; on 38 days from S.; on 30 days from E.; on 17 days from S.E.; on 17 days from N.; on 13 days from N.E., at 9.30 A.M.; on 33 days the air was calm at that hour. The total pressure of the W. wind was 302·62 lbs., being an average of 2·83 lbs. per square foot. The strongest wind blew from S.W., on the 6th December, when the pressure was 25 lbs. per square foot.

I beg here to repeat the observations made in my Report to your Excellency for 1864; with respect to the working of the Acts for the Registration of Births, Deaths, and Marriages in Ireland, as I regret to state that the numbers of these events registered in 1866 do not show any improvement compared with previous years:—

"In several instances prosecutions have been resorted to with some advantage; but notwithstanding the exertions made to induce a general compliance with the law throughout the country, numerous cases of neglect to register births and

deaths have been reported to me by the District Registrars, but frequently at too late a period after their occurrence to allow of the parties being proceeded against at the Petty Sessions.

"I regret to add that the registration of marriages under the 26th & 27th Vic., cap. 90, is not at all satisfactory in some Districts, owing to the Clergy who have celebrated the marriages having declined to sign the necessary certificates.

"The marriages solemnized under the provisions of the 7th & 8th Vic., cap. 81, which came into operation in 1845, are, I believe, all registered.

"The following are the ratios of Births, Deaths, and Marriages to population in different countries compared with the ratio in Ireland in 1864 [and in 1865 and 1866]:—

Countries.	Ratio to Population.		
	Births.	Deaths.	Marriages.
IRELAND [in 1864],	1 in 42	1 in 61	1 in 207
IRELAND [in 1865],	1 in 39	1 in 61	1 in 183
IRELAND [in 1866],	1 in 38	1 in 60	1 in 185
England,	1 „ 28	1 „ 42	1 „ 116
Scotland,	1 „ 28	1 „ 42	1 „ 137
Sweden,	1 „ 30	1 „ 50	1 „ 145
Prussia (Old Provinces),	1 „ 24	1 „ 38	1 „ 116
Hanover,	1 „ 30	1 „ 44	1 „ 124

"It will be seen from the foregoing figures, compiled from the Statistical Tables published by the Board of Trade, how incomplete was Registration in Ireland in 1864, and comparing the number of Births, Deaths, and Marriages recorded in that year with those since annually registered, I regret to state that there appears but little improvement in the subsequent years:—

Registered.	1864.	1865.	1866.	1867.	1868.
Births,	136,414	144,970	146,090	144,318	146,108
Deaths,	93,144	93,154	93,027	93,911	86,803
Marriages,	27,406	30,802	30,121	29,796	27,753"

Following this Report are summaries of the Quarterly Reports issued in 1866, and the Appendix contains a letter addressed to me by Dr. Burke, the Superintendent of Medical Statistics, respecting the causes of death—to which I beg to refer.

I have the honour to be
Your Excellency's
Very faithful servant,

William Donnelly,
Registrar-General.

General Register Office,
Dublin, 31st March, 1870.

SUMMARY OF THE QUARTERLY REPORTS, 1866.

First Quarter—January, February, March.

Quarterly Reports. First Quarter.

Marriages.—The number of marriages *registered* in Ireland during the first three months of the year 1866 amounted to 11,992, equal to an annual ratio of 1 in every 116, or ·859 per cent. of the *estimated* population. The number *registered* during the corresponding period of 1865 was 12,308.

Of the 11,992 marriages *registered* during the first quarter of 1866, 9,681 were between Roman Catholics, representing an annual ratio of 1 marriage in every 112, or ·893 per cent. of the Roman Catholic population; and the remaining 2,311 marriages were between Protestants, being equal to an annual ratio of 1 in every 134, or ·745 per cent. of the Protestant population.

Births.—The births *registered* during the quarter ending on 31st March, 1866, amounted to 40,002 (20,577 boys and 19,425 girls), being equal to an annual ratio of 1 in every 34·9, or 2·87 per cent. of the *estimated* population; the number of births registered during the corresponding quarter of 1865 was 38,320, and in the first quarter of 1864 the number was 30,179.

Deaths.—The number of deaths registered in Ireland during the quarter amounted to 27,614 (13,575 males and 14,039 females), representing an annual ratio of 1 in every 50·5, or 1·98 per cent. of the *estimated* population. The number *registered* in the corresponding quarter of 1865 was 29,259, and in 1864 it was 28,043.

Emigration.—According to the returns obtained by the Enumerators, the number of emigrants who left the ports of Ireland, during the quarter ended 31st March, 1866, amounted to 25,809—16,689 males and 9,120 females—being 9,961 more than the number who emigrated during the corresponding quarter of 1865.

The *average* number of emigrants from Ireland *during the first three months* of the years 1852 to 1865 was 21,745; the number for the first quarter of 1866 is, therefore, 4,064 in excess of the average.

As will be seen by the following statement, the number of emigrants who left the country during *the first quarter* of each year in which the Returns were obtained* varied to a very great extent; in the first quarter of 1852 the number was 45,434, in 1853 it was 36,912, in 1854 it was 31,620, in 1855 it fell to 19,572, and from that period in only one year (1857) reached 20,000, until the year 1863, when it rose from 11,495, in 1862, to 24,792; it further increased to 27,625, in 1864; it then fell to 15,848 *for the first quarter* of 1865, and, as has been already stated, amounted to 25,809 during the first quarter of 1866.

STATEMENT showing the number of Emigrants who left Ireland during *the first three months* of each of the years 1852 to 1866, inclusive, according to Returns received by the Registrar-General.

	No. of Emigrants.		No. of Emigrants.		No. of Emigrants.
First three months of	1852, 45,434	First three months of	1857, 20,025	First three months of	1862, 11,495
„	1853, 36,912	„	1858, 12,118	„	1863, 24,792
„	1854, 31,620	„	1859, 14,367	„	1864, 27,625
„	1855, 19,572	„	1860, 15,525	„	1865, 15,848
„	1856, 14,870	„	1861, 14,235	„	1866, 25,809

Estimated Decrease of the Population.—The number of births *registered* during the quarter ended 31st March, 1866, being 40,002; the deaths 27,614; and the number of emigrants 25,809 (according to the returns obtained by the enumerators at the several seaports);—a decrease of 13,421 would, therefore, appear to have taken place in the population during that period.

PRICES OF PROVISIONS, AND PAUPERISM.

The average price of Messrs. Manders and Co.'s 4 lb. loaf for the first quarter of the year 1866 was 6½*d.*, being one penny higher than the average price for the

* Returns of the Emigration from Ireland were first obtained by the Registrar-General in May, 1851.

Quarterly Reports.

First Quarter.

corresponding period of 1865. The price during the first three weeks of the first quarter of 1866 was 7*d.*; it was 6½*d.* during the remaining weeks. The price was 5½*d.* during the whole of the corresponding quarter of 1865.

The price of oatmeal at the Dublin Corn Exchange ranged from 15*s.* 6*d.* in the first week to 14*s.* 6*d.* per cwt. in the last week of the first quarter of 1866; the average price for the three months being 14*s.* 10*d.*, against 11*s.* 9*d.* for the corresponding quarter of 1865.

The quotations for potatoes at the Potato Market, Dublin, were somewhat lower for the first quarter of 1866 than for the corresponding period of 1865; the averages for the former being 2*s.* 6*d.* to 3*s.* 6*d.*, and for the latter 3*s.* 1*d.* to 3*s.* 7*d.* per cwt.

The average prices of beef at the Dublin Cattle Market were also lower during the first quarter of 1866, than during the first three months of 1865; the averages being 50*s.* 6*d.* to 63*s.* 6*d.* per cwt. for the former, and 54*s.* 6*d.* to 68*s.* for the latter.

The average number of persons in Ireland receiving indoor relief on Saturdays during the quarter was 57,123; the average for the corresponding quarter of the year 1865 was 62,418. The smallest number of persons (54,894) receiving indoor relief was on Saturday, in the first week of January; this was also the case in the corresponding quarter of 1865 and of 1864. The largest number receiving indoor relief during the first quarter of 1866 was in the first and second weeks of March. The number of persons (10,163) receiving outdoor relief was also smallest in the first week of the quarter; the weekly average for the quarter was 11,927, against 11,296 in the corresponding period of 1865.

Of the persons receiving indoor relief during the first quarter of the year 1866, an average number of 465 in each week were located in Asylums for the Blind and the Deaf and Dumb, and in Extern Hospitals; in the corresponding quarter of 1865 the average weekly number was 523.

THE WEATHER.

The mean height of the barometer at the Ordnance Survey Office, Phœnix Park, Dublin, during the first quarter of the year 1866, was 29·521 inches (in the corresponding period of 1865, and of 1864 it was 29,651 inches, and 29·725 inches respectively); the highest reading (30·490 inches) was on the 24th January, at 9.30 A.M., wind S.W.; and the lowest (28·480 inches) on the 23rd March, at 9.30 P.M., wind S.E.

The mean temperature of the air during the quarter was 41.5° (during the corresponding period of 1865 it was 38·9°, and in 1864 it was 40·2°); the maximum registered by the thermometer (68·0°) was on the 30th March, and the minimum (17·5°) was on the 1st of the same month.

Rain or snow fell on 54 days during the quarter. The rain-fall measured 7·508 inches (it was 5·979 inches and 5·227 inches respectively during the corresponding quarters of 1865 and 1864). The greatest monthly rain-fall during the first quarter of 1866 was in March, when 3·309 inches were registered.

The wind blew on 47 days from S.W.; 13 days from N.W.; 7 days from W.; 6 days from S.E.; and 5 days from N.E., at 9.30 A.M.; on only one day during the three months did the wind blow from the East at that hour, and on only two days from the North. The air was calm on 4 days at 9.30 A.M.

HEALTH OF THE PEOPLE.

The deaths registered during the first quarter of 1866 were far below the number registered during the corresponding periods of the years 1864 and 1865.

Zymotic diseases, in general, proved less fatal than during the preceding periods; in some districts, however, especially those in which precautionary measures were neglected, fever, scarlatina, measles, &c., proved most destructive.

The Registrar of the Randalstown District, Superintendent Registrar's District of Antrim, says, "I have had 21 cases of fever, while there have been registered

during the same period 7 deaths from it. The disease, I am sorry to say, has been on the increase for the last month, owing chiefly to my not having compulsory power to send such cases to the workhouse fever hospital. I saw to-day 6 fever cases in one cabin, and the head of the family refused to have them removed to hospital. *I should mention that the Guardians have a spring cart and bed for the conveyance of fever patients to hospital.*" *Quarterly Reports.* First Quarter.

It would be well that the good example set by the Antrim Board of Guardians was more generally followed, as there can be no doubt that the poison of fever and other zymotic diseases is disseminated in consequence of fever patients being transmitted to hospital in cabs and other public conveyances.

In Belfast No. 4 District 49 deaths resulted from fever.

Scarlatina of a malignant character prevailed in the Keady District, Armagh Union; 5 healthy children in one family were cut off by this scourge. In the Bellaghy District, Magherafelt Union, scarlatina and its sequelæ proved fatal in 21 instances. In Mullingar District 27 deaths resulted from scarlatina. "This great mortality" (observes the Registrar) "I attribute to the filthy and uncleansed state of the back streets in this town." In Enniskillen scarlatina was very prevalent, but comparatively mild; this disease was also rife in Wexford, Galway, Westport; and of the 50 deaths registered in the Achill District (Newport Union) 21 were ascribed to scarlatina. The disease, however, had disappeared from many districts where it had been epidemic.

Measles and whooping cough were very prevalent.

In Coleraine there were nine deaths from small-pox; in Arklow (Rathdrum Union) out of 78 deaths registered during the quarter, no less than 35 were caused by small-pox! Deaths from this disease also occurred in the Districts of Cappaghduff (Ballinrobe Union), Ballymoney, &c. *It is much to be regretted that the Registrars of those districts in which fatal cases of small-pox were registered, were unable to state whether those who fell victims to this disease had been previously vaccinated.*

Bronchitis and other pulmonary affections proved very fatal, especially to the aged and the very young. The Registrar of the Portadown District (Lurgan Union) records a case of "pure Asiatic" cholera which proved fatal in 15 hours. Two deaths "from cholera" were registered in the Newtownards District.

While some of the Registrars were enabled to report favourably of the sanitary state of their districts, the majority complained loudly of the want of all sanitary precautions, especially the Registrars of Portrush, Bellaghy (Magherafelt Union), Ardara (Glenties Union), Kilskeer (Kells Union), Mullingar, and Carrick-on-Suir.

Those who fail to adopt such precautionary measures as have been over and over again recommended with a view to the improvement of the public health may see, when it is too late, the dire results of their negligence.

NUMBER OF MARRIAGES, BIRTHS, AND DEATHS, REGISTERED IN EACH OF THE EIGHT DIVISIONS

Into which Ireland has been divided for Statistical purposes.

Marriages.—The marriage rate during the quarter ending 31st March, 1866 was highest in the "South-Western" and "Western" Divisions, and lowest in the "Eastern" Division. This was also the case in the first quarter of 1865.

The order of the EIGHT DIVISIONS *as regards the annual Rate represented by the number of Marriages registered during the* FIRST *quarter of the years* 1865 *and* 1866 *is shown in the following Statement:—*

Quarter ending 31st March, 1865.		Quarter ending 31st March, 1866.	
Divisions.	*Ratio to Population.*	*Divisions.*	*Ratio to Population*
1. South-Western,	1 in 74	South-Western,	1 in 77
2. Western,	„ 84	Western,	„ 81
3. South-Eastern,	„ 100	South-Eastern,	„ 117
4. North Midland,	„ 130	North-Western,	„ 125
5. North-Western,	„ 138	North-Eastern,	„ 147
6. South Midland,	„ 139	North Midland,	„ 155
7. North-Eastern,	„ 158	South Midland,	„ 157
8. Eastern,	„ 170	Eastern,	„ 165

Quarterly Reports. First Quarter.

Births.—The birth-rate, during the first quarter of the year 1866, in the "South-Western" Division, was 1 in 30; this was higher than the rate in any of the other divisions. The "South-Western" Division had also the highest birth-rate for the first quarter of 1865 and of 1864.

The "South-Midland" Division, which ranked *third* for the first quarter of 1864, had the lowest birth-rate for the first quarter of 1865, as well as for the corresponding period of 1866.

The "North-Western" has improved its position as to birth-rate; it came eighth (or last) for the first quarter of 1864; and sixth for the corresponding quarter of 1865 and 1866.

The "North-Eastern" Division, which was fourth for the first quarter of 1864, occupied the second place for the corresponding period in 1865, and maintained its position for the first quarter of 1866.

The "Western" Division was seventh for the first quarter of 1864; fifth for the corresponding period of 1865; and third for the first quarter of 1866.

The numerical order of the EIGHT DIVISIONS *as regards the annual Rate represented by the number of Births registered during the* FIRST *quarter of* 1864, 1865, *and* 1866, *is shown in the following Statement:—*

Quarter ending 31st March,

1864.		1865.		1866.	
Divisions.	*Ratio.*	*Divisions.*	*Ratio.*	*Divisions.*	*Ratio.*
1. South-Western,	1 in 37	South-Western,	1 in 33	South-Western,	1 in 30
2. South-Eastern,	„ 42	North-Eastern,	„ 34	North-Eastern,	„ 32
3. South Midland,	„ 47	South-Eastern,	„ 37	Western,	„ 35
4. North-Eastern,	„ 47	Eastern,	„ 37	South-Eastern,	„ 36
5. Eastern,	„ 48	Western,	„ 38	Eastern,	„ 37
6. North Midland,	„ 52	North-Western,	„ 40	North-Western,	„ 37
7. Western,	„ 55	North Midland,	„ 41	North Midland,	„ 39
8. North-Western,	„ 56	South Midland,	„ 42	South Midland,	„ 41

Deaths.—The rate of mortality was not so high in any of the divisions during the first quarter of the year 1866, as it was during the corresponding period of 1865.

The "Eastern" Division had the highest rate of mortality (1 in 41) for the first quarter of 1866; it had also the highest rate (1 in 40) for the corresponding quarter of 1865; it ranked second for the first quarter of 1864, when its death-rate was 1 in 43. The North-Eastern Division came second, and the South-Eastern third, as regards rate of mortality, for the first quarter of 1866. These three divisions had the highest rates of mortality for the first quarter in each of the years 1864, 1865, and 1866.

The Western Division came last for each of the quarters just mentioned; the average rate of mortality therein for the first quarter of 1866 was 1 in 64; it is, however, but right to state that many of the Unions or Superintendent Registrars' Districts had a much higher rate than this, and that this low ratio for the division is produced by the extraordinarily low ratios afforded by the deaths *registered* in some of the Unions.

The following Statement shows the EIGHT DIVISIONS *arranged according to the annual Rate of Mortality afforded by the number of Deaths registered during the* FIRST *quarter of* 1864, 1865, *and* 1866:—

Quarter ending 31st March,

1864.		1865.		1866.

Quarterly Reports.

First Quarter.

PROVINCES.

Marriages.—The number of marriages registered during the first quarter in the Province of Connaught affords an annual ratio of 1 in 84 of the population; in Munster the ratio was 1 in 87; in Ulster 1 in 148; and in Leinster 1 in 171.

The following Table shows, by PROVINCES, *the number of Marriages registered during the* FIRST *quarter of the years* 1864, 1865, *and* 1866, *together with the annual ratio to the estimated Population.*

REGISTRATION PROVINCES	MARRIAGES. Quarter ending 31st March,					
	1864.		1865.		1866.	
	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.
LEINSTER,	1,863	1 in 188	2,197	1 in 158	2,008	1 in 171
MUNSTER,	3,110	„ 120	4,564	„ 81	4,249	„ 87
ULSTER,	2,714	„ 174	3,025	„ 155	3,143	„ 148
CONNAUGHT,	1,915	„ 116	2,522	„ 88	2,592	„ 84
TOTAL,	9,602	1 in 148	12,308	1 in 115	11,992	1 in 116

Births.—The number of births registered in the Province of Munster during the first quarter of 1866 afforded the highest birth-rate, viz., 1 in 33; this province had also the highest birth-rate for the first quarter of 1865 and 1864; in Ulster and Connaught the birth-rate during the first quarter of 1866 was 1 in 34, and in Leinster it was only 1 in 39.

Deaths.—The rate of mortality during the quarter was highest in Leinster, viz., 1 in 44; in Ulster it was 1 in 50; in Munster, 1 in 53; and in Connaught, 1 in 63.

The following Table shows, by PROVINCES, *the number of Births and Deaths registered during the* FIRST *quarter of the years* 1864, 1865, *and* 1866, *together with the ratio to the estimated Population.*

Second Quarter.

Second Quarter.—April, May, June.

Marriages.—The number of marriages *registered* in Ireland during the second quarter of the year 1866 amounted to 6,081, equal to an annual ratio of 1 in every

Quarterly Reports.

Second Quarter.

230, or ·436 per cent. of the *estimated* population. The number *registered* in the corresponding period of 1865 was 5,659.

Of the 6,081 marriages *registered* during the second quarter of 1866, 3,970 were between Roman Catholics, representing an annual ratio of 1 marriage in 273, or ·366 per cent. of the Roman Catholic population; and the remaining 2,111 marriages were between Protestants, being equal to an annual ratio of 1 in every 147, or ·680 per cent. of the Protestant population.

Births.—There were 38,785 births *registered* in Ireland during the quarter ending 30th June, 1866—19,883 boys and 18,902 girls—representing an annual ratio of 1 in every 36·0, or 2·78 per cent. of the *estimated* population; the births *registered* during the corresponding quarter of 1865 were 39,109, and in 1864 they were 38,715.

Deaths.—The deaths *registered* in Ireland during the second quarter of 1866 amounted to 24,623—12,150 males and 12.473 females—affording an annual ratio of 1 in every 56·7, or 1·76 per cent. of the *estimated* population. The numbers *registered* during the corresponding quarters of 1864 and 1865 were 24,155 and 24,250 respectively.

Emigration.—According to the returns obtained by the Enumerators, the number of emigrants who left the ports of Ireland, during the quarter ended 30th June, 1866, amounted to 41,124—24,331 males and 16,793 females—being 3,536 more than the number who emigrated during the corresponding quarter of 1865.

Estimated Decrease of the Population.—The number of births *registered* during the quarter ended 30th June, 1866, being 38,785; the deaths 24,623; and the number of emigrants 41,124—(according to the returns obtained by the enumerators at the several seaports); a decrease of 26,962 would, therefore, appear to have taken place in the population of Ireland during that period.

PRICES OF PROVISIONS, AND PAUPERISM.

The price of Messrs. Manders and Co.'s 4 lb. loaf during the first twelve weeks of the second quarter of 1866 was 6½*d.*, being one halfpenny higher than the price through the entire of the corresponding quarter of 1865; it was raised to 7*d.* during the last week of the quarter.

The average price of oatmeal for the second quarter of 1866 was 15*s.* 8*d.* per cwt.; it rose from 14*s.* 6*d.* per cwt. in the first week of the quarter to 16*s.* 6*d.* in the last week; the average price for the corresponding quarter of 1865 was 14*s.* 1*d.*

The average prices of potatoes during the quarter at the Dublin Potato Market were 3*s.* 1*d.* to 3*s.* 11*d.* per cwt., differing very slightly from the averages for the corresponding quarter of 1865.

The prices of beef at the Dublin Cattle Market during the quarter ending 30th June last, ranged from 55*s.* to 80*s.* per cwt., the average for the quarter being 58*s.* to 72*s.* 6*d.*; the average prices for the corresponding quarter of 1865 were only 55*s.* to 67*s.* 6*d.* per cwt.

The average number of persons in Ireland receiving indoor relief on Saturdays during the three months ending 30th June, 1866, was 51,404, against 54,852 for the corresponding period of 1865. On Saturday in the first week of the quarter the number was 54,810; on Saturday in the last week the number had decreased to 48,444.

The average weekly number of persons receiving outdoor relief during the quarter was 11,982, against 10,565 for the second quarter of 1865.

Of the persons receiving indoor relief during the second quarter of 1866 an average number of 466 in each week were located in Asylums for the Blind and the Deaf and Dumb, and in Extern Hospitals; in the corresponding quarter of 1865 the average weekly number was 475.

Quarterly Reports.

Second Quarter.

THE WEATHER.

The mean height of the barometer at the Ordnance Survey Office, Phœnix Park, Dublin, during the second quarter of 1866 was 29·761 inches (in the corresponding quarter of 1865 and 1864 it was 29·916 inches, and 29·838 inches respectively); the highest reading (30·277 inches) was on the 23rd April, at 9.30 A.M., wind S.W.; and the lowest (29·252 inches) on the 18th June, at 3.30 P.M., wind N.W.

The mean temperature of the air during the quarter was 51·5° (in the corresponding quarter of 1865 it was 54·8°, and in the second quarter of 1864 it was 53·6°); the maximum temperature (79·8°) was on the 28th June, and the minimum (29·0°) was on the 4th April.

Rain or snow fell on 48 days during the quarter. The rain-fall measured 7·796 inches; in the corresponding quarters of 1865 and 1864 it was 5·816 inches and 4·083 inches respectively. The greatest monthly rain-fall was in June, when 3·652 inches were registered.

The wind blew on 27 days from S.W.; 14 days from N.E.; 12 days from E.; 11 days from N.W.; 9 days from W.; and 7 days from S.E., at 9.30 A.M.; on no day during the quarter did the wind blow from the south at that hour. The air was calm on 7 days at 9.30 A.M.

HEALTH OF THE PEOPLE.

The state of the public health during the quarter was generally satisfactory, though the number of deaths *registered* was in excess of the number *registered* during the corresponding period of 1865.

The low temperature, combined with the harsh easterly winds which prevailed during the months of April and May, rendered pulmonary affections among young and old extremely fatal, and to these causes must be referred the greater mortality during the quarter as compared with the corresponding periods of 1864 and 1865.

There was in most districts an absence of epidemic or zymotic diseases, and, save in some exceptional instances, the deaths from scarlatina, fever, measles, small-pox, &c., had notably diminished.

The Registrar of the Mohill District (Mohill Union), in referring to a malignant type of scarlatina in his locality, makes the following observations:—"It is a remarkable fact that all the fatal cases occurred under almost similar circumstances in *badly ventilated and filthy houses, where the poor sufferers had to breathe a foul and vitiated atmosphere*; in many instances the pigs and patients occupied the same apartments. In families of 9 or 10 attacked at the same time, *where attention was paid to cleanliness and ventilation, not one fatal case took place.*" The Registrar of the Mullingar District (Mullingar Union) says that of 22 deaths from scarlatina, which were *registered* during the quarter, "all occurred in the town, none in the country portions of the district, showing clearly *the evil of the filthy and uncleansed state of the back streets of this town.*" In many of the districts from which scarlatina had disappeared, the Registrars attributed the subsidence of the epidemic to improved sanitary arrangements.

It is satisfactory to find that no deaths from small-pox occurred in the Arklow District (Rathdrum Union) during the quarter, as in the quarter ended March 31st, the alarming number of 35 deaths from small-pox had been registered in that district. In the Ballymoney District a child aged 3 months (*not vaccinated*) died from small-pox. In Summerhill District (Trim Union) the Registrar notes that "two deaths from small-pox were registered in the past quarter, one in the person of an infant lately brought from Dublin, the second an adult, *neither of whom had been vaccinated.*"

Three deaths from small-pox occurred in the Boyle District; the Registrar

Quarterly Reports. Second Quarter.

makes no reference to vaccination. With a view of demonstrating the protective powers of vaccination, the Registrar of Arthurstown Sub-district, Fethard (New Ross Union), relates the following interesting particulars:—"A sailor returned from a foreign voyage to his native village, Ballyhack, and in a few days after was seized with small-pox in its confluent and most virulent form. The village swarms with a population steeped in poverty, and is in *every way* badly calculated to resist the extension of a contagious disease. The man's residence was in its centre, and segregation from its neighbours impossible. *Vaccination, however, had been for years carefully attended to;* an infant residing in the house had been vaccinated only a few weeks before. The man recovered, and although two months have gone by, there has not been another case of small-pox amongst the inhabitants."

Fever was generally of a milder type.

The number of Registrars who refer to the improved sanitary condition of their districts increases every quarter. It is to be hoped that the ample powers which the new Sanitary Act affords for suppressing nuisances and protecting the public against the spread of contagious diseases may soon be brought into action, so that the evils at present existing, and which have been so forcibly described by the Registrars, may be neutralized.

In the Scotstown District (Monaghan Union) 2 cases of English cholera were registered in the month of June, both having proved fatal within 48 hours; two other members of the same family were attacked, but recovered. In the Malin District (Inishowen Union) a case of English cholera proved fatal in 15 hours.

Some of the persons whose deaths were registered during the quarter had attained very advanced periods of life; thus in the Templemartin District (Bandon Union) "the death of a person aged 106 was registered;" in Aughnacloy District (Clogher Union) the death of a person aged 104 was registered; and the deaths of centenarians were also registered in Shinrone (Roscrea Union) and Ballycastle.

NUMBER OF MARRIAGES, BIRTHS, AND DEATHS REGISTERED IN EACH OF THE EIGHT DIVISIONS.

Marriages.—The marriage-rate during the quarter ending 30th June, 1866, was highest in the "North-Eastern" and "Eastern" Divisions; the "South-Eastern" came next. The order in which these divisions ranged was the same in the corresponding quarter of 1865.

The order of the EIGHT DIVISIONS *as regards the annual Rate represented by the number of Marriages registered during the* SECOND *quarter of the years* 1865 *and* 1866 *is shown in the following Statement:—*

Quarter ending 30th June, 1865.		Quarter ending 30th June, 1866.	
Divisions.	*Ratio to Population.*	*Divisions.*	*Ratio to Population.*
1. North-Eastern,	1 in 171	North-Eastern,	1 in 164
2. Eastern,	„ 174	Eastern,	„ 164
3. South-Eastern,	„ 253	South-Eastern,	„ 261
4. South-Western,	„ 286	South-Western,	„ 261
5. North-Western,	„ 307	North-Western,	„ 263
6. South Midland,	„ 334	South Midland,	„ 309
7. North Midland,	„ 335	North Midland,	„ 312
8. Western,	„ 451	Western,	„ 337

Births.—The highest birth-rate attained in any of the divisions during the second quarter of the years 1864, 1865, and 1866, was 1 in 31. This was the rate

for the "North-Eastern" in 1865 and 1866. The "South Midland" ranked *sixth* as to birth-rate during the second quarter of 1864; it fell to *seventh* place in the corresponding quarter of 1865, and to *eighth* or last place for the second quarter of 1866, the ratios for this division being 1 in 40, 42, and 43 respectively, for the three periods named. *Quarterly Reports.* Second Quarter.

The numerical order of the EIGHT DIVISIONS *as regards the annual Rate represented by the number of Births registered during the* SECOND *quarter of* 1864, 1865, *and* 1866, *is shown in the following Statement:—*

Quarter ending 30th June,					
1864.		1865.		1866.	
Divisions.	*Ratio.*	*Divisions.*	*Ratio.*	*Divisions.*	*Ratio.*
1. South-Western,	1 in 32	North-Eastern,	1 in 31	North-Eastern,	1 in 31
2. North-Eastern,	„ 33	South-Western,	„ 32	South-Western,	„ 32
3. Eastern,	„ 35	Eastern,	„ 36	Eastern,	„ 35
4. South-Eastern,	„ 36	South-Eastern,	„ 36	South-Eastern,	„ 36
5. North Midland,	„ 40	North Midland,	„ 40	North Midland,	„ 40
6. South Midland,	„ 40	North-Western,	„ 40	Western,	„ 41
7. Western,	„ 41	South Midland,	„ 42	North-Western,	„ 42
8. North-Western,	„ 43	Western,	„ 43	South Midland,	„ 43

Deaths.—The death rate in the "Eastern" Division during the quarter ending 30th June, 1866, was 1 in 45. This is the highest rate of mortality which has occurred during the second quarter of the year in any division since registration commenced in Ireland. The number of deaths *registered* in the "Western" Division during the quarter represents an annual ratio of only 1 in 76: in the corresponding quarter of 1864 and 1865, the rate afforded was 1 in 77 and 75 respectively.

The following statement shows the EIGHT DIVISIONS *arranged according to the annual Rate of Mortality afforded by the number of Deaths registered during the* SECOND *quarter of* 1864, 1865, *and* 1866:—

Quarter ending 30th June,					
1864.		1865.		1866.	
Divisions.	*Ratio.*	*Divisions.*	*Ratio.*	*Divisions.*	*Ratio.*
1. South-Eastern,	1 in 51	Eastern,	1 in 49	Eastern,	1 in 45
2. North-Eastern,	„ 51	North-Eastern,	„ 50	North-Eastern,	„ 48
3. Eastern,	„ 53	South-Eastern,	„ 52	South-Eastern,	„ 50
4. South-Western,	„ 59	South-Western,	„ 61	South Midland,	„ 61
5. South Midland,	„ 60	South Midland,	„ 62	South-Western,	„ 62

Deaths.—The deaths *registered* in the Province of Leinster during the three months ending 30th June, 1866, afford an annual ratio of 1 in 49; in Ulster, 1 in 54; in Munster, 1 in 62; and in Connaught, 1 in 76.

Third Quarter.

Third Quarter.—July, August, September.

Marriages.—The number of marriages *registered* in Ireland during the third quarter of 1866 amounted to 5,566, equal to an annual ratio of 1 in every 251, or ·399 per cent. of the *estimated* population. The number *registered* in the corresponding period of 1865 was 5,854.

Of the 5,566 marriages *registered* during the third quarter of 1866, 3,509 were between Roman Catholics, representing an annual ratio of 1 marriage in

Quarterly Reports.

Third Quarter.

every 309, or ·324 per cent. of the Roman Catholic population; and the remaining 2,057 marriages were between Protestants, being equal to an annual ratio of 1 in every 151, or ·663 per cent. of the Protestant population.

Births.—There were 33,581 births *registered* in Ireland during the quarter ending 30th September, 1866—17,327 boys and 16,254 girls—representing an annual ratio of 1 in every 41·6, or 2·41 per cent. of the *estimated* population; the births *registered* during the corresponding quarter of 1865 were 34,045, and in 1864 they were 33,877.

Deaths.—The deaths *registered* in Ireland during the third quarter of the year 1866 amounted to 18,600—9,383 males and 9,217 females—affording an annual ratio of 1 in every 75·0, or 1·33 per cent. of the *estimated* population. The numbers *registered* during the corresponding quarters of 1864 and 1865 were 19,191 and 18,632 respectively.

Emigration.—According to the returns obtained by the Enumerators, the number of emigrants who left the ports of Ireland, during the quarter ended 30th September, 1866, amounted to 19,640—11,447 males and 8,193 females—being 8,021 less than the number who emigrated during the corresponding quarter of 1865.

Estimated Decrease of the Population.—The number of births *registered* during the quarter ended 30th September, 1866, being 33,581; the deaths 18,600; and the number of emigrants 19,640 (according to the returns obtained by the enumerators at the several seaports); a decrease of 4,660 would, therefore, appear to have taken place in the population of Ireland during that period.

PRICES OF PROVISIONS, AND PAUPERISM.

The average price of Messrs. Manders and Co.'s 4lb. loaf for the third quarter of 1866 was 6½*d.* (being one halfpenny more than the average for the corresponding quarter of 1865); the price was 7*d.* during the first four weeks of the quarter, and 6½*d.* during the remaining nine weeks.

The average price of oatmeal for the third quarter of 1865 was 15*s.* 3*d.*; for the corresponding quarter of 1866 it was 15*s.* 5*d.*; the average price was highest (16*s.* 6*d.*) in the third week of the quarter, and lowest (14*s.* 6*d.*) in the eighth week; the average price in the last week was 15*s.*, against 14*s.* 3*d.* in the corresponding week of 1865.

The average prices of potatoes for the quarter, at the Dublin Potato Market, were 3*s.* 8*d.* to 5*s.* 2*d.*, being much higher than the average prices for the corresponding quarter of 1865, viz., 2*s.* 8*d.* to 4*s.*

The average price of inferior beef at the Dublin Cattle Market, during the third quarter of 1866, was 52*s.*, which was lower than the average price (56*s.* 6*d.*) for the corresponding quarter of 1865; best beef, however, was higher during the third quarter of 1866 than in the third quarter of 1865, the average price for the former being 69*s.* 6*d.*, and for the latter 67*s.* 6*d.*

The average number of persons in Ireland receiving indoor relief on Saturdays during the third quarter of 1866 was 44,980, against 46,632 for the corresponding period of 1865.

The average weekly number of persons receiving outdoor relief during the quarter was 10,870, against 9,093 for the third quarter of 1865.

Of the persons receiving indoor relief during the third quarter of 1866, an average number of 451 in each week were located in Asylums for the Blind and the Deaf and Dumb, and in Extern Hospitals; in the corresponding quarter of 1865 the average weekly number was 463.

THE WEATHER.

The mean height of the barometer at the Ordnance Survey Office, Phœnix Park, Dublin, during the third quarter of the year 1866, was 29·628 inches (in the corresponding quarter of 1865 and 1864 it was 29·820 inches, and 29·804 inches

Quarterly Reports.

Third Quarter.

respectively); the highest reading (30·186 inches) was on the 10th July, at 9.30 P.M., when the air was calm; and the lowest (28·946 inches) on the 7th August, at 9.30 A.M., wind S.W.

The mean temperature of the air during the quarter was 56·9° (it was 60·8° in the corresponding quarter of 1865, and 57·8° in the third quarter of 1864); the maximum temperature (80·7°) was on the 13th July, and the minimum (31·8°) was on the 29th September.

Rain or snow fell on 56 days during the quarter. The rain-fall measured 6·656 inches; it was 6·318 inches in the third quarter of 1865, and 4·137 inches in the corresponding quarter of 1864. The total rain-fall during the half-year ended 30th September 1866, was 14·452 inches, against 12·134 inches and 8·220 inches during the corresponding period of 1865 and 1864, respectively. The greatest monthly rain-fall in the third quarter of 1866 was in September, when 2·988 inches were registered.

The prevailing winds during the quarter were westerly, the wind having been from W. on 27 days; from S.W. on 32 days; and from N.W. on 11 days, at 9.30 A.M. The air was calm on 6 days at that hour.

HEALTH OF THE PEOPLE.

Notwithstanding the outbreak of cholera in various parts of the country, the deaths *registered* during the third quarter of 1866 were 32 less than the number *registered* during the corresponding quarter of 1865.

Fever, though prevalent in some districts, was generally of a mild type, and caused comparatively few deaths.

Deaths from scarlatina of a malignant nature were reported from various districts, especially Carrickfergus, Castlederg, Lurgan, Bailieborough, and Lucan. The Registrar of Ballinakill, Superintendent Registrar's District of Abbeyleix, reported 14 deaths from scarlatina; he made the following statement:—"I have been for over thirty years the Medical Officer of Ballinakill Dispensary, but never experienced so bad a type of scarlatina as the present epidemic afforded." At Kilrush, 12 deaths from scarlatina were reported. In many districts this disease had disappeared, or very much decreased, especially in those localities where attention had been paid to sanitary precautions.

About 30 Registrars reported cases of cholera having occurred in their districts; in nearly every instance those who were first attacked by the disease had been recently in localities where cholera abounded. Reapers and labourers arriving from England were attacked in various parts of the country; and, generally speaking, the disease was not confined to the individual first attacked, but spread to the other inmates of the house. In Mallow, where 26 deaths from cholera took place during the quarter, the Registrar states that "the greater number of cases occurred in the locality of a well, the water of which was in daily use by the people dwelling in its neighbourhood. This water has been since analyzed by Professor Cameron of Dublin. His opinion is that the water is not suitable for consumption, in consequence of its containing a very large amount of organic matter derived from animal sources. The people have been warned of the consequences of using it. I may remark that this well is NOT the celebrated spa of Mallow, which spa is in daily use by far the larger portion of the town."

The Registrar of the Carrick-on-Suir District, who had so frequently reported on the unsatisfactory sanitary condition of his district, makes the following statement:—"The health of this district is at present most satisfactory. The sanitary condition of the town is now being improved, owing to the exertions of the Town Commissioners since the 'Sanitary Act, 1866,' came into force." The Registrar of Milltown Malbay, Superintendent Registrar's District of Ennistimon, testifies to the advantages of sanitary improvements; referring to the disappearance or subsidence of fever and scarlatina in his district, he observes:—"More perfectly

organized sanitary arrangements have confessedly brought about this disappearance of diseases, epidemic or endemic."

Whooping-cough was very prevalent and very fatal in the Cavan Union.

A death from hydrophobia took place in the Clady District, Londonderry Union; and in the Boherboy District, Kanturk Union, a child 16 months old died from the same cause.

The ages of 3 women who died at Oranmore, Galway Union, were stated to have been 86, 90, and 102, respectively. In the Ballynacally District, Killadysert Union, the deaths of 6 persons, aged between 80 and 101, were reported. In Tobercurry, 5 deaths from old age were reported, including a sailor 106 years old, "who served under Lord Nelson at Trafalgar."

NUMBER OF MARRIAGES, BIRTHS, AND DEATHS, REGISTERED IN EACH OF THE EIGHT DIVISIONS.

Marriages.—The number of marriages registered in the Eastern Division during the third quarter of 1866, afforded the highest annual ratio, viz.:—1 in 163 of the *estimated* population; in the North-Eastern Division the ratio was 1 in 173; in the North-Western Division the ratio was only 1 in 369; and in the Western Division 1 in 501.

The order of the EIGHT DIVISIONS *as regards the annual Rate represented by the number of Marriages registered during the* THIRD *quarter of the years* 1865 *and* 1866, *is shown in the following statement:—*

Quarter ending 30th September, 1865.		Quarter ending 30th September, 1866.	
Divisions.	*Ratio.*	*Divisions.*	*Ratio.*
1. Eastern,	1 in 157	Eastern,	1 in 163
2. North-Eastern,	„ 164	North-Eastern,	„ 173
3. South-Eastern,	„ 240	South-Eastern,	„ 265
4. South-Western,	„ 281	South-Western,	„ 273
5. North-Western,	„ 314	South Midland,	„ 315
6. South Midland,	„ 320	North Midland,	„ 344
7. North Midland,	„ 365	North-Western,	„ 369
8. Western,	„ 463	Western,	„ 501

Births.—The "North-Eastern" Division had the highest birth-rate during the quarter ending 30th September, 1866, 1 in 36; the "South-Midland" had the lowest, 1 in 52; these divisions held the same rank for the corresponding quarter of 1865.

The numerical order of the EIGHT DIVISIONS *as regards the annual Rate represented by the number of Births registered during the* THIRD *quarter of* 1864, 1865, *and* 1866, *is shown in the following Statement:—*

Quarter ending 30th September,					
1864.		1865.		1866.

8. North-Western,	„ 48	South Midland,	„ 47	South Midland,	„ 47

Quarterly Reports. Third Quarter.

Deaths.—The rate of mortality, during the third quarter of the year 1866, was highest in the "Eastern" Division, 1 in 55; in the corresponding quarter of 1865 the rate in this division was 1 in 59, and in the third quarter of 1864 it was 1 in 63.

The number of deaths *registered* in the "Western" Division, during the quarter of the year under consideration, only affords *an annual ratio of* 1 *in* 102; this division had also the lowest death-rate in the corresponding quarter of 1864 and 1865.

The following Statement shows the EIGHT DIVISIONS *arranged according to the annual Rate of Mortality afforded by the number of Deaths registered during the* THIRD *quarter of* 1864, 1865, *and* 1866:—

Quarter ending 30th September,					
1864.		1865.		1866.	
Divisions.	*Ratio.*	*Divisions.*	*Ratio.*	*Divisions.*	*Ratio*

Births.—The number of births registered during the third quarter of the year 1866, in the Province of Connaught was equal to an annual ratio of 1 in 39; in Ulster, 1 in 39; in Munster, 1 in 43; and in Leinster, 1 in 45.

The following Table shows, by PROVINCES, *the number of Births and Deaths registered during the* THIRD *quarter of the years* 1864, 1865, *and* 1866, *together with the ratio to the estimated Population.*

Deaths.—The deaths registered in the Province of Leinster during the quarter ending the 30th September, 1866, represent an annual ratio of 1 in 61; in Ulster, 1 in 77; in Munster, 1 in 78; and in Connaught, 1 in 102.

Fourth Quarter.—October, November, December.

Fourth Quarter

Marriages.—There were 6,482 marriages *registered* in Ireland during the fourth quarter of 1866, affording an annual ratio of 1 in every 215, or ·464 per cent. of the *estimated* population. Of this number 4,051 were between Roman Catholics, representing a ratio of only 1 marriage in every 268, or ·374 per cent. of Roman Catholics, and 2,431 were between Protestants, affording a ratio of 1 in every 128, or ·783 per cent. of the Protestant population. The number of marriages *registered* in the corresponding quarter of 1865 was 6,981, and in the fourth quarter of 1864 the number was 6,269.

Births.—There were 33,722 births *registered* in Ireland during the quarter ending 31st December, 1866—17,308 boys and 16,414 girls—representing an annual ratio of 1 in every 41·4, or 2·42 per cent. of the *estimated* population;* the births *registered* during the corresponding quarter of 1865 were 33,496, and in 1864 they were 33,643.

Deaths.—The deaths *registered* in Ireland during the fourth quarter of the year 1866 amounted to 22,190—11,032 males and 11,158 females—affording an annual ratio of 1 in every 62·9, or 1·59 per cent. of the *estimated* population. The numbers *registered* during the corresponding quarters of 1864 and 1865 were 21,755 and 21,013 respectively.

Emigration.—According to the returns obtained by the Enumerators, the number of emigrants who left the ports of Ireland, during the quarter ended 31st December, 1866, amounted to 12,894—7,094 males and 5,800 females—being 7,506 less than the number who emigrated during the corresponding quarter of 1865.

Estimated Decrease of the Population.—The number of births *registered* during the quarter ended 31st December, 1866, being 33,722; the deaths 22,190; and the number of emigrants 12,894—(according to the returns obtained by the enumerators at the several seaports);—a decrease of 1,362 would, therefore, appear to have taken place in the population of Ireland during that period.

Quarterly Reports.

Fourth Quarter.

PRICES OF PROVISIONS, AND PAUPERISM.

The average price of Messrs. Manders and Co.'s 4 lb. loaf for the fourth quarter of 1866 was 7½*d.* (being one halfpenny more than the average for the corresponding quarter of 1865); the price was 8*d.* during the last five weeks of the quarter, against 7*d.* during the corresponding weeks of the previous year.

The average price of oatmeal for the quarter ending 31st December, 1866, was 15*s.* 11*d.* per cwt.; the average price for the corresponding quarter of 1865 was 15*s.* 1*d.* The average price was only 15*s.* in the first week, it was 17*s.* 3*d.* in the ninth week, and 16*s.* 6*d.* in the last week of the quarter.

The average prices of potatoes per cwt., at the Dublin Potato Market, for the fourth quarter of 1866, were 3*s.* 1*d.* to 4*s.* 11*d.*; for the corresponding quarter of 1865 the prices ranged from 2*s.* 9*d.* to 3*s.* 8*d.*

Beef of inferior quality (at the Dublin Cattle Market), averaged a lower price for the last quarter of 1866, than for the corresponding quarter of 1865, the averages being respectively, 48*s.* 6*d.*, and 50*s.* 6*d.* per cwt.; whereas, best beef sold at higher prices during the fourth quarter of 1866 than during the corresponding period in 1865, the average price for the former three months being 67*s.*, and for the latter 63*s.* 6*d.* per cwt.

The average number of persons in Ireland receiving indoor relief on Saturdays during the fourth quarter of 1866 was 48,534, against 49,457 for the corresponding period of 1865.

The average weekly number of persons receiving outdoor relief during the quarter was 11,217, against 8,859 for the fourth quarter of 1865.

Of the persons receiving indoor relief during the fourth quarter of 1866 an average number of 443 in each week were located in Asylums for the Blind and the Deaf and Dumb, and in Extern Hospitals; in the corresponding quarter of 1865 the average weekly number was 460.

THE WEATHER.

The mean height of the barometer at the Ordnance Survey Office, Phœnix Park, Dublin, during the fourth quarter of 1866, was 29·773 inches (in the corresponding quarter of 1865 and 1864 it was 29·674 inches, and 29·686 inches respectively); the highest reading (30·389 inches) was on the 8th October, at 9.30 A.M., wind N.N.E.; and the lowest (29·092 inches) was on the 6th December, at 9.30 P.M., wind S.W.

The mean temperature of the air during the last quarter of 1866 was 46·4° (it was 46·5° in the fourth quarter of 1865, and 44·4° in the corresponding period of 1864); the maximum temperature (65·9°) was on the 21st October, and the minimum (21·8°) was on the 31st December.

Rain or snow fell on 58 days during the quarter. The rain-fall was unusually light, having only measured 4·897 inches, while it was 10·112 inches and 12·040 inches respectively in the corresponding quarters of 1865 and 1864. The greatest monthly rain-fall in the last quarter of 1866 was in December, when 1·852 inches were registered.

Though the rain-fall was so small, westerly winds were very prevalent during the quarter, the wind having been from that point on 37 days; on 22 days from S.W.; on 3 days from N.W.; on 7 days from S.E.; on 4 days from S.; on 2 days from N.E.; and on one day from N., at 9·30 A.M. The air was calm on 16 days at that hour.

HEALTH OF THE PEOPLE.

During the quarter ended December 31st, the deaths were 1,177 in excess of those registered in the corresponding period of 1865. The increased mortality

Quarterly Reports.

Fourth Quarter.

was mainly attributable to Asiatic cholera, which was, as testified by the Registrars, in most instances imported into their districts. In some localities this disease proved most fatal; thus in Bray, out of 98 deaths registered no less than 68 were ascribed to cholera, and 3 to diarrhœa; surely there must have been something very deficient in the sanitary arrangements of this town, to account for a mortality from cholera even greater than that in the east end of London. In Bray scarlatina had been heretofore a prevailing epidemic. In the Registrar's District of Arklow, Rathdrum Union, or Superintendent Registrar's District, where cholera had been directly imported by a sailor labouring under the disease, the Registrar enumerated 75 deaths from cholera out of 131 deaths, and he added that, "The sanitary state of Arklow is in a most unsatisfactory condition; the same state of overcrowding habitations, deficient sewerage, and want of pure water, as existed previous to the recent outbreak of cholera, and for the past thirteen years, the extent of the time of my residence here as Medical Officer to the Arklow Dispensary District."

In one part of the town of Carlow (Graigue), 77 deaths resulted from cholera: the Registrar makes no reference to the sanitary condition of that locality. In Limerick cholera proved very fatal. In many instances deaths from cholera were ascribed to other diseases; the lower classes, having a horror of speedy burials and the loss of "wakes," assigned the cause of death to anything save cholera.

The Registrar of Enniscorthy, No. 2, says, "Cholera and diarrhœa very prevalent at present in this district; a great desire amongst the poor to remain at home in preference to going to hospital, and if possible to *keep the disease secret.*"

In the Bantry Registrar's District, Bantry Union, a man arrived from Cork labouring under cholera, and died; he communicated the disease to 4 others, of whom 2 died. Four cases of cholera occurred at Glengarriff, 2 proving fatal; the Registrar states that "the contagion was distinctly traced from the city of Cork."

The following note from the Registrar of Tartaraghan, Superintendent Registrar's District of Lurgan, demands special attention; the more so, as the Poor Law Commissioners require that the medical officers of dispensaries in Ireland should be thoroughly qualified as midwifery practitioners. The Commissioners, also, in many cases, send through the country respectable women, educated at the Rotundo Lying-in Hospital, to attend upon the poor in their hour of need.

The Registrar referred to states that "Floodings are frequent, and uterine diseases prevail to a large extent, owing to the brutal manner in which females are treated by uneducated women attending as midwives, and the quantity of whiskey they consume during parturition. An accurate return of the number of deaths, or cause of death (especially infantile), is quite impossible, *a Medical and Registrar's certificate of the cause of death not being required before interment.*"

Fever and scarlatina were less fatal than usual, and wherever either prevailed, there defective sanitary arrangements existed, and by way of illustration, the report of the Registrar of the Cookstown District may be referred to; he states that, "In November and December we were visited by a severe epidemic of fever; 15 cases were entered in the Dispensary Relief Register alone; the majority of these patients resided in a block of houses, *filthy, wretchedly ventilated, and badly sewered, with manure heaps and a large cesspool in the rere.*" The Registrar states, that since his report to the Town Commissioners, matters are "in a fair sanitary condition." Again, in Skull District (Superintendent Registrar's District, Skull), the Registrar reports that "Four young women died of low continued fever (3 in one family), where pure air was inaccessible, and filth abounded internally and externally."

Every report testifies to the benefits resulting from the Compulsory Vaccination Act: only 10 deaths from small-pox were recorded in the fourth quarter. The Registrar of Castlefinn District (Strabane Union), makes the following satisfactory statement:—"There has not been a fatal case from small-pox recorded since the Registration Act came into force; the fact speaks for itself." Similar testimony is borne to the successful operation of the Act by the Registrar of Whitechurch District (Dungarvan Union), who says, "I have had but 2 cases of small-pox in

Quarterly Reports.

Fourth Quarter.

my district for the last three years, and they were of a mild type, which I attribute to the success attending the working of the Compulsory Vaccination Act."

Bronchitis and other chest affections proved very fatal to the aged, and those of tender years. Of the former many had long passed the three score and ten years. For instance, the reputed age of a man who died in Magherafelt was 102 years; a farmer died in Omagh District, whose age was stated to have been 120 years; a woman died in the Aughnacloy District (Clogher Union), at the age of 98, the assigned cause of death being paralysis. The Registrar of the Finnea District (Granard Union), states that some deaths "were registered at an advanced age; one beyond a century by several years;" and in the Cong District (Ballinrobe Union), one death was registered, the age stated being 104 years.

The publication of the Registrars' notes appears to have had a salutary effect, for in their notes on this quarter some of the Registrars whose districts had been, in a sanitary point of view, utterly neglected, advert to their improved condition; amongst these districts may be mentioned Newtownards (Newtownards Union), Swords (Balrothery Union), Milltown Malbay (Ennistimon Union), and Loughrea. Though many Registrars still complain, it is satisfactory to perceive that some progress in the right direction has been achieved. It is needless to add, how desirable it would be to have in all localities, especially in those densely populated, highly educated and efficient officers of health.

NUMBER OF MARRIAGES, BIRTHS, AND DEATHS REGISTERED IN EACH OF THE EIGHT DIVISIONS.

Marriages.—The North-Eastern Division had the greatest number of marriages *registered* in proportion to its population during the last quarter of the year 1866, the annual ratio being 1 in 131. In the Eastern Division the ratio was 1 in 163. These two Divisions also ranked first and second respectively in the corresponding quarters of 1864 and 1865. In the Western Division the ratio was only 1 in 426. The low ratio is to be accounted for by the large proportion of the Roman Catholic marriages being celebrated in the *first* quarter of the year.

The order of the EIGHT DIVISIONS *as regards the annual Rate represented by the number of Marriages registered during the* FOURTH *quarter of the years* 1864, 1865, *and* 1866, *is shown in the following Statement:—*

Quarter ending 31st December,

1864.		1865.		1866.	
Divisions.	*Ratio.*	*Divisions.*	*Ratio.*	*Divisions.*	*Ratio.*
1. North-Eastern,	1 in 148	North-Eastern,	1 in 126	North-Eastern,	1 in 131

8. Western,	„ 441	Western,	„ 363	Western,	„ 426

Births.—The Births *registered* during the last quarter of 1866 in the North-Eastern Division amounted to 7,430, affording an annual ratio of 1 in 36 of the *estimated* population; in the corresponding quarter of 1865 the ratio was 1 in 37;

and in 1864 it was 1 in 38; in the South Midland Division the ratio afforded was only 1 in 52 in 1866 and 1865 against 1 in 50 for the corresponding period of 1864. *Quarterly Reports.* Fourth Quarter.

The order of the EIGHT DIVISIONS *as regards the annual Rate represented by the number of Births registered during the* FOURTH *quarter of* 1864, 1865, *and* 1866, *is shown in the following Statement:—*

Quarter ending 31st December,

1864.		1865.		1866.	
Divisions.	*Ratio.*	*Divisions.*	*Ratio.*	*Divisions.*	*Ratio.*
1. North-Eastern,	1 in 38	North-Eastern,	1 in 37	North-Eastern,	1 in 36

7. North Midland,	„ 47	South-Eastern,	„ 46	North-Western,	„ 46
8. South Midland,	„ 50	South Midland,	„ 52	South Midland,	„ 52

Deaths.—The Eastern Division had the highest death-rate during the fourth quarter of 1866, the annual ratio afforded being 1 in 40 of the estimated population; in the corresponding quarter of 1865 the death-rate in this division was 1 in 51, and in 1864 it was 1 in 54. In the North Midland Division the deaths *registered* during the fourth quarter of 1866 represent an annual ratio of 1 in 78 against 1 in 83 for the fourth quarter of 1865, and 1 in 80 for the fourth quarter of 1864; in the North-Western Division the ratio was 1 in 88 against 1 in 78 for 1864, and 1 in 84 for 1865; and in the Western it was only 1 in 92 against 1 in 86 for the corresponding quarter of 1864, and 1 in 90 for 1865.

The following Statement shows the EIGHT DIVISIONS *arranged according to the annual Rate of Mortality afforded by the number of Deaths registered during the* FOURTH *quarter of* 1864, 1865, *and* 1866:—

Quarter ending 31st December,

Deaths.—There were 7,544 deaths registered in the province of Leinster during the fourth quarter of 1866, the annual ratio afforded being 1 in 46—in the fourth quarter of 1865 the ratio was 1 in 57, and in 1864 it was 1 in 58. In Munster there were registered 5,488 deaths, or 1 in 67 of the estimated population, against 1 in 68 for the corresponding quarter of 1865, and 1 in 65 for the fourth quarter of 1864; in Ulster, 6,759 or 1 in 69, against 1 in 67 in 1865, and 1 in 65 in 1864; and in Connaught, 2,399, or only 1 in 91, against 1 in 88 for the fourth quarter of 1865, and 1 in 83 for 1864.

Topographical Description of the Eight Divisions into which Ireland has been divided in the foregoing Tables.

No. I. The North-Eastern Division.—This division may be described by a line passing southward from Lough Foyle through the counties of Londonderry, Tyrone, and Armagh, to Lough Bawn, in the county of Monaghan, and thence eastward to Carlingford Lough; the north and east being on the seaboard.

No. II. The North-Western Division is bounded on the east by the division just described, from Lough Foyle to a point a little south of Six Mile Cross, in the county of Tyrone, and may be described by a line drawn thence S.W. through the county of Fermanagh to the south of Enniskillen, embracing that portion of the north-west angle of the county of Cavan belonging to the Enniskillen Union, into the county of Leitrim, crossing Lough Allen, thence into the county of Sligo, to a point situated to the southward of the town of Ballymote, and thence extending north to Ballysadare Bay; the remainder of the division is bounded by the sea. It contains Loughs Erne and Derg, and part of Lough Allen, and large portions of it are mountainous.

No. III. The Eastern Division is situated in the provinces of Leinster and Ulster; it extends along the Irish Sea and St. George's Channel, from Warrenspoint, in the county of Down, to the south of Cahore Point, in the county of Wexford, stretching inland about twenty-five miles, and embracing the counties of Louth, Dublin, and Wicklow, and portions of the counties of Carlow, Cavan, Kildare, Meath, and Wexford; together with small portions of the counties of Armagh and Monaghan.

No. IV. The North Midland Division is situated in the provinces of Leinster, Ulster, and Connaught, and extends southward from its junction with the "North-Western" division near Six Mile Cross, in the county of Tyrone, to Tyrrellspass, in the county of Westmeath. Virginia, in the county of Cavan, is situated on its eastern border, and Tulsk, in the county of Roscommon, on its western.

No. V. The South Midland Division, situated in the provinces of Leinster and Munster, extends from the Hill of Down, in the county of Meath, southward to Borris, in the county of Carlow. Its southern boundary may be described by a line drawn thence to New Birmingham, in the county of Tipperary, and from that point south to Fethard, in the same county, thence westward to the northern base of the Galty Mountains, and in a north-westerly direction, to Pallasgreen, in the county of Limerick. On the east it is bounded by the "Eastern" division, and on the west by the "Western" and the "South-Western" divisions.

No. VI. The Western Division.—This division extends southwards from Sligo and Killala Bays to the northern bank of the River Shannon, lying westward of Limerick; the extreme points, north and south, being Benwee Head, in the county of Mayo, and Loop Head, in the county of Clare, a distance in or about 120 miles, which, however, does not represent the extent of seaboard, the western coast being indented by numerous bays and inlets. This division has been extended much more inland than the eastern division, as from its exposure to the Atlantic Ocean, and the prevalence of westerly winds (which blow for nearly three-fourths of the year), the climate must be affected for a considerable distance inland; the Unions situated on the extreme east are Boyle, Castlereagh, Glennamaddy, Mountbellew, Ballinasloe, and Portumna.

No. VII. The South-Eastern Division.—This division extends from its junction with the "Eastern" division southward of Cahore Point, in the county of Wexford, along the eastern and southern coasts to the east of Cork Harbour, and is bounded on the north by the South Midland division. It embraces the county of Waterford; nearly the whole of the county of Wexford; parts of the counties of Carlow, Kilkenny, and Tipperary; that portion of the county of Limerick (38,550 acres) comprised in the Mitchelstown Union, and a portion of the eastern side of Cork County.

No. VIII. The South-Western Division extends along the southern and western coasts from Cork Harbour to the river Shannon, and embraces the county of Kerry, nearly the whole of the counties of Cork and Limerick, and a small portion of the county of Clare, comprised in the Limerick Union.

POPULATION OF IRELAND (including Army, Navy, and Merchant Seamen on shore and in port) *estimated* to the middle of each of the Years 1801 to 1866 :—

NOTE.—This table has been constructed for the years 1801 to 1831—By adopting the rates of increase of the male and female population between 1821 and 1831, as shown by the Irish Census Reports of 1831—the first complete Census of Ireland having been taken in 1821.

1832 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851 ; the difference between the number arrived at by this computation and the *actual* number by the Census of 1851 was divided over the intervening years in proportion to the number of recorded deaths and the number of emigrants.

1852 to 1861—The English birth and death rates, as above, were used, deducting the number of emigrants according to the returns obtained by the Registrar-General for Ireland, and apportioning the difference as explained for the last period.

1862 to 1866—The English birth and death rates, as above, were employed in the calculations for each year deducting the number of emigrants according to the returns received by the Registrar-General for Ireland.

ANNUAL ABSTRACTS

OF

MARRIAGES, BIRTHS, AND DEATHS.

ABSTRACT OF MARRIAGES.—Marriages *registered* in Ireland, pursuant to the

DIVISIONS AND SUPERINTENDENT REGISTRARS' DISTRICTS.*		Area in Statute Acres, exclusive of the larger Rivers, Lakes, and Tideways.	Population, 1861.	TOTAL MARRIAGES.	MARRIAGES, Registered under the Act 7 & 8 Vic., c. 81. According to the Rites of the Established Church. Special Licence.	Licence.	Banns.	Registrar's Certificate.	Not stated by which of the foregoing Forms.	Total.	Not according to the Rites of the Established Church. In Registered Presbyterian Meeting Houses.	In Registered Buildings.	In the Registrar's Office.	Society of Friends.	Jews.	TOTAL Registered under the Act 7 & 8 Vic., c. 81.

* See note (†) page 2.

NOTE.—Wherever the minus sign (—) is prefixed to the number in the column headed "Excess of Births over Deaths," it denotes that the Births in the Superintendent Registrar's District, instead of exceeding the Deaths, were, in fact, *less than the Deaths*, to the extent stated.

* The *Registration Counties* consist of groups of Superintendent Registrars' Districts or Poor Law Unions. Whenever a District or Union extends into more than one County, it is assigned wholly to that County in which the greater portion of the population is located; hence all the *Registration* Counties differ more or less from the Counties *Proper*.

† See note (†) page 2.

* For remainder of Belfast see next page.

NOTE.—The Registrars' Districts are sub-divisions of the Unions or Superintendent Registrars' Districts, and are identical with the Dispensary Districts of the same names, except in a few instances.

The letter *W* denotes that the Registrar's District contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.

Wherever the minus sign (—) is prefixed to the numbers given in the column headed "Excess of Births over Deaths," it denotes that the births in the Registrar's District, instead of exceeding the deaths, were, in fact, *less than the deaths*, to the extent stated.

I.—NORTH-EASTERN DIVISION.—BIRTHS AND DEATHS, 1866—REGISTRARS' DISTRICTS—*continued.*

IRELAND.—SUPPLEMENTARY TABLE of the

[In the foregoing Tables all the Diseases, either having a distinct character, or fatal to any considerable number of persons, are classified under 114 heads; some of which, however, include groups of very distinct diseases,—such as are fatal to only a *few persons*, or *diseases* which are often confounded with other diseases. The rule has been to refer the distinct diseases to heads under which the cases were so numerous that the additional numbers would not interfere with the calculated proportions. Where it is desired, partial correction;

(*continued at page* 78.)

CAUSES of DEATH at different Periods of Life, in the Year 1866.

however, can now be made by means of the following Supplementary Tables, containing many of the deaths from distinct diseases, such as mumps, epistaxis, dry gangrene, polypus, rickets, bronchocele, &c., &c., and deaths from other forms of disease, such as softening of the brain (necrencephalus), which are returned in many cases under other heads, as paralysis, &c.

These Tables are an extension of the Tables of Causes of Death in Ireland, pp. 68 to 75.]

Letter to the Registrar-General on the Causes of Death in Ireland, from William M. Burke, F.C.P.I.

Year 1866.

Sir,

I have the honour of submitting to you a few observations on the assigned causes of the deaths *registered* in Ireland during the year 1866.

It is noteworthy that, notwithstanding an epidemic visitation of cholera, the mortality during the year was somewhat less than in the year preceding.

I. Zymotic Diseases.

The number of deaths caused by Zymotic diseases amounted to 19,626—9,855 males, 9,771 females—showing a decrease of 176 as compared with the preceding year. Of the total deaths recorded, 1 in every 4·7 resulted from diseases of this class.

Fever caused 4,218—2,184 males and 2,034 females—or 1 in every 22·1 of the total deaths. The mortality from fever during the preceding year exceeded that of the year 1866 by 1,065.

Scarlet fever killed 3,501 persons—1,876 males and 1,625 females—of these, 2,003 were under 5 years of age, and 1,061 were aged between 5 and 10 years.

Of the deaths from all causes, 1 in every 26·6 resulted from scarlet fever.

The deaths consequent on the epidemic of Asiatic cholera amounted to 2,501—1,167 males, and 1,334 females,—or 1 in 37·2 of the total deaths.

The number of deaths from diarrhœa amounted to 1,911—973 males and 938 females—or 1 in 48·7 of the total deaths. Of the persons who died from diarrhœa 816 were under 5 years of age, and 691 were 55 years and upwards.

Whooping cough was the cause of 1,736 deaths—768 males and 968 females,—or 1 in every 53·6 of all the deaths. Nearly all the deaths from whooping cough occurred in children under 5 years of age: 2 females whose deaths were referred to whooping cough were stated to be aged between 25 and 35 years, and a man and a woman between 35 and 45 years.

Croup was the cause of 1,390 deaths—718 males, and 672 females. This disease appears to have been more prevalent in Ireland than in either England or Scotland in the year 1866, the ratios to the total number of deaths registered being in Ireland 1 in 67; in Scotland 1 in 79; and in England only 1 in 97.

851 deaths were referred to measles—464 males, and 387 females. The number registered in 1865 was 1,036, and in 1864, 630.

Diphtheria was the cause of 317 deaths, against 480 in 1865, and 661 in 1864. Of the deaths registered from diphtheria 111 occurred in the North-Eastern Division, and 88 in the Eastern Division.

The deaths from small-pox only amounted to 194, showing a decrease of 267 as compared with the year 1865, and being 660 less than in 1864.

Three males and 1 female died from hydrophobia.

The deaths of 2 men were caused by glanders; in the preceding year 9 men died from this disease; and in the year 1864, 3 men and 1 woman died from the same cause.

II. Constitutional Diseases.

The number of deaths from diseases termed constitutional amounted to 17,462—8,290 males and 9,172 females—affording a ratio of 1 in every 5·3 of the total deaths registered.

Phthisis, or pulmonary consumption, proved fatal in 10,119 instances—4,835 males and 5,284 females—being in the proportion of 1 death in every 9·2 of all the deaths.

1,762 deaths—723 males, and 1,039 females—were returned under the head of dropsy.

Cancer killed 1,694 persons—703 males, and 991 females.

1,466 deaths were referred to tabes mesenterica.

Hydrocephalus, or water on the brain, was the cause of 1,060 deaths—598 males and 462 females.

1,090 deaths were ascribed to scrofula.

III. Local Diseases.

The deaths attributed to local diseases numbered 31,380, or 1 in every 3 of all the deaths, the sexes being 16,774 males and 14,606 females.

To diseases of the nervous system 8,795 deaths were referred, the sexes being 4,840 males, and 3,955 females. Of these, 4,057 (2,270 males and 1,787 females) were returned as caused by convulsions; apoplexy caused 972 (563 males and 409 females); paralysis caused 1,756 (906 males and 850 females); cephalitis, or inflammation of the brain, &c., contributed 610 (342 males, 268 females). 805 deaths were tabulated under the head of brain disease unspecified; in 1865 the number so tabulated was 799, and in 1864 it was 1,182.

Diseases of the circulatory organs caused 3,168 deaths—1,696 males and 1,472 females; of these, 66 deaths (39 males and 27 females,) resulted from pericarditis; 100 were caused by aneurism (81 males and 19 females); 3,002 deaths (1,576 males and 1,426 females,) were returned under the head of heart disease unspecified.

Diseases of the respiratory organs, not including phthisis, caused 12,851 deaths—6,533 males and 6,318 females. Bronchitis was the cause of 8,959 deaths (4,366 males and 4,593 females); inflammation of the lungs proved fatal in 1,892 instances (1,145 males and 747 females); asthma was the assigned cause of 657 deaths; pleurisy of 402; and laryngitis of 112; to lung disease unspecified 829 deaths were referred.

Diseases of the digestive organs caused 4,894 deaths—2,637 males, 2,257 females. Of this number, inflammation of the bowels caused 662 deaths (368 males, and 294 females); 268 persons died from peritonitis (142 males, and 126 females); gastritis, or inflammation of the stomach, is stated to have caused 198 deaths;

ileus, which includes obstruction of the bowels, constipation, &c., caused 403 deaths (249 males and 154 females); 1,259 deaths were ascribed to stomach disease unspecified. To inflammation of the liver 243 deaths were referred; to jaundice 194; and to liver disease unspecified 1,005.

Diseases of the urinary organs proved fatal in 1,096 instances—844 males and 252 females. Of this number, inflammation of the kidneys caused 50 deaths; nephria, or Bright's disease, 198; stone in the bladder 23; inflammation of the bladder 52; diabetes 124; and kidney disease unspecified 564.

170 persons died from diseases of the generative organs.

Diseases of the organs of locomotion caused 172 deaths—103 males and 69 females.

234 deaths were ascribed to diseases of the integumentary system, viz., 9 to phlegmon; 82 to ulcer; and 143 to skin disease, &c.

IV. Developmental Diseases.

Diseases incidental to development contributed 18,442 deaths—7,782 males, 10,660 females—the proportion being 1 in 5 of the total deaths registered; 255 died from premature birth; cyanosis caused 13 deaths, of these, 11 were under 1 year old, 1 was 2 years old, and the other between 10 and 15 years. Spina bifida was the cause of 12 deaths; 26 deaths were tabulated under the head of "other malformations;" and teething was the cause assigned for 299 deaths.

667 women died in childbirth; as 328 women died from metria, or puerperal fever, so the total deaths resulting from child-bearing will amount to 995. For every 147 children born, the life of 1 mother was sacrificed.

The cause of 13,282 deaths was stated to have been old age; the sexes were, 5,525 males, and 7,757 females.

3,878 deaths were referred to atrophy and debility.

V. Violent Deaths.

The deaths from violence registered during the year amounted to 2,162—1,423 males and 739 females, or 1 in every 43 of the total deaths registered. In every 10,000 of the estimated population in 1866, 4 persons died from violence.

Of the deaths from violence, 1,889 were accidental, viz., 682 from fractures and contusions; 23 from gunshot wounds; 30 from cuts or stabs; 505 from burns or scalds—218 males and 287 females; 29 from poisoning; 464 from drowning—361 males, and 103 females; 72 from suffocation. In each of the two preceding years the number of deaths from suffocation was 71. Of the 72 persons whose deaths were caused by suffocation, 30 were under 12 months old. The nature of the accident was not stated in 84 instances, against 140 in the year 1865.

The number of deaths from homicide amounted to 140—80 males, and 60 females.

67 persons—45 males and 22 females—committed suicide, or 12 out of 1,000,000 of the estimated population were self-destroyed.

The modes resorted to for self-destruction were—gunshot wounds, 1 man; cuts or stabs, 1 man and 1 woman; poisoning, 2 men and 1 woman; drowning, 15 men and 12 women; hanging, 18 men and 4 women; and in the cases of 8 men and 4 women the mode of self-destruction was not stated in the returns.

Two men, between 20 and 25 years of age, were executed.

Sixty-four of the violent deaths were not classed.

In 504 cases of sudden death, the cause was not ascertained.

The cause of death was unspecified or ill-defined in 3,451 instances, or 1 in 27 of the total deaths. This evidences an improvement in the returns on the years 1864 and 1865, when the number of deaths unspecified were 6,504, or 1 in 14·3, and 4,853, or 1 in 19·2 respectively.

I have the honour to be,
Sir,
Your obedient servant,
W. M. BURKE.

To
The Registrar-General.

COPY of CIRCULAR relating to REGISTRATION of MARRIAGES celebrated by the ROMAN CATHOLIC CLERGY, 26 and 27 Vic., cap. 90.

General Register Office, Dublin,
31*st December*, 1863.

SIR,

I request you will furnish each Parish Priest within your District—who may apply to you for the same—with *six blank* Forms of Certificates of Marriage, which you will carefully take from the Certificate Book forwarded to you, and also with *six* of the printed Envelopes, addressed to "The Registrar of Births, Deaths, and Marriages."

By this course—which has been strongly recommended to me by many Dignitaries of the Roman Catholic Church, and approved of by the Law Officers of the Crown—the convenience of the Catholic Population, especially those of the poorer classes, will be greatly promoted in regard to the Registration of their Marriages.

A *further supply* of Certificates *will be forwarded on your application*—from which *blank Forms* will be furnished by you, from time to time, to those Parish Priests within your District who may require them. You will request each Rev. Gentleman obtaining the Certificates to give you a receipt for them, (on the accompanying Forms), in order that you may be able to account to me for all the Certificates entrusted to your care; and you will furnish me, at the end of each month, with the Names and Addresses of those Clergymen to whom you supply them. You will observe they are on *Water-marked* paper, with the words "Certificate of Marriage" printed thereon.

I beg to say that I feel assured you will discharge the duties of your office with zeal, discretion, and courtesy, and thus largely contribute to the success of the very Important Measures, in the carrying out of which you have so readily undertaken to assist by accepting the office of Registrar.

I am, Sir,
Your obedient Servant,
WILLIAM DONNELLY,
Registrar-General.

To
The Registrar of
Births, Deaths, and Marriages.

INDEX OF SUPERINTENDENT REGISTRARS' DISTRICTS.

* Thus, the number of Marriages in the Abbeyleix Superintendent Registrar's District may at once be ascertained by referring in the "*Abstract of Marriages*" to the Superintendent Registrar's District, numbered 75 (*see* page 4), and in like manner the number of Births and Deaths, of Deaths at different ages, &c., will be found by referring to the same Superintendent Registrar's District Number in the appropriate Tables.

INDEX OF REGISTRARS' DISTRICTS.

[The Number against each Registrar's District in the Third Column refers to the order in which it appears in the Arrangement of the Districts in the Tables of Abstracts; thus Abbey (120: 4) is the 4th Registrar's District of the Tuam Superintendent Registrar's District, No. 120.]

REPORT

TO

His Excellency JOHN POYNTZ, EARL SPENCER, K.G., &c., &c.,

Lord Lieutenant-General and General Governor of Ireland.

MAY IT PLEASE YOUR EXCELLENCY,—

As directed by the provisions of the 26 Vic., cap. 11, sec. 49, the 26 & 27 Vic., cap. 90, sec. 16, and the 7 & 8 Vic., cap. 81, sec. 56, I have the honour to transmit to your Excellency, in order that the same may be laid before Parliament, General Abstracts of the Births, Deaths, and Marriages registered in Ireland during the year 1867.

A General Abstract of the number of Births, Deaths, and Marriages, registered in the year 1867, was presented to Parliament in the Session of 1868. The Report now submitted contains detailed Tables of the ages and condition of persons married, of Births, distinguishing legitimate from illegitimate; and of Deaths, and their causes.

The Acts for the Registration of Births and Deaths, and Roman Catholic Marriages, came into operation on the 1st of January, 1864, but that for the Registration of Protestant Marriages of all denominations has been in force since the 1st of April, 1845.

For the purposes of Registration, the country has been divided into 163 Superintendent Registrars' Districts—co-extensive with the Poor Law Unions—and into 774 Registrars' Districts, which, with a few exceptions, are of equal extent with the Dispensary Districts formed under the Medical Charities Act.

GENERAL SUMMARY.

The *estimated* population of Ireland in the middle of 1867 was 5,557,196; the persons whose marriages were registered, amounted to 59,484; the number of marriages being 29,742; children born alive whose births were registered, amounted to 144,388; and the number of deaths registered was 93,503. The emigrants from Ireland during the year 1867 amounted to 80,624. In the previous year—1866—there were *registered* 30,121 marriages, 146,090 births, and 93,027 deaths; the number of emigrants was 99,467.

MARRIAGES.

29,742 marriages were registered in Ireland during 1867, being in the proportion of ·535 marriages to every 100 persons, or of 1 marriage to every 187 persons, of the *estimated* population. The ratio in England was 1 in 113, or ·836 per cent., and in Scotland 1 in 140 or ·710 per cent. of the estimated population.

755 men and 4,357 women contracted marriage before they had attained their twenty-first year. The proportion of males married under

age was 2·54; of females, 14·65 per cent. The proportions in England and Wales in 1867 were—males, 6·87, and females, 20·17 per cent. In Scotland the proportions were 6·77 males and 20·41 per cent. females.

Of widowers, 3,029, and of widows, 1,627 were re-married; the proportion being 10·18 per cent. of widowers, and 5·47 per cent. of widows, to the total marriages. The like proportions in England and Wales were 14·33 widowers, and 9·65 per cent. widows. In Scotland the proportions were, widowers, 12·33, and widows, 5·65 per cent.

According to the provisions of the Registration Acts, every registry of a marriage is required to be signed by the parties married, two witnesses, and the officiating clergyman. A test of the elementary education of the persons contracting marriage is thus afforded by comparing the number who write their names in the registers, with the number who make a mark. Of 59,484 persons married in 1867, 25,303 (11,086 men and 14,217 women) signed the registers with marks; being in the proportion of 42·5 per cent.—37·3 per cent. of the males, and 47·8 per cent. of the females married.

The like rates in England and Wales for the same year were 21·1 per cent. of males, and 28·8 per cent. of females; and in Scotland 10·59 of males and 20·73 per cent. of females.

The marriage registers contain a column in which the age of each of the parties married is inserted; but as the law only requires it to be stated whether the parties are "of full age" or "minors," the precise age at marriage is not always entered in the registers. In 1867 the exact ages of both parties were given in 12,007 instances. Of these 10,843 were bachelors, and 11,355 spinsters; 1,164 were widowers, and 652 widows. The largest number of wives was married between 21 and 30—the number being 7,442, or more than one-half of the whole number whose ages are recorded. The largest number of husbands—7,375—is also found to have been married between 21 and 30 years of age.

350 bachelors were married to widows, both of whose ages at the time of marriage are recorded. Of these, 188 of the widows and 170 of the bachelors married between 25 and 35 years of age. Of 862 widowers who married spinsters, 381 of the latter were between 25 and 35 years of age; whilst the largest number of the widowers on their re-marriages ranged chiefly between 30 and 45.

Of widowers and widows married, whose ages at the time of marriage are stated, there were 302 couples. Of these the largest number of widows appears to have been between 40 and 50, and of widowers between 50 and 60. 9 widowers and 4 widows were married when they were above 70 years old.

With respect to Roman Catholic Marriages, the 26 & 27 Vic., cap. 90, directs that parties about to contract marriage shall produce to the clergyman celebrating the marriage a certificate, to be procured from the Registrar, filled up as far as possible by that officer with the particulars necessary to be registered, which certificate the parties married, the witnesses, and the officiating clergyman are required to sign. When so filled up the certificate is to be returned within three days to the Registrar by the husband, under a penalty of ten pounds.

With a view to facilitate the registration of marriages under the Act referred to, and at the special request of several dignitaries of the Roman Catholic Church,—with the approval of the Law Officers of the Crown—(who at that time were the Right Hon. Thomas O'Hagan, M.P., and James

A. Lawson, esq., Q.C.)—I instructed the District Registrars to furnish to each parish priest, who should apply for them, forms of certificate to be duly filled, signed, and forwarded to the Registrar on the occasion of a marriage, thus saving the husband the inconvenience of procuring from the Registrar a form of certificate *previous* to his marriage, as required by the Statute.* I also furnished all the Roman Catholic clergy in Ireland with copies of the Act above referred to, in order that the requirements of the law might be known to them previous to coming into operation.

The proportions per cent. of marriages to the estimated population, and of persons married who wrote their names in the registers; also of minors, widowers, and widows, are given in the following table, for the several registration divisions:—

TABLE I.—*The Proportional Number of Marriages in the Eight Divisions of Ireland during the years* 1864, 1865, 1866, *and* 1867, *of Persons who Signed their Names, of Persons not of Full Age, and of Re-marriages.*

The extent and position of each of these divisions are specified at page xxxvi.

* For copy of Circular issued on this subject, see page 98.

Of the total number of marriages registered (29,742) 20,977 were celebrated by Roman Catholic clergymen, and entered in the register books by the Registrars in accordance with the 26th and 27th Vic., cap. 90; and 8,765 marriages were of members of the various Protestant persuasions. Of the latter marriages 4,992 were in churches and chapels of the Established Church, 2,674 in Presbyterian Meeting-houses, 206 in "Registered Buildings," 877 in the Registrars' offices, 13 according to the usages of the Society of Friends, and 3 marriages were of members of the Jewish persuasion. Of the entire number of marriages in 1867 there were contracted in the quarter ending the last day of March, 12,828; of June, 5,155; of September, 5,486; of December, 6,273.

The following table gives a statement showing in continuation of the return in my report for 1866, the number of marriages solemnized in Ireland under the Marriages Act of 1844, distinguishing the mode of celebration:—

TABLE II.—*The Number of Marriages registered under* 7 & 8 *Vic., c.* 81, *in each Year, from* 1*st April,* 1845, *to* 31*st December,* 1867, *and the Mode in which the Marriages were solemnized.*

There is not any return made to me of the places of worship belonging to Roman Catholics in which marriages are celebrated; but under the

* The 7 & 8 Vic., c. 81, came into operation 1st April, 1845.

provisions of the 7th & 8th Vic., cap. 81, I am enabled to state respecting other religious persuasions, that there were 1,471 Churches and Chapels of the Established Church, 580 registered Presbyterian Meeting-houses, and 209 Registered Buildings belonging to various denominations, in which marriages might lawfully be solemnized, on the 31st December, 1867. During the year 1867 there was an increase of 13 in the number of such places in the Established Church; and of 15 in other religious communities. The "Registered Buildings" belong to the following denominations:—

Denominations.	No. of Places of Worship.	Denominations.	No. of Places of Worship.
Wesleyan Methodists,	114	Methodists New Connexion,	5
Reformed Presbyterians,	34	Church Methodists,	1
Independents,	20	Covenanters,	1
Baptists,	12	Evangelical Union,	1
Seceders,	11		
United Presbyterians,	5	Total,	209
Moravians or United Brethren,	5		

The following Table shows by Divisions and Registrars' Districts the number of places of worship in which marriages (under the 7 & 8 Vic., cap. 81), may be solemnized in each District or Union, distinguishing the religious denominations:—

During the year 1867 there were issued by the Registrars, 728 Licences for Marriage in Registered Buildings and in the Registrars' offices.

The number of Marriage Licences issued by the licensing Ministers of the several Presbyterian bodies is given in the following summary :—

Presbytery or Synod.	Number of Licensing Ministers on 31st December, 1867.	Number of Registered Meeting-houses on 31st December, 1867.	Number of Licences issued.
1. General Assembly of the Presbyterian Church in Ireland,	114	540	2,597
2. Remonstrant Synod of Ulster,	8	21	44
3. Presbytery of Antrim,	4	10	35
4. United Presbytery or Synod of Munster,	4	4	—
5. Northern Presbytery of Antrim,	1	5	10
Total,	131	580	2,686

BIRTHS.

The births registered in Ireland during 1867, amounted to 144,388. Of these, 74,332 were males, and 70,056 females, being in the proportion of 106·1 boys to every 100 girls. In England, in the same year, the number of males to 100 females whose births were registered was 104·3; and in Scotland 105·4.

The rate per cent. of births to the *estimated* population was 2·598. In England the rate was 3·585, and in Scotland 3·593.

There were 4,714 illegitimate births, of which 2,409 were those of males, and 2,305 females; the proportion to the total number of births being 3·3 in every 100. The rate in England was 5·9, and in Scotland 9·7 per cent. The highest rates, 5·7 and 4·5, of illegitimate children in every 100 born, occurred in the North-Eastern and South-Eastern Divisions respectively.

The following table shows the proportion of legitimate and illegitimate births *registered* in each of the eight Divisions in 1864, 1865, 1866, and 1867.

TABLE IV.—*The Per-centage of Legitimate and Illegitimate Births registered in Ireland during the years* 1864, 1865, 1866, *and* 1867, *by Divisions.*

Divisions.	Proportion per cent. of Legitimate Births.				Proportion per cent. of Illegitimate Births.			
	1864.	1865.	1866.	1867.	1864.	1865.	1866.	1867.
IRELAND, ...	96·2	96·3	96·7	96·7	3·8	3·7	3·3	3·3

North-Western, ...	96·4	96·8	96·7	97·1	3·6	3·2	3·3	2·9
Eastern, ...	96·6	96·9	97·3	97·2	3·4	3·1	2·7	2·8
North Midland, ...	97·3	97·5	97·8	97·7	2·7	2·5	2·2	2·3
South Midland, ...	95·7	96·4	96·2	96·3	4·3	3·6	3·8	3·7
Western, ...	98·1	98·3	98·6	98·8	1·9	1·7	1·4	1·2
South-Eastern, ...	94·9	94·8	95·4	95·5	5·1	5·2	4·6	4·5
South-Western, ...	97·6	97·5	97·7	98·0	2·4	2·5	2·3	2·0

37,637 births were registered during the quarter ended 31st March; 40,063 in that ended 30th June; 34,192 during that ended 30th September; and 32,496 in that ended 31st December.

DEATHS.

The deaths registered in 1867 amounted to 93,503—46,945 males, and 46,558 females—being in the proportion of 1·683 per cent. of the *estimated* population, or in the ratio of 1 *registered* death to every 59 persons. The proportion in England for the same year was 2·198 per cent., or 1 in 45; and in Scotland 2·177 per cent., or 1 in 46.

The following table shows the per-centage of mortality at different ages:—

TABLE V.—*The Mortality per Cent. at each Age-period, according to the Registration of Deaths in Ireland, during the Years* 1864, 1865, 1866, *and* 1867, *by Sexes.*

Sexes.		Ages.											
		0—	5—	10—	15—	25—	35—	45—	55—	65—	75—	85—	95 and upwards.

	1867	24·04	3·72	2·34	6·56	6·53	5·90	7·31	11·69	14·96	12·00	4·05	·90
Males and Females,	1864	26·92	4·25	2·34	7·24	6·37	5·91	7·78	11·66	13·02	10·68	3·16	·67
	1865	27·50	4·57	2·37	7·32	6·51	6·00	7·80	11·00	13·03	10·08	3·15	·67
	1866	26·03	4·70	2·49	7·14	6·86	6·18	7·73	11·19	12·94	10·66	3·37	·71
	1867	25·81	3·71	2·25	6·70	6·55	5·68	7·50	11·62	14·27	11·35	3·76	·80

Of the persons whose deaths were registered during the year 25·81 in every 100 were children under 5 years old—of whom 27·57 per cent. were males, and 24·04 per cent. females. 14·89 per cent. of the men, and 16·95 per cent. of the women, whose deaths were registered had passed their 75th year. 70 of the males and 90 of the females in every 10,000 were stated in the returns to have been over 95 years of age.

EMIGRATION.

During the year 1867 the number of emigrants who left the ports of Ireland amounted to 80,624; of these 45,215 were males and 35,409 females. Of the whole number, 16,027 were from Leinster; 25,268 from Munster; 18,164 from Ulster; and 9,752, from Connaught: 11,413 persons did not state the county or province to which they belonged.

Of the emigrants in 1867, 13·5 per cent. were under 15 years of age; 74·0 per cent. were 15 to 35 years old; 11·4 per cent. were 35 and upwards; and the ages of 1·1 per cent. were not specified in the returns.

METEOROLOGY.

The following is an abstract of the meteorological observations taken during the year 1867, at the Ordnance Survey Office, Phœnix Park, Dublin, furnished by Major Wilkinson, R.E., by direction of the Superintendent of the Ordnance Survey.

The barometer was highest during the year at 9.30 P.M., on 2nd March, when it stood at 30·796 inches, the air being calm; it was lowest on 7th January, at 9.30 P.M., with the wind at S.W., when it was 28·597 inches.

The highest temperature in the air was 79·6°, on 14th August, and the lowest was 4·6°, on 3rd January.

Rain or snow fell on 201 days. The greatest rain-fall in 24 hours was ·906 in., on 15th July, with wind blowing S.W. The total amount registered was 24·050 inches.

The prevailing wind was from the W., from which point it blew on 92 days; it was from S.W. on 71 days; from N.W. on 47 days; from S. on 30 days; from S.E. on 31 days; from E. on 37 days; from N.E. on 14 days; and from N. on 21 days, at 9.30 A.M. On 22 days the air was calm at that hour. The total pressure of the W. wind was 346·25 lbs., being an average of 3·76 lbs. per square foot. The strongest wind blew from W. on the 6th February, when the pressure was 25 lbs. per square foot.

I beg here to repeat the observations made in my former Reports to your Excellency, with respect to the working of the Acts for the Registration of Births, Deaths, and Marriages in Ireland, as I regret to state that the numbers of these events registered in 1867 do not show much improvement compared with previous years:—

"In several instances prosecutions have been resorted to with some advantage; but notwithstanding the exertions made to induce a general compliance with the law throughout the country, numerous cases of neglect to register births and deaths have been reported to me by the District Registrars, but frequently at too late a period after their occurrence to allow of the parties being proceeded against at the Petty Sessions.

"I regret to add that the registration of marriages under the 26th & 27th Vic., cap. 90, is not at all satisfactory in some Districts, owing to the Clergy who have celebrated the marriages having declined to sign the necessary certificates.

"The marriages solemnized under the provisions of the 7th & 8th Vic., cap. 81, which came into operation in 1845, are, I believe, all registered.

"The following are the ratios of Births, Deaths, and Marriages to population in different countries compared with the ratio in Ireland in 1864 [and in 1865, 1866, and 1867]:—

Countries.	Ratio to Population.		
	Births.	Deaths.	Marriages.
IRELAND [in 1864],	1 in 42	1 in 61	1 in 207
IRELAND [in 1865],	1 „ 39	1 „ 61	1 „ 183
IRELAND [in 1866],	1 „ 38	1 „ 60	1 „ 185
IRELAND [in 1867],	1 „ 38	1 „ 59	1 „ 187
England,	1 „ 28	1 „ 42	1 „ 116
Scotland,	1 „ 28	1 „ 42	1 „ 137
Sweden,	1 „ 30	1 „ 50	1 „ 145
Prussia (Old Provinces),	1 „ 24	1 „ 38	1 „ 116
Hanover,	1 „ 30	1 „ 44	1 „ 124
Wurtemburg,	1 „ 23	1 „ 31	1 „ —
Hanse Towns: Bremen,	1 „ 28	1 „ 37	1 „ 105
Holland,	1 „ 30	1 „ 42	1 „ 127
France,	1 „ 38	1 „ 44	1 „ 127
Spain,	1 „ 26	1 „ 32	1 „ 127
Austria (exclusive of Hungary),	1 „ 25	1 „ 31	1 „ 121

"It will be seen from the foregoing figures, compiled from the Statistical Tables published by the Board of Trade, how incomplete was Registration in Ireland in 1864, and comparing the number of Births, Deaths, and Marriages recorded in that year with those since annually registered, I regret to state that there appears but little improvement in the subsequent years:—

		1864.	1865.	1866.	1867.	1868.
Registered	Births, . .	136,414	144,970	146,090	144,388	146,108
	Deaths, . .	93,144	93,154	93,027	93,502	86,803
	Marriages, . .	27,406	30,802	30,121	29,742	27,753."

Following this Report are summaries of the Quarterly Reports issued in 1867, and the Appendix contains a letter addressed to me by Dr. Burke, the Superintendent of Medical Statistics, respecting the causes of death—to which I beg to refer.

I have the honour to be
Your Excellency's
Very faithful servant,

WILLIAM DONNELLY,
Registrar-General.

GENERAL REGISTER OFFICE,
Dublin, September 3rd, 1870.

Quarterly Reports.

First Quarter.

SUMMARY OF THE QUARTERLY REPORTS, 1867.

First Quarter—January, February, March.

Marriages.—There were 12,828 marriages *registered* in Ireland during the first quarter of 1867, affording an annual ratio of 1 in every 108, or ·923 per cent. of the *estimated* population. Of this number 10,655 were between Roman Catholics, representing a ratio of 1 marriage in every 101, or ·987 per cent. of Roman Catholics, and 2,173 were between Protestants, affording a ratio of 1 in every 142, or ·703 per cent. of the Protestant population. The number of marriages *registered* in the corresponding quarter of 1866 was 11,992, and in the first quarter of 1865 it was 12,308.

Births.—The births registered during the first quarter of the year 1867 amounted to 37,637—19,313 boys and 18,324 girls—affording an annual ratio of 1 in every 36·9, or 2·71 per cent. of the *estimated* population. The average number of births registered during the corresponding quarter of the previous three years was 36,167.

Deaths.—There were 30,411 deaths—15,007 males, and 15,404 females—*registered* during the quarter, affording an annual ratio of 1 in 45·7, or 2·19 per cent. of the *estimated* population. The average number *registered* during the first quarter of the preceding three years was 28,305.

Emigration.—According to the returns obtained by the Enumerators, the number of emigrants who left the ports of Ireland, during the quarter ended 31st March, 1867, amounted to 14,033—8,698 males and 5,335 females—being 11,776 less than the number who emigrated during the corresponding quarter of 1866, when the number amounted to 25,809. The number in the first quarter of 1865 was 15,848, and in the corresponding quarter of 1864 it was 27,625.

Estimated Decrease of the Population.—The number of births *registered* during the quarter ended 31st March 1867, being 37,637; the deaths 30,411; and the number of emigrants 14,033 (according to the returns obtained by the enumerators at the several seaports);—a decrease of 6,807 would, therefore, appear to have taken place in the population of Ireland during that period.

PRICES OF PROVISIONS, AND PAUPERISM.

It will be seen from the following that the prices of provisions were much higher during the first quarter of 1867, than they were in the corresponding quarter of 1866, and that there was a considerable increase in the number of persons receiving Poor Law relief.

The average price of Messrs. Manders and Co.'s 4 lb. loaf for the first quarter of 1867 was 8*d.*, being three halfpence higher than the average for the corresponding quarter of 1866. The price was 8*d.* during the first eight weeks of the quarter, and 7½*d.* during the last five weeks.

The average price of oatmeal for the first quarter of 1867 was 16*s.* 1*d.* per cwt., against 14*s.* 10*d.* for the corresponding quarter of 1866. The average prices of potatoes per cwt. at the Dublin Potato Market ranged from 4*s.* 5*d.* to 5*s.* 7*d.*, being much higher than for the corresponding quarter of 1866, when the prices ranged from 2*s.* 6*d.* to 3*s.* 6*d.*

The weekly average prices of beef at the Dublin Cattle Market for the quarter ranged from 53*s.* to 70*s.* per cwt. against 50*s.* 6*d.* to 63*s.* 6*d.* for the corresponding quarter of the previous year.

The average number of persons receiving indoor relief in the Irish workhouses during the first quarter of 1867 was 58,503, against 57,123 for the corresponding quarter of 1866; the greatest number (59,634) was on Saturday, the 9th February; on the corresponding day of the previous year there were but 57,573; the lowest number was on Saturday, the 5th January, the number amounting to 55,359, against 54,894 on the corresponding day in 1866.

The average weekly number of persons receiving outdoor relief was 16,489, against 11,927 for the first quarter of 1866. *Quarterly Reports.*

Of the persons receiving indoor relief during the first quarter of 1867 an average number of 429 in each week were located in Asylums for the Blind and the Deaf and Dumb, and in Extern Hospitals; in the corresponding quarter of 1866 the average weekly number was 465. First Quarter.

THE WEATHER.

The mean height of the barometer at the Ordnance Survey Office, Phœnix Park, Dublin, during the first quarter of 1867 was 29·642 inches (in the corresponding quarter of 1866, 1865, and 1864 it was 29·521 inches, 29·651 inches, and 29·725 inches respectively); the highest reading (30·613 inches) was on the 2nd March, at 9.30 P.M., when the air was calm, and the lowest (28·414 inches) on the 7th January, at 9.30 P.M., wind S.W.

The mean temperature of the air during the quarter was 39·9° (it was 41·5°, 38·9°, and 40·2°, respectively, in the corresponding quarters of 1866, 1865, and 1864); the maximum temperature (59·5°) was on the 24th March, and the minimum (4·6°) was on the 3rd January.

Rain or snow fell on 60 days during the quarter. The rain-fall measured 8·188 inches; in the first quarter of 1866, 1865, and 1864 it was 7·508 inches, 5·979 inches, and 5·227 inches respectively. The greatest monthly rain-fall was in March, when 3·744 inches were registered.

There was a prevalence of westerly winds, the wind having been from that point on 24 days; on 14 days from S.W.; 5 days from N.W.; 17 days from E.; 11 days from S.E.; 4 days from N.E.; 6 days from N., and 1 day from S., at 9.30 AM. It was calm on 8 days at that hour.

HEALTH OF THE PEOPLE.

During the first three months of each year the mortality is greater than at any other period. In the first quarter of the year 1867 the deaths were 2,797 in excess of the number registered during the corresponding period of 1866.

As very many of the Registrars throughout the country stated that their districts had been comparatively free from epidemic diseases, the high death-rate must be, in a great measure, referred to the extreme severity of the season.

The old and those of tender years suffered much. To bronchitis and other affections of the respiratory organs, very many of the deaths were attributable.

Out of 79 deaths registered in the Dromore District, Banbridge Union, the Registrar stated, "There were altogether nearly 60 deaths caused directly or indirectly by diseases of the respiratory organs, owing, no doubt, to the unusual severity of the weather."

The Registrar of the Moneymore District, in the Superintendent Registrar's District of Magherafelt, observed that, "During the quarter the number of very aged people who died was unprecedented; their ages ranged from 103 down to 80 years; this is to be attributed to the scarcity of fuel."

Deaths from a very malignant form of fever were reported from a few Districts. This form of fever has at the hands of physicians received various designations, such as "purpura maligna," "febris nigra," "malignant typhus," and lastly, "malignant purpuric fever."

The Registrar of the Rathcoole District, Celbridge Union, reported that "There was one case of malignant fever, or as it has been termed, *black death*, which I am happy to state survives, but with complete loss of vision." One case of "black typhus" occurred in the Tullamore District, which proved rapidly fatal; and in the Mitchelstown District, Mitchelstown Union, the Registrar says, "One case of 'febris nigra' is recorded; the patient was a young girl in the prime of life; she lived but thirty-two hours."

Quarterly Reports.

First Quarter.

Scarlatina prevailed in certain districts, but not at all to the same extent as in the first quarter of 1866.

The Registrar of the Riverstown District (Sligo Union) reported that "A most malignant form of scarlatina appeared in the district within the last five weeks, fatal in every case—in all 6 ; . . . . . happily there has been no new case for the last three weeks."

The Registrar of the Cavan District (Cavan Union) reported 2 deaths from scarlatina, and no less than 20 from measles; and in the Belturbet District of the same union, the Registrar noted the prevalence of measles, which he characterized as the "Rubeola nigra."

In the Kells District, Kells Union, the Registrar reported 13 deaths from cholera. The Registrar of the Street District, Granard Union, stated that "There were 28 cases of cholera morbus, of which 11 proved fatal. There was a strong likelihood of the extension of the epidemic, but this was counteracted by sanitary and charitable measures." One death from Asiatic cholera occurred in the Carrickbyrne District, New Ross Union.

The satisfactory manner in which the provisions of the Compulsory Vaccination Act are carried out, may be inferred from the fact that the only reference to small-pox in the Registrars' notes occurs in that of the Registrar of the Claremorris District (Claremorris Union), who stated that "There has been registered 1 death from small-pox, the subject of which *had not been vaccinated.* In the quarter I have had occasion to notice 2 cases in which *infants vaccinated in* 1865 *have been exposed to the influence of small-pox, sleeping in same bed with children so affected and have completely escaped.*"

Though some of the Registrars reported on the improved sanitary condition of their districts, there were many who complained bitterly of the wretched condition of their districts. In Mullingar, where the deaths nearly doubled the births (68 of the latter against 121 of the former), the very zealous Registrar made the following statement:—"I beg to call attention to the great mortality in the Mullingar Dispensary District during the last quarter; 24 of the deaths *registered* were from cholera. . . . The increasing mortality in this town loudly calls for attention; the number of deaths registered during the year 1866 was 338, and the number now registered for the quarter ending March 31st, is 121 ! This is a death-rate that something should be done to check. I have frequently reported on the fearfully unhealthy state of this town from the want of sewers. The Town Commissioners here will do nothing; the Poor Law Commissioners have reported to Government with a view to getting the present sanitary laws enforced, *but nothing has been done.*"

The benefits resulting from sanitary improvements were well illustrated in the condition of the Milltown Malbay District, Ennistimon Union, which afforded a striking contrast when compared with Mullingar. The Registrar of Milltown Malbay recorded 70 births against 30 deaths, and made the following observations:—"Dependent on its improved sanitary condition, my district enjoys an immunity from disease epidemic or endemic. Nothing can be more marked than the difference betwixt it and the preceding quarters of the same season, when unhappily less preventive measures existed."

NUMBER OF MARRIAGES, BIRTHS, AND DEATHS, REGISTERED IN EACH OF THE EIGHT DIVISIONS

Into which Ireland has been divided for Statistical purposes.

Marriages.—The Western Division had the greatest number of marriages registered in proportion to its population during the first quarter of 1867, the annual ratio afforded being 1 in 73. The South-Western Division ranked second, with a ratio of 1 in 75. The North-Eastern and Eastern Divisions had the lowest ratios, the number of marriages registered in the former being only equal to an annual ratio of 1 in 152, and in the latter to 1 in 161.

Quarterly Reports.

First Quarter.

The order of the EIGHT DIVISIONS *as regards the annual Rate represented by the number of Marriages registered during the* FIRST *quarter of the years* 1865, 1866, *and* 1867, *is shown in the following Statement :—*

Quarter ending 31st March,

1865.		1866.		1867.	
Divisions.	*Ratio.*	*Divisions.*	*Ratio.*	*Divisions.*	*Ratio.*
1. South-Western,	1 in 74	South-Western,	1 in 77	Western,	1 in 73
2. Western,	„ 84	Western,	„ 81	South-Western,	„ 75
3. South-Eastern,	„ 100	South-Eastern,	„ 117	South-Eastern,	„ 101
4. North Midland,	„ 130	North-Western,	„ 125	North-Western,	„ 118
5. North-Western,	„ 138	North-Eastern,	„ 147	South Midland,	„ 122
6. South Midland,	„ 139	North Midland,	„ 155	North Midland,	„ 133
7. North-Eastern,	„ 158	South Midland,	„ 157	North-Eastern,	„ 152
8. Eastern,	„ 170	Eastern,	„ 165	Eastern,	„ 161

Births.—The North-Eastern and South-Western Divisions had the highest birth-rate during the quarter ending 31st March, 1867, the annual ratio afforded being 1 in 33. The latter Division afforded the highest birth-rate in the corresponding quarter of each of the years during which the Registration Act has been in force. The South Midland Division, which ranked third for the first quarter of 1864, has had the lowest birth-rate in the corresponding quarter of the three succeeding years.

The numerical order of the EIGHT DIVISIONS *as regards the annual Rate represented by the number of Births registered during the* FIRST *quarter of* 1865, 1866, *and* 1867, *is shown in the following Statement :—*

Quarter ending 31st March,

1865.		1866.		1867.	
Divisions.	*Ratio.*	*Divisions.*	*Ratio.*	*Divisions.*	*Ratio.*
1. South-Western,	1 in 33	South-Western,	1 in 30	North-Eastern,	1 in 33
2. North-Eastern,	„ 34	North-Eastern,	„ 32	South-Western,	„ 33
3. South-Eastern,	„ 37	Western,	„ 35	Western,	„ 36
4. Eastern,	„ 37	South-Eastern,	„ 36	North-Western,	„ 40
5. Western,	„ 38	Eastern,	„ 37	Eastern,	„ 40
6. North-Western,	„ 40	North-Western,	„ 37	South-Eastern,	„ 40
7. North Midland,	„ 41	North Midland,	„ 39	North Midland,	„ 41
8. South Midland,	„ 42	South Midland,	„ 41	South Midland,	„ 44

Deaths.—The Eastern Division, as usual, had the highest death-rate. The South-Eastern ranked second, and the North-Eastern third. The Western and North-Western had the lowest death-rate during the quarter, the annual ratio afforded by the number of deaths *registered* being, respectively, 1 in 61 and 1 in 62 of the estimated population.

The following statement shows the EIGHT DIVISIONS *arranged according to the annual Rate of Mortality afforded by the number of Deaths registered during the* FIRST *quarter of* 1865, 1866, *and* 1867 :—

Quarter ending 31st March,

1865.		1866.		1867.

8. Western,	„ 61	Western,	„ 64	North-Western,	„ 62

Quarterly Reports.

First Quarter.

PROVINCES.

Marriages.—Grouping the Unions or Superintendent Registrars' Districts by Provinces, it will be observed from the following table that there were 2,872 marriages registered in the province of Connaught during the first quarter of 1867, affording an annual ratio of 1 marriage in every 76 of the population; and in Munster 4,647, affording a ratio of 1 in 79; whereas in Ulster the ratio was only 1 in 149; and in Leinster, 1 in 155. As has been remarked in former reports, the first quarter of the year is much the most favoured by the Roman Catholic population for marriage; this fact accounts for the great difference between the marriage-rates in Connaught and Munster, and those in Ulster and Leinster.

The following Table shows, by PROVINCES, *the number of Marriages registered during the* FIRST *quarter of the years* 1865, 1866, *and* 1867; *together with the annual ratio to the estimated Population.*

REGISTRATION PROVINCES.	MARRIAGES. Quarter ending 31st March,					
	1865.		1866.		1867.	
	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.
LEINSTER, ...	2,197	1 in 158	2,008	1 in 171	2,213	1 in 155
MUNSTER, ...	4,564	„ 81	4,249	„ 87	4,647	„ 79
ULSTER, ...	3,025	„ 155	3,143	„ 148	3,096	„ 149
CONNAUGHT, ...	2,522	„ 88	2,592	„ 84	2,872	„ 76
TOTAL, ...	12,308	1 in 115	11,992	1 in 116	12,828	1 in 108

Births.—Of the 37,637 births registered in Ireland during the first quarter of 1867, 8,088 occurred in Leinster, affording a ratio of only 1 in 42 of the estimated population. In Munster the number *registered* was 10,328; in Ulster, 13,047; and in Connaught, 6,174. In each of the three last-named provinces, the annual ratio afforded was 1 in 35 of the estimated population.

The following Table shows, by PROVINCES, *the number of Births and Deaths registered during the* FIRST *quarter of the years* 1865, 1866, *and* 1867, *together with the ratio to the estimated Population.*

REGISTRATION PROVINCES.	BIRTHS. Quarter ending 31st March,						DEATHS. Quarter ending 31st March,

Quarterly Reports.

First Quarter.

Deaths.—Whilst the births *registered* in the province of Leinster, during the quarter ending 31st March, 1867, afforded the *lowest* ratio, the deaths *registered* give the *highest* rate of mortality, the number being 8,898, equal to an annual ratio of 1 in 39. In Munster the number *registered* was 8,153, yielding a ratio of 1 in 45; in Ulster, 9,687, or 1 in 48; and in Connaught, 3,673, or 1 in 59 of the estimated population.

Second Quarter.

Second Quarter.—April, May, June.

Marriages.—The number of marriages *registered* in Ireland during the second quarter of 1867 amounted to 5,155, equal to an annual ratio of 1 in every 270, or ·371 per cent. of the *estimated* population. The number *registered* in the corresponding period of 1866 was 6,081.

Of the 5,155 marriages *registered* during the second quarter of 1867, 3,097 were between Roman Catholics, representing an annual ratio of 1 marriage in every 319, or ·287 per cent. of the Roman Catholic population; and the remaining 2,058 marriages were between Protestants, being equal to an annual ratio of 1 in every 150, or ·666 per cent. of the Protestant population.

Births.—The births *registered* during the second quarter of 1867 amounted to 40,063—20,528 boys, and 19,535 girls—affording an annual ratio of 1 in every 34·7, or 2·88 per cent. of the *estimated* population. The average number of births registered during the corresponding quarter of the preceding three years was 38,870.

Deaths.—There were 24,121 deaths—12,160 males, and 11,961 females—*registered* during the quarter, affording an annual ratio of 1 in 57·6, or 1·74 per cent. of the *estimated* population. The average number *registered* during the second quarter of the previous three years was 24,343.

Emigration.—According to the returns obtained by the Enumerators, the number of emigrants who left the ports of Ireland, during the quarter ended 30th June, 1867, amounted to 34,889—19,556 males and 15,333 females—being 6,235 less than the number who emigrated during the corresponding quarter of 1866, when the number amounted to 41,124. The number in the second quarter of 1865 was 37,588, and in the corresponding quarter of 1864 it was 48,802.

Estimated Decrease of the Population.—The number of births *registered* during the quarter ended 30th June, 1867, being 40,063; the deaths 24,121; and the number of emigrants 34,889—(according to the returns obtained by the enumerators at the several seaports); a decrease of 18,947 would, therefore, appear to have taken place in the population of Ireland during that period.

PRICES OF PROVISIONS, AND PAUPERISM.

With the exception of beef, the prices of provisions were much higher during the second quarter of 1867, than they were in the corresponding quarter of the previous year. There was a considerable increase in the number of persons receiving Poor Law relief.

The average price of Messrs. Manders and Co.'s 4-lb. loaf for the second quarter of 1867 was 8*d.*, being three halfpence higher than the average for the corresponding quarter of the previous year; the price was 7½*d.* during the first two weeks and 8*d.* during the remaining weeks of the quarter.

The average price of oatmeal for the second quarter of 1867 at the Dublin Corn Exchange was 18*s.* 5*d.* per cwt., against 15*s.* 8*d.* for the corresponding quarter of the previous year. The average price of potatoes per cwt. at the Dublin Potato Market ranged from 5*s.* 3*d.* to 6*s.* 6*d.*, being much higher than for the corresponding quarter of the previous year, when the prices ranged from 3*s.* 1*d.* to 3*s.* 11*d.*

Quarterly Reports.

Second Quarter.

The weekly average prices of beef at the Dublin Cattle Market for the quarter ranged from 53*s.* 6*d.* to 70*s.* 6*d.* per cwt., against 58*s.* to 72*s.* 6*d.* for the corresponding quarter of 1866.

The average number of persons receiving indoor relief in the Irish workhouses during the second quarter of 1867 was 55,399, against 51,404 for the corresponding quarter of 1866; the greatest number (57,664) was on Saturday in the first week of the quarter; on the corresponding day of the previous year there were but 54,810; the lowest number was on Saturday in the last week of the quarter, the number amounting to 52,787, against 48,444 on the corresponding day in 1866.

The average weekly number of persons receiving outdoor relief was 15,527, against 11,982 for the second quarter of 1866.

Of the persons receiving indoor relief during the second quarter of 1867 an average number of 425 in each week were located in Asylums for the Blind and the Deaf and Dumb, and in Extern Hospitals; in the corresponding quarter of 1866 the average weekly number was 466.

THE WEATHER.

The mean height of the barometer during the second quarter of 1867 was 29·740 inches (in the corresponding quarter of 1866, 1865, and 1864 it was 29·761 inches, 29·916 inches, and 29·838 inches respectively); the highest reading (30·554 inches) was on the 27th June, at 9·30 P.M., wind N.W., and the lowest (28·914 inches) was on the 14th April, at 3·30 P.M., wind W.

The mean temperature of the air during the quarter was 53·2° (it was 51·5°, 54·8°, and 53·6°, respectively, in the corresponding quarters of 1866, 1865, and 1864); the maximum temperature (79·4°) was on the 26th June, and the minimum (29·7°) was on the 22nd May.

Rain or snow fell on 47 days during the quarter. The rain-fall measured 5·173 inches; in the second quarter of 1866, 1865, and 1864 it was 7·796 inches, 5·816 inches, and 4·083 inches respectively. The greatest monthly rain-fall was in May, when 2·465 inches were registered; and the greatest amount in 24 hours (·733 in.) fell on the 10th of same month. In June the rain-fall measured only ·496 in., a less quantity than fell in the corresponding month of any year since 1849, when the rain-fall in June was only ·397 in.

There was a prevalence of westerly winds, the wind having been from W. on 20 days; from S.W. on 19 days; and from N.W. on 17 days. It blew from E. on 11 days; from S.E. on 9 days; from S. on 8 days; from N. on 6 days; and from N.E. on one day at 9.30 A.M.

HEALTH OF THE PEOPLE.

The state of the public health during the quarter ended 30th June, 1867, was on the whole satisfactory, the number of deaths showing a decrease of 502, when compared with the number registered in the corresponding period of 1866.

Diseases of the respiratory organs, induced by the inclemency of the weather, proved very fatal, and, as usual, most so among the old and the very young.

With some exceptions, there was a comparative freedom from diseases assuming an epidemic form. The various forms of fever prevailed in some districts, and one form excited much alarm, in consequence of the unhappy misnomer which was applied to it. The disease rapidly declined, and certainly, as many recoveries have been reported, it is not entitled to the fearful name of Black Death.

Measles, scarlatina, and whooping-cough proved very fatal in certain localities. In the Achill District, Newport Union, of the 35 deaths registered, 20 were referred to whooping-cough.

Quarterly Reports.

Second Quarter.

No death from small-pox was mentioned in the Registrars' notes for the second quarter of 1867.

The Registrar of the Carney District, No. 1, Sligo Union, reported the death of a woman "from uterine inflammation after parturition, caused by the unskilful management of a midwife," and adds that "the brutal treatment to which the poor are subjected at the hands of these women is most lamentable; instrumental aid being the alternative in almost every case to which the medical man is called. I would beg to urge upon my dispensary brethren similarly circumstanced, to give a return of these cases so palpably attributable to the want of trained midwives in their respective districts."

Old age furnished a very large contingent to the death register during the quarter. In the Portglénone District, Ballymena Union, one-third of the deaths registered occurred in persons from 70 to 90 years of age; in the Lisburn District, Lisburn Union, 16 of the deaths registered were of persons who had passed the threescore and ten years; and the Registrar of the Tallow District, Lismore Union, stated that "a female died at the extreme age of 108 years, having retained her faculties to the last."

The beneficial effects resulting from the improved sanitary condition of their districts were recorded by the Registrars of Swords, Pomeroy, Kilskeer, Ballyragget, Galway, Castlegregory, Gurteen, and Carlow. In those districts where sanitary precautions are neglected, there fever is always present.

NUMBER OF MARRIAGES, BIRTHS, AND DEATHS REGISTERED IN EACH OF THE EIGHT DIVISIONS.

Marriages.—The "North-Eastern" Division had the highest marriage-rate during the quarter ending 30th June, 1867. It also ranked first for the corresponding quarter of the preceding two years, and the "Eastern Division," which ranks second on the present occasion, was also second on those occasions. The "North-Western" Division ranks third; it only came fifth for the second quarter of 1865 and 1866.

The order of the EIGHT DIVISIONS *as regards the annual Rate represented by the number of Marriages registered during the* SECOND *quarter of the years* 1865, 1866, *and* 1867, *is shown in the following Statement:—*

Quarter ending 30th June,

1865.		1866.		1867.	
Divisions.	*Ratio.*	*Divisions.*	*Ratio.*	*Divisions.*	*Ratio.*
1. North-Eastern,	1 in 171	North-Eastern,	1 in 164	North-Eastern,	1 in 180
2. Eastern,	„ 174	Eastern,	„ 164	Eastern,	„ 184
3. South-Eastern,	„ 253	South-Eastern,	„ 261	North-Western,	„ 287
4. South-Western,	„ 286	South-Western,	„ 261	South-Eastern,	„ 318
5. North-Western,	„ 307	North-Western,	„ 263	South-Western,	„ 339
6. South Midland,	„ 334	South Midland,	„ 309	North Midland,	„ 385
7. North Midland,	„ 335	North Midland,	„ 312	South Midland,	„ 392
8. Western,	„ 451	Western,	„ 337	Western,	„ 448

Births.—The birth-rate for the second quarter of 1867, was somewhat higher in six of the eight divisions than it was in the corresponding quarter of 1866. As to the remaining two divisions (Eastern and North-Midland) the former had a ratio of 1 in 35 in 1866 against a ratio of 1 in 36 for the corresponding quarter of 1867, and the latter had the same ratio for both years, viz., 1 in 40.

Quarterly Reports.

Second Quarter.

The numerical order of the EIGHT DIVISIONS *as regards the annual Rate represented by the number of Births registered during the* SECOND *quarter of* 1865, 1866, *and* 1867, *is shown in the following Statement:—*

Quarter ending 30th June,

1865.		1866.		1867.	
Divisions.	*Ratio.*	*Divisions.*	*Ratio.*	*Divisions.*	*Ratio.*
1. North-Eastern,	1 in 31	North-Eastern,	1 in 31	North-Eastern,	1 in 30
2. South-Western,	„ 32	South-Western,	„ 32	South-Western,	„ 31
3. Eastern,	„ 36	Eastern,	„ 35	South-Eastern,	„ 35
4. South Eastern,	„ 36	South-Eastern,	„ 36	Eastern,	„ 36
5. North Midland,	„ 40	North Midland,	„ 40	North-Western,	„ 38
6. North-Western,	„ 40	Western,	„ 41	Western,	„ 38
7. South Midland,	„ 42	North-Western,	„ 42	South Midland,	„ 39
8. Western,	„ 43	South Midland,	„ 43	North Midland,	„ 40

Deaths.—The death-rate during the quarter in the Eastern Division was 1 in 46; the South-Eastern Division ranked second, with a ratio of 1 in 50; the North-Eastern third, the ratio being 1 in 53; the Western Division, as usual, had the lowest death-rate, the number of deaths registered during the second quarter of 1867 being only equal to a ratio of 1 in 77. In the corresponding quarter of 1866 the ratio in this division was 1 in 76; and in the second quarter of 1865 the ratio was 1 in 75.

The following Statement shows the EIGHT DIVISIONS *arranged according to the annual Rate of Mortality afforded by the number of Deaths registered during the* SECOND *quarter of* 1865, 1866, *and* 1867:—

Quarter ending 30th June,

1865.		1866.		1867.	
Divisions.	*Ratio.*	*Divisions.*	*Ratio.*	*Divisions.*	*Ratio.*
1. Eastern,	1 in 49	Eastern,	1 in 45	Eastern,	1 in 46

8. Western,	„ 75	Western,	„ 76	Western,	„ 77

PROVINCES.

Marriages.—The number of marriages *registered* in the Province of Ulster during the quarter ending 30th June, 1867, affords an annual ratio of 1 in 221; in Leinster the ratio was 1 in 226; in Munster, 1 in 369; and in Connaught, 1 in 397.

The following Table shows, by PROVINCES, *the number of Marriages registered during the* SECOND *quarter of the years* 1865, 1866, *and* 1867; *together with the annual ratio to the estimated Population.*

REGISTRATION PROVINCES.	MARRIAGES. Quarter ending 30th June,					
	1865.		1866.		1867.	
	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.

TOTAL,	5,659	1 in 249	6,081	1 in 230	5,155	1 in 270

Quarterly Reports.

Second Quarter.

Births.—The largest number of births, both actually and relatively, during the second quarter of 1867, was registered in the province of Ulster, the annual ratio afforded being 1 in 32·9 of the population; in Munster the ratio was 1 in 33; in Leinster, 1 in 37; and in Connaught, 1 in 38.

The following Table shows, by PROVINCES, *the number of Births and Deaths registered during the* SECOND *quarter of the years* 1865, 1866, *and* 1867, *together with the ratio to the estimated Population.*

REGISTRATION PROVINCES.	BIRTHS.						DEATHS.					
	Quarter ending 30th June,						Quarter ending 30th June,					
	1865.		1866.		1867.		1865.		1866.		1867.	
	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.
LEINSTER, .	9,138	1 in 38	9,173	1 in 38	9,202	1 in 37	6,660	1 in 52	7,096	1 in 49	6,951	1 in 49
MUNSTER, .	10,931	34	10,647	35	11,101	33	6,143	61	5,975	62	6,432	57
ULSTER, .	13,801	34	13,573	34	14,080	33	8,447	56	8,658	54	7,852	59
CONNAUGHT, .	5,239	42	5,392	41	5,680	38	3,000	74	2,894	76	2,886	75
TOTAL, .	39,109	36	38,785	36	40,063	35	24,250	58	24,623	57	24,121	58

Deaths.—The number of deaths *registered* in the province of Leinster during the second quarter of 1867 afforded an annual ratio of 1 in 49; in Munster the ratio was 1 in 57; in Ulster, 1 in 59; and in Connaught, 1 in 75 of the estimated population.

Third Quarter.—July, August, September.

Third Quarter.

Marriages.—The number of marriages *registered* in Ireland during the third quarter of 1867 amounted to 5,486, equal to an annual ratio of 1 in every 253, or ·395 per cent. of the *estimated* population. The number *registered* in the corresponding period of 1866 was 5,566.

Of the 5,486 marriages *registered* during the third quarter of 1867, 3,323 were between Roman Catholics, representing an annual ratio of 1 marriage in every 325, or ·308 per cent. of the Roman Catholic population; and the remaining 2,163 marriages were between Protestants, being equal to an annual ratio of 1 in every 143, or ·700 per cent. of the Protestant population.

Births.—There were 34,192 births *registered* in Ireland during the quarter ending 30th September, 1867—17,641 boys and 16,551 girls—representing an annual ratio of 1 in every 40·6, or 2·48 per cent. of the *estimated* population; the average number of births *registered* during the corresponding quarter of the preceding three years was 33,834.

Deaths.—The deaths *registered* in Ireland during the third quarter of the year 1867 amounted to 18,497—9,409 males and 9,088 females—affording an annual ratio of 1 in every 75·1, or 1·33 per cent. of the *estimated* population. The average number *registered* during the corresponding quarter of the previous three years was 18,808.

Emigration.—According to the returns obtained by the Enumerators, the number of emigrants who left the ports of Ireland during the quarter ended 30th September, 1867, amounted to 18,475—9,851 males and 8,624 females—being 1,165 less than the number who emigrated during the corresponding quarter of 1866.

Estimated Decrease of the Population.—The number of births *registered* during the quarter ended 30th September, 1867, being 34,192; the deaths 18,497; and the number of emigrants 18,475—(according to the returns obtained by the enumerators at the several seaports);—a decrease of 2,780 would, therefore, appear to have taken place in the population of Ireland during that period.

Quarterly Reports.

Third Quarter.

PRICES OF PROVISIONS, AND PAUPERISM.

The prices of bread and oatmeal in Dublin were considerably higher during the third quarter of 1867 than during the corresponding period of 1866; the prices of beef ranged somewhat lower.

The average price of Messrs. Manders and Co.'s 4-lb. loaf for the third quarter of 1867 was 8*d.* (being three halfpence more than the average for the corresponding quarter of 1866); the price was raised to 8½*d.* for the last week of the quarter.

The average price of oatmeal at the Dublin Corn Exchange for the third quarter of 1866 was 15*s.* 5*d.* per cwt.; for the corresponding quarter in 1867 it was 19*s.* 4*d.*; for the first week of the quarter the average price was 18*s.* 9*d.*; it rose to 22*s.* for the eighth and ninth weeks. The average price during the last week was 18*s.*

The price of potatoes at the Dublin Potato Market averaged from 3*s.* 5*d.* to 5*s.* 1*d.*; for the corresponding quarter of 1866 the average prices were 3*s.* 8*d.* to 5*s.* 2*d.* per cwt.

The average prices of beef at the Dublin Cattle Market for the third quarter of 1867 ranged from 50*s.* to 66*s.* 6*d.* per cwt., against 52*s.* to 69*s.* 6*d.* during the corresponding quarter of 1866. The prices quoted for the first week of the quarter were 54*s.* to 67*s.* 6*d.*; for the last week they were 45*s.* to 63*s.*

The average number of persons in Ireland receiving indoor relief on Saturdays, during the third quarter of 1867 was 47,911, against 44,978 for the corresponding period of 1866.

The average weekly number of persons receiving outdoor relief during the third quarter of 1867 was 13,731, against 10,909 for the third quarter of 1866.

Of the persons receiving indoor relief during the third quarter of 1867 an average number of 433 in each week were located in Asylums for the Blind and the Deaf and Dumb, and in Extern Hospitals; in the corresponding quarter of 1866 the average weekly number was 449.

THE WEATHER.

The mean height of the barometer during the third quarter of 1867 was 29·786 inches (in the corresponding quarter of 1866, 1865 and 1864 it was 29·628 inches, 29·820 inches, and 29·804 inches respectively); the highest reading (30·381 inches) was on the 25th September, at 9.30 A.M., wind N.W.; and the lowest (29·219 inches) was on the 12th of the same month at 9.30 A.M., wind S.S.W.

The mean temperature of the air during the quarter was 58·5° (it was 56·9°, 60·8°, and 57·8°, respectively, in the corresponding quarters of 1866, 1865, and 1864); the maximum temperature (79·6°) was on the 13th August, and the minimum (35·6°) was on the 30th September.

Rain or snow fell on 46 days during the quarter. The rain-fall measured 6·058 inches; in the third quarter of 1866, 1865, and 1864 it was 6·656 inches, 6·318 inches and 4·137 inches respectively. The greatest monthly rain-fall was in July, when 2·673 inches were registered.

Westerly winds prevailed during the quarter, the wind (at 9·30 A.M.) having been on 21 days from W., on 21 days from S.W., and on 11 days from N.W.; it blew on 16 days from S., on 7 days from E., and on 6 days from N.; it was calm on 5 days at 9·30 A.M.

HEALTH OF THE PEOPLE.

As during the third quarter of 1867 the weather was fine, epidemics confined to a few districts, employment for labourers abundant, and wages good, so the health of the community was satisfactory.

The births *registered* during the third quarter of 1867 exceeded the number *registered* during the corresponding period of 1866 by 611, and the deaths *registered* show a decrease of 103, as compared with the September quarter of 1866.

It is obvious from the foregoing statement that the registration of deaths in Ireland is very imperfect.

That the health of the people improved within the last few years, may be inferred even from the imperfect registration. The publication of the notes from many intelligent and painstaking Registrars, who are also Medical Officers of Dispensary Districts, has had a very beneficial effect. Several of these gentlemen have during the third quarter of 1867, and also on former occasions, recorded improvements in the sanitary condition of their districts, which improvements they ascribe partly to their own exertions, and much to the publication of their notes in the Registrar-General's Quarterly Returns.

The Registrar of Forkill District, in the Union of Newry, stated that the "strict sanitary precautions of late carried into effect throughout the district, as regards whitewashing, removal of nuisances, sewerage, &c., have had a very beneficial effect."

As regards improved sanitary arrangements and their adoption, the Registrar of Kilmakevoge District, in the Union of Waterford, made the following observations:—"Deaths below the average, which may be attributed to the growing intelligence of the people, in being more attentive to cleanliness and ventilation, and being more temperate in their habits."

The encouragement afforded by the report of the Registrar of the Kilmakevoge District is unhappily counterbalanced by the account given by the Registrar of the Waterford (City) District, who stated that "Our sanitary arrangements are, perhaps, the worst in Ireland."

The Registrar of the Enniskillen District also stated that "the sanitary arrangements in the town are very bad."

Scarlatina prevailed in certain districts, and appeared to be endemic in many. In Loughgall District, Armagh Union, out of 33 deaths, 9 resulted from scarlatina. In Brookeborough, Lisnaskea Union, nearly one-half of the deaths were caused by scarlatina. Of 20 deaths registered in the Graigue District, Thomastown Union, so many as 9 were referred to scarlatina. In Carrignavar District, No. 1, Cork Union, scarlatina was the cause of one-sixth of the deaths, and in Carrignavar No. 2 District, in the same union, out of the 5 deaths registered, 4 were classed under the head of scarlatina. The Registrar of Cork District, No. 2, remarked upon the prevalence of scarlatina in his district, and in reference to sanitary precautions stated that "the Corporation are doing very much by whitewashing and cleansing the lanes, but still they allow manure to be collected from the streets and waterclosets, and deposited in yards, much to the detriment of the neighbourhood."

The following are the only important facts in reference to small-pox recorded in the Registrars' Notes:—

The Registrar of Crumlin District, Antrim Union, reported:—"Vaccination well attended to by parents. There has been no small-pox in the district for years."

The Registrar of Castlefinn District, Strabane Union, observed, "I have not seen a case of small-pox for two years. The people seem to have a great wish for early vaccination."

The Registrar of the Roundstone District, Clifden Union, reported a fatal case of small-pox; *he did not, however, state whether the person who died from this loathsome (at the same time most preventible) disease, had been vaccinated.*

Quarterly Reports. Third Quarter.

The Registrar of Aclare District, Tobercurry Union, was most satisfactory in his report; his statement was as follows :—"There was one death from *unvaccinated* small-pox. The child had been the only one not vaccinated of a family of four young children, none of whom had ever had the small-pox. The other three children escaped even catching the disease."

The Registrar of Cullen District, Millstreet Union, stated that—"No case of small-pox occurred, vaccination having been fully carried out."

The following observations of the Registrar of the Whitechurch District, Dungarvan Union, add further evidence to that already adduced in support of the benefits arising from the Compulsory Vaccination Act:—"There has not been a case of small-pox in the district for the last three years, which may be attributed to the successful working of the Compulsory Vaccination Act."

Whooping-cough proved very fatal in some districts. In Brideswell Registration District, Athlone Union, 8 of the 20 deaths registered were referred to this disease. In the Johnstown District, Urlingford Union, the Registrar stated that "4 deaths arose from chincough (whooping-cough), of which there were 27 cases in my district. Two out of the 4 deaths occurred in the family of a labourer, and were attributable to overcrowding—the man, his wife, and five children occupying a single apartment barely twelve feet square." In the Killeroran Registrar's District, Mountbellew Union, 9 deaths out of the 26 registered, were referred to whooping-cough; and in the Mountbellew District of the same union, 14 of the 34 deaths registered, were ascribed to the same disease.

Typhia, or typhoid fever, was more prevalent than typhus. A fatal case of fever, accompanied with ecchymosis, or dark patches of blood under the skin, occurred in the Rathcoole District, Celbridge Union, the duration of illness stated to have been only 14 hours.

The Registrar of the Clonmany District, Inishowen Union, directed attention to the prevalence of chest affections in his neighbourhood, which he attributed "to the occupation of the people, who are up all night gathering seaweed."

The deaths of many very aged persons were registered during the quarter. In the Carlingford District, Dundalk Union, 9 of those who died were from 70 to 98 years of age. In the Shercock District, Bailieborough Union, the ages of 3 persons whose deaths were registered, were stated to have been 80, 90, and 100 years respectively. In the Easky District, Dromore West Union, two persons died, who were both stated to have attained the advanced age of 100 years. In the Gort District, Gort Union, the ages of three persons whose deaths were recorded, were said to have been 85, 92, and 100 years. In the Milltown District, Killarney Union, a female pauper died who was said to have attained the age of 104 years.

In reference to the death of 6 men, caused by the explosion of a boiler in a flax mill, the Registrar of the Randalstown District, Antrim Union, made the following remarks :—"It seems strange there is a Government inspection of factories and none of flax mills, in which nearly all the terrible injuries and mutilations by machinery in the north of Ireland occur."

NUMBER OF MARRIAGES, BIRTHS, AND DEATHS, REGISTERED IN EACH OF THE EIGHT DIVISIONS.

Marriages.—The number of marriages registered in the Eastern Division during the third quarter of 1867, afforded the highest annual ratio, viz.:—1 in 162 of the *estimated* population; in the North-Eastern Division the ratio was 1 in 177; in the North Midland Division the ratio was only 1 in 416; and in the Western Division 1 in 571.

The order of the EIGHT DIVISIONS *as regards the annual Rate represented by the number of Marriages registered during the* THIRD *quarter of the years* 1865, 1866, *and* 1867, *is shown in the following statement:—*

Quarter ending 30th September,

1865.		1866.		1867.	
Divisions.	*Ratio.*	*Divisions.*	*Ratio.*	*Divisions.*	*Ratio.*
1. Eastern,	1 in 157	Eastern,	1 in 163	Eastern,	1 in 162
2. North-Eastern,	„ 164	North-Eastern,	„ 173	North-Eastern,	„ 177
3. South-Eastern,	„ 240	South-Eastern,	„ 265	South-Eastern,	„ 249
4. South-Western,	„ 281	South-Western,	„ 273	South-Western,	„ 277
5. North-Western,	„ 314	South Midland,	„ 315	South Midland,	„ 293
6. South Midland,	„ 320	North Midland,	„ 344	North-Western,	„ 326
7. North Midland,	„ 365	North-Western,	„ 369	North Midland,	„ 416
8. Western,	„ 463	Western,	„ 501	Western,	„ 571

Births.—The "North-Eastern" Division had the highest birth-rate during the quarter ending 30th September, 1867, 1 in 35; the "South-Midland" had the lowest, 1 in 49; these divisions also held the first and last positions respectively for the corresponding quarter of the two previous years.

The numerical order of the EIGHT DIVISIONS *as regards the annual Rate represented by the number of Births registered during the* THIRD *quarter of* 1865, 1866, *and* 1867, *is shown in the following Statement:—*

Quarter ending 30th September,

1865.		1866.		1867.	
Divisions.	*Ratio.*	*Divisions*	*Ratio.*	*Divisions.*	*Ratio.*
1. North-Eastern,	1 in 36	North-Eastern,	1 in 36	North-Eastern,	1 in 35
2. Eastern,	„ 40	Western,	„ 40	South-Western,	„ 38
3. Western,	„ 40	South-Western,	„ 41	Eastern,	„ 41
4. South-Western,	„ 42	Eastern,	„ 42	Western,	„ 41
5. South-Eastern,	„ 45	North Midland,	„ 45	South-Eastern,	„ 42
6. North Midland,	„ 45	South-Eastern,	„ 45	North Midland,	„ 46
7. North-Western,	„ 46	North-Western,	„ 46	North-Western,	„ 47
8. South Midland,	„ 47	South Midland,	„ 52	South Midland,	„ 49

Deaths.—The rate of mortality, during the third quarter of the year 1867, was highest in the "Eastern" Division, 1 in 54; in the corresponding quarter of 1866 the rate in this division was 1 in 55; and in the third quarter of 1865 it was 1 in 59.

The number of deaths *registered* in the "Western" Division, during the quarter of the year under consideration, only affords *an annual ratio of* 1 *in* 101 of the estimated population; this division had also the lowest death-rate in the corresponding quarter of each year since registration commenced in this country.

The following Statement shows the EIGHT DIVISIONS *arranged according to the annual Rate of Mortality afforded by the number of Deaths registered during the* THIRD *quarter of* 1865, 1866, *and* 1867:—

Quarter ending 30th September,

1865.		1866.		1867.

Quarterly Reports.

Third Quarter.

PROVINCES.

Marriages.—The number of marriages registered in the province of Leinster during the quarter ending 30th September, 1867, affords an annual ratio of 1 in 195; in Ulster, 1 in 226; in Munster, 1 in 293; and in Connaught, 1 in 502.

The following Table shows, by PROVINCES, *the number of Marriages registered during the* THIRD *quarter of the years* 1865, 1866, *and* 1867, *together with the annual ratio to the estimated Population.*

REGISTRATION PROVINCES.	MARRIAGES.

Deaths.—The deaths *registered* in the Province of Leinster during the quarter ending the 30th September, 1867, represent an annual ratio of 1 in 62; in Ulster and Munster, each 1 in 77; and in Connaught, 1 in 100.

Quarterly Reports.

Fourth Quarter.

Fourth Quarter.—October, November, December.

Marriages.—There were 6,273 marriages *registered* in Ireland during the fourth quarter of 1867, a number affording an annual ratio of 1 in every 221, or ·452 per cent. of the *estimated* population. Of this number 3,902 were between Roman Catholics, representing a ratio of only 1 marriage in every 277, or ·362 per cent. of Roman Catholics, and 2,371 were between Protestants, affording a ratio of 1 in every 130, or ·767 per cent. of the Protestant population. The average number of marriages *registered* in the corresponding quarter of the previous three years was 6,577.

Births.—There were 32,496 births *registered* in Ireland during the quarter ending 31st December, 1867—16,850 boys and 15,646 girls—representing an annual ratio of 1 in every 42·8, or 2·34 per cent. of the *estimated* population; the average number of births *registered* during the corresponding quarter of the preceding three years was 33,620.

Deaths.—The deaths *registered* in Ireland during the fourth quarter of the year 1867 amounted to 20,474—10.369 males and 10,105 females—affording an annual ratio of 1 in every 67·9, or 1·47 per cent. of the *estimated* population. The average number *registered* during the corresponding quarter of the previous three years was 21,653.

Emigration.—According to the returns obtained by the Enumerators, the number of emigrants who left the ports of Ireland, during the quarter ended 31st December, 1867, amounted to 13,227—7,110 males and 6,117 females—being 333 more than the number who emigrated during the corresponding quarter of 1866.

Estimated Decrease of the Population.—The number of births *registered* during the quarter ended 31st December, 1867, being 32,496; the deaths 20,474; and the number of emigrants 13,227 (according to the returns obtained by the enumerators at the several seaports); a decrease of 1,205 would, therefore, appear to have taken place in the population of Ireland during that period.

PRICES OF PROVISIONS, AND PAUPERISM.

The price of Messrs. Manders & Co.'s 4-lb. loaf during the first week of the fourth quarter of 1867 was 8½*d.*; during the remaining weeks of the quarter the price was 9*d.*; the average price during the corresponding quarter of 1866 was 7½*d.*; during that of 1865 it was 7*d.*; and during the fourth quarter of 1864 the average price was 5½*d.* The 4-lb. loaf was, therefore, 63⅓ *per cent. higher in price* during the last quarter of 1867 than during the corresponding period of 1864.

The average price per cwt. of oatmeal for the quarter was 17*s.* 4*d.*; for the corresponding quarter of 1866 it was 15*s.* 11*d.*; for that of 1865 it was 15*s.* 1*d.*; and for that of 1864 it was 10*s.* 10*d.* A rise of 60 per cent. took place in the price of oatmeal between 1864 and 1867.

The average prices per cwt. of potatoes for the fourth quarter of 1867, at the Dublin Potato Market, were 3*s.* 10*d.* to 4*s.* 7*d.*; the average prices for the corresponding quarter of 1866 were 3*s.* 1*d.* to 4*s.* 11*d.*; for 1865 they were 2*s.* 9*d.* to 3*s.* 8*d.*; and for the last quarter of 1864 the average prices were 2*s.* 2*d.* to 3*s.* 4*d.*

The average price of beef at the Dublin Cattle Market, during the quarter ranged from 45*s.* 6*d.* to 62*s.* per cwt.; for the fourth quarter of 1866 the average prices were 48*s.* 6*d.* to 67*s.*

The following statement shows the average prices of the above articles of food in Dublin *during the fourth quarter* of the years 1864–7:—

Years.	Bread (Messrs. Manders & Co.'s 4-lb. loaf).	Oatmeal (Corn Exchange), per cwt.	Potatoes (at Potato Market), per cwt.	Beef (at Dublin Cattle Market), per cwt.
	d.	*s.* *d.*	*s.* *d.* to *s.* *d.*	*s.* *d.* to *s.* *d.*
1864 (4th quarter),	5½	10 10	2 2 to 3 4	49 6 to 65 6
1865 „	7	15 1	2 9 to 3 8	50 6 to 63 6
1866 „	7½	15 11	3 1 to 4 11	48 6 to 67 0
1867 „	9	17 4	3 10 to 4 7	45 6 to 62 0

Quarterly Reports.

Fourth Quarter.

The average number of persons in Ireland receiving indoor relief on Saturdays during the fourth quarter of 1867 was 50,775, against 48,534 for the corresponding period of 1866.

The average weekly number of persons receiving outdoor relief during the quarter was 13,467, against 11,217 for the fourth quarter of 1866.

Of the persons receiving indoor relief during the fourth quarter of 1867, an average number of 431 in each week were located in Asylums for the Blind and the Deaf and Dumb, and in Extern Hospitals; in the corresponding quarter of 1866 the average weekly number was 443.

THE WEATHER.

At the Ordnance Survey Office, Phœnix Park, the mean height of the barometer during the fourth quarter of the year 1867, was 29·934 inches (in the corresponding quarter of 1866, 1865, and 1864 it was 29·773 inches, 29·674 inches, and 29·686 inches respectively); the highest reading (30·583 inches) was on the 21st November, at 9.30 P.M., wind N., and the lowest (29·006 inches) was on the 1st December, at 9.30 A.M., wind S.W.

The mean temperature of the air during the quarter was 44·6° (it was 46·4°, 46·5°, and 44·4° respectively, in the corresponding quarters of 1866, 1865, and 1864); the maximum temperature (67·6°) was on the 10th October, and the minimum (25·0°) was on the 28th November.

Rain or snow fell on 48 days during the quarter. The rain-fall was unusually small, having measured only 4·631 inches; in the fourth quarter of 1866 it was 4·897 inches, while in the corresponding quarters of 1865 and 1864 it amounted to 10·112 inches, and 12·040 inches respectively. The greatest monthly rain-fall during the quarter was in October, when 3·034 inches, or nearly two-thirds of the entire quantity, were registered.

As usual, the west wind was most prevalent during the quarter, having blown (at 9·30 A.M.) for 27 days. The wind was from S.W. on 17 days; from N.W. on 14 days; from S. on 5 days; from S.E. on 8 days; from E. on 2 days; from N.E. on 7 days; and from N. on 3 days; it was calm on 9 days at 9·30 A.M.

HEALTH OF THE PEOPLE.

The deaths *registered* during the quarter ended December 31st, 1867, show a decrease of 1,716 as compared with the number registered in the corresponding period of the year 1866, when Asiatic cholera was epidemic.

To the mildness of the season and the improved sanitary condition of the country, the lessened mortality during the quarter may be fairly ascribed; for, though scarlatina, measles, and whooping-cough were very prevalent, and very fatal throughout the country, yet the number of deaths *registered* during the last quarter of 1867 was less than the number *registered* during the last quarter of any year since the Registration Act came into operation in 1864.

Scarlatina was the zymotic disease to which most deaths were ascribed. In the Keady district, Armagh Union, of the 44 deaths registered 15 resulted from scarlatina; in the Banbridge district more than one-fourth of the deaths were referred to scarlatina; at Downpatrick 13 of the 65 deaths registered were attributed to this disease; in the Bellaghy District, Magherafelt Union, of the 56 deaths registered 16 were caused by scarlatina. The Registrar of the Palmerston District, South Dublin Union, remarked that "scarlatina has been epidemic during the quarter of a mild form except in one locality (Island bridge), where 4 deaths occurred, out of 5 cases in the whole district. I attribute this to a sand-pit having been filled up with refuse vegetable and other matter." In Cork City No. 2 (North) District, 31 of the 89 deaths registered were caused by scarlatina.

Whooping-cough and measles caused many deaths.

Quarterly Reports.

Fourth Quarter.

The Registrar of Navan reported 1 death from small-pox: "the patient had been previously vaccinated." The Registrar of the Dunmore District, Tuam Union, stated that "some cases of small-pox occurred in this district; it proved fatal in 1 case, that of *a child six months old who had not been vaccinated.*" The Registrar of the Hollymount District, Ballinrobe Union, reported that "there have been 5 or 6 cases of small-pox arising from the pernicious custom of inoculation, but it has been impossible to detect the perpetrators owing to their carefulness to avoid detection, and the sympathy of the poor with their acts." It is satisfactory to observe that the "Compulsory Vaccination Act" has been highly successful, for, during the year 1867, the total deaths from small-pox *registered* did not amount to more than 21; whereas in the year 1864, in which the Act came into operation, no less than 854 deaths were caused by small-pox.

Many of the persons whose deaths were reported during the fourth quarter of 1867 had attained very advanced periods of life. A female died in the Kiltormer District, Ballinasloe Union, whose age was stated to have been 107 years. The Registrar of the Enniscorthy District, No. 2, Enniscorthy Union, stated that "It is a remarkable fact that upwards of one-third of those whose deaths were registered last quarter had reached the patriarchal age of 74 years, and 1 woman whose death has not yet been registered, lived, I am informed, to be 106 years old." In the Blackwatertown District, Armagh Union, "the deaths (4 excepted) are of very old persons, 1 of 92 and another of 103 years." In Bellananagh District, Cavan Union, the death of a person stated to have been 104 years old was registered.

The Registrar of Shinrone District, Roscrea Union, remarked that "nearly all the deaths have been caused by old age. Of the 10 deaths registered 3 were over 80 years, 1 was 90 years and another 104 years and 9 months. The last-mentioned, a man, retained all his faculties to the last, except hearing, which he had nearly lost, and was engaged making a fence a short time before his death." The death of a man (as stated) aged 103 years was registered in the Glenavy District, Union of Lisburn; and in Newry District, No. 1, "12 of the persons whose deaths were registered were between 70 and 80; 2 between 80 and 90; one, 100; and 1 had arrived at the advanced age of 106 years."

There were few unfavourable reports of the sanitary condition of the Registrars' Districts. The Registrar of Caherconlish District, Limerick Union, made the following statement, "Fever, though not virulent, has never quitted one portion of the district since my appointment, which I attribute to want of cleanliness on the part of the poor occupiers, and it not being a police patrol district it is entirely neglected." The poisonous effects resulting from the noxious effluvia from sewers, were well illustrated by a death from cholera, registered in the Mitchelstown District, Mitchelstown Union; the Registrar of the district observed that "the deceased was a mason, and was employed at work over a very foul sewer when he first complained."

NUMBER OF MARRIAGES, BIRTHS, AND DEATHS REGISTERED IN EACH OF THE EIGHT DIVISIONS.

Marriages.—The North-Eastern Division had the greatest number of marriages *registered* in proportion to its population during the last quarter of the year 1867, the annual ratio being 1 in 140. In the Eastern Division the ratio was 1 in 160. These two Divisions also ranked first and second respectively in the corresponding quarters of 1865 and 1866. In the Western Division the ratio was only 1 in 457. The low ratio is to be accounted for by the large proportion of the Roman Catholic marriages being celebrated in the *first* quarter of the year.

Quarterly Reports.

Fourth Quarter.

The order of the EIGHT DIVISIONS *as regards the annual Rate represented by the number of Marriages registered during the* FOURTH *quarter of the years* 1865, 1866, *and* 1867 *is shown in the following Statement:—*

Quarter ending 31st December,

1865.		1866.		1867.	
Divisions.	*Ratio.*	*Divisions.*	*Ratio.*	*Divisions.*	*Ratio.*
1. North-Eastern,	1 in 126	North-Eastern,	1 in 131	North-Eastern,	1 in 140
2. Eastern,	„ 152	Eastern,	„ 163	Eastern,	„ 160
3. North-Western,	„ 224	South-Eastern,	„ 219	North-Western,	„ 233
4. South-Eastern,	„ 238	North-Western,	„ 236	South-Eastern,	„ 240
5. North Midland,	„ 254	South Midland,	„ 262	South Midland,	„ 270
6. South Midland,	„ 256	South-Western,	„ 304	South-Western,	„ 303
7. South-Western,	„ 278	North Midland,	„ 317	North Midland,	„ 305
8. Western,	„ 363	Western,	„ 426	Western,	„ 457

Births.—The births *registered* during the last quarter of 1867 in the North-Eastern Division amounted to 7,579, affording an annual ratio of 1 in 36 of the *estimated* population; in the corresponding quarter of 1866 the ratio was also 1 in 36; and in 1865 it was 1 in 37; in the South Midland Division the ratio afforded was only 1 in 52 in 1867 and the two preceding years.

The order of the EIGHT DIVISIONS *as regards the annual Rate represented by the number of Births registered during the* FOURTH *quarter of* 1865, 1866, *and* 1867, *is shown in the following Statement:—*

Quarter ending 31st December,

1865.		1866.		1867.	
Divisions.	*Ratio.*	*Divisions.*	*Ratio.*	*Divisions.*	*Ratio.*
1. North-Eastern,	1 in 37	North-Eastern,	1 in 36	North-Eastern,	1 in 36
2. Western,	„ 40	Western,	„ 37	Western,	„ 39
3. South-Western,	„ 40	South-Western,	„ 39	South-Western,	„ 42

7. South-Eastern,	„ 46	North-Western,	„ 46	South-Eastern,	„ 49
8. South Midland,	„ 52	South Midland,	„ 52	South Midland,	„ 51

Deaths.—The Eastern Division had the highest death-rate during the fourth quarter of 1867, the annual ratio afforded being 1 in 51 of the estimated population; in the corresponding quarter of 1866 the death-rate in this division was 1 in 40, and in 1865 it was 1 in 51. In the North Midland Division the deaths *registered* during the fourth quarter of 1867 represent an annual ratio of 1 in 79 against 1 in 78 for the fourth quarter of 1866, and 1 in 83 for the fourth quarter of 1865; in the North-Western Division the ratio was 1 in 87 against 1 in 88 for 1866, and 1 in 84 for 1865; and in the Western it was 1 in 97 against 1 in 92 for the corresponding quarter of 1866, and 1 in 90 for 1865.

The following Statement shows the EIGHT DIVISIONS *arranged according to the annual Rate of Mortality afforded by the number of Deaths registered during the* FOURTH *quarter of* 1865, 1866, *and* 1867:—

Quarter ending 31st December.

1865.		1866.		1867.

Quarterly Reports.

Fourth Quarter.

PROVINCES.

Marriages.—The number of marriages *registered* in the province of Ulster during the fourth quarter of 1867 amounted to 2,733, a number representing an annual ratio of 1 in every 169 of the estimated population; in Leinster the number was 1842, or 1 in 186; in Munster 1,180, or 1 in 310; and in Connaught 518, or only 1 in 420.

The following Table shows, by PROVINCES, *the number of Marriages registered during the* FOURTH *quarter of the years* 1865, 1866, *and* 1867, *together with the annual ratio to the estimated Population:—*

REGISTRATION PROVINCES.	MARRIAGES. Quarter ended 31st December,					
	1865.		1866.		1867.	
	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.
LEINSTER, ...	1,960	1 in 177	1,828	1 in 188	1,842	1 in 186
MUNSTER, ...	1,281	„ 290	1,232	„ 299	1,180	„ 310
ULSTER, ...	3,076	„ 153	2,842	„ 164	2,733	„ 169
CONNAUGHT, ...	664	„ 333	580	„ 377	518	„ 420
TOTAL, ...	6,981	1 in 202	6,482	1 in 215	6,273	1 in 221

Births.—The births *registered* in Leinster during the fourth quarter of 1867 afford an annual ratio of only 1 in 49 of the estimated population—in the corresponding quarter of 1865 the ratio was 1 in 47, and in 1866, 1 in 46. In Munster there were registered 8,237 births—a number equal to an annual ratio of 1 in 44 (the ratio for the fourth quarter of 1865 and 1866 being 1 in 43 and 1 in 42, respectively); in Ulster the number was 11,661, or 1 in 40, which was also the ratio for the corresponding quarter of 1865 and 1866; and in Connaught 5,671, or 1 in 38, against 1 in 39 for 1865, and 1 in 37 for 1866.

The following Table shows, by PROVINCES, *the number of Births and Deaths registered during the quarters ending* 31*st December*, 1865, 1866, *and* 1867, *and the ratio to the estimated Population:—*

Deaths.—There were 5,985 deaths registered in the province of Leinster during the fourth quarter of 1867, the annual ratio afforded being 1 in 57—in the fourth quarter of 1866 the ratio was 1 in 46, and in 1865 it was 1 in 57. In Munster there were registered 5,500 deaths, or 1 in 67 of the estimated population, against 1 in 67 for the corresponding quarter of 1866, and 1 in 68 for the fourth quarter of 1865; in Ulster, 6,590 or 1 in 70, against 1 in 69 in 1866, and 1 in 67 in 1865; and in Connaught, 2,399, or only 1 in 91, against 1 in 91 for the fourth quarter of 1866, and 1 in 88 for 1865.

Topographical Description of the Eight Divisions into which Ireland has been divided in the foregoing Tables.

No. I. The North-Eastern Division.—This division may be described by a line passing southward from Lough Foyle through the counties of Londonderry, Tyrone, and Armagh, to Lough Bawn, in the county of Monaghan, and thence eastward to Carlingford Lough; the north and east being on the seaboard.

No. II. The North-Western Division is bounded on the east by the division just described, from Lough Foyle to a point a little south of Six Mile Cross, in the county of Tyrone, and may be described by a line drawn thence S.W. through the county of Fermanagh to the south of Enniskillen, embracing that portion of the north-west angle of the county of Cavan belonging to the Enniskillen Union, into the county of Leitrim, crossing Lough Allen, thence into the county of Sligo, to a point situated to the southward of the town of Ballymote, and thence extending north to Ballysadare Bay; the remainder of the division is bounded by the sea. It contains Loughs Erne and Derg, and part of Lough Allen, and large portions of it are mountainous.

No. III. The Eastern Division is situated in the provinces of Leinster and Ulster; it extends along the Irish Sea and St. George's Channel, from Warrenspoint, in the county of Down, to the south of Cahore Point, in the county of Wexford, stretching inland about twenty-five miles, and embracing the counties of Louth, Dublin, and Wicklow, and portions of the counties of Carlow, Cavan, Kildare, Meath, and Wexford; together with small portions of the counties of Armagh and Monaghan.

No. IV. The North Midland Division is situated in the provinces of Leinster, Ulster, and Connaught, and extends southward from its junction with the "North-Western" division near Six Mile Cross, in the county of Tyrone, to Tyrrellspass, in the county of Westmeath. Virginia, in the county of Cavan, is situated on its eastern border, and Tulsk, in the county of Roscommon, on its western.

No. V. The South Midland Division, situated in the provinces of Leinster and Munster, extends from the Hill of Down, in the county of Meath, southward to Borris, in the county of Carlow. Its southern boundary may be described by a line drawn thence to New Birmingham, in the county of Tipperary, and from that point south to Fethard, in the same county, thence westward to the northern base of the Galty Mountains, and in a north-westerly direction, to Pallasgreen, in the county of Limerick. On the east it is bounded by the "Eastern" division, and on the west by the "Western" and the "South-Western" divisions.

No. VI. The Western Division.—This division extends southwards from Sligo and Killala Bays to the northern bank of the River Shannon, lying westward of Limerick; the extreme points, north and south, being Benwee Head, in the county of Mayo, and Loop Head, in the county of Clare, a distance in or about 120 miles, which, however, does not represent the extent of seaboard, the western coast being indented by numerous bays and inlets. This division has been extended much more inland than the eastern division, as from its exposure to the Atlantic Ocean, and the prevalence of westerly winds (which blow for nearly three-fourths of the year), the climate must be affected for a considerable distance inland; the Unions situated on the extreme east are Boyle, Castlereagh, Glennamaddy, Mountbellew, Ballinasloe, and Portumna.

No. VII. The South-Eastern Division.—This division extends from its junction with the "Eastern" division southward of Cahore Point, in the county of Wexford, along the eastern and southern coasts to the east of Cork Harbour, and is bounded on the north by the South Midland division. It embraces the county of Waterford; nearly the whole of the county of Wexford; parts of the counties of Carlow, Kilkenny, and Tipperary; that portion of the county of Limerick (38,550 acres) comprised in the Mitchelstown Union, and a portion of the eastern side of Cork County.

No. VIII. The South-Western Division extends along the southern and western coasts from Cork Harbour to the river Shannon, and embraces the county of Kerry, nearly the whole of the counties of Cork and Limerick, and a small portion of the county of Clare, comprised in the Limerick Union.

POPULATION OF IRELAND (including Army, Navy, and Merchant Seamen on shore and in port) *estimated* to the middle of each of the Years 1801 to 1867:—

NOTE.—This table has been constructed for the years 1801 to 1831—By adopting the rates of increase of the male and female population between 1821 and 1831, as shown by the Irish Census Reports of 1831—the first complete Census of Ireland having been taken in 1821.

1832 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; the difference between the number arrived at by this computation and the *actual* number by the Census of 1851 was divided over the intervening years in proportion to the number of recorded deaths and the number of emigrants.

1852 to 1861—The English birth and death rates, as above, were used, deducting the number of emigrants according to the returns obtained by the Registrar-General for Ireland, and apportioning the difference as explained for the last period.

1862 to 1867—The English birth and death rates, as above, were employed in the calculations for each year deducting the number of emigrants according to the returns received by the Registrar-General for Ireland.

* See note (†) page 2.

NOTE.—Wherever the minus sign (—) is prefixed to the number in the column headed "Excess of Births over Deaths," it denotes that the Births in the Superintendent Registrar's District, instead of exceeding the Deaths, were, in fact, *less than the Deaths*, to the extent stated.

* The *Registration Counties* consist of groups of Superintendent Registrars' Districts or Poor Law Unions. Whenever a District or Union extends into more than one County, it is assigned wholly to that County in which the greater portion of the population is located; hence all the *Registration* Counties differ more or less from the Counties *Proper*.

† See note (†) page 2.

* For remainder of Belfast see next page.

NOTE.—The Registrars' Districts are sub-divisions of the Unions or Superintendent Registrars' Districts, and are identical with the Dispensary Districts of the same names, except in a few instances.

The letter *W* denotes that the Registrar's District contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.

Wherever the minus sign (—) is prefixed to the numbers given in the column headed "Excess of Births over Deaths," it denotes that the births in the Registrar's District, instead of exceeding the deaths, were, in fact, *less than the deaths*, to the extent stated.

I.—NORTH-EASTERN DIVISION.—BIRTHS AND DEATHS, 1867—REGISTRARS' DISTRICTS—*continued.*

IRELAND.—SUPPLEMENTARY TABLE of the

[In the foregoing Tables all the Diseases, either having a distinct character, or fatal to any considerable number of persons, are classified under 114 heads; some of which, however, include groups of very distinct diseases,—such as are fatal to only a *few persons*, or *diseases* which are often confounded with other diseases. The rule has been to refer the distinct diseases to heads under which the cases were so numerous that the additional numbers would not interfere with the calculated proportions. Where it is desired, partial correction,

[*continued at page* 78.]

CAUSES of DEATH at different Periods of Life, in the Year 1867.

however, can now be made by means of the following Supplementary Tables, containing many of the deaths from distinct diseases, such as mumps, epistaxis, dry gangrene, polypus, rickets, bronchocele, &c., &c., and deaths from other forms of disease, such as softening of the brain (necrencephalus), which are returned in many cases under other heads, as paralysis, &c.

These Tables are an extension of the Tables of Causes of Death in Ireland, pp. 68 to 75.]

* The *Registration Counties* consist of groups of Superintendent Registrars' Districts or Poor Law Unions. Whenever a District or Union extends into more than one County, it is assigned wholly to that County in which the greater portion of the population is located; hence all the *Registration* Counties differ more or less from the Counties *Proper*.

Letter to the Registrar-General on the Causes of Death in Ireland, from William M. Burke, F.C.P.I.

Year 1867.

Sir,

I have the honour of submitting to you a few observations on the assigned causes of the deaths *registered* in Ireland during the year 1867.

The health of the people during the year 1867 was, on the whole, good. The excess of deaths (476), as compared with the year preceding, may be accounted for by improvement in the working of the Registration Act.

I. Zymotic Diseases.

The deaths from Zymotic diseases amounted to 16,066—8,028 males and 8,038 females—showing a decrease of 3,560 as compared with the year preceding. Of all the deaths registered during the year, 1 in every 5·8 was caused by diseases of this class.

Fever was the cause of 3,750 deaths—1,957 males and 1,793 females—or 1 in every 25 of the total deaths.

Scarlet fever contributed 2,145 deaths—1,117 males and 1,028 females. The number of deaths registered from this disease during the preceding year was 3,501. One in every 44 of the deaths from all causes resulted from this disease.

The mortality from whooping-cough was great; the deaths from this disease numbered 2,144—911 males and 1,233 females—or 1 in every 44 of the deaths from all causes. The deaths from whooping-cough exceeded by 408 the number registered in the year preceding. This disease was most fatal in the South-Eastern Division.

Diarrhœa proved fatal in 1,920 instances—944 males and 976 females—or 1 in every 49 of all the deaths. 912 of the persons who died from diarrhœa were under 5 years of age, and 401 were aged 65 years and upwards.

1,365 deaths—742 males and 623 females—were caused by croup, or 1 in every 68 of all the deaths registered.

Measles caused 1,292 deaths—667 males and 625 females. The number of deaths registered from this disease in 1866 was only 851.

The deaths from diphtheria have shown a remarkable decline since the year 1864, when the deaths from diphtheria amounted to 661; they numbered, 480 in 1865; 317 in 1866, and 189 in 1867—96 males and 93 females.

387 deaths were referred to cholera. Of this number, 260 were registered during the first quarter of the year, 38 during the second, 62 during the third, and 27 during the last quarter.

Metria, or puerperal fever, caused 302 deaths.

Four females died from hydrophobia.

Five deaths resulted from glanders—4 males and 1 female.

The deaths from small-pox amounted to 21, showing a decrease of 173 as compared with the year 1866.

II. Constitutional Diseases.

From diseases termed constitutional there resulted 17,540 deaths—8,616 males and 8,924 females—or 1 in every 5·3 of all the deaths.

Phthisis or pulmonary consumption, caused 10,383 deaths—5,099 males and 5,284 females—or 1 in every 9 of the total deaths.

Under the vague heading "dropsy" 1,599 deaths were returned; of these, 693 were males and 906 females.

1,659 persons—749 males and 910 females—died from cancer.

Mesenteric disease caused 1,590 deaths—the sexes being equal.

The deaths from hydrocephalus or water on the brain numbered 1,047—597 males and 450 females.

Scrofula was the cause assigned for 1,011 deaths.

III. Local Diseases.

The number of deaths attributed to local diseases amounted to 32,322—17,419 males and 14,903 females—or 1 in every 2·9 of the total deaths registered.

Diseases of the nervous system caused 9,049 deaths—4,958 males and 4,091 females. Of this number 4,228 deaths (2,334 males and 1,894 females) were ascribed to convulsions; apoplexy caused 1,022 deaths (598 males and 424 females); paralysis caused 1,626 deaths (837 males and 789 females); 728 deaths (424 males and 304 females) were caused by cephalitis, or inflammation of the brain; 882 deaths were ascribed to brain disease unspecified.

3,324 deaths—1,810 males and 1,514 females—were caused by diseases of the organs of circulation; of these, 65 (35 males and 30 females) were caused by pericarditis or inflammation of the heart's covering; aneurism killed 94 persons—74 males and 20 females; to heart disease unspecified 3,165 deaths (1,701 males and 1,464 females) were referred.

Diseases of the respiratory organs, exclusive of phthisis, caused 13,703 deaths—6,996 males and 6,707 females. Bronchitis caused 10,067 deaths—4,929 males and 5,138 females; 1,677 deaths (1,025 males and 652 females) resulted from pneumonia or inflammation of the lungs; 727 deaths were attributed to asthma; 383 to pleurisy; 85 to laryngitis, and 764 to lung disease unspecified.

Diseases of the digestive organs produced 4,613 deaths—2,585 males, and 2,028 females. Of this number, inflammation of the bowels was the cause of 599 deaths—347 males and 252 females; peritonitis proved fatal in 280 instances—136 males and 144 females; 200 deaths are stated to have been caused by gastritis or inflammation of the stomach; ileus, under which heading are included obstruction of the bowels, constipation, &c., was the cause of 419 deaths—261 males and 158 females; to stomach disease unspecified 1,051 deaths were referred. Inflammation of the liver is the cause assigned for 242 deaths; jaundice 150; and liver disease unspecified 992.

Diseases of the urinary organs caused 1,061 deaths—822 males and 239 females. Of these, nephria or Bright's disease contributed 183 deaths; inflammation of the kidneys 42; stone in the bladder 25; inflammation of the bladder 56; diabetes 105; and kidney disease unspecified 596.

From diseases of the organs of generation there resulted 148 deaths.

210 deaths were ascribed to diseases of the organs of locomotion—the sexes being 124 males and 86 females.

To diseases of the integumentary system 214 deaths were ascribed, viz., 4 to phlegmon; 91 to ulcer; and 119 to skin disease unspecified.

IV. Developmental Diseases.

The deaths resulting from diseases connected with the growth and decay of the human frame amounted to 21,941—9,560 males, 12,381 females—or 1 in every 4·3 of all the deaths registered. Of the forementioned deaths, 217 were referred to premature birth; 10 to cyanosis—of the persons whose deaths were attributed to this malformation, 9 were under 5 years of age, and 1 was aged between 10 and 15 years. Spina bifida caused 21 deaths; 17 deaths were returned under the head of "other malformations;" and 360 infants are stated to have died from teething.

620 women died in childbirth; if we add to the deaths from childbirth the number of deaths from metria or puerperal fever (302) it will be found that the total deaths resulting from the births registered during the year will amount to 922. For every 157 children born 1 mother died.

16,606 deaths were tabulated under the head of old age. Of these, 7,116 were males and 9,490 females.

To atrophy and debility 4,064 deaths were referred—2,096 males and 1,968 females.

V. Violent Deaths.

The number of deaths resulting from violent causes amounted to 2,177—1,485 males and 692 females—or 1 in every 43 of all the deaths registered. Four deaths in every 10,000 of the estimated population were caused by violence.

Of the deaths from violence, 1,887 were accidental, viz., 652 from fractures and contusions; 13 from gunshot wounds; 23 from cuts or stabs; 499 from burns or scalds—234 males and 265 females; 21 from poisoning; 454 from drowning—366 males and 88 females; 94 from suffocation—67 males and 27 females. Thirty of the persons whose deaths were caused by suffocation had not attained the age of 12 months. In 131 instances the nature of the accident which caused death was not stated.

151 deaths from homicide were registered; of these, 112 were cases of infanticide.

83 persons—59 males and 24 females—committed suicide, or 15 out of every 1,000,000 of the estimated population died by their own hands.

Of the men who committed self-destruction the means resorted to were as follows:—7 from gunshot wounds; 13 from cut or stab; 2 from poison; 10 from drowning, and 21 from hanging. Of the female suicides, the act was committed in 6 instances by cut or stab; 3 by poison; 9 by drowning, and 4 by hanging.

In 8 instances the means of self-destruction was not stated in the returns—6 men and 2 women.

In 56 instances of violent deaths it was not stated in the returns whether the death was accidental, suicidal, or homicidal, and consequently these deaths could not be classed in the tables.

In 442 cases of sudden death the cause was not ascertained.

The cause of death was unspecified or ill-defined in 3,015 instances, or 1 in 31 of the total deaths, showing a still further improvement in the returns, as in the year preceding the number of ill-defined or unspecified cases was in the proportion of 1 in 27 of the total deaths registered.

I have the honour to be,
Sir,
Your obedient servant,
W. M. BURKE.

To
The Registrar-General.

COPY of CIRCULAR relating to REGISTRATION of MARRIAGES celebrated by the ROMAN CATHOLIC CLERGY, 26 and 27 Vic., cap. 90.

General Register Office, Dublin,
31*st December*, 1863.

SIR,

I request you will furnish each Parish Priest within your District—who may apply to you for the same—with *six blank* Forms of Certificates of Marriage, which you will carefully take from the Certificate Book forwarded to you, and also with *six* of the printed Envelopes, addressed to "The Registrar of Births, Deaths, and Marriages."

By this course—which has been strongly recommended to me by many Dignitaries of the Roman Catholic Church, and approved of by the Law Officers of the Crown—the convenience of the Catholic Population, especially those of the poorer classes, will be greatly promoted in regard to the Registration of their Marriages.

A *further supply* of Certificates *will be forwarded on your application*—from which *blank Forms* will be furnished by you, from time to time, to those Parish Priests within your District who may require them. You will request each Rev. Gentleman obtaining the Certificates, to give you a receipt for them (on the accompanying Forms), in order that you may be able to account to me for all the Certificates intrusted to your care; and you will furnish me, at the end of each month, with the Names and Addresses of those Clergymen to whom you supply them. You will observe they are on *Water-marked* paper, with the words "Certificate of Marriage" printed thereon.

I beg to say that I feel assured you will discharge the duties of your office with zeal, discretion, and courtesy, and thus largely contribute to the success of the very Important Measures, in the carrying out of which you have so readily undertaken to assist by accepting the office of Registrar.

I am, Sir,
Your obedient Servant,
WILLIAM DONNELLY,
Registrar-General.

To the
Registrar of Births, Deaths, and Marriages,
District of———

* Thus, the number of Marriages in the Abbeyleix Superintendent Registrar's District may at once be ascertained by referring in the "*Abstract of Marriages*" to the Superintendent Registrar's District, numbered 75 (*see* page 4), and in like manner the number of Births and Deaths, of Deaths at different ages, &c., will be found by referring to the same Superintendent Registrar's District Number in the appropriate Tables.

INDEX OF REGISTRARS' DISTRICTS.

[The Number against each Registrar's District in the Third Column refers to the order in which it appears in the Arrangement of the Districts in the Tables of Abstracts; thus Abbey (120 : 4) is the 4th Registrar's District of the Tuam Superintendent Registrar's District, No. 120.]

REPORT

TO

His Excellency JOHN POYNTZ, EARL SPENCER, K.G., &c., &c.,

Lord Lieutenant-General and General Governor of Ireland.

MAY IT PLEASE YOUR EXCELLENCY,—

As directed by the provisions of the 26 Vic., cap. 11, sec. 49, the 26 & 27 Vic., cap. 90, sec. 16, and the 7 & 8 Vic., cap. 81, sec. 56, I have the honour to transmit to your Excellency, in order that the same may be laid before Parliament, General Abstracts of the Births, Deaths, and Marriages registered in Ireland during the year 1868.

A General Abstract of the number of Births, Deaths, and Marriages, registered in the year 1868, was presented to Parliament in the Session of 1869. The Report now submitted contains detailed Tables of the ages and condition of persons married; of Births, distinguishing legitimate from illegitimate; and of Deaths, and their causes.

The Acts for the Registration of Births and Deaths, and Roman Catholic Marriages, came into operation on the 1st of January, 1864, but that for the Registration of Protestant Marriages of all denominations has been in force since the 1st of April, 1845.

For the purposes of Registration, the country has been divided into 163 Superintendent Registrars' Districts—co-extensive with the Poor Law Unions—and into 779 Registrars' Districts, which, with a few exceptions, are of equal extent with the Dispensary Districts formed under the Medical Charities Act.

GENERAL SUMMARY.

The *estimated* population of Ireland in the middle of 1868 was 5,543,285; the persons whose marriages were registered, amounted to 55,398, the number of marriages being 27,699; children born alive whose births were registered, amounted to 146,051; and the number of deaths registered was 86,185. The emigrants from Ireland during the year 1868 amounted to 61,018. In the previous year—1867—there were *registered* 29,742 marriages, 144,388 births, and 93,503 deaths; the number of emigrants was 80,624.

MARRIAGES.

27,699 marriages were registered in Ireland during 1868, being in the proportion of 1 marriage to every 200 of the *estimated* population. The ratio in England in the same year was 1 in 122.

667 men and 3,808 women contracted marriage before they had attained their twenty-first year. The proportion of males married under age was 2·41; of females, 13·75 per cent. The proportions in England and Wales in 1868 were—males, 7·15, and females, 21·05 per cent.

Of widowers, 2,855, and of widows, 1,563 were re-married; the proportion to the total marriages being 10·31 per cent. of widowers, and 5·64

per cent. of widows. The like proportions in England and Wales were 14.05 per cent. widowers, and 9·39 per cent. widows.

According to the provisions of the Registration Acts, every registry of a marriage is required to be signed by the parties married, two witnesses, and the officiating clergyman. A test of the elementary education of the persons contracting marriage is thus afforded by comparing the number who write their names in the registers, with the number who make a mark. Of 55,398 persons married in 1868, 22,905 (10,011 men and 12,894 women) signed the registers with marks; being in the proportion of 41·35 per cent.—36·1 per cent. of the males, and 46·6 per cent. of the females married.

The corresponding rates in England and Wales for the same year were 20·1 per cent. of males, and 27·8 per cent. of females.

The marriage registers contain a column in which the age of each of the parties married is inserted; but as the law only requires it to be stated whether the parties are "of full age" or "minors," the precise age at marriage is not always entered in the registers. In 1868 the exact ages of both parties were given in 10,821 instances. Of these 9,816 were bachelors, and 10,267 spinsters; 1,005 were widowers, and 554 widows. The largest number of wives married between the ages of 21 and 30—the number being 6,866, or more than one-half of the whole number whose ages are recorded. The largest number of husbands—6,524—also married between 21 and 30 years of age.

292 bachelors were married to widows, both of whose ages at the time of marriage are recorded. 157 of these widows and 137 of the bachelors married between 25 and 35 years of age. Of 743 widowers who married spinsters, 393 of the latter were between 20 and 30 years of age; whilst the largest number of the widowers on their re-marriages ranged chiefly between 30 and 40.

Of widowers and widows married, whose ages at the time of marriage are stated, there were 262 couples. Of these the largest number of widows appears to have been between 35 and 45, and of widowers between 50 and 60. 8 widowers and 1 widow were married when they were above 70 years old.

With respect to Roman Catholic Marriages, the 26 & 27 Vic., cap. 90, directs that parties about to contract marriage shall produce to the clergyman celebrating the marriage a certificate, to be procured from the Registrar, filled up as far as possible by that officer with the particulars necessary to be registered, which certificate the parties married, the witnesses, and the officiating clergyman are required to sign. When so filled up the certificate is to be returned within three days to the Registrar by the husband, under a penalty of ten pounds.

With a view to facilitate the registration of marriages under the Act referred to, and at the special request of several dignitaries of the Roman Catholic Church,—with the approval of the Law Officers of the Crown—(who at that time were the Right Hon. Thomas O'Hagan, M.P., and James A. Lawson, esq., Q.C.)—I instructed the District Registrars to furnish to each parish priest, who should apply for them, forms of certificate to be duly filled, signed, and forwarded to the Registrar on the occasion of a marriage, thus saving the husband the inconvenience of procuring from the Registrar a form of certificate *previous* to his marriage, as required by the Statute.* I also furnished all the Roman

* For copy of Circular issued on this subject, see page 98.

Catholic clergy in Ireland with copies of the Act above referred to, in order that the requirements of the law might be known to them previous to the Act coming into operation.

The proportions per cent. of marriages to the estimated population, and of persons married who wrote their names in the registers; also of minors, widowers, and widows, are given in the following table, for the several registration divisions:—

TABLE I.—*The Proportional Number of Marriages in the Eight Divisions of Ireland during the years* 1864, 1865, 1866, 1867, *and* 1868, *of Persons who Signed their Names, of Persons not of Full Age, and of Re-marriages.*

The extent and position of each of these divisions are specified at page xxxvi.

Of the total number of marriages registered (27,699) 19,521 were celebrated by Roman Catholic clergymen, and entered in the register books by the Registrars in accordance with the 26th and 27th Vic., cap. 90; and 8,178 marriages were of members of the various Protestant persuasions. Of the latter marriages 4,678 were in churches and chapels of the Established Church, 2,457 in Presbyterian Meeting-houses, 243 in "Registered Buildings," 780 in the Registrars' offices, 18 according to the usages of the Society of Friends, and 2 marriages were of members of the Jewish persuasion.

Of the entire number of marriages in 1868 there were contracted in the quarter ending the last day of March, 11,580; of June, 5,134; of September, 5,053; of December, 5,932.

The following table gives a statement showing in continuation of the return in my report for 1867, the number of marriages solemnized in Ireland under the Marriages Act of 1844, distinguishing the mode of celebration:—

TABLE II.—*The Number of Marriages registered under 7 & 8 Vic., c. 81, in each Year, from 1st April, 1845, to 31st December, 1868, and the Mode in which the Marriages were solemnized.*

Years ended 31st December	Marriages. According to the Rites of the Established Church.						Not according to the Rites of the Established Church.						Total Marriages.
	Special Licence.	Licence.	Banns.	Registrar's Certificate.	Not stated by which of the foregoing Forms.	Total.	In Registered Presbyterian Meeting-houses.	In Registered Buildings.	In the Registrars' Offices.	Society of Friends.	Jews.	Total.

There is not any return made to me of the places of worship belonging to Roman Catholics, in which marriages are celebrated; but under the

* The 7 & 8 Vic., c. 81, came into operation 1st April, 1845.

provisions of the 7th & 8th Vic., cap. 81, I am enabled to state respecting other religious persuasions, that there were 1,475 Churches and Chapels of the Established Church, 580 registered Presbyterian Meeting-houses, and 225 Registered Buildings belonging to various denominations, in which marriages might lawfully be solemnized, on the 31st December, 1868. During the year 1868 there was an increase of 4 in the number of such places in the Established Church; and of 16 in other religious communities. The "Registered Buildings" belong to the following denominations:—

Denominations.	No. of Places of Worship.	Denominations.	No. of Places of Worship.
Wesleyan Methodists,	125	Methodists New Connexion,	6
Reformed Presbyterians,	34	Church Methodists,	1
Independents,	21	Covenanters,	1
Baptists,	14	Evangelical Union,	1
Seceders,	11		
United Presbyterians,	6	Total,	225
Moravians or United Brethren,	5		

The following Table shows by Divisions and Registrars' Districts the number of places of worship in which marriages (under the 7 & 8 Vic., cap. 81), may be solemnized in each District or Union, distinguishing the religious denominations:—

During the year 1868 there were issued by the Registrars, 713 Licences for Marriage in Registered Buildings and in the Registrars' offices.

The number of Marriage Licences issued by the licensing Ministers of the several Presbyterian bodies is given in the following summary:—

Presbytery or Synod.	Number of Licensing Ministers on 31st December, 1868.	Number of Registered Meeting-houses on 31st December, 1868.	Number of Licences issued.
1. General Assembly of the Presbyterian Church in Ireland,	118	540	2,350
2. Remonstrant Synod of Ulster,	8	21	41
3. Presbytery of Antrim,	4	10	23
4. United Presbytery or Synod of Munster,	4	4	—
5. Northern Presbytery of Antrim,	1	5	17
Total,	135	580	2,431

BIRTHS.

The births registered in Ireland during 1868, amounted to 146,051. Of these, 75,172 were males, and 70,879 females, being in the proportion of 106·1 boys to every 100 girls. In England, in the same year, the number of males to 100 females whose births were registered was 103·6.

The rate per cent. of births to the *estimated* population was 2·635, or 1 in 38 of the estimated population. In England the rate per cent. was 3·635.

There were 4,568 illegitimate births, of which 2,299 were those of males, and 2,269 females; the proportion to the total number of births being 3·1 in every 100. The rate in England was 5·9 per cent. The highest rates, 5·5 and 4·1, of illegitimate children in every 100 born, occurred in the North-Eastern and South-Eastern Divisions respectively.

The following table shows the proportion of legitimate and illegitimate births *registered* in each of the eight Divisions in 1864, 1865, 1866, 1867, and 1868.

TABLE IV.—*The Per-centage of Legitimate and Illegitimate Births registered in Ireland during the years* 1865, 1866, 1867, *and* 1868, *by Divisions.*

Divisions.	Proportion per cent. of Legitimate Births.				Proportion per cent. of Illegitimate Births.			
	1865.	1866.	1867.	1868.	1865.	1866.	1867.	1868.
IRELAND, ...	96·3	96·7	96·7	96·9	3·7	3·3	3·3	3·1
North-Eastern, ...	93·6	94·3	94·3	94·5	6·4	5·7	5·7	5·5

South-Western, ...	97·5	97·7	98·0	97·9	2·5	2·3	2·0	2·1

38,277 births were registered during the quarter ended 31st March; 40,431 in that ended 30th June; 34,310 during that ended 30th September; and 33,033 in that ended 31st December.

DEATHS.

The deaths registered in 1868 amounted to 86,185—43,359 males, and 42,826 females—being in the proportion of 1·555 per cent. of the *estimated* population, or in the ratio of 1 *registered* death to every 64 persons. The proportion in England for the same year was 2·220 per cent., or 1 in 45.

The following table shows the per-centage of mortality at different ages:—

TABLE V.—*The Mortality per Cent. at each Age-period, according to the Registration of Deaths in Ireland, during the Years* 1864, 1865, 1866, 1867, *and* 1868, *by Sexes.*

	1868	28·16	4·05	2·32	6·73	6·61	5·68	7·22	11·22	13·44	10·44	3·47	·66

Of the persons whose deaths were registered during the year 28·16 in every 100 were children under 5 years old—29·86 per cent. of the males and 26·45 per cent. of the females. 13·76 per cent. of the men, and 15·40 per cent. of the women, whose deaths were registered had passed their 75th year. 58 of the males and 76 of the females in every 10,000 were stated in the returns to have been over 95 years of age.

EMIGRATION.

During the year 1868 the number of emigrants who left the ports of Ireland amounted to 61,018; of these 35,412 were males and 25,606 females. Of the whole number, 10,154 were from Leinster; 16,857 from Munster; 14,763 from Ulster; and 9,692 from Connaught: 9,552 persons did not state the county or province to which they belonged.

Of the emigrants in 1868, 11·7 per cent. were under 15 years of age; 77·5 per cent. were 15 to 35 years old; 9·8 per cent. were 35 and upwards; and the ages of 1·0 per cent. were not specified in the returns.

METEOROLOGY.

The following is an abstract of the meteorological observations taken during the year 1868, at the Ordnance Survey Office, Phœnix Park, Dublin.

The barometer was highest during the year at 9.30 P.M., on 11th February, when it stood at 30·865 inches, the air being calm; it was lowest on 27th December, at 9.30 A.M., with the wind at S.W., when it was 28·735 inches.

The highest temperature in the air was 88·4°, on 21st July, and the lowest was 22·6°, on 3rd January.

Rain or snow fell on 183 days. The greatest rain-fall in 24 hours was 1·334 inches, on 25th September, wind N.E. The total amount registered was 24·095 inches.

The prevailing wind was S.W., from which point it blew on 124 days; it was from W. on 68 days; from S.E. on 41 days; from N.W. on 29 days; from N.E. and E. on 24 days each; from S. on 21 days; and from N. on 14 days, at 9.30 A.M. On 21 days the air was calm at that hour. The total pressure of S.W. wind was 535 lbs. per square foot, being an average of 4·31 lbs. for each day it blew. The strongest wind blew from S.W. on 10th December, when the pressure was 25 lbs. per square foot.

I beg here to repeat the observations made in my former Reports to your Excellency, with respect to the working of the Acts for the Registration of Births, Deaths, and Marriages in Ireland, as I regret to state that the numbers of these events registered in 1868 do not show any improvement compared with previous years:—

"In several instances prosecutions have been resorted to with some advantage; but notwithstanding the exertions made to induce a general compliance with the law throughout the country, numerous cases of neglect to register births and deaths have been reported to me by the District Registrars, but frequently at too late a period after their occurrence to allow of the parties being proceeded against at the Petty Sessions.

"I regret to add that the registration of marriages under the 26th & 27th Vic., cap. 90, is not at all satisfactory in some Districts, owing to the Clergy who have celebrated the marriages having declined to sign the necessary certificates.

"The marriages solemnized under the provisions of the 7th & 8th Vic., cap. 81, which came into operation in 1845, are, I believe, all registered.

"The following are the ratios of Births, Deaths, and Marriages to population in different countries compared with the ratio in Ireland in 1864 [and in 1865, 1866, 1867, and 1868]:—

Countries.	Ratio to Population. Births.	Deaths.	Marriages.
IRELAND [in 1864],	1 in 42	1 in 61	1 in 207
IRELAND [in 1865],	1 „ 39	1 „ 61	1 „ 183
IRELAND [in 1866],	1 „ 38	1 „ 60	1 „ 185
IRELAND [in 1867],	1 „ 38	1 „ 59	1 „ 187
IRELAND [in 1868],	1 „ 38	1 „ 64	1 „ 200
England,	1 „ 28	1 „ 42	1 „ 116
Scotland,	1 „ 28	1 „ 42	1 „ 137
Sweden,	1 „ 30	1 „ 54	1 „ 145
Prussia (Old Provinces),	1 „ 24	1 „ 38	1 „ 116
Hanover,	1 „ 30	1 „ 44	1 „ 124
Wurtemburg,	„ 23	1 „ 31	1 „ —
Hanse Towns: Bremen,	1 „ 28	1 „ 37	1 „ 105
Holland,	1 „ 30	1 „ 42	1 „ 127
France,	1 „ 38	1 „ 44	1 „ 127
Spain,	1 „ 26	1 „ 32	1 „ 127
Austria (exclusive of Hungary),	1 „ 25	1 „ 31	1 „ 121

"It will be seen from the foregoing figures, compiled from the Statistical Tables published by the Board of Trade, how incomplete was Registration in Ireland in 1864, and comparing the number of Births, Deaths, and Marriages recorded in that year with those since annually registered, I regret to state that there appears but little improvement in the subsequent years:—

		1864.	1865.	1866.	1867.	1868.
Registered	Births, . .	136,414	144,970	146,090	144,388	146,051
	Deaths, . .	93,144	93,154	93,027	93,503	86,185
	Marriages, . .	27,406	30,802	30,121	29,742	27,699."

Following this Report are summaries of the Quarterly Reports issued in 1868, and the Appendix contains a letter addressed to me by Dr. Burke, the Superintendent of Medical Statistics, respecting the causes of death—to which I beg to refer.

I have the honour to be
Your Excellency's
Very faithful servant,

WILLIAM DONNELLY,
Registrar-General.

GENERAL REGISTER OFFICE,
Dublin, January 5th, 1871.

Quarterly Reports

First Quarter.

SUMMARY OF THE QUARTERLY REPORTS, 1868.

First Quarter—January, February, March.

Marriages.—There were 11,580 marriages *registered* in Ireland during the first quarter of 1868, affording an annual ratio of 1 in every 120, or ·836 per cent. of the *estimated* population. Of this number 9,575 were between Roman Catholics, representing a ratio of 1 marriage in every 112, or ·889 per cent. of Roman Catholics, and 2,005 were between Protestants, affording a ratio of 1 in every 154, or ·651 per cent. of the Protestant population. The average number of marriages *registered* in the corresponding quarter of the preceding three years was 12,376.

Births.—The births registered during the first quarter of the year 1868 amounted to 38,277—19,826 boys and 18,451 girls—affording an annual ratio of 1 in every 36·2, or 2·76 per cent. of the *estimated* population. The average number of births registered during the corresponding quarter of the previous four years was 36,534.

Deaths.—There were 25,024 deaths—12,537 males, and 12,487 females—*registered* during the quarter, affording an annual ratio of 1 in 55·4, or 1·81 per cent. of the *estimated* population. The average number *registered* during the first quarter of the preceding four years was 28,832.

Emigration.—According to the returns obtained by the Enumerators, the number of emigrants who left the ports of Ireland, during the quarter ended 31st March, 1868, amounted to 12,527—7,977 males and 4,550 females. The average number of emigrants during the first quarter of the previous four years was 20,829.

Estimated Increase of the Population.—The number of births *registered* during the quarter ended 31st March, 1868, being 38,277; the deaths 25,024; and the number of emigrants 12,527 (according to the returns obtained by the enumerators at the several seaports);—an increase of 726 would, therefore, appear to have taken place in the population of Ireland during that period.

PRICES OF PROVISIONS, AND PAUPERISM.

The price of Messrs. Manders and Co.'s 4-lb. loaf during each week of the quarter, ending 31st March, 1868, was 9*d.*, being one penny higher than the average price for the corresponding quarter of 1867.

The average price of oatmeal for the quarter was 16*s.* 10*d.*, against 16*s.* 1*d.* for the first quarter of 1867.

Potatoes ranged in price during the quarter from 3*s.* to 5*s.* 6*d.* per cwt., the average prices being 4*s.* 6*d.* to 5*s.* 2*d.*; for the corresponding quarter of 1867 the average prices were 4*s.* 5*d.* to 5*s.* 7*d.* per cwt.

The average price of beef at the Dublin Cattle Market, during the quarter, was 49*s.* 6*d.* per cwt. for inferior, and 63*s.* 6*d.* for superior quality; the average prices for the first quarter of 1867 were 53*s.* and 70*s.* respectively.

The following statement shows the average prices of the foregoing articles of food in Dublin *during the first quarter* of the years 1864–8:—

Years.	Bread (Messrs. Manders & Co.'s 4 lb. loaf).	Oatmeal (Corn Exchange), per cwt.	Potatoes (at Potato Market), per cwt.	Beef, (at Dublin Cattle Market), per cwt.
	d.	*s.* *d.*	*s.* *d.* to *s.* *d.*	*s.* *d.* to *s.* *d.*
1864 (1st quarter),	6	11 0	2 6 to 3 3	51 6 to 64 6
1865 ,,	5½	11 9	3 1 to 3 7	54 6 to 68 0
1866 ,,	6¼	14 10	2 6 to 3 6	50 6 to 63 6
1867 ,,	8	16 1	4 5 to 5 7	53 0 to 70 0
1868 ,,	9	16 10	4 6 to 5 2	49 6 to 63 6

The average number of persons in Ireland receiving in-door relief on Saturdays during the first quarter of the year 1868 was 61,264, against 58,503 for the corresponding period of 1867.

Quarterly Reports.

First Quarter.

The average weekly number of persons receiving out-door relief during the quarter was 18,159, against 16,489 in the first quarter of 1867.

Of the persons receiving indoor relief during the first quarter of 1868 an average number of 474 in each week were located in Asylums for the Blind and the Deaf and Dumb, and in Extern Hospitals; in the corresponding quarter of 1867 the average weekly number was 429.

THE WEATHER.

The mean height of the barometer during the first quarter of the year 1868 was 29·901 inches (in the corresponding quarter of 1867, 1866, 1865, and 1864 it was 29·642 inches, 29·521 inches, 29·651 inches, and 29·725 inches respectively); the highest reading (30·682) was on the 11th February, at 9.30 P.M., the air being calm, and the lowest (28·642) was on the 18th January, at 9.30 A.M., wind S.W.

The mean temperature of the air during the quarter was 44·1° (it was 39·9°, 41·5°, 38·9°, and 40·2°, respectively, in the corresponding quarters of 1867, 1866, 1865, and 1864); the maximum temperature (62·1°) was on the 30th March, and the minimum (22·6°) was on the 3rd January.

Rain or snow fell on 44 days during the quarter. The rain-fall measured 5·878 inches; in the first quarter of 1867, 1866, 1865, and 1864 it was 8·188 inches, 7·508 inches, 5·979 inches, and 5·227 inches respectively. The greatest monthly rain-fall during the quarter was in January, when 2·810 inches were registered.

As usual there was a prevalence of westerly winds, the wind having blown from the west (at 9·30 A.M.) on 30 days; from S.W. on 37, and from N.W. on 6. On 5 days it blew from N.E., on 4 from S.E., on 3 from E., and on 1 from S. The air was calm on 6 days at 9.30, A.M.

HEALTH OF THE PEOPLE.

The genial weather which prevailed during the first three months of the year 1868 notably influenced the public health.

The mean temperature during the quarter was 44·1°, and the number of deaths registered was 25,024. During the corresponding period of 1867 the mean temperature was 39·9°, and the number of deaths registered 30,411, so that an increase in the temperature of 4·2° caused a decrease of 5,387 in the number of deaths.

Whooping-cough, scarlatina, and measles were the prevailing epidemics. Many deaths resulted from croup.

The Registrar of the Dunmore District, Tuam Union, stated "there was one death caused by small-pox, which at the beginning of the quarter was rather prevalent, but it has disappeared; the child *had not been vaccinated.*"

The Registrar of the Hollymount District, in the Union of Ballinrobe, made the following remarks:—"Small-pox still existing, but on the decline. Legal proceedings have been instituted against a person accused of inoculating; but prosecution and conviction is very difficult, owing to the imperfection of the Act in only making the inoculator liable, and not also those aiding and abetting, as the parents in case of children, and adults submitting themselves to the operation."

Four children in the Brideswell District, Athlone Union, who had been previously vaccinated, were attacked with small-pox, all recovered, and "there was no trace of any pitting."

The deaths of many aged persons were registered during the quarter. In the Registrar's District of Raferagh, Carrickmacross Union, the death of a man aged 90 from typhus fever was registered. A man died in the Stradone District, Cavan Union, who was stated to have attained the advanced age of 103 years; a person died in the Registrar's District of Kildare, Naas Union, stated to have been upwards of 100 years old; in Abbeyleix District another died aged 105 years; in the District

Quarterly Reports. — First Quarter.

of Moira, Lurgan Union, the death of a woman is recorded whose age was 103 years, and whose death was "incidentally brought on by a fall;" and a woman, whose death was registered in the Donaghmoyne District, Carrickmacross Union, was stated to have reached the age of 102 years.

The Registrar of the Parsonstown District stated that "one case of the so-called 'black death' occurred here this quarter, and 2 rather like it in some of the symptoms; all were so sudden as to demand inquests, and all occurred in the same street. The boy who died with most of the given symptoms was employed the day before stirring up very foul manure."

In the Drumconrath District, Ardee Union, one death was caused by measles of the type called rubeola nigra. The Registrar stated "six deaths occurred from scarlatina, the symptoms resembled more those of the recently described 'spinal fever,' or 'purpura maligna,' than the symptoms of any epidemic of scarlatina which I witnessed." The Registrar of Dundalk District stated that there was one death from what appeared to him to be the disease termed "black death," having had the characteristic nervous disturbance, with dark spots on the skin, terminating fatally in 36 hours in a young man aged 24 years. The Registrar of the Edenderry District stated that one case of purpura maligna proved fatal in 17 hours. Two other cases of the same disease occurred during the quarter, and recovered.

The Registrar of the Gortin District remarked:—"Typhoid fever has been prevailing to some extent, no doubt caused in a great measure by the too prevalent habit of allowing the manure heap to accumulate before the door; and in wet seasons, like the one we have just passed through, every species of dissolving filth soaks through the walls and mud floors, making us wonder how it is possible for humanity to breathe the poisoned atmosphere and escape unhurt."

NUMBER OF MARRIAGES, BIRTHS, AND DEATHS, REGISTERED IN EACH OF THE EIGHT DIVISIONS

Into which Ireland has been divided for Statistical purposes.

Marriages.—The South-Western Division had the greatest number of marriages registered in proportion to its population during the first quarter of 1868, the annual ratio afforded being 1 in 77. The Western Division ranked second, with a ratio of 1 in 85. The Eastern and North-Eastern Divisions had the lowest ratios, the number of marriages registered in the former being only equal to an annual ratio of 1 in 163, and in the latter to 1 in 169.

The order of the EIGHT DIVISIONS *as regards the annual Rate represented by the number of Marriages registered during the* FIRST *quarter of the years* 1866, 1867, *and* 1868, *is shown in the following Statement:—*

Quarter ending 31st March,

1866.		1867.		1868.	
Divisions.	*Ratio.*	*Divisions.*	*Ratio.*	*Divisions.*	*Ratio.*
1. South-Western,	1 in 77	Western,	1 in 73	South-Western,	1 in 77
2. Western,	„ 81	South-Western,	„ 75	Western,	„ 85
3. South-Eastern,	„ 117	South-Eastern,	„ 101	South-Eastern,	„ 105

5. North-Eastern,	„ 147	South Midland,	„ 122	North-Western,	„ 144
6. North Midland,	„ 155	North Midland,	„ 133	North Midland,	„ 163
7. South Midland,	„ 157	North-Eastern,	„ 152	Eastern,	„ 163
8. Eastern,	„ 165	Eastern,	„ 161	North-Eastern,	„ 169

Births.—The South-Western and North-Eastern Divisions had the highest birth-rate during the quarter ending 31st March, 1868, the annual ratio afforded being 1 in 32. The former Division afforded the highest birth-rate in the corresponding quarter of each of the years during which the Registration Act has been in force,

save in the year 1867, when it ranked second. The South Midland Division, which ranked third for the first quarter of 1864, had the lowest birth-rate in the corresponding quarter of the four succeeding years. *Quarterly Reports.* First Quarter.

The numerical order of the EIGHT DIVISIONS *as regards the annual Rate represented by the number of Births registered during the* FIRST *quarter of* 1866, 1867, *and* 1868, *is shown in the following Statement:—*

Quarter ending 31st March,

1866.		1867.		1868.	
Divisions.	*Ratio.*	*Divisions.*	*Ratio.*	*Divisions.*	*Ratio.*
1 South-Western,	1 in 30	North-Eastern,	1 in 33	South-Western,	1 in 32

6. North-Western,	„ 37	South-Eastern,	„ 40	North-Western,	„ 40
7. North Midland,	„ 39	North Midland,	„ 41	North Midland,	„ 42
8. South Midland,	„ 41	South Midland,	„ 44	South Midland,	„ 42

Deaths.—The Eastern Division, as usual, had the highest death-rate. The North-Eastern ranked second, and the South-Eastern third. The North-Western and Western had the lowest death-rate during the quarter, the annual ratio afforded by the number of deaths *registered* being, respectively, 1 in 68 and 1 in 71 of the estimated population.

The following statement shows the EIGHT DIVISIONS *arranged according to the annual Rate of Mortality afforded by the number of Deaths registered during the* FIRST *quarter of* 1866, 1867, *and* 1868:—

Quarter ending 31st March,

1866.		1867.		1868.

PROVINCES.

Marriages.—Grouping the Unions or Superintendent Registrars' Districts by Provinces, it will be observed from the following table that there were 4,340 marriages registered in the province of Munster during the first quarter of 1868, affording an annual ratio of 1 marriage in every 84 of the population; and in Connaught 2,411, affording a ratio of 1 in 90; whereas in Ulster the ratio was only 1 in 169; and in Leinster, 1 in 162. As has been remarked in former reports, the first quarter of the year is much the most favoured by the Roman Catholic population for marriage; this fact accounts for the great difference between the marriage-rates in Connaught and Munster, and those in Ulster and Leinster.

Quarterly Reports.

First Quarter.

The following Table shows, by PROVINCES, *the number of Marriages registered during the* FIRST *quarter of the years* 1866, 1867, *and* 1868; *together with the annual ratio to the estimated Population.*

REGISTRATION PROVINCES.	MARRIAGES. Quarter ending 31st March,

TOTAL, . . .	11,992	1 in 116	12,828	1 in 108	11,580	1 in 120

Births.—Of the 38,277 births registered in Ireland during the first quarter of 1868, 8,304 occurred in Leinster, affording a ratio of only 1 in 41 of the estimated population. In Munster the number *registered* was 10,863; in Ulster, 13,131; and in Connaught, 5,979, affording respectively an annual ratio of 1 in 34, 35, and 36 of the estimated population.

The following Table shows, by PROVINCES, *the number of Births and Deaths registered during the* FIRST *quarter of the years* 1866, 1867, *and* 1868, *together with the ratio to the estimated Population.*

REGISTRATION PROVINCES.	BIRTHS. Quarter ending 31st March,						DEATHS. Quarter ending 31st March,					
	1866.		1867.		1868.		1866.		1867.		1868.	
	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.

Deaths.—Whilst the births *registered* in the province of Leinster, during the quarter ending 31st March, 1868, afforded the *lowest* ratio, the deaths *registered* give the *highest* rate of mortality, the number being 7,207, equal to an annual ratio of 1 in 47. In Munster the number *registered* was 6,357, yielding a ratio of 1 in 57; in Ulster, 8,320, or 1 in 55; and in Connaught, 3,140, or 1 in 69 of the estimated population.

Second Quarter.

Second Quarter.—April, May, June.

Marriages.—The number of marriages *registered* in Ireland during the second quarter of 1868 amounted to 5,134, equal to an annual ratio of 1 in every 270, or ·370 per cent. of the *estimated* population. The average number *registered* in the corresponding period of the preceding four years was 5,729.

Quarterly Reports.

Second Quarter.

Of the 5,134 marriages *registered* during the second quarter of 1868, 3,191 were between Roman Catholics, representing an annual ratio of 1 marriage in every 337, or ·296 per cent. of the Roman Catholic population; and the remaining 1,943 marriages were between Protestants, being equal to an annual ratio of 1 in every 159, or ·630 per cent. of the Protestant population.

Births.—The births *registered* during the second quarter of 1868 amounted to 40,431—20,679 boys, and 19,752 girls—affording an annual ratio of 1 in every 34·3, or 2·92 per cent. of the *estimated* population. The average number of births registered during the corresponding quarter of the preceding four years was 39,168.

Deaths.—There were 22,307 deaths—11,236 males, and 11,071 females—*registered* during the quarter, affording an annual ratio of 1 in 62·1, or 1·61 per cent. of the *estimated* population. The average number *registered* during the second quarter of the previous four years was 24,287.

Emigration.—According to the returns obtained by the Enumerators, the number of emigrants who left the ports of Ireland, during the quarter ended 30th June, 1868, amounted to 25,453—14,725 males and 10,728 females. The average number of emigrants during the corresponding quarter of the preceding four years was 40,601.

Estimated Decrease of the Population.—The number of births *registered* during the quarter ended 30th June, 1868, being 40,431; the deaths 22,307; and the number of emigrants 25,453—(according to the returns obtained by the enumerators at the several seaports); a decrease of 7,329 would, therefore, appear to have taken place in the population of Ireland during that period.

PRICES OF PROVISIONS, AND PAUPERISM.

The average price of Messrs. Manders and Co.'s 4 lb. loaf for the quarter ended 30th June 1868 was 9*d.*, the price during the first eight weeks having been 9*d.*, and during the last five weeks 8½*d.*; the average price for the corresponding quarter of 1867 was 8*d.*

The average price of oatmeal for the quarter, at the Dublin Corn Exchange, was 18*s.* 3*d.* per cwt., being 2*d.* less than the average price for the second quarter of 1867.

Potatoes ranged in price during the quarter from 4*s.* 6*d.* to 5*s.* 6*d.* per cwt., against 4*s.* 6*d.* to 7*s.* 6*d.* for the corresponding quarter of 1867.

The average prices of beef at the Dublin Cattle Market, during the quarter, were 54*s.* 6*d.* to 67*s.* per cwt.; the average prices for the second quarter of 1867 were 53*s.* 6*d.* to 70*s.* 6*d.* per cwt.

The following statement shows the average prices of the foregoing articles of food, in Dublin, *during the second quarter* of the years 1864–8:

Years.	Bread (Messrs. Manders & Co.'s 4 lb. loaf.)	Oatmeal (Corn Exchange), per cwt.	Potatoes (at Potato Market), per cwt.	Beef (at Dublin Cattle Market), per cwt.
	d.	*s.* *d.*	*s.* *d.* to *s.* *d.*	*s.* *d.* to *s.* *d.*
1864 (2nd quarter),	6	10 6	2 11 to 3 8	53 0 to 65 6
1865, „	6	14 1	3 2 to 3 11	55 0 to 67 6
1866, „	6½	15 8	3 1 to 3 11	58 0 to 72 6
1867, „	8	18 5	5 3 to 6 6	53 6 to 70 6
1868, „	9	18 3	4 8 to 5 6	54 6 to 67 0

The average number of persons in Ireland receiving in-door relief on Saturdays during the second quarter of the year 1868 was 55,731, against 55,399 for the corresponding period of 1867.

The average weekly number of persons receiving out-door relief during the quarter was 17,568, against 15,527 in the second quarter of 1867.

Of the persons receiving in-door relief during the second quarter of 1868 an average number of 481 in each week were located in Asylums for the Blind and the Deaf and Dumb, and in Extern Hospitals; in the corresponding quarter of 1867 the average weekly number was 425.

Quarterly Reports.

Second Quarter.

THE WEATHER.

The mean height of the barometer during the second quarter of the year 1868 was 29·979 inches (in the corresponding quarter of 1867, 1866, 1865, and 1864 it was 29·740 inches, 29·761 inches, 29·916 inches, and 29·838 inches respectively); the highest reading (30·484) was on the 1st April, at 9·30 A.M., the air being calm, and the lowest (28·865) was on the 19th April, at 9·30 P.M., the air being calm.

The mean temperature of the air during the quarter was 54·0° (it was 53·2°, 51·5°, 54·8°, and 53·6°, respectively, in the corresponding quarters of 1867, 1866, 1865, and 1864); the maximum temperature (78·9°) was on the 29th June, and the minimum (28·2°) on the 9th April.

Rain or snow fell on 35 days during the quarter. The rain-fall measured only 3·317 inches; in the second quarter of 1867, 1866, 1865, and 1864 it was 5·173 inches, 7·796 inches, 5·816 inches, and 4·083 inches respectively. The greatest monthly rain-fall during the quarter was in April, when 1·517 inches were registered.

As usual there was a prevalence of westerly winds, the wind having blown from the west (at 9.30 A.M.) on 20 days; from S.W. on 27 days; and from N.W. on 5. On 12 days it blew from S.E., on 8 from S., on 7 from E., on 5 from N., and on 1 from N.E. The air was calm on 6 days at 9.30 A.M.

HEALTH OF THE PEOPLE.

During the quarter of the year ended June 30, 1868, there was a comparative freedom from epidemic diseases of any great severity; the health of the community was satisfactory, the number of deaths registered being 1,814 less than in the corresponding period of 1867.

Though to the mildness of the season must be chiefly ascribed the diminished mortality, yet we may safely infer that the improved sanitary condition of many localities checked the development of preventable diseases.

Scarlatina, whooping-cough, and fever were the zymotic diseases which prevailed most during the quarter.

A few cases of purpuric fever scattered throughout the country proved fatal, in some instances the disease receiving the inappropriate name of "Black Death."

The Registrar of the Downpatrick District stated, "One well marked case of 'Febris Nigra' terminated fatally in twenty-four hours." The Registrar of the Maghera District recorded two deaths from purpura hæmorrhagica.

The Registrar of Ballyragget District, Castlecomer Union, reported that "one death was caused in a strong healthy young labourer having well marked symptoms of cerebro-spinal meningitis, commonly called 'Black Death.' He was sent to this town from a distance of six miles in a state of insensibility, lived for six days, and before death the whole surface of the body became remarkably livid, with patches of purpura on many parts of the trunk."

Two other deaths from purpuric fever were reported, one from Parsonstown and the other from Kilmallock.

Of the thirty-four deaths registered in the Dungloe District, Glenties Union, ten resulted from scarlatina.

In the Dripsey District, Cork Union, of the twenty-three deaths registered, ten were caused by scarlatina, "which (added the Registrar) was of a malignant type, some of the cases living only a few hours."

The Registrar of the Hollymount District, Ballinrobe Union, made the following report—"One death from small-pox (uncertified) of a child a few weeks old. An epidemic of this complaint has existed and still exists in one portion of this district, having, I believe, originated from inoculation."

Three deaths in the Dunmore District, Tuam Union, were ascribed to small-pox: *none of the individuals had been protected by vaccination.*

Two deaths were stated to have been caused by glanders—one in Pomeroy, Cookstown Union, and the other in Bellaghy, Magherafelt Union.

The deaths of two centenarians were registered in the Pomeroy District, Cookstown Union.

Of the sixty-eight persons whose deaths were registered in Glendermot District, Londonderry Union, twenty had exceeded the age of seventy years, including eleven who were said to have reached the advanced age of eighty years and upwards. The death of a woman, who was stated to have attained the very advanced age of 106 years, was registered in the Crossakeel District, Oldcastle Union.

NUMBER OF MARRIAGES, BIRTHS, AND DEATHS REGISTERED IN EACH OF THE EIGHT DIVISIONS.

Marriages.—The "Eastern" Division had the highest marriage-rate during the quarter ended 30th June, 1868. It ranked second for the corresponding quarter of the preceding three years, and the "North-Eastern Division," which ranks second for the second quarter of 1868, was first on those occasions. The "South-Eastern" Division ranks third; it came fourth for the second quarter of 1867, and third for the second quarter of 1865 and 1866.

The order of the EIGHT DIVISIONS *as regards the annual Rate represented by the number of Marriages registered during the* SECOND *quarter of the years* 1866, 1867, *and* 1868, *is shown in the following Statement:—*

Quarter ending 30th June,

1866.		1867.		1868.	
Divisions.	*Ratio.*	*Divisions.*	*Ratio.*	*Divisions.*	*Ratio.*
1. North-Eastern,	1 in 164	North-Eastern,	1 in 180	Eastern,	1 in 191
2. Eastern,	„ 164	Eastern,	„ 184	North-Eastern,	„ 193
3. South-Eastern,	„ 261	North-Western,	„ 287	South-Eastern,	„ 270

7. North Midland,	„ 312	South Midland,	„ 392	North Midland,	„ 434
8. Western,	„ 337	Western,	„ 448	Western,	„ 437

Births.—The number of births registered during the second quarter of 1868 in the South-Western Division was equal to an annual ratio of 1 in 29; in the North-Eastern Division the ratio was 1 in 30. The births *registered* in the North-Western Division afforded a ratio of only 1 in 39, and in the South-Midland Division the ratio was only 1 in 40.

The numerical order of the EIGHT DIVISIONS *as regards the annual Rate represented by the number of Births registered during the* SECOND *quarter of* 1866, 1867, *and* 1868, *is shown in the following Statement:—*

Quarter ending 30th June,

1866.		1867.		1868.	
Divisions.	*Ratio.*	*Divisions.*	*Ratio.*	*Divisions.*	*Ratio.*

8. South Midland,	„ 43	North Midland,	„ 40	South Midland,	„ 40

Quarterly Reports. Second Quarter.

Deaths.—The death-rate during the quarter in the Eastern Division was 1 in 52; the North-Eastern Division ranked second, with a ratio of 1 in 55; the South-Eastern third, the ratio being 1 in 59; the Western Division, as usual, had the lowest death-rate, the number of deaths registered during the quarter being only equal to a ratio of 1 in 82. In the corresponding quarter of 1867 the ratio in this division was 1 in 77; and in the second quarter of 1866 the ratio was 1 in 76.

The following Statement shows the EIGHT DIVISIONS *arranged according to the annual Rate of Mortality afforded by the number of Deaths registered during the* SECOND *quarter of* 1866, 1867, *and* 1868:—

Quarter ending 30th June,					
1866.		1867.		1868.

PROVINCES.

Marriages.—The number of marriages *registered* in the Province of Ulster during the quarter ended 30th June, 1868, affords an annual ratio of 1 in 229; in Leinster the ratio was 1 in 226; in Munster, 1 in 329; and in Connaught, 1 in 443.

The following Table shows, by PROVINCES, *the number of Marriages registered during the* SECOND *quarter of the years* 1866, 1867, *and* 1868; *together with the annual ratio to the estimated Population.*

REGISTRATION PROVINCES.	MARRIAGES.					
	Quarter ending 30th June,					
	1866.		1867.		1868.	
	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.
LEINSTER,	1,778	1 in 194	1,516	1 in 226	1,514	1 in 226
MUNSTER,	1,263	„ 291	994	„ 369	1,112	„ 329
ULSTER,	2,333	„ 199	2,097	„ 221	2,018	„ 229

TOTAL,	6,081	1 in 230	5,155	1 in 270	5,134	1 in 270

Births.—The largest number of births, relatively, during the second quarter of 1868, was registered in the province of Munster, the annual ratio afforded being 1 in 31·4 of the population; in Ulster the ratio was 1 in 33; in Leinster, 1 in 38; and in Connaught, 1 in 38.

Quarterly Reports.

Second Quarter.

The following Table shows, by PROVINCES, *the number of Births and Deaths registered during the* SECOND *quarter of the years* 1866, 1867, *and* 1868, *together with the ratio to the estimated Population.*

REGISTRATION PROVINCES.	BIRTHS.						DEATHS.					
	Quarter ending 30th June,						Quarter ending 30th June,					
	1866.		1867.		1868.		1866.		1867.		1868.	
	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.
LEINSTER,	9,173	1 in 38	9,202	1 in 37	9,005	1 in 38	7,096	1 in 49	6,951	1 in 49	6,134	1 in 56
MUNSTER,	10,647	35	11,101	33	11,650	31	5,975	62	6,432	57	5,831	63
ULSTER,	13,573	34	14,080	33	14,111	33	8,658	54	7,852	59	7,630	60
CONNAUGHT,	5,392	41	5,680	38	5,665	38	2,894	76	2,886	75	2,712	80
TOTAL,	38,785	36	40,063	35	40,431	34	24,623	57	24,121	58	22,307	62

Deaths.—The number of deaths *registered* in the province of Leinster during the second quarter of 1868 afforded an annual ratio of 1 in 56; in Munster the ratio was 1 in 63; in Ulster, 1 in 60; and in Connaught, 1 in 80 of the estimated population.

Third Quarter

Third Quarter.—July, August, September.

Marriages.—The number of marriages *registered* in Ireland during the third quarter of 1868 amounted to 5,053, equal to an annual ratio of 1 in every 274, or ·365 per cent. of the *estimated* population. The average number *registered* in the corresponding period of the preceding four years was 5,604.

Of the 5,053 marriages *registered* during the third quarter of 1868, 3,162 were between Roman Catholics, representing an annual ratio of 1 marriage in every 340, or ·294 per cent. of the Roman Catholic population; and the remaining 1,891 marriages were between Protestants, being equal to an annual ratio of 1 in every 163, or ·614 per cent. of the Protestant population.

Births.—There were 34,310 births *registered* in Ireland during the quarter ending 30th September, 1868—17,649 boys and 16,661 girls—representing an annual ratio of 1 in every 40·4, or 2·48 per cent. of the *estimated* population; the average number of births *registered* during the corresponding quarter of the preceding four years was 33,924.

Deaths.—The deaths *registered* in Ireland during the third quarter of the year 1868 amounted to 18,426—9,270 males and 9,156 females—affording an annual ratio of 1 in every 75·2, or 1·33 per cent. of the *estimated* population. The average number *registered* during the corresponding quarter of the previous four years was 18,730.

Emigration.—According to the returns obtained by the Enumerators, the number of emigrants who left the ports of Ireland during the quarter ended 30th September, 1868, amounted to 14,259—7,744 males and 6,515 females—the average number who emigrated during the corresponding quarter of the previous four years was 21,978.

Quarterly Reports. Third Quarter.

Estimated Increase of the Population.—The number of births *registered* during the quarter ended 30th September, 1868, being 34,310; the deaths 18,426; and the number of emigrants 14,259—(according to the returns obtained by the enumerators at the several seaports);—an increase of 1,625 would, therefore, appear to have taken place in the population of Ireland during that period.

PRICES OF PROVISIONS, AND PAUPERISM.

The average price of Messrs. Manders and Co.'s 4-lb. loaf for the third quarter of the year 1868 was 8*d.* The price was 8½*d.* during the first week, and 8*d.* during each of the other weeks. The average price for the corresponding quarter of 1867 was also 8*d.*

The average price of oatmeal at the Dublin Corn Exchange for the third quarter of 1868 was 16*s.* 5*d.* per cwt.; it was 17*s.* 6*d.* per cwt. during the first week, and gradually fell to 15*s.* per cwt. for the last week of the quarter. The average price of oatmeal during the corresponding quarter of 1867 was 19*s.* 4*d.* per cwt.

The price of potatoes at the Dublin Potato Market averaged from 4*s.* 9*d.* to 6*s.* 5*d.*; for the corresponding period of 1867 the average prices were 3*s.* 5*d.* to 5*s.* 1*d.* per cwt.

The average prices of beef at the Dublin Cattle Market for the third quarter of the year 1868 ranged from 51*s.* to 64*s.* 6*d.* per cwt.; for the corresponding quarter of 1867 the average prices were 50*s.* to 66*s.* 6*d.* per cwt.

The following statement shows the average prices of the foregoing articles of food in Dublin, *during the third quarter* of the years 1864–8.

Years.	Bread (Messrs. Manders & Co.'s 4 lb. loaf.)	Oatmeal (Corn Exchange), per cwt.	Potatoes (at Potato Market), per cwt.	Beef (at Dublin Cattle Market), per cwt.

1867, „	8	19 4	3 5 to 5 1	50 0 to 66 6
1868, „	8	16 5	4 9 to 6 5	51 0 to 64 6

The average number of persons in Ireland receiving in-door relief on Saturdays, during the third quarter of the year 1868 was 48,835, against 47,911 for the corresponding period of 1867.

The average weekly number of persons receiving out-door relief during the quarter was 15,615, against 13,731 for the third quarter of 1867.

Of the persons receiving in-door relief during the third quarter of the year 1868, an average number of 474 in each week were located in Asylums for the Blind and the Deaf and Dumb, and in Extern Hospitals; in the corresponding quarter of 1867 the average weekly number was 433.

THE WEATHER.

The mean height of the barometer during the third quarter of the year 1868 was 29·957 inches (in the corresponding quarter of 1867, 1866, 1865, and 1864, it was 29·786 inches, 29·628 inches, 29·820 inches, and 29·804 inches respectively); the highest reading (30·540) was on the 24th July, at 9.30 A.M., wind S.E., and the lowest (28·918) was on the 29th of September, at 9.30 A.M., wind E.

The mean temperature of the air during the quarter was 60·0° (it was 58·5°, 56·9°, 60·8°, and 57·8°, respectively, in the corresponding quarter of 1867, 1866, 1865, and 1864); the maximum temperature (88·4°) was on the 2nd July, and the minimum (38·4°) was on the 24th September.

Rain fell on 37 days during the quarter. The rain-fall measured 7·909 inches; in the corresponding quarter of 1867, 1866, 1865, and 1864 it was 6·058, 6·656, 6·318, and 4·137 inches respectively. The greatest monthly rain-fall during the quarter was in August, when 4·130 inches were registered; 3·140 inches were registered in September, but only ·639 in. in July. The greatest amount in 24 hours (1·334 inches) fell on the 25th September.

The south-westerly wind was the most prevalent during the quarter, having blown on 27 days. On 15 days the wind blew from N.E., on 15 from S.E., on 11 from N.W., on 9 from E., on 7 from N., on only 6 days from W., and on 2 from S., at 9·30 A.M.

HEALTH OF THE PEOPLE.

The general absence of epidemics and the very fine weather are the most remarkable features of the September quarter. It will be seen in the preceding report on the weather, that the mean temperature of the air during the quarter was 60° of Fahrenheit, the maximum having been 88·4°, while in the corresponding period of 1867 the mean temperature was 58·5°, and the maximum 79·6°.

Of zymotic diseases that which was most frequently referred to in the Registrars' notes is scarlatina—a disease which commits *sad havoc* among children, especially in those localities *where sanitary laws are neglected.* Of the 61 deaths registered in the Kinsale District, Kinsale Union, 14 were caused by scarlatina. The Registrar of the Kilworth District, Fermoy Union, reports on the prevalence of scarlatina "of a very malignant type, several of the cases only living a few days. There were 32 cases and 20 deaths; a great many died without a doctor seeing them." In the Tallow District, Lismore Union, 13 of the 30 deaths registered resulted from scarlatina. The Registrar states that "it was impossible to treat this complaint in the dwellings of the poor, where numbers are *crowded together in small and badly ventilated apartments.*" In the Glenarm District, Larne Union, 15 of the 39 deaths registered were referred to scarlatina and its sequelæ.

Measles and whooping cough were prevalent and fatal in a few districts.

Many of the Registrars remarked upon the general immunity from the various forms of fever.

In the Swanlinbar District, Bawnboy Union, 2 deaths resulted from purpura. One fatal case of purpuric fever was reported by the Registrar of the Brosna District, Tralee Union.

A boy aged seventeen died from tetanus or locked-jaw, the result of an injury of the foot.

The high temperature which prevailed during the quarter was the cause of several deaths from solis ictus or sun-stroke.

The Registrar of Hollymount, Ballinrobe Union, reported the disappearance of small-pox from his district.

In the Castlereagh District, Castlereagh Union, "there were 9 cases of small-pox, 2 of which had been vaccinated. All recovered." The Registrar of the Frenchpark District of the same union stated "*chin cough* prevailed during the Autumn. There were a few deaths reported from it."

The deaths of many persons who were stated to have attained very advanced ages were reported—of these a few may be instanced. The Registrar of the Kilkeel District, Kilkeel Union, stated "There was 1 death of a person aged 113 years." In the Kilskeer District, Kells Union, "One case was registered of a person more

Quarterly Reports. Third Quarter.

than 100 years at time of death." In the Hollymount District, Ballinrobe Union, one man died at the age of 105 years. Three persons died in the Castlereagh District, Castlereagh Union, at the respective ages of seventy-five, ninety-five, and ninety-nine years. The Registrar of the Kilworth District, Fermoy Union, stated that "One man lived to 108, and never was ill; he walked two miles a day or two before his death."

Very defective sanitary arrangements in many districts were reported by the Registrars.

NUMBER OF MARRIAGES, BIRTHS, AND DEATHS, REGISTERED IN EACH OF THE EIGHT DIVISIONS.

Marriages.—The number of marriages registered in the Eastern Division during the third quarter of 1868, afforded the highest annual ratio, viz.:—1 in 176 of the *estimated* population; in the North-Eastern Division the ratio was 1 in 203; in the North Midland Division the ratio was only 1 in 426; and in the Western Division 1 in 584.

The order of the EIGHT DIVISIONS *as regards the annual Rate represented by the number of Marriages registered during the* THIRD *quarter of the years* 1866, 1867, *and* 1868, *is shown in the following statement:—*

Quarter ending 30th September,

1866.		1867.		1868.	
Divisions.	*Ratio.*	*Divisions.*	*Ratio.*	*Divisions.*	*Ratio.*

Deaths.—The rate of mortality, during the third quarter of the year 1868, was highest in the "Eastern" Division, 1 in 56; in the corresponding quarter

Quarterly Reports.

Third Quarter.

of 1867 the rate in this division was 1 in 54; and in the third quarter of 1866 it was 1 in 55.

The number of deaths *registered* in the "Western" Division, during the quarter of the year under consideration, only affords *an annual ratio of* 1 *in* 105 of the estimated population; this division had also the lowest death-rate in the corresponding quarter of each preceding year since registration commenced in this country.

The following Statement shows the EIGHT DIVISIONS *arranged according to the annual Rate of Mortality afforded by the number of Deaths registered during the* THIRD *quarter of* 1866, 1867, *and* 1868:—

Quarter ending 30th September,

Deaths.—The deaths *registered* in the Province of Leinster during the quarter ended the 30th September, 1868, represent an annual ratio of 1 in 63; in Ulster the ratio was 1 in 76; in Munster, 1 in 77; and in Connaught, 1 in 102.

Fourth Quarter.

Fourth Quarter.—October, November, December.

Marriages.—There were 5,932 marriages *registered* in Ireland during the fourth quarter of 1868, a number affording an annual ratio of 1 in every 234, or ·428 per cent. of the *estimated* population. Of this number 3,593 were between Roman Catholics, representing a ratio of only 1 marriage in every 300, or ·334 per cent. of Roman Catholics, and 2,339 were between Protestants, affording a ratio of 1 in every 132, or ·759 per cent. of the Protestant population. The average number of marriages *registered* in the corresponding quarter of the previous four years was 6,501.

Births.—There were 33,033 births *registered* in Ireland during the quarter ending 31st December, 1868—17,018 boys and 16,015 girls—representing an annual ratio of 1 in every 42·0, or 2·38 per cent. of the *estimated* population; the average number of births *registered* during the corresponding quarter of the preceding four years was 33,339.

Deaths.—The deaths *registered* in Ireland during the fourth quarter of the year 1868 amounted to 20,428—10,316 males and 10,112 females—a number affording an annual ratio of 1 in every 67·8, or 1·47 per cent. of the *estimated* population. The average number *registered* during the corresponding quarter of the previous four years was 21,358.

Emigration.—According to the returns obtained by the Enumerators, the number of emigrants who left the ports of Ireland, during the quarter ended 31st December, 1868, amounted to 8,779—4,966 males and 3,813 females. The average number of emigrants during the fourth quarter of the preceding four years was 17,929.

Estimated Increase of the Population.—The number of births *registered* during the quarter ended 31st December, 1868, being 33,033; the deaths 20,428; and the number of emigrants 8,779 (according to the returns obtained by the enumerators at the several seaports); an increase of 3,826 would, therefore, appear to have taken place in the population of Ireland during that period.

PRICES OF PROVISIONS, AND PAUPERISM.

The price of Messrs. Manders & Co.'s 4-lb. loaf during the first nine weeks of the fourth quarter of 1868 was 7½*d.*; it was 7*d.* during the remaining four weeks. The average price for the corresponding quarter of 1867 was 9*d.*

The average price per cwt. of oatmeal for the quarter was 16*s.* 4*d.*, being 1*s.* per cwt. lower than it was for the corresponding period of 1867.

The average prices per cwt. of potatoes for the fourth quarter of 1868, at the Dublin Potato Market, were 2*s.* 11*d.* to 4*s.* 7*d.*; the average prices for the corresponding period of the previous year were 3*s.* 10*d.* to 4*s.* 7*d.*

The average prices of beef in the Dublin Cattle Market, during the quarter ranged from 49*s.* 6*d.* to 65*s.* per cwt.; for the fourth quarter of 1867 the prices were 45*s.* 6*d.* to 62*s.*

The following statement shows the average prices of the above mentioned articles of food in Dublin *during the fourth quarter* of the years 1864–8 :—

Years.	Bread (Messrs. Manders & Co.'s 4-lb. loaf).	Oatmeal (Corn Exchange), per cwt.	Potatoes (at Potato Market), per cwt.	Beef (at Dublin Cattle Market), per cwt.
	d.	*s.* *d.*	*s.* *d.* to *s.* *d.*	*s.* *d.* to *s.* *d.*
1864 (4th quarter),	5½	10 10	2 2 to 3 4	49 6 to 65 6
1865 „	7	15 1	2 9 to 3 8	50 6 to 63 6
1866 „	7½	15 11	3 1 to 4 11	48 6 to 67 0
1867 „	9	17 4	3 10 to 4 7	45 6 to 62 0
1868 „	7½	16 4	2 11 to 4 7	49 6 to 65 0

The average number of persons in Ireland receiving in-door relief on Saturdays during the fourth quarter of 1868 was 52,107, against 50,775 for the corresponding period of 1867.

The average weekly number of persons receiving out-door relief during the quarter was 15,501, against 13,467 for the fourth quarter of 1867.

Of the persons receiving in-door relief during the fourth quarter of 1868, an average number of 482 in each week were located in Asylums for the Blind and the Deaf and Dumb, and in Extern Hospitals; in the corresponding quarter of 1867 the average weekly number was 431.

THE WEATHER.

The mean height of the barometer during the fourth quarter of the year 1868, was 29·777 inches (in the corresponding quarter of 1867, 1866, 1865, and 1864 it was 29·934 inches, 29·773 inches, 29·674 inches, and 29·686 inches respectively); the highest reading (30·726) was on the 13th November, at 9.30 A.M., wind W., and the lowest (28·735 inches) was on the 27th December, at 9.30 A.M., wind S.W.

The mean temperature of the air during the quarter was 45·2° (it was 44·6°, 46·4°, 46·5°, and 44·4° respectively, in the corresponding quarter of 1867, 1866, 1865, and 1864); the maximum temperature (64·3°) was on the 1st November, and the minimum (26·5°) was on the 6th of the same month.

Rain or snow fell on 67 days during the quarter. The rain-fall measured 6·991 inches; in the fourth quarter of 1867, 1866, 1865, and 1864 it was 4·631 inches, 4·897 inches, 10·112 inches, and 12·040 inches respectively. The greatest monthly rain-fall during the quarter was in December, when 4·379 inches, or nearly two-thirds of the entire quantity, were registered.

There was a prevalence of westerly winds during the quarter—the wind having blown (at 9·30, A.M.) on 33 days from S.W., on 12 days from W., and on 7 days from N.W. It blew from S. and S.E. on 10 days each, from E. on 5 days; from N.E. on 4 days, from N. on 2 days; and the air was calm on 9 days at 9·30 A.M.

Quarterly Reports.

Fourth Quarter.

HEALTH OF THE PEOPLE.

The deaths registered during the quarter show a decrease of 46 as compared with the corresponding quarter of the year 1867. The weather was very tempestuous, the temperature unusually mild, and the rain-fall 2·360 inches more than in the December quarter of the year 1867.

Scarlet fever of a malignant type was very prevalent throughout the country.

In the Tallow District, Lismore Union, of the 18 deaths registered, 8 resulted from scarlatina. The Registrar observed:—"The state of the sewerage of the town requires attention; I believe neglect in that department is a fruitful source of fever, *and to that cause I attribute the continuance of scarlatina.*"

In Broughshane, Ballymena Union, one-half of the deaths registered were caused by scarlet fever. Of the 54 deaths registered in the Randalstown District, Antrim Union, 24 were from scarlet fever; and of the 44 deaths registered in the Glenarm District, Larne Union, 25 were referred to the same disease.

In some districts typhus fever was epidemic. The Registrar of Dysartmoon District, New Ross Union, stated that "Fever, of the worst form of typhus, was very prevalent during the quarter. Four died in the district of the disease, and 4 in hospital."

The Registrar of Parsonstown observed:—"There was more fever than usual, and of a more severe character. The common, continued fever which we generally meet with here, being in some instances replaced by typhus of a grave kind from the commencement." Typhoid or enteric fever prevailed in Cookstown. The Registrar of Kilskeer District, Kells Union, reported some cases of relapsing fever, typhinia or famine fever.

Measles was epidemic in ne districts of Belfast, Clonmel, Enniskillen, Lurgan No. 1, Moira, and Ballina.

Several Registrars reported on the prevalence of whooping-cough in their districts.

Three of the Registrars referred in their notes to small-pox—viz., the Registrar of Athlone, No. 2 district, stated:—"One case of small-pox occurred during the quarter in a child 3 years of age, who had been vaccinated three weeks before the invasion of the disease. *The child made a speedy recovery*, and [January 1869], there has not been another case in the district since." The Registrar of the Islandeady District, Westport Union, reported a few cases of small-pox which, as far as he could learn, terminated favourably. The Registrar of the Cloyne District, Middleton Union, reported a case of small-pox which was sent to hospital; he did not state the result, nor did he mention whether the person had been vaccinated.

In the Castlecomer District a death from tetanus or locked-jaw, the result of an injury, was registered.

Many of the deaths were referred to extreme old age.

From Mohill the Registrar wrote, "We have had an outbreak of fever, which must have been caused by the filthy and neglected state in which the inhabitants generally keep their yards, &c., and also by the imperfect drainage and sewerage of the town; for though the facilities for improvement in a sanitary point of view are very considerable, from its position, yet I regret to have to state that such has not been taken advantage of."

The Galway Registrar reported favourably of the sanitary condition of his district: he said, "The sanitary arrangements lately introduced, particularly the waterworks, which give to the poor an abundant supply of pure water, have contributed to the healthy state of the district."

With respect to the certified causes of Death, the Registrar of the Kilskeer District, Kells Union, stated:—"Diarrhœa and *ephemeral* fever have been

common under the head of certified causes of death. The assigned causes afford no precise information; as might be expected, the most prominent symptoms, such as 'convulsions,' 'shortness of breath,' 'decline,' &c., are given; any attempt to push inquiry is resented as inquisitorial and unfeeling." *Quarterly Reports.* Fourth Quarter.

NUMBER OF MARRIAGES, BIRTHS, AND DEATHS REGISTERED IN EACH OF THE EIGHT DIVISIONS.

Marriages.—The North-Eastern Division had the greatest number of marriages *registered* in proportion to its population during the last quarter of the year 1868, the annual ratio represented being 1 in 153. In the Eastern Division the ratio was 1 in 177. These two Divisions also ranked first and second respectively in the corresponding quarters of 1866 and 1867. In the Western Division the ratio was only 1 in 455. The low ratio is to be accounted for by the large proportion of the Roman Catholic marriages being celebrated in the *first* quarter of the year.

The order of the EIGHT DIVISIONS *as regards the annual Rate represented by the number of Marriages registered during the* FOURTH *quarter of the years* 1866, 1867, *and* 1868 *is shown in the following Statement:—*

Quarter ending 31st December,

1866.		1867.		1868.	
Divisions.	*Ratio.*	*Divisions.*	*Ratio.*	*Divisions.*	*Ratio.*

Quarterly Reports.

Fourth Quarter.

Deaths.—The Eastern Division had the highest death-rate during the fourth quarter of 1868, the annual ratio afforded being 1 in 55 of the estimated population; in the corresponding quarter of 1867 the death-rate in this division was 1 in 51, and in 1866 it was 1 in 40. In the North Midland Division the deaths *registered* during the fourth quarter of 1868 represent an annual ratio of 1 in 83 against 1 in 79 for the fourth quarter of 1867, and 1 in 78 for the fourth quarter of 1866; in the North-Western Division the ratio was 1 in 81 against 1 in 87 for 1867, and 1 in 88 for 1866; and in the Western it was 1 in 88 against 1 in 97 for the corresponding quarter of 1867, and 1 in 92 for 1866.

The following Statement shows the EIGHT DIVISIONS *arranged according to the annual Rate of Mortality afforded by the number of Deaths registered during the* FOURTH *quarter of* 1866, 1867, *and* 1868 :—

Quarter ending 31st December,

1866.		1867.		1868.

PROVINCES.

Marriages.—The number of marriages *registered* in the province of Ulster during the fourth quarter of 1868 amounted to 2,496, a number representing an annual ratio of 1 in every 185 of the estimated population; in Leinster the number was 1732, or 1 in 197; in Munster 1,146, or 1 in 319; and in Connaught 558, or only 1 in 389.

The following Table shows, by PROVINCES, *the number of Marriages registered during the* FOURTH *quarter of the years* 1866, 1867, *and* 1868, *together with the annual ratio to the estimated Population represented by the number of Marriages registered :—*

Births.—The births *registered* in Leinster during the fourth quarter of 1868 afford an annual ratio of only 1 in 47 of the estimated population—in the corresponding quarter of 1866 the ratio was 1 in 46, and in 1867, 1 in 49. In

Quarterly Reports.

Fourth Quarter.

Munster there were registered 8,861 births—a number equal to an annual ratio of 1 in 41 (the ratio for the fourth quarter of 1866 and 1867 being 1 in 42 and 1 in 44, respectively); in Ulster the number was 11,327, or 1 in 41, against 1 in 40 for the corresponding quarter of 1866 and 1867; and in Connaught 5,521, or 1 in 39, against 1 in 37 for 1866, and 1 in 38 for 1867.

The following Table shows, by PROVINCES, *the number of Births and Deaths registered during the quarters ending* 31st *December,* 1866, 1867, *and* 1868, *and the ratio to the estimated Population:—*

Deaths.—There were 5,639 deaths registered in the province of Leinster during the fourth quarter of 1868, the annual ratio afforded being 1 in 61—in the fourth quarter of 1867 the ratio was 1 in 57, and in 1866 it was 1 in 46. In Munster there were registered 5,464 deaths, or 1 in 67 of the estimated population, against 1 in 67 for the corresponding quarter of 1867 and 1866; in Ulster, 6,923 or 1 in 67, against 1 in 70 in 1867, and 1 in 69 in 1866; and in Connaught, 2,402, or 1 in 90, against 1 in 91 for the fourth quarter of 1867 and 1866.

Topographical Description of the Eight Divisions into which Ireland has been divided in the foregoing Tables.

No. I. The North-Eastern Division.—This division may be described by a line passing southward from Lough Foyle through the counties of Londonderry, Tyrone, and Armagh, to Lough Bawn, in the county of Monaghan, and thence eastward to Carlingford Lough; the north and east being on the seaboard.

No. II. The North-Western Division is bounded on the east by the division just described, from Lough Foyle to a point a little south of Six Mile Cross, in the county of Tyrone, and may be described by a line drawn thence S.W. through the county of Fermanagh to the south of Enniskillen, embracing that portion of the north-west angle of the county of Cavan belonging to the Enniskillen Union, into the county of Leitrim, crossing Lough Allen, thence into the county of Sligo, to a point situated to the southward of the town of Ballymote, and thence extending north to Ballysadare Bay; the remainder of the division is bounded by the sea. It contains Loughs Erne and Derg, and part of Lough Allen, and large portions of it are mountainous.

No. III. The Eastern Division is situated in the provinces of Leinster and Ulster; it extends along the Irish Sea and St. George's Channel, from Warrenspoint, in the county of Down, to the south of Cahore Point, in the county of Wexford, stretching inland about twenty-five miles, and embracing the counties of Louth, Dublin, and Wicklow, and portions of the counties of Carlow, Cavan, Kildare, Meath, and Wexford; together with small portions of the counties of Armagh and Monaghan.

No. IV. The North Midland Division is situated in the provinces of Leinster, Ulster, and Connaught, and extends southward from its junction with the "North-Western" division near Six Mile Cross, in the county of Tyrone, to Tyrrellspass, in the county of Westmeath. Virginia, in the county of Cavan, is situated on its eastern border, and Tulsk, in the county of Roscommon, on its western.

No. V. The South Midland Division, situated in the provinces of Leinster and Munster, extends from the Hill of Down, in the county of Meath, southward to Borris, in the county of Carlow. Its southern boundary may be described by a line drawn thence to New Birmingham, in the county of Tipperary, and from that point south to Fethard, in the same county, thence westward to the northern base of the Galty Mountains, and in a north-westerly direction, to Pallasgreen, in the county of Limerick. On the east it is bounded by the "Eastern" division, and on the west by the "Western" and the "South-Western" divisions.

No. VI. The Western Division.—This division extends southwards from Sligo and Killala Bays to the northern bank of the River Shannon, lying westward of Limerick; the extreme points, north and south, being Benwee Head, in the county of Mayo, and Loop Head, in the county of Clare, a distance in or about 120 miles, which, however, does not represent the extent of seaboard, the western coast being indented by numerous bays and inlets. This division has been extended much more inland than the eastern division, as from its exposure to the Atlantic Ocean, and the prevalence of westerly winds (which blow for nearly three-fourths of the year), the climate must be affected for a considerable distance inland; the Unions situated on the extreme east are Boyle, Castlereagh, Glennamaddy, Mountbellew, Ballinasloe, and Portumna.

No. VII. The South-Eastern Division.—This division extends from its junction with the "Eastern" division southward of Cahore Point, in the county of Wexford, along the eastern and southern coasts to the east of Cork Harbour, and is bounded on the north by the South Midland division. It embraces the county of Waterford; nearly the whole of the county of Wexford; parts of the counties of Carlow, Kilkenny, and Tipperary; that portion of the county of Limerick (38,550 acres) comprised in the Mitchelstown Union, and a portion of the eastern side of Cork County.

No. VIII. The South-Western Division extends along the southern and wetern coasts from Cork Harbour to the river Shannon, and embraces the county of Kerry, nearly the whole of the counties of Cork and Limerick, and a small portion of the county of Clare, comprised in the Limerick Union.

POPULATION OF IRELAND (including Army, Navy, and Merchant Seamen on shore and in port) *estimated* to the middle of each of the Years 1801 to 1868 :—

Middle of the Years	Estimated POPULATION.			Middle of the Years	Estimated POPULATION.			Middle of the Years	Estimated POPULATION.

NOTE.—This table has been constructed for the years 1801 to 1831—By adopting the rates of increase of the male and female population between 1821 and 1831, as shown by the Irish Census Reports of 1831—the first complete Census of Ireland having been taken in 1821.

1832 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; the difference between the number arrived at by this computation and the *actual* number by the Census of 1851, was divided over the intervening years in proportion to the number of recorded deaths and the number of emigrants.

1852 to 1861—The English birth and death rates, as above, were used, deducting the number of emigrants according to the returns obtained by the Registrar-General for Ireland, and apportioning the difference as explained for the last period.

1862 to 1868—The English birth and death rates, as above, were employed in the calculations for each year deducting the number of emigrants according to the returns received by the Registrar-General for Ireland.

ANNUAL ABSTRACTS

OF

MARRIAGES, BIRTHS, AND DEATHS.

1868.

* The *Registration Counties* consist of groups of Superintendent Registrars' Districts or Poor-Law Unions. Whenever a District or Union extends into more than one County, it is assigned wholly to that County in which the greater portion of the population is located; hence all the *Registration* Counties differ more or less from the Counties *Proper*.

† See note (†) page 2.

* For remainder of Belfast see next page.

NOTE.—The Registrars' Districts are sub-divisions of the Unions or Superintendent Registrars' Districts, and are identical with the Dispensary Districts of the same names, except in a few instances.

The letter *W* denotes that the Registrar's District contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.

Wherever the minus sign (—) is prefixed to the numbers given in the column headed "Excess of Births over Deaths," it denotes that the births in the Registrar's District, instead of exceeding the deaths, were, in fact, *less than the deaths*, to the extent stated.

I.—NORTH-EASTERN DIVISION.—BIRTHS AND DEATHS, 1868—REGISTRARS' DISTRICTS—*continued.*

* The district of Newtownhamilton was formed on 3rd March, 1868, by the severance of Electoral Divisions from the districts of Castleblayney and Crossmaglen; at the same time changes were made in the other districts of the Union.

† Kilkeel was divided into two districts on 1st December, 1868. The numbers given for Kilkeel No. 1 District include the Births and Deaths registered in the entire district up to that date.

IRELAND.—SUPPLEMENTARY TABLE of the

[In the foregoing Tables all the Diseases, either having a distinct character, or fatal to any considerable number of persons, are classified under 114 heads; some of which, however, include groups of very distinct diseases,—such as are fatal to only a *few persons*, or *diseases* which are often confounded with other diseases. The rule has been to refer the distinct diseases to heads under which the cases were so numerous that the additional numbers would not interfere with the calculated proportions. Where it is desired, partial correction,

(continued at page 78.)

CAUSES of DEATH at different Periods of Life, in the Year 1868.

however, can now be made by means of the following Supplementary Tables, containing many of the deaths from distinct diseases, such as mumps, epistaxis, dry gangrene, polypus, rickets, bronchocele, &c., &c., and deaths from other forms of disease, such as softening of the brain (necrencephalus), which are returned in many cases under other heads, as paralysis, &c.

These Tables are an extension of the Tables of Causes of Death in Ireland, pp. 68 to 75.]

Letter to the Registrar-General on the Causes of Death in Ireland, from William M. Burke, Esq., f.c.p.i.

Year 1868.

Sir,

I have the honour of submitting to you a few observations on the assigned causes of the deaths *registered* in Ireland during the year 1868.

The number of deaths registered during the year 1868 was 7,318 less than the number registered during the year preceding. The mean temperature for the year 1868 was 1·7° higher than in 1867—this may to a certain extent account for the diminished mortality.

I. Zymotic Diseases.

The number of deaths ascribed to zymotic diseases amounted to 16,487—8,227 males and 8,260 females—showing an increase of 421, as compared with the year 1867. Of all the deaths registered during the year, 1 in every 5·2 resulted from zymotic diseases.

Fever was the cause of 3,560 deaths—1,880 males and 1,680 females—or 1 in every 24 of all the deaths.

2,696 persons died from scarlet fever—1,349 males and 1,347 females; 1 in every 32 of the total deaths registered were referred to scarlet fever.

Whooping-cough was more fatal than in the year preceding; 2,380—1,044 males and 1,336 females—fell victims to this disease, showing a ratio of 1 in every 36 of all the deaths registered.

The deaths from diarrhœa numbered 2,127—1,076 males and 1,051 females—or 1 in 41 of all the deaths. 1,123 of the persons who died from diarrhœa were under 5 years of age, and 386 were aged 65 years and upwards.

The deaths caused by croup amounted to 1,549—840 males and 709 females—being in the proportion of 1 in 56 of all the deaths. The number of the deaths registered from this disease exceeded the number registered in 1867 by 184.

Measles proved fatal in 1,251 instances—633 males and 618 females.

Diphtheria was the cause of 202 deaths—107 males and 95 females.

157 deaths were ascribed to cholera.

Metria or puerperal fever was the cause of 264 deaths, showing a decrease of 38, as compared with the preceding year.

Two males and 1 female died from hydrophobia.

Glanders caused the death of 3 men.

Small-pox caused 23 deaths, 8 of which occurred in the Tuam Union.

II. Constitutional Diseases.

To constitutional diseases 16,204 deaths were referred—7,852 males and 8,352 females—affording a ratio of 1 in every 5·3 of all the deaths.

9,440 persons fell victims to phthisis or pulmonary consumption—4,496 males and 4,944 females—or 1 in every 9·1 of all the deaths.

To dropsy 1,432 deaths were ascribed—660 males and 772 females.

Cancer caused 1,647 deaths—of these, 722 were males and 925 females.

Mesenteric disease was the cause of 1,403 deaths—697 males and 706 females.

Hydrocephalus or water on the brain caused 1,085 deaths—615 males and 470 females.

Under the head of scrofula, 957 deaths were tabulated.

III. Local Diseases.

Diseases termed "Local" contributed 28,268 deaths—15,501 males, and 12,767 females—or 1 in every 3·0 of all the deaths.

Diseases of the nervous system proved fatal in 8,600 instances—4,827 males and 3,773 females—of which number, 4,137 deaths were ascribed to convulsions—2,363 males and 1,774 females; 973 to apoplexy—577 males and 396 females; 1,440 were referred to paralysis, (736 males and 704 females); 700 to inflammation of the brain and its membranes—445 males and 255 females; and 825 to brain disease unspecified.

From diseases of the circulatory organs there died 3,158 persons—1,668 males and 1,490 females viz., pericarditis or inflammation of the heart's covering was the cause of 90 deaths—50 males and 40 females; (the number of deaths registered from pericarditis during the year 1867 was 65); aneurism was the cause of 111 deaths—82 males and 29 females; and 2,957 deaths—1,536 males and 1,421 females—were returned under the head of heart disease unspecified.

Diseases of the respiratory organs (exclusive of phthisis or pulmonary consumption) caused 10,393 deaths—5,460 males and 4,933 females; in the year 1867 the deaths from these diseases amounted to 13,703. In the first three months of 1867 the temperature was 4·2° lower than in the corresponding quarter of 1868. The lower temperature in the former year may be referred to as the cause of the deaths from diseases of the respiratory organs, being 3,310 in excess of the year 1868. Bronchitis caused 7,250 deaths—3,628 males and 3,622 females: the deaths from bronchitis in the year preceding amounted to 10,067; pneumonia or inflammation of the lungs caused 1,532 deaths—963 males and 569 females; 499 deaths were referred to asthma against 727 in the preceding year; 347 deaths were attributed to pleurisy; 108 to laryngitis; and 657 to lung disease unspecified.

Diseases of the digestive organs caused 4,515 deaths—2,509 males and 2,006 females:—viz., enteritis or inflammation of the bowels proved fatal to 553 persons; peritonitis to 252; gastritis is the cause assigned for 255 deaths; ileus, including obstruction of the bowels, constipation, &c., caused 410 deaths; 982 deaths were returned as caused by disease of the stomach unspecified; hepatitis or inflammation of the liver was stated to have been the cause of 231 deaths; jaundice of 183; and liver disease unspecified of 996.

Diseases of the urinary organs were the cause of 1,019 deaths—802 males and 217 females; of which number nephria or Bright's disease caused 208 deaths; inflammation of the kidneys 46; stone in the bladder 26; inflammation of the bladder 59; diabetes 100; and kidney disease unspecified 535.

151 deaths were the result of diseases of the organs of generation.

To diseases of the organs of locomotion 204 deaths—114 males and 90 females—were referred.

228 persons died from diseases of the integumentary system, viz., 6 from phlegmon; 90 from ulcer; and 132 from skin disease unspecified.

IV. Developmental Diseases.

20,091 deaths—8,761 males and 11,330 females—1 in every 4·3 of all the deaths were ascribed to diseases incidental to the growth and decay of the human frame. Premature birth was the cause of 194 deaths; cyanosis of 9; spina bifida of 19; and 32 deaths were returned under the head of "other malformations;" the deaths of 315 infants were referred to dentition.

The number of deaths from childbirth (676), shows an increase of 56 as compared with the year 1867. The deaths from metria or puerperal fever amounted to 264, making a total of 940 deaths. In 1867 the number of women who died from parturition was 922—302 from metria, and 620 from the accidents of child-bearing.

14,769 deaths were ascribed to old age—6,371 males and 8,398 females.

To atrophy and debility 4,061 deaths were referred—2,072 males and 1,989 females.

V. Violent Deaths.

The number of deaths resulting from violent causes amounted to 2,143—1,494 males and 649 females—or 1 in every 40 of all the deaths registered. Four deaths in every 10,000 of the estimated population were caused by violence.

Of the deaths from violence, 1,834 were accidental, viz., 609 from fractures and contusions; 14 from gunshot wounds; 14 from cuts or stabs; 533 from burns or scalds—248 males and 285 females; 25 from poisoning; 466 from drowning—391 males and 75 females; 50 from suffocation—38 males and 12 females. Eighteen of the persons whose deaths were caused by suffocation had not attained the age of 12 months. In 123 instances the nature of the accident which caused death was not stated.

143 deaths from homicide were registered.

87 persons—68 males and 19 females—committed suicide, or 15 out of every 1,000,000 of the estimated population died by their own hands.

Of the men who committed self-destruction, 8 were returned as having died from gunshot wounds; 18 from cut or stab; 4 from poison; 10 from drowning, and 18 from hanging. Of the female suicides, the act was committed in 2 instances by cut or stab; 1 by poison; 9 by drowning, and 5 by hanging. In 12 instances the means of self-destruction was not stated in the returns—(10 males and 2 females).

In 79 instances of violent deaths it was not stated in the returns whether the death was accidental, suicidal, or homicidal, and consequently these deaths could not be classed in the tables.

In 367 cases of sudden death the cause was not ascertained.

The cause of death was unspecified or ill-defined in 2,625 instances, or 1 in 33 of the total deaths, showing a still further improvement in the returns, as in the year preceding the number of ill-defined or unspecified cases was in the proportion of 1 in 31 of the total deaths registered.

I have the honour to be,
Sir,
Your obedient servant,
W. M. BURKE.

To
The Registrar-General.

COPY of CIRCULAR relating to REGISTRATION of MARRIAGES celebrated by the ROMAN CATHOLIC CLERGY, 26 and 27 Vic., cap. 90.

General Register Office, Dublin,
31*st December*, 1863.

SIR,

I request you will furnish each Parish Priest within your District—who may apply to you for the same—with *six blank* Forms of Certificates of Marriage, which you will carefully take from the Certificate Book forwarded to you, and also with *six* of the printed Envelopes, addressed to "The Registrar of Births, Deaths, and Marriages."

By this course—which has been strongly recommended to me by many Dignitaries of the Roman Catholic Church, and approved of by the Law Officers of the Crown—the convenience of the Catholic Population, especially those of the poorer classes, will be greatly promoted in regard to the Registration of their Marriages.

A *further supply* of Certificates *will be forwarded on your application*—from which *blank Forms* will be furnished by you, from time to time, to those Parish Priests within your District who may require them. You will request each Rev. Gentleman obtaining the Certificates, to give you a receipt for them (on the accompanying Forms), in order that you may be able to account to me for all the Certificates intrusted to your care; and you will furnish me, at the end of each month, with the Names and Addresses of those Clergymen to whom you supply them. You will observe they are on *Water-marked* paper, with the words "Certificate of Marriage" printed thereon.

I beg to say that I feel assured you will discharge the duties of your office with zeal, discretion, and courtesy, and thus largely contribute to the success of the very Important Measures, in the carrying out of which you have so readily undertaken to assist by accepting the office of Registrar.

I am, Sir,
Your obedient Servant,
WILLIAM DONNELLY,
Registrar-General.

To the
Registrar of Births, Deaths, and Marriages,
District of——

* Thus, the number of Marriages in the Abbeyleix Superintendent Registrar's District may at once be ascertained by referring in the "*Abstract of Marriages*" to the Superintendent Registrar's District, numbered 75 (*see* page 4), and in like manner the number of Births and Deaths, of Deaths at different ages, &c., will be found by referring to the same Superintendent Registrar's District Number in the appropriate Tables.

INDEX OF REGISTRARS' DISTRICTS.

[The Number against each Registrar's District in the Third Column refers to the order in which it appears in the Arrangement of the Districts in the Tables of Abstracts; thus Abbey (120 : 4) is the 4th Registrar's District of the Tuam Superintendent Registrar's District, No. 120.]

Copy of Circular relating to Registration of Roman Catholic Marriages, ... 131

Index of Superintendent Registrars' Districts, and of Registrars' Districts, . . . 132–138

REPORT

TO

His Grace, JAMES, DUKE OF ABERCORN, K.G., &c., &c., &c.,
Lord Lieutenant-General and General Governor of Ireland.

MAY IT PLEASE YOUR GRACE,—

As directed by the provisions of the 26 Vic., cap. 11, sec. 49, the 26 & 27 Vic., cap. 90, sec. 16, and the 7 & 8 Vic., cap. 81, sec. 56, I have the honour to transmit to your Grace, in order that the same may be laid before Parliament, General Abstracts of the Births, Deaths, and Marriages registered in Ireland during the year 1871.

A General Abstract of the number of Births, Deaths, and Marriages, registered in the year 1871, was presented to Parliament in the Session of 1872. The Report now submitted contains detailed tables of the Ages and Condition of persons Married; of Births, distinguishing legitimate from illegitimate; and of Deaths, and their Causes.

The Acts for the Registration of Births and Deaths, and Roman Catholic Marriages, came into operation on the 1st of January, 1864, but that for the Registration of Protestant Marriages of all denominations has been in force since the 1st of April, 1845.

For the purposes of Registration, the country has been divided into 163 Superintendent Registrars' Districts—co-extensive with the Poor Law Unions—and into 790 Registrars' Districts, which, with a few exceptions, are of equal extent with the Dispensary Districts formed under the Medical Charities Act.

GENERAL SUMMARY.

The *estimated* population of Ireland in the middle of 1871 was 5,395,007 the persons whose marriages were registered during the year, amounted to 57,920, the number of marriages being 28,960; children born alive whose births were registered, amounted to 151,355; and the number of deaths registered was 88,348. The emigrants from Ireland during the year 1871 amounted to 71,240. In the previous year—1870—there were *registered* 28,667 marriages, 149,846 births, and 90,462 deaths; the number of emigrants was 74,855.

MARRIAGES.

28,960 marriages were registered in Ireland during 1871, being in the proportion of 1 marriage to every 186 of the *estimated* population. The ratio in England in the same year was 1 in 120.

743 men and 3,835 women contracted marriage before they had

ıttained their twenty-first year. The proportion of males married under ıge was 2·57; of females, 13·24 per cent. The proportions in England ınd Wales in 1871 were—males, 7·9, and females, 22 per cent.

Of widowers, 3,148, and of widows, 1,708 were re-married; the proporıion to the total marriages being 10·87 per cent. of widowers, and 5·90 ɔer cent. of widows. The corresponding proportions in England and Wales were 13·9 per cent. widowers, and 9·7 per cent. widows.

According to the provisions of the Registration Acts, every registry of marriage is required to be signed by the parties married, two witnesses, ınd the officiating clergyman. A test of the elementary education of he persons contracting marriage is thus afforded by comparing the ıumber who write their names in the registers, with the number who ıake a mark. Of 57,920 persons married in 1871, 23,954 (10,858 men ınd 13,096 women) signed the registers with marks; being in the proporıion of 41·36 per cent.—37·49 per cent. of the males, and 45·22 per cent. f the females married.

The corresponding rates in England and Wales for the same year were 9·4 per cent. of males, and 26·8 per cent. of females.

In Ireland, the marriage register was signed by mark by both parties ı 8,850, and by one or other of the persons married in 6,254 instances—ıus in 15,104, or 52·2 per cent. of the total number of marriages regisɔred, one or both of the persons married signed by mark.

The marriage registers contain a column in which the age of each of he parties married is inserted; but as the law only requires it to be tated whether the parties are "of full age" or "minors," the precise age t marriage is not always entered in the registers. In 1871 the exact ages f both parties were given in 9,743 instances. Of these 8,763 were achelors, and 9,259 spinsters; 980 were widowers, and 484 widows. 'he largest number of wives married between the ages of 21 and 30—the umber being 5,946, or more than one-half of the whole number whose ges are recorded. The largest number of husbands—5,646—also married etween 21 and 30 years of age.

268 bachelors were married to widows, both of whose ages at the time f marriage are recorded. 142 of these widows and 133 of the bachelors ıarried between 25 and 35 years of age. 764 of the marriages in which he ages of both parties were recorded, were between widowers and pinsters, 408 of the former being between the ages of 30 and 45, and ·24 of the latter between 21 and 35.

Of widowers and widows married, whose ages at the time of marriage ɔre stated, there were 216 couples. Of these the largest number of widows vere between 35 and 45, and of widowers between 45 and 55.

With respect to Roman Catholic Marriages, the 26 & 27 Vic., cap.)0, directs that parties about to contract marriage shall produce to he clergyman celebrating the marriage a certificate, to be procured ırom the Registrar, filled up as far as possible by that officer with the particulars necessary to be registered, which certificate the parties married, the witnesses, and the officiating clergyman are required to sign. When so filled up the certificate is to be returned within three days to the Registrar by the husband, under a penalty of ten pounds.

With a view to facilitate the registration of marriages under the Act referred to, and at the special request of several dignitaries of the Roman Catholic Church,—with the approval of the Law Officers of the Crown—

(who at that time were the Right Hon. Thomas O'Hagan, M.P., and James A. Lawson, esq., Q.C.)—I instructed the District Registrars to furnish to each parish priest, who should apply for them, forms of certificate to be duly filled, signed, and forwarded to the Registrar on the occasion of a marriage, thus saving the husband the inconvenience of procuring from the Registrar a form of certificate *previous* to his marriage, as required by the Statute.* I also furnished all the Roman Catholic clergy in Ireland with copies of the Act above referred to, in order that the requirements of the law might be known to them previous to the Act coming into operation.

The number of marriages; proportion per cent. of persons married who wrote their names in the registers, of minors, of widowers, and of widows, are given in the following table, for the several registration divisions:—

TABLE I.—*The Number of Marriages in the Eight Divisions of Ireland during the years* 1864–71, *and proportion per cent. of Persons who signed their Names, of Persons not of Full Age, and of Re-marriages.*

		1871	4,497	60·8	51·4	2·45	14·81	11·41	6·85

The extent and position of each of these divisions are specified at p. 30.

Of the total number of marriages (28,960) registered in 1871, 20,942 were celebrated by Roman Catholic clergymen, and entered in the register books by the Registrars in accordance with the 26th and 27th Vic., cap. 90; and 8,018 marriages were of members of the various Protestant persuasions. Of the latter marriages 4,205 were in churches and chapels of the late Established Church, 2,805 in Presbyterian Meeting-houses, 294 in "Registered Buildings," 697 in the Registrars' offices, 14 according to the usages of the Society of Friends, and 3 marriages were of members of the Jewish persuasion.

Of the entire number of marriages in 1871 there were contracted in

the quarter ending the last day of March, 11,815; of June, 5,674; of September, 5,313; of December, 6,158.

The following table gives a statement showing in continuation of the return in my report for 1870, the number of marriages solemnized in Ireland under the Marriages Act of 1844, distinguishing the mode of celebration:—

TABLE II.—*The Number of Marriages registered under 7 & 8 Vic., c. 81, in each Year, from 1st April, 1845, to 31st December, 1871, and the Mode in which the Marriages were solemnized.*

Years ended 31st December	Marriages. According to the Rites of the late Established Church.						Not according to the Rites of the late Established Church.						Total Marriages registered under 7 & 8 Vic., cap. 81.

There is not any return made to me of the places of worship belonging to Roman Catholics, in which marriages are celebrated; but under the provisions of the 7th & 8th Vic., cap. 81, I am enabled to state respecting other religious persuasions, that there were 1,502 Churches and Chapels of the late Established Church, 590 registered Presbyterian Meeting-

* The 7 & 8 Vic., c. 81, came into operation 1st April, 1845.

† The increase in the number of marriages by Special Licence and in those on Registrar's Certificate in 1871 is caused by the provisions of sections 36 and 38 of "The Matrimonial Causes and Marriage Law (Ireland) Amendment Act, 1870."

houses, and 236 Registered Buildings belonging to various denominations, in which marriages might lawfully be solemnized, on the 31st December, 1871. During the year 1871 there was an increase of 10 in the number of such places in the late Established Church; of 5 in the Presbyterian Church; and of 5 in other religious communities. The "Registered Buildings" belong to the following denominations:

Denominations.	No. of Places of Worship.	Denominations.	No. of Places of Worship.
Wesleyan Methodists, . .	136	Methodists New Connexion, .	6
Reformed Presbyterians, . .	34	Church Methodists, . .	1
Independents, ...	20	Covenanters, ...	1
Baptists, ...	13	Evangelical Union, . . .	1
Seceders, ...	11	United Original Seceders, .	1
United Presbyterians, . .	7		
Moravians, or United Brethren,	5	Total, . .	236

The following Table shows by Divisions and Registrars' Districts the number of places of worship in which marriages (under the 7 & 8 Vic., cap. 81,) may be solemnized in each District or Union, distinguishing the religious denominations:—

TABLE III.—*The Number of Churches and Chapels of the late Established Church, of Registered Presbyterian Meeting Houses, and of Registered Buildings, by Divisions and Registrars' Districts:—*

During the year 1871 there were issued by the Registrars, 747 Licences for Marriage in Registered Buildings and in the Registrars' offices.

The number of Marriage Licences issued by the licensing Ministers of the several Presbyterian bodies is given in the following summary:—

Presbytery or Synod.	Number of Licensing Ministers on 31st December, 1871.	Number of Registered Meeting-houses on 31st December, 1871.	Number of Licences issued.
1. General Assembly of the Presbyterian Church in Ireland,	127	549	2,658
2. Remonstrant Synod of Ulster,	8	21	35
3. Presbytery of Antrim,	4	10	56
4. United Presbytery or Synod of Munster,	4	4	1
5. Northern Presbytery of Antrim,	1	6	11
Total,	144	590	2,761

BIRTHS.

The births registered in Ireland during 1871, amounted to 151,355. Of these, 77,314 were males, and 74,041 females, being in the proportion of 104 boys to every 100 girls. In England also, in the same year, the number of males to 100 females whose births were registered was 104.

The rate per cent. of births to the *estimated* population was 2·805, or 1 in 36 of the population. In England the rate per cent. was 3·50.

There were 4,150 illegitimate births, of which 2,150 were those of males, and 2,000 females; the proportion to the total number of births being 2·7 in every 100. The rate in England was 5·6 per cent. In Ireland, the highest rates, 5·2 and 3·3, of illegitimate children in every 100 born, occurred in the North-Eastern and South-Eastern Divisions respectively.

The following table shows the proportion of legitimate and illegitimate births *registered* in each of the eight Divisions in 1867, 1868, 1869, 1870, and 1871.

TABLE IV.—*The Per-centage of Legitimate and Illegitimate Births registered in Ireland during the years* 1867, 1868, 1869, 1870, *and* 1871, *by Divisions.*

41,615 births were registered during the quarter ended 31st March; 40,768 in that ended 30th June; 34,022 during that ended 30th September; and 34,950 in that ended 31st December.

DEATHS.

The deaths registered in 1871 amounted to 88,348—44,233 males, and 44,115 females—being in the proportion of 1·638 per cent. of the *estimated* population, or in the ratio of 1 *registered* death to every 61 persons. The proportion in England for the same year was 2·26 per cent., or 1 in 44.

The following table shows the per-centage of mortality at different ages:—

TABLE V.—*The Mortality per Cent. at each Age-period, according to the Registration of Deaths in Ireland, during the Years* 1864–1871, *by Sexes.*

	1869	26·02	4·02	2·49	6·39	6·72	5·68	7·04	11·56	14·18	11·34	3·80	·76
	1870	25·88	3·74	2·33	6·34	6·75	5·68	6·96	11·60	14·71	11·35	3·85	·81
	1871	25·56	3·52	2·32	6·87	6·98	5·98	6·92	11·62	14·33	11·23	3·91	·76

Of the persons whose deaths were registered during the year 25·56 in every 100 were children under 5 years old—27·25 per cent. of the males and 23·85 per cent. of the females. 14·99 per cent. of the men, and 16·81 per cent. of the women, whose deaths were registered had passed their 75th year. 63 of the males and 89 of the females in every 10,000 were stated in the returns to have been over 95 years of age.

26,420 deaths were registered during the first quarter of the year; 22,260 during the second; 17,451 during the third; and 22,217 during the fourth quarter.

EMIGRATION.

According to the Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several seaports, the number of emigrants who left Ireland during the year 1871 amounted to 71,240; of these 41,358 were males and 29,882 females. Of the whole number, 15,850 were from Leinster; 13,199 from Munster; 28,066 from Ulster; and 9,049 from Connaught: 5,076 persons did not state the county or province to which they belonged.

Of the emigrants in 1871, 11·9 per cent. were under 15 years of age; 76·4 per cent. were 15 to 35 years old; 10·9 per cent. were 35 and upwards; and the ages of 0·8 per cent. were not specified in the returns.

METEOROLOGY.

The following is an abstract of the Meteorological Observations taken during the year 1871 at the Ordnance Survey Office,* Phœnix Park, Dublin, furnished by Lieutenant-Colonel Wilkinson, R.E., by direction of the Superintendent of the Ordnance Survey.

The barometer was highest during the year at 9.30 P.M. on 28th March, when it stood at 30·603 inches, wind E.N.E.; it was lowest on 15th January, at 9.30 P.M., wind S.E., when it registered 28·423 inches.

The highest temperature in the air was 81·9°, on 10th August, and the lowest was 23·5°, on 4th December.

Rain or snow fell on 176 days during the year. The total amount registered was 28·252 inches. The greatest rain-fall in twenty-four hours was 1·160 inches, on 26th September, wind E.

The prevailing wind was the W., from which point it blew on 107 days; it blew from S.W. on 57 days; from S. on 46 days; from E. on 43 days; from S.E. on 30 days; from N. on 24 days; from N.W. on 21 days; from N.E. on 9 days; and the air was calm on 28 days, at 9.30 A.M. The total pressure of W. wind was 238·00 lbs. per square foot, giving an average of 2·22 lbs. for each day. The strongest wind was from S.W., on 18th December, when the pressure was 16 lbs. per square foot.

* Latitude 53° 21′, 44·65″, north; longitude 6° 21′, 6·35″, west. Height above the sea 158·8 feet. The barometrical readings have been corrected for altitude, and reduced to 32° Fahrenheit.

I beg here to repeat the observations made in my former Reports, with respect to the working of the Acts for the Registration of Births, Deaths, and Marriages in Ireland, as I regret to state that the numbers of these events registered in 1871 do not show much improvement compared with previous years:—

"In several instances prosecutions have been resorted to with some advantage; but notwithstanding the exertions made to induce a general compliance with the law throughout the country, numerous cases of neglect to register births and deaths have been reported to me by the District Registrars, but frequently at too late a period after their occurrence to allow of the parties being proceeded against at the Petty Sessions.

"I regret to add that the registration of marriages under the 26th & 27th Vic., cap. 90, is not at all satisfactory in some Districts, owing to the Clergy who have celebrated the marriages having declined to sign the necessary certificates.

"The marriages solemnized under the provisions of the 7th & 8th Vic., cap. 81, which came into operation in 1845, are, I believe, all registered.

"The following are the ratios of Births, Deaths, and Marriages to population in different countries compared with the ratio in Ireland in 1864 [and in 1865, 1866, 1867, 1868, 1869, 1870, and 1871]:—

Countries.	Ratio to Population.		
	Births.	Deaths.	Marriages.

"It will be seen from the foregoing figures, compiled from the Statistical Tables published by the Board of Trade, how incomplete was Registration in Ireland in 1864, and comparing the number of Births, Deaths, and Marriages recorded in that year with those since annually registered, I regret to state that there appears but little improvement in the subsequent years:—

Registered	1864.	1865.	1866.	1867.	1868.	1869.	1870.	1871.
Births,	136,414	144,970	146,090	144,388	146,051	145,659	149,846	151,355
Deaths,	93,144	93,154	93,027	93,503	86,185	89,593	90,462	88,348
Marriages,	27,406	30,802	30,121	29,742	27,699	27,277	28,667	28,960."

Following this Report are summaries of the Quarterly Reports issued in 1871, and the Appendix contains a letter addressed to me by Dr. Burke, the Superintendent of Medical Statistics, respecting the causes of death—to which I beg to refer.

I have the honour to be
Your Grace's very faithful servant,

WILLIAM DONNELLY,
Registrar-General.

GENERAL REGISTER OFFICE,
CHARLEMONT HOUSE,
Dublin, 7th April, 1874.

SUMMARY OF THE QUARTERLY REPORTS, 1871.

Quarterly Reports.

First Quarter.

First Quarter—January, February, March.

Marriages.—There were 11,815 marriages *registered* in Ireland during the first quarter of 1871, a number affording an annual ratio of 1 in every 114, or ·876 per cent. of the *estimated* population. The average number of marriages registered in the corresponding quarter of the years 1866–70 was 11,708.

Births.—The births registered during the first quarter of the year 1871 amounted to 41,615—21,154 boys and 20,461 girls—affording an annual ratio of 1 in every 32·4, or 3·09 per cent. of the *estimated* population. The average number of births registered during the corresponding quarter of the previous five years was 38,856.

Deaths.—There were 26,420 deaths—13,069 males, and 13,351 females—*registered* during the quarter, affording an annual ratio of 1 in 51·1, or 1·96 per cent. of the *estimated* population. The average number *registered* during the first quarter of the preceding five years was 27,514.

Emigration.—According to the returns obtained by the Enumerators, the number of emigrants who left the ports of Ireland, during the quarter ended 31st March, 1871, amounted to 11,355—7,425 males and 3,930 females. The average number of emigrants during the corresponding quarter of the preceding five years was 15,152.

PRICES OF PROVISIONS, AND PAUPERISM.

The average price of Messrs. Manders and Co.'s 4-lb. loaf for the quarter ended 31st March, 1871, was 7½*d.*, being 1½*d.* dearer than it was during the corresponding period of 1870.

At the Dublin Corn Exchange the average price of oatmeal for the quarter was 15*s.* 2*d.* per cwt.; during the first quarter of 1870 it was 14*s.* 3*d.*; in the corresponding period of 1864 it was only 11*s.*

At the Dublin Potato market the average prices of potatoes during the quarter ranged from 3*s.* 1*d.* to 5*s.* 6*d.* per cwt., against 3*s.* 9*d.* to 4*s.* 8*d.* in the corresponding quarter of the preceding year; the average prices for the first quarter of 1864 were only 2*s.* 6*d.* to 3*s.* 3*d.*

The average prices of beef at the Dublin Cattle Market during the quarter were 60*s.* to 73*s.* 6*d.* per cwt., against 54*s.* 6*d.* to 66*s.* 6*d.* in the corresponding period of 1870; for the first quarter of 1864 the average prices were 51*s.* 6*d.* to 64*s.* 6*d.*

The following statement shows the average prices of the foregoing articles of food in Dublin *during the first quarter* of the years 1864–71:—

Years.	Bread (Messrs. Manders & Co.'s 4 lb. loaf).	Oatmeal (Corn Exchange), per cwt.	Potatoes (at Potato Market), per cwt.	Beef (at Dublin Cattle Market), per cwt.
	d.	*s.* *d.*	*s.* *d.* to *s.* *d.*	*s.* *d.* to *s.* *d.*
1864 (1st quarter),	6	11 0	2 6 to 3 3	51 6 to 64 6
1865 „	5½	11 9	3 1 to 3 7	54 6 to 68 0
1866 „	6½	14 10	2 6 to 3 6	50 6 to 63 6
1867 „	8	16 1	4 5 to 5 7	53 0 to 70 0
1868 „	9	16 10	4 6 to 5 2	49 6 to 63 6
1869 „	7	15 8	3 5 to 4 10	54 6 to 70 0
1870 „	6	14 3	3 9 to 4 8	54 6 to 66 6
1871 „	7½	15 2	3 1 to 5 6	60 0 to 73 6

The average number of persons in Ireland receiving in-door relief on Saturdays during the first quarter of 1871 was 52,096, against 55,867 for the corresponding period of 1870.

Quarterly Reports.

First Quarter.

The average weekly number of persons receiving out-door relief during the quarter was 24,748, against 21,727 during the first quarter of 1870.

Of the persons receiving in-door relief during the first quarter of 1871, an average number of 513 in each week were located in Asylums for the Blind and the Deaf and Dumb, and in Extern Hospitals; in the corresponding quarter of 1870 the average weekly number was 497.

THE WEATHER.

The mean height of the barometer at the Ordnance Survey Office, Phœnix Park, Dublin, during the first quarter of the year 1871 was 29·881 inches, against an average of 29·747 inches for the corresponding quarter of the preceding five years; the highest reading (30·603) was on the 28th March, at 9.30 P.M., wind E.N.E.; and the lowest (28·423) on the 15th of January, at 9.30 P.M., wind S.E.

The mean temperature of the air during the quarter was 42·9°, against an average of 41·8° for the corresponding period of the preceding five years; the maximum temperature (67·1°) was on the 24th March, and the minimum (25·8°) on the 25th January.

Rain or snow fell on 36 days during the quarter. The rain-fall measured 6·917 inches; the average amount for the first quarter of the previous five years was 6·889 inches. The greatest monthly rain-fall during the quarter was in January, when 3·771 inches were registered.

It blew on 23 days from W., on 19 days from S.W., on 10 days from S., on 9 days from E., on 7 days from N.W., on 5 days from S.E., on 2 days from N., on 1 day from N.E., and the air was calm on as many as 14 days, at 9.30 A.M.

HEALTH OF THE PEOPLE.

The state of the public health during the quarter was, with some exceptions, satisfactory. The harsh easterly winds proved very fatal to the aged and infirm, and the principal mortality was due to pulmonary affections. Small-pox, which prevailed to an alarming extent in England, made its appearance in about twenty districts of the country. In almost all the cases the infection could be traced to English or Scotch sources. In the month of January an English recruit was admitted into the General Military Hospital, Phœnix Park, labouring under small-pox. A female servant (with bad marks of vaccination) employed in the hospital was attacked with the disease, which assumed a confluent form. She was removed to the Mater Misericordiæ Hospital, and ultimately recovered. The number of small-pox cases treated in the Mater Misericordiæ Hospital up to the 24th of March amounted to 16, of these 7 were confluent, the others modified; two of the Sisters of Mercy, four students, a ward maid, and the cook contracted the disease; all recovered.

The Registrars generally reported most favourably of the working of the Compulsory Vaccination Act, and the beneficial results were manifest. The poorer classes who formerly entertained the strongest prejudices against vaccination, became most anxious to have the operation performed on their children. Nay, more the number of adults vaccinated and revaccinated within the three months was very considerable.

Scarlet fever was not so prevalent as usual; in some places, however, it proved very fatal. Thus in the Annamoe District, Rathdrum Union, 9 of the 22 deaths registered during the quarter resulted from this disease. In the Summerhill District, Trim Union, 7 of the 31 deaths registered were ascribed to scarlet fever. Six deaths from scarlet fever occurred in the Roosky District, Strokestown Union. The Registrar made the following report,—"Scarlet fever was the most prevalent disease during the quarter, in fact it has spread through the whole district; young

Quarterly Reports.
First Quarter.

and old have suffered much from its ravages and were it not for the exertions of the medical officer I am sure the death-rate would have been much heavier."

Some of the Registrars referred to the presence of fever, croup, measles, and whooping cough in their districts. The Registrar of Ballinakill District, Abbeyleix Union, reported the death of a man, aged 70 years, from typhus.

The number of old people (as before stated) whose deaths were registered during the quarter was very large, and if the information as to the great ages attained can be relied upon, the Irish people must be singularly long-lived.

Over 20 are said to have attained the age of 100 years, of these 11 had exceeded the 100th year, 1 was registered as 112 years, 1 as 110 years, 1 as 109, 2 as 108, 3 as 107, &c., &c.

While some of the Registrars reported favourably as to the improvements in the sanitary condition of their districts, many more referred to the prevalence of disease as induced by the total want of all sanitary administration and the filthy habits of the people.

NUMBER OF MARRIAGES, BIRTHS, AND DEATHS, REGISTERED IN EACH OF THE PROVINCES.

Marriages.—Grouping the Unions or Superintendent Registrars' Districts by Provinces, it will be observed from the following table that there were 2,581 marriages registered in the province of Connaught during the first quarter of 1871, affording an annual ratio of 1 marriage in every 81 of the population; and in Munster 4,289, affording a ratio of 1 in 82; whereas in Ulster the ratio was only 1 in 161; and in Leinster, 1 in 158. As has been remarked in former reports, the first quarter of the year is much the most favoured by the Roman Catholic population for marriage; this fact accounts for the great difference between the marriage-rates in Connaught and Munster, and those in Ulster and Leinster.

The following Table shows, by PROVINCES, *the number of Marriages registered during the* FIRST *quarter of the years* 1869, 1870, *and* 1871, *together with the annual ratio to the estimated Population.*

REGISTRATION PROVINCES.	MARRIAGES.					
	Quarter ending 31st March,					
	1869.		1870.		1871.	
	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.

CONNAUGHT, ...	2,115	„ 101	2,583	„ 81	2,581	„ 81
TOTAL, ...	10,181	1 in 134	11,958	1 in 113	11,815	1 in 114

Births.—Of the 41,615 births *registered* in Ireland during the first quarter of 1871, 8,966 occurred in Leinster, affording a ratio of only 1 in 37 of the estimated population. In Munster the number *registered* was 11,739; in Ulster, 13,714; and in Connaught, 7,196, affording respectively an annual ratio of 1 in 30, 34, and 29 of the estimated population.

Quarterly Reports.

First Quarter.

The following Table shows, by PROVINCES, *the number of Births and Deaths registered during the* FIRST *quarter of the years* 1869, 1870, *and* 1871, *together with the ratio to the estimated Population.*

Registration Provinces.	Births.						Deaths.					
	Quarter ending 31st March,						Quarter ending 31st March,					
	1869.		1870.		1871.		1869.		1870.		1871.	
	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.
Leinster, .	8,586	1 in 39	8,766	1 in 38	8,966	1 in 37	7,042	1 in 48	7,782	1 in 42	7,246	1 in 45
Munster, .	10,731	33	11,149	32	11,739	30	6,629	53	7,041	50	6,884	51
Ulster, . .	12,959	36	13,506	34	13,714	34	9,396	49	9,808	47	8,913	52
Connaught, .	6,319	34	6,349	33	7,196	29	3,220	66	3,603	58	3,377	62
Total, .	38,595	35	39,770	34	41,615	32	26,287	52	28,234	48	26,420	51

Deaths.—Whilst the births *registered* in the province of Leinster, during the quarter ending 31st March, 1871, afforded the *lowest* ratio, the deaths *registered* give the *highest* rate of mortality, the number being 7,246, equal to an annual ratio of 1 in 45. In Munster the number *registered* was 6,884. yielding a ratio of 1 in 51; in Ulster, 8,913, or 1 in 52; and in Connaught, 3,377, or 1 in 62 of the estimated population.

Second Quarter.—April, May, June.

Second Quarter.

Marriages.—The number of marriages *registered* in Ireland during the second quarter of 1871 amounted to 5,674, equal to an annual ratio of 1 in every 238, or ·421 per cent. of the *estimated* population. The average number *registered* in the corresponding period of the preceding five years was 5,436.

Births.—The births *registered* during the second quarter of 1871 amounted to 40,768—20,821 boys and 19,947 girls—affording an annual ratio of 1 in every 33·1, or 3·02 per cent. of the *estimated* population. The average number of births registered during the corresponding quarter of the preceding five years was 39,941.

Deaths.—There were 22,260 deaths—11,200 males and 11,060 females—*registered* during the quarter, affording an annual ratio of 1 in 60·6, or 1·65 per cent. of the *estimated* population. The average number *registered* during the second quarter of the previous five years was 23,700.

Emigration.—According to the returns obtained by the Enumerators, the number of emigrants who left the ports of Ireland during the quarter ended 30th June, 1871, amounted to 32,709—18,767 males and 13,942 females. The average number of emigrants during the corresponding quarter of the preceding five years was 33,187.

PRICES OF PROVISIONS, AND PAUPERISM.

The average price of Messrs. Manders and Co.'s 4-lb. loaf for the quarter ended 30th June 1871, was 7½*d.*, which was 1*d.* higher than the average price for the corresponding period of 1870.

At the Dublin Corn Exchange the average price of oatmeal for the quarter was 15*s.* per cwt.; during the second quarter of the preceding year it was 15*s.* 2*d.*; in the corresponding period of 1864 it was only 10*s.* 6*d.*

Quarterly Reports.

Second Quarter.

At the Dublin Potato market the average prices of potatoes during the quarter ranged from 2*s.* 7*d.* to 5*s.* 2*d.* per cwt., against 3*s.* 10*d.* to 5*s.* 1*d.* in the corresponding quarter of 1870; the average prices for the second quarter of 1864 were only 2*s.* 11*d.* to 3*s.* 8*d.*

The average prices of beef at the Dublin Cattle market during the quarter were 60*s.* to 77*s.* 6*d.* per cwt., against 54*s.* 6*d.* to 68*s.* 6*d.* in the corresponding period of 1870; for the second quarter of 1864 the average prices were 53*s.* to 65*s.* 6*d.*

The following statement shows the average prices of the foregoing articles of food, in Dublin, *during the second quarter* of the years 1864–71:—

Years.	Bread (Messrs. Manders & Co.'s 4-lb. loaf).	Oatmeal (Corn Exchange), per cwt.	Potatoes (at Potato Market), per cwt.	Beef (at Dublin Cattle Market), per cwt.
	d.	*s.* *d.*	*s.* *d.* to *s.* *d.*	*s.* *d.* to *s.* *d.*
1864 (2nd quarter),	6	10 6	2 11 to 3 8	53 0 to 65 6
1865 „	6	14 1	3 2 to 3 11	55 0 to 67 6
1866 „	6½	15 8	3 1 to 3 11	58 0 to 72 6
1867 „	8	18 5	5 3 to 6 6	53 6 to 70 6
1868 „	9	18 3	4 8 to 5 6	54 6 to 67 0
1869 „	6½	15 6	3 0 to 4 11	56 6 to 74 0
1870 „	6½	15 2	3 10 to 5 1	54 6 to 68 6
1871 „	7½	15 0	2 7 to 5 2	60 0 to 77 6

The average number of persons in Ireland receiving in-door relief on Saturdays during the second quarter of 1871, was 45,991 against 50,168 for the corresponding period of 1870.

The average weekly number of persons receiving out-door relief during the quarter was 24,466, against 21,614 during the second quarter of 1870.

Of the persons receiving in-door relief during the second quarter of 1871 an average number of 524 in each week were located in Asylums for the Blind and the Deaf and Dumb, and in Extern Hospitals; in the corresponding quarter of 1870 the average weekly number was 503.

THE WEATHER.

The mean height of the barometer at the Ordnance Survey Office, Phœnix Park, during the second quarter of 1871 was 29·946 inches, against an average of 29·846 inches for the corresponding quarter of the preceding five years; the highest reading (30·409 in.) was on the 7th May, at 9.30 P.M., wind E.; and the lowest (29·060 in.) on the 19th April, at 3.30 P.M., wind S.S.W.

The mean temperature of the air during the quarter was 52·5°, against an average of 52·4° for the corresponding period of the preceding five years; the maximum temperature (76·4°) was on the 30th May, and the minimum (27·5°) on the 7th April.

Rain fell on 42 days during the quarter. The rain-fall measured 6·095 inches; the average amount for the second quarter of the previous five years was 5·258 inches. The greatest monthly rain-fall during the quarter was in April, when 3·374 inches were registered.

It blew on 22 days from W., on 18 days from E., on 12 days from N., on 10 days from S.E., on 8 days from N.W., on 7 days from S., on 5 days from S.W., on 3 days from N.E., and the air was calm on 6 days at 9.30 A.M.

HEALTH OF THE PEOPLE.

The state of the public health during the quarter was, on the whole, satisfactory. The number of deaths registered was 1,440 below the average of the corresponding period of the previous five years, and 1,050 less than in the second quarter of 1870.

Quarterly Reports.

Second Quarter.

The majority of the Registrars reported favourably as to the healthfulness of their districts, and the comparative immunity from epidemic disease.

As small-pox was epidemic in Great Britain, and no quarantine regulations had been adopted to prevent the importation of the disease, fatal cases occurred in various parts of the country.

Twenty-nine of the Registrars reported the presence of small-pox in their several districts. In Longford two fatal cases of small-pox occurred, they were "attacked immediately after their arrival from Dublin. The disease extended no farther." In Dundalk "about 13 families have been attacked, and there have been 5 fatal cases registered, 1 in the workhouse, and 4 in the town—1 young man aged 20; *said* to have been vaccinated; 1 young girl aged 17, ditto; 1 little girl aged 10, ditto; 1 child at workhouse, aged 7 months, not known; and 1 child, 3 months, unvaccinated."

At Queenstown "there were three deaths from small-pox during the quarter; the disease was imported in ships outward bound from Liverpool. As far as could be ascertained, none of the persons had been vaccinated." In Carlow "one case of small-pox is reported in which the patient passed through the illness favourably and recovered. *The disease in this instance was imported from Liverpool through the medium of some clothes worn by a victim to the malady.*" The Poor Law Medical Officers showed a praiseworthy zeal in carrying out the provisions of the Compulsory Vaccination Act.

As before stated, there was a general absence of epidemic disease. In some districts scarlet fever prevailed, especially in those where sanitary laws were ignored.

Very many of the deaths registered during the quarter occurred in persons of extreme old age—the cause of death in one instance in the Oughterard Union was "fracture of femur," age 104 years. In Anascaul district, Dingle—"one death registered of a person at the advanced age of 110 years." In Bandon "an unusual number of persons died at very advanced ages. Mentioning some of the oldest—1 female was 100 years, supposed to be more; another 96, a third 88, and a fourth 80 years of age; the ages of 5 males ranged from 80 to 84 years, whilst of both sexes seven others are registered as between 70 and 80, and several more as approaching 70 years of age." In Mitchelstown "one death has been registered of a person whose age was 100 years, and 1 of a person whose age was 95 years." The Registrar adds—"I believe both to have been a few years more." Of the 52 deaths registered in Castleblayney, "30 were cases where the persons reached ages ranging from 60 to 100 years, and averaging 79 years." In Coolmountain district, Dunmanway Union, "5 of the deaths registered (17) were of persons over 80 years of age, one woman attained the great age of 103 years."

There was in some parts of the country a considerable improvement as regards sanitary arrangements. The numberless complaints of deficient sewerage, imperfect supply of water, &c., merely show that the provisions of the Sanitary Act of 1866 were not carried out. The success of the Compulsory Vaccination Act proves that a law when properly administered will prove effective.

NUMBER OF MARRIAGES, BIRTHS, AND DEATHS REGISTERED IN EACH OF THE PROVINCES.

Marriages.—The number of marriages *registered* in the province of Leinster, during the quarter ended 30th June, 1871, affords an annual ratio of 1 in 195; in Ulster, the ratio was 1 in 207; in Munster, 1 in 301; and in Connaught, 1 in 353.

Quarterly Reports.

Second Quarter.

The following Table shows, by PROVINCES, *the number of Marriages registered during the* SECOND *quarter of the years* 1869, 1870, *and* 1871; *together with the annual ratio to the estimated Population:*—

TOTAL,	39,439	35	40,987	33	40,768	33	24,138	56	23,310	58	22,260	61

Deaths.—The number of deaths *registered* in the province of Leinster during the second quarter of 1871 afforded an annual ratio of 1 in 52; in Munster, the ratio was 1 in 60; in Ulster 1 in 63; and in Connaught, 1 in 74 of the estimated population.

Third Quarter

Third Quarter.—July, August, September.

Marriages.—The number of marriages *registered* in Ireland during the third quarter of 1871 amounted to 5,313, equal to an annual ratio of 1 in every 254, or ·394 per cent. of the *estimated* population. The average number *registered* in the corresponding period of the preceding five years was 5,374.

Quarterly Reports. — Third Quarter.

Births.—There were 34,022 births *registered* in Ireland during the quarter ended 30th September, 1871—17,426 boys and 16,596 girls—representing an annual ratio of 1 in every 39·6, or 2·52 per cent. of the *estimated* population; the average number of births *registered* during the corresponding quarter of the preceding five years was 34,142.

Deaths.—The deaths *registered* in Ireland during the third quarter of the year 1871 amounted to 17,451—8,851 males and 8,600 females—affording an annual ratio of 1 in every 77·3, or 1·29 per cent. of the *estimated* population. The average number *registered* during the corresponding quarter of the previous five years was 18,446.

Emigration.—According to the returns obtained by the Enumerators, the number of emigrants who left the ports of Ireland during the quarter ended 30th September, 1871, amounted to 17,079—9,586 males and 7,493 females—the average number who emigrated during the corresponding quarter of the previous five years was 17,109.

PRICES OF PROVISIONS, AND PAUPERISM.

The average price of Messrs. Manders & Co.'s 4-lb. loaf for the quarter ended 30th September 1871, was 7*d.*, being one halfpenny cheaper than it was during the corresponding period of 1870, and one penny dearer than in the third quarter of 1864.

At the Dublin Corn Exchange the average price of oatmeal for the quarter was 15*s.* 1*d.* per cwt.; in the third quarter of 1870 it was 17*s.* 1*d.*; while in the corresponding quarter of 1864 it was only 10*s.* 8*d.*

At the Dublin Potato market the average prices of potatoes during the quarter ranged from 2*s.* 10*d.* to 4*s.* 8*d.* per cwt., against 3*s.* 8*d.* to 5*s.* 1*d.* in the corresponding period of the preceding year; the average prices for the third quarter of 1864 were only 2*s.* 7*d.* to 3*s.* 10*d.*

The average prices of beef at the Dublin Cattle market during the quarter were 59*s.* to 74*s.* per cwt., against 54*s.* 6*d.* to 68*s.* 6*d.* in the corresponding period of 1870; for the third quarter of 1864 the prices were 51*s.* to 62*s.* 6*d.*

The following statement shows the average prices of the foregoing articles of food in Dublin, *during the third quarter* of the years 1864–71:—

Years.	Bread (Messrs. Manders & Co.'s 4-lb. loaf).	Oatmeal (Corn Exchange), per cwt.	Potatoes (at Potato Market), per cwt.	Beef (at Dublin Cattle Market), per cwt.
	d.	*s.* *d.*	*s.* *d.* to *s.* *d.*	*s.* *d.* to *s.* *d.*
1864 (3rd quarter),	6	10 8	2 7 to 3 10	51 0 to 62 6
1865 „	6	15 3	2 8 to 4 0	56 6 to 67 6
1866 „	6½	15 5	3 8 to 5 2	52 0 to 69 6
1867 „	8	19 4	3 5 to 5 1	50 0 to 66 6
1868 „	8	16 5	4 9 to 6 5	51 0 to 64 6
1869 „	7	16 10	4 10 to 6 8	49 6 to 68 0
1870 „	7½	17 1	3 8 to 5 1	54 6 to 68 6
1871 „	7	15 1	2 10 to 4 8	59 0 to 74 0

The average number of persons in Ireland receiving in-door relief on Saturdays during the third quarter of the year 1871 was 41,332, against 43,751 for the corresponding period of 1870.

The average weekly number of persons receiving out-door relief during the quarter was 23,744, against 20,292 for the third quarter of 1870.

Of the persons receiving in-door relief during the third quarter of the year 1871, an average number of 531 in each week were located in Asylums for the Blind and the Deaf and Dumb, and in Extern Hospitals; in the corresponding quarter of 1870 the average weekly number was 491.

Quarterly Reports.

Third Quarter.

THE WEATHER.

The mean height of the barometer at the Ordnance Survey Office, Phœnix Park, during the third quarter of the year 1871, was 29·904 inches, against an average of 29·903 inches for the corresponding quarter of the preceding five years; the highest reading (30·505 inches) was on the 27th August, at 9.30 P.M., the air being calm; and the lowest (29·103 inches) on the 27th September, at 3.30 P.M., wind E.N.E.

The mean temperature of the air during the quarter was 57·8°, against an average of 58·7° for the corresponding period of the preceding five years; the maximum temperature (81·9°) was on the 13th August, and the minimum (30·0°) on the 22nd September.

Rain or snow fell on 52 days during the quarter. The rain-fall measured 9·982 inches; the average amount for the third quarter of the previous five years was 6·410 inches. The greatest monthly rain-fall during the quarter was in July, when 4·832 inches were registered.

The wind blew on 23 days from W., on 17 from S., on 16 from S.W., on 9 from S.E., on 7 from E., on 5 days each from N., N.E., and N.W., and the air was calm on 5 days, at 9.30 A.M.

HEALTH OF THE PEOPLE.

According to the number of deaths registered during the quarter, the public health was in a satisfactory state. The *registered* deaths showed a decrease of 995 as compared with the average number in the corresponding quarter of the previous five years, and were 758 less than in the third quarter of the year 1870.

Scarlet fever and small-pox were very prevalent during the quarter. Scarlet fever was generally epidemic; 75 Registrars noted the presence of this pestilence in their several districts. The Registrar of the Bridgetown District, Limerick Union, remarked that "scarlatina has been very prevalent during this quarter, and many cases of a very bad form; but though up to this only 7 deaths have been registered (the total deaths were 21), yet I know of, at least, as many more which will be registered in a few days. In some parts of the district it was epidemic; even a great many old people, and people from 20 to 40 years old, have had it." Of the 10 deaths registered in the Killeen District, Dunshaughlin Union, 4 were caused by scarlet fever.

Small-pox was spreading in various parts of the country. Twenty-three of the Registrars reported upon the appearance of the disease in their several districts. Two cases of confluent small-pox were imported into the Forkill District, Newry Union, from Middlesboro'; they both, however, recovered.

Of the 50 cases of small-pox which occurred in Dundalk District, the Registrar recorded 10 deaths.

In the Ravensdale District, Dundalk Union, some cases of small-pox occurred. There was 1 death: "infection imported from England." Two fatal cases of the disease took place in Portrush; of these, 1 was a child (unvaccinated), aged 14 months, recently arrived from Scotland. In the Headford District, Tuam Union, the Registrar reported 20 cases of small-pox, and only 1 death therefrom. Nineteen cases of small-pox were reported from Waterford. The Registrar stated that "all recovered except one, which was directly imported from Liverpool, and complicated with purpura hæmorrhagica. . . . . I attribute the providential escape of this city from the threatened epidemic to the perfect vaccination of all the children in this district, and also to the great amount of revaccination performed on the appearance of the first case of small-pox, and previous to it." An unvaccinated child, aged 3 months, died in the Crumlin District, Antrim Union; *three other children in the same family who had been successfully vaccinated during infancy escaped the disease.*

Quarterly Reports. — Third Quarter.

Fever, especially typhoid, prevailed in some districts. In Tullow District, Carlow Union, "several cases of relapsing fever occurred; 1 only fatal in an aged and broken-down subject." A death from relapsing fever occurred in the Castleblayney District.

Six of the persons whose deaths were registered during the quarter were stated to have been centenarians. The Registrar of Cookstown District observes that "the great ages attained in some cases are very extraordinary. There were registered in the quarter, out of a total of 35, 4 deaths between the ages of 60 and 70 years, 7 between 70 and 80, 2 between 80 and 90, while 2 attained the extreme term of 102 (female) and 108 (male) respectively. I have made careful inquiry respecting these two cases, and have no reason to think the ages are exaggerated; they are both remembered as '*old people*' by individuals long past their climacteric." In the Dervock District, Ballymoney Union, "one death occurred at the advanced age of 105 years (authenticated)."

Improvements in the sanitary condition of certain localities were reported, while some districts appear to have been in a sadly neglected condition. The Registrar of Castlegregory, Dingle Union, states that "scarlatina prevailed at Magharees and in no other part of the district. Some children died from it. The severity which characterized it there may probably be ascribed to the excessive filth of the villages and to the almost total want of good water in every part of that sandy peninsula." Seven other Registrars made reports equally unfavourable as to the sanitary condition of their districts.

NUMBER OF MARRIAGES, BIRTHS, AND DEATHS, REGISTERED IN EACH OF THE PROVINCES.

Marriages.—The number of marriages registered in the province of Leinster during the quarter ended 30th September, 1871, affords an annual ratio of 1 in 184; in Ulster, 1 in 227; in Munster, 1 in 320; and in Connaught, 1 in 514.

The following Table shows, by PROVINCES, *the number of Marriages registered during the* THIRD *quarter of the years* 1869, 1870, *and* 1871, *together with the annual ratio to the estimated Population.*

Deaths.—The deaths *registered* in the Province of Leinster during the quarter ended the 30th September, 1871, represent an annual ratio of 1 in 66; in Munster the ratio was 1 in 78; in Ulster, 1 in 79; and in Connaught, 1 in 99.

Fourth Quarter.—October, November, December.

Fourth Quarter.

Marriages.—There were 6,158 marriages *registered* in Ireland during the fourth quarter of 1871, a number affording an annual ratio of 1 in every 219, or ·457 per cent. of the *estimated* population. The average number of marriages *registered* in the corresponding quarter of the previous five years was 6,183.

Births.—There were 34,950 births *registered* in Ireland during the quarter ended 31st December, 1871—17,913 boys and 17,037 girls—representing an annual ratio of 1 in every 38·6, or 2·59 per cent. of the *estimated* population; the average number of births *registered* during the corresponding quarter of the preceding five years was 33,468.

Deaths.—The deaths *registered* in Ireland during the fourth quarter of the year 1871 amounted to 22,217—11,113 males and 11,104 females—a number affording an annual ratio of 1 in every 60·7, or 1·65 per cent. of the *estimated* population. The average number *registered* during the corresponding quarter of the previous five years was 20,894.

Emigration.—According to the returns obtained by the Enumerators, the number of emigrants who left the ports of Ireland, during the quarter ended 31st December, 1871, amounted to 10,097—5,580 males and 4,517 females. The average number of emigrants during the fourth quarter of the preceding five years was 11,058.

PRICES OF PROVISIONS, AND PAUPERISM.

During the whole of the fourth quarter of 1871 the price of Messrs. Manders and Co.'s 4-lb. loaf was 8*d.*, being one penny higher than the average price in the corresponding quarter of 1870, and 2½*d.* higher than in the fourth quarter of 1864.

The average price of oatmeal in Dublin for the quarter was 15*s.* per cwt., being one penny under the average for the corresponding quarter of 1870. In the fourth quarter of 1864 the average price was 10*s.* 10*d.* per cwt.

Quarterly Reports.

Fourth Quarter.

The average prices per cwt. of potatoes at the Dublin Potato market for the fourth quarter of 1871 were 2*s.* 6*d.* to 4*s.* 4*d.* In the fourth quarter of 1870 the average prices were 2*s.* 10*d.* to 3*s.* 8*d.*, and in the corresponding quarter of 1864 they were 2*s.* 2*d.* to 3*s.* 4*d.*

The average prices of beef at the Dublin Cattle Market during the quarter were from 58*s.* to 70*s.* 6*d.* per cwt., against 54*s.* to 70*s.* 6*d.* in the corresponding quarter of 1870, and 49*s.* 6*d.* to 65*s.* 6*d.* in the fourth quarter of 1864.

The following statement shows the average prices of the above-mentioned articles of food in Dublin *during the fourth quarter* of the years 1864–71 :—

Years.	Bread (Messrs. Manders & Co.'s 4-lb. loaf).	Oatmeal (Corn Exchange), per cwt.	Potatoes (at Potato Market), per cwt.	Beef (at Dublin Cattle Market), per cwt.
	d.	*s.* *d.*	*s.* *d.* to *s.* *d.*	*s.* *d.* to *s.* *d.*
1864 (4th quarter),	5½	10 10	2 2 to 3 4	49 6 to 65 6
1865 „	7	15 1	2 9 to 3 8	50 6 to 63 6
1866 „	7½	15 11	3 1 to 4 11	48 6 to 67 0
1867 „	9	17 4	3 10 to 4 7	45 6 to 62 0
1868 „	7½	16 4	2 11 to 4 7	49 6 to 65 0
1869 „	6½	15 1	2 11 to 4 0	52 6 to 67 0
1870 „	7	15 1	2 10 to 3 8	54 0 to 70 6
1871 „	8	15 0	2 6 to 4 4	58 0 to 70 6

The average number of persons in Ireland receiving in-door relief on Saturdays during the fourth quarter of 1871 was 44,957, against 46,674 for the corresponding period of 1870.

The average weekly number of persons receiving out-door relief during the quarter was 23,878, against 20,640 for the fourth quarter of 1870.

Of the persons receiving in-door relief during the fourth quarter of 1871, an average number of 534 in each week were located in Asylums for the Blind and the Deaf and Dumb, and in Extern Hospitals; in the corresponding quarter of 1870 the average weekly number was 505.

THE WEATHER.

The mean height of the barometer at the Ordnance Survey Office, Phœnix Park, during the fourth quarter of the year 1871 was 29·977 inches, against an average of 29·852 inches for the corresponding quarter of the preceding five years; the highest reading (30·496 inches) was on the 11th December, at 3.30 P.M., wind W.S.W.; and the lowest (29·052 inches) was on the 1st October, at 3.30 P.M., wind W.

The mean temperature of the air during the quarter was 44·6°. The maximum temperature (66·7°) was on the 13th October, and the minimum (23·5°) on the 4th December.

Rain or snow fell on 46 days during the quarter. The rain-fall measured 5·257 inches, of which 2·910 inches were registered in the month of October.

The west wind was by far the most prevalent during the quarter, it having blown on 39 days. The wind blew on 17 days from S.W., on 11 days from S., on 9 days from E., on 6 days from S.E., on 5 days from N., on 1 day each from N.E., and N.W., and the air was calm on 3 days during the quarter at 9.30 A.M.

HEALTH OF THE PEOPLE.

The mean temperature during the three months ending the 31st of December, 1871, was 2·6° higher than in the corresponding quarter of the year 1870, and the mortality showed an increase of 1,508.

The deaths from small-pox during the quarter amounted to 441. All the deaths from that disease registered in the *year* 1870 numbered only 32.

Scarlet fever was very prevalent; no less than 89 Registrars reported its presence in their several districts. The Registrar of the Killeagh district, Youghal, observes that the "scarlatina was of a very severe type. In one case, from the suddenness of the death it was thought necessary to hold a coroner's inquest. In every instance that came under my observation, the scarlatina could be traced to direct contagion, showing the necessity of isolating those cases as well as those of small-pox." Of the 42 deaths registered in the Castlegregory district, Dingle Union, 19 were caused by scarlet fever. The picture by the Registrar of the sanitary condition of the district fully accounts for the excessive mortality. His description is as follows—"This division (Castlegregory) comprises the Magharees peninsula, throughout the whole of which the water used for drinking is procured from holes dug for the occasion in the sand. It is consequently always impure, and often disgusting. Despite the efforts of the Relieving Officer, who has been zealous to mitigate nuisance, the sanitary state of the village of Castlegregory stands in need of great improvements. Only one well supplies the whole village with water, and it is situate at the bottom of a long street, placed on a considerable declivity, down which flow, after every fall of rain, streams laden with filth, a portion of which inevitably enters it despite of all care, and of some improvements which have been made in connexion with the well. *In all parts of the district, and of the Union, wherever the supply of water is comparatively pure, scarlatina has either not existed or has been very mild, while, on the contrary, it has been exceedingly fatal when the water is obviously polluted.* In Castlegregory especially, but also at Magharees, the severe and fatal cases occurred almost without an exception, in the houses that an experienced observer would *a priori* have pointed out as peculiarly liable to such fatality."

In the Dunlavin district, Baltinglass Union, and the Newmarket district, Kanturk Union, 4 and 3 deaths respectively were caused by diphtheria. The Registrars state, that heretofore the disease was almost unknown in their districts.

Whooping-cough prevailed to a considerable extent, and in several instances proved fatal.

There was a comparative freedom from the various types of continued fever and measles.

The deaths of 11 centenarians were reported. One person died at Clonmoyle, Macroom Union, who was stated to have attained the extraordinary age of 108 years.

In Donegal, Banbridge, and Ennistimon, there died 3 persons whose respective ages were (as reported) 105 years.

Many districts still remained in the most wretched condition as to sanitary arrangements; indeed the provisions of the Sanitary Act of 1866 were rarely, if ever, brought into force.

NUMBER OF MARRIAGES, BIRTHS, AND DEATHS REGISTERED IN EACH OF THE PROVINCES.

Marriages.—The number of marriages *registered* in the Province of Ulster during the fourth quarter of 1871 amounted to 2,628, a number representing an annual ratio of 1 in every 175 of the estimated population; in Leinster the number was 1,768, or 1 in 185; in Munster 1,160, or 1 in 302; and in Connaught 602, or only 1 in 348.

Quarterly Reports.

Fourth Quarter.

The following Table shows, by PROVINCES, *the number of Marriages registered during the* FOURTH *quarter of the years* 1869, 1870, *and* 1871; *together with the annual ratio to the estimated Population represented by the number of Marriages registered:—*

Deaths.—There were 6,436 deaths registered in the province of Leinster during the fourth quarter of 1871, the annual ratio afforded being 1 in 51; in Munster there were registered 6,023 deaths, or 1 in 58 of the estimated population; in Ulster, 7,175, or 1 in 64; and in Connaught, 2,583, or 1 in 81.

TOPOGRAPHICAL DESCRIPTION of the EIGHT DIVISIONS into which IRELAND has been divided for Statistical purposes.

No. I. The North-Eastern Division.—This division may be described by a line passing southward from Lough Foyle through the counties of Londonderry, Tyrone, and Armagh, to Lough Bawn, in the county of Monaghan, and thence eastward to Carlingford Lough; the north and east being on the seaboard.

No. II. The North-Western Division is bounded on the east by the division just described, from Lough Foyle to a point a little south of Six Mile Cross, in the county of Tyrone, and may be described by a line drawn thence S.W. through the county of Fermanagh to the south of Enniskillen, embracing that portion of the north-west angle of the county of Cavan belonging to the Enniskillen Union, into the county of Leitrim, crossing Lough Allen, thence into the county of Sligo, to a point situated to the southward of the town of Ballymote, and thence extending north to Ballysadare Bay ; the remainder of the division is bounded by the sea. It contains Loughs Erne and Derg, and part of Lough Allen, and large portions of it are mountainous.

No. III. The Eastern Division is situated in the provinces of Leinster and Ulster ; it extends along the Irish Sea and St. George's Channel, from Warrenspoint, in the county of Down, to the south of Cahore Point, in the county of Wexford, stretching inland about twenty-five miles, and embracing the counties of Louth, Dublin, and Wicklow, and portions of the counties of Carlow, Cavan, Kildare, Meath, and Wexford ; together with small portions of the counties of Armagh and Monaghan.

No. IV. The North Midland Division is situated in the provinces of Leinster, Ulster, and Connaught, and extends southward from its junction with the "North-Western" division near Six Mile Cross, in the county of Tyrone, to Tyrrellspass, in the county of Westmeath. Virginia, in the county of Cavan, is situated on its eastern border, and Tulsk, in the county of Roscommon, on its western.

No. V. The South Midland Division situated in the provinces of Leinster and Munster, extends from the Hill of Down, in the county of Meath, southward to Borris, in the county of Carlow. Its southern boundary may be described by a line drawn thence to New Birmingham, in the county of Tipperary, and from that point south to Fethard, in the same county, thence westward to the northern base of the Galty Mountains, and in a north-westerly direction, to Pallasgreen, in the county of Limerick. On the east it is bounded by the "Eastern" division, and on the west by the "Western" and the "South-Western" divisions.

No. VI. The Western Division.—This division extends southwards from Sligo and Killala Bays to the northern bank of the River Shannon, lying westward of Limerick ; the extreme points, north and south, being Benwee Head, in the county of Mayo, and Loop Head, in the county of Clare, a distance in or about 120 miles, which, however, does not represent the extent of seaboard, the western coast being indented by numerous bays and inlets. This division has been extended much more inland than the eastern division, as from its exposure to the Atlantic Ocean, and the prevalence of westerly winds (which blow for nearly three-fourths of the year), the climate must be affected for a considerable distance inland ; the Unions situated on the extreme east are Boyle, Castlereagh, Glennamaddy, Mountbellew, Ballinasloe, and Portumna.

No. VII. The South-Eastern Division.—This division extends from its junction with the "Eastern" division southward of Cahore Point, in the county of Wexford, along the eastern and southern coasts to the east of Cork Harbour, and is bounded on the north by the South Midland division. It embraces the county of Waterford ; nearly the whole of the county of Wexford ; parts of the counties of Carlow, Kilkenny, and Tipperary ; that portion of the county of Limerick (38,550 acres) comprised in the Mitchelstown Union, and a portion of the eastern side of Cork County.

No. VIII. The South-Western Division extends along the southern and western coasts from Cork Harbour to the river Shannon, and embraces the county of Kerry, nearly the whole of the counties of Cork and Limerick, and a small portion of the county of Clare, comprised in the Limerick Union.

POPULATION OF IRELAND (including Army, Navy, and Merchant Seamen on shore and in port) *estimated* to the middle of each of the Years 1801 to 1871, inclusive:—

1824	7,078,140	3,471,820	3,606,320	1848	7,639,800	3,746,427	3,893,373				

NOTE.—This table has been constructed for the years 1801 to 1831—By adopting the rates of increase of the male and female population between 1821 and 1831, as shown by the Irish Census Reports of 1831—the first complete Census of Ireland having been taken in 1821.

1832 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871—The English birth and death rates, as above, were used, deducting the number of emigrants according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871 as explained for the last period.

ANNUAL ABSTRACTS

OF

MARRIAGES, BIRTHS, AND DEATHS.

1871.

ABSTRACT OF MARRIAGES.—Marriages *registered* in Ireland, pursuant to the

DIVISIONS AND SUPERINTENDENT REGISTRARS' DISTRICTS.*	Area in Statute Acres, exclusive of the larger Rivers, Lakes, and Tideways.	Population, 1871.	TOTAL MARRIAGES.	MARRIAGES Registered under the Act 7 & 8 Vic., c. 81. According to the Rites of the late Established Church. Special Licence.	Licence.	Banns.	Registrar's Certificate.	Not stated by which of the foregoing Forms.	TOTAL.	In Registered Presbyterian Meeting Houses.	In Registered Buildings.	In the Registrar's Office.	Society of Friends.	Jews.	TOTAL Registered under the Act 7 & 8 Vic., c. 81.	Roman Catholic Marriages under the 26 & 27 Vic., c. 90.

* For remainder of Belfast see next page.

NOTE.—The Registrars' Districts are sub-divisions of the Unions or Superintendent Registrars' Districts, and are identical with the Dispensary Districts of the same names, except in a few instances.

The letter *W* denotes that the Registrar's District contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.

Wherever the minus sign (—) is prefixed to the numbers given in the column headed "Excess of Births over Deaths," it denotes that the births in the Registrar's District, instead of exceeding the deaths, were, in fact, *less than the deaths*, to the extent stated.

I.—NORTH-EASTERN DIVISION.—BIRTHS AND DEATHS, 1871—REGISTRARS' DISTRICTS—*continued.*

IRELAND.—SUPPLEMENTARY TABLE of the

[In the foregoing Tables all the Diseases, either having a distinct character, or fatal to any considerable number of persons, are classified under 116 heads; some of which, however, include groups of very distinct diseases,—such as are fatal to only a *few persons*, or *diseases* which are often confounded with other diseases. The rule has been to refer the distinct diseases to heads under which the cases were so numerous that the additional numbers would not interfere with the calculated proportions. Where it is desired, partial correction,

LETTER to the REGISTRAR-GENERAL on the CAUSES of DEATH in IRELAND, from WILLIAM M. BURKE, ESQ., F.C.P.I.

YEAR 1871.

SIR,

I beg to bring under your notice a few remarks in reference to the principal causes which contributed to the mortality of the year 1871.

Again I find it necessary to state that the registration of deaths in Ireland remains imperfect; the causes of the imperfection referred to in the year 1870 still obtain—the principal one being the facility afforded for interments, the Registrar's certificate of death not being required in the first instance.

The causes of death are often vaguely and loosely stated, so as to render them in a great degree valueless for scientific purposes. The English certificate refers to the primary and secondary causes of death, and so affords most valuable information. Thus a child dies in Ireland, and the medical certificate states that the cause of death was dropsy—that is, the secondary cause is the only one referred to, whereas if the primary cause had to be sought, it very probably would be discovered that the dropsy was the result of the scarlatinal poison. Again, the death tables, in consequence of the primary and secondary causes not being stated, give very fallacious figures as to the number of deaths resulting from insanity; the certificates received from lunatic asylums rarely name insanity as the cause of death—the cause assigned generally being one of the following: paralysis, epilepsy, apoplexy, diarrhœa, &c.

The medical men at large are anxious that the form of certificate of the cause of death should be so altered as to relieve them from the responsibility of being *informants* of the death. They would gladly afford every information which could tend to the advancement of science.

Of the total deaths registered during the year, the causes of death were certified to by medical men in 43,113 instances, 2,326 by coroners, making a total of the certified deaths of 45,439. In 3,317 instances the cause of death was not certified by the medical attendant, and 38,727 persons died unattended by a medical man. No particulars as to medical certificate were given in 865 cases.

The total deaths registered during the year amounted to 88,348, showing a decrease of 2,114 as compared with the year 1870.

I. ZYMOTIC DISEASES.

The total number of deaths from zymotic diseases registered during the year amounted to 13,936—7,010 males and 6,926 females. In the preceding year 14,548 persons died from zymotic diseases. Of all the deaths registered during the

year, [illegible] every 6·3 resulted from this class of diseases. Preventable diseases proved fatal to 26 in 10,000 of the population.

Fever proved fatal in 3,176 instances—1,667 males and 1,509 females—classified as follows: typhus 873, typhoid or enteric 930, and simple continued fever 1,373. In every 10,000 of the population 6 persons succumbed to fever.

Scarlet fever numbered 2,207 victims—1,150 males and 1,057 females—or 4 in every 10,000 of the population.

For some years previous to 1871 Ireland had enjoyed a singular immunity from small-pox. In 1864 the Compulsory Vaccination Act came into operation, the disease was then epidemic in certain localities, and the deaths registered from it amounted to 854; in 1865 the number fell to 461; in 1866 to 194; in 1867 to 21; in 1868 the number was 23; in 1869, 20; in 1870, 32; during the year 1871 the disease became epidemic, and carried off 665 persons—366 males and 299 females. Of the deaths from small-pox registered, 277 occurred in the Belfast Union, 133 in the North Dublin Union, and 99 in the South; only 9 deaths from small-pox were registered in the province of Munster, and 13 in Connaught.

1,736 deaths were caused by diarrhœa—862 males and 874 females.

Whooping-cough killed 1,388 persons—632 males and 756 females; of these, 1,291 were children under 5 years of age.

547 deaths resulted from measles—255 males and 292 females. In the year preceding, 954 deaths resulted from this disease. 302 of the deaths from measles occurred in Ulster, 149 in Connaught, 74 in Leinster, and 22 in Munster.

The deaths from croup numbered 1,365—750 males and 615 females; of these, 1,211 were under 5 years of age. The disease proved most fatal in the South-Western Division, in which there were 323 deaths; in the Western there were 261; in the North-Eastern, 246; in the Eastern, 181; in the South-Eastern, 125; in the South-Midland, 99; in the North-Midland, 70; and in the North-Western, 60.

Diphtheria was the cause of 226 deaths—123 males and 103 females.

309 deaths were ascribed to quinsy.

394 women died of metria or puerperal fever.

Two men died from glanders.

Erysipelas proved fatal in 319 instances.

Influenza caused 105 deaths.

284 deaths were ascribed to dysentery.

II. Constitutional Diseases.

Under the head of constitutional diseases 16,948 deaths (8,152 males, 8,796 females), or 1 in every 5·2 of the total deaths, and 31 in every 10,000 of the population, were registered.

10,427 persons (5,036 males and 5,391 females) died from phthisis or pulmonary consumption; equal to 1 in 8·5 of the total deaths, and 19 in every 10,000 of the population.

Mesenteric disease caused 1,279 deaths—602 males and 677 females. 1,222 deaths (659 males and 563 females) resulted from hydrocephalus or water on the brain. 852 deaths (466 males and 386 females) were referred to scrofula.

1,732 persons (767 males and 965 females) died from cancer.

1,249 deaths (522 males and 727 females) were vaguely returned as from dropsy.

III. Local Diseases.

31,208 deaths (16,801 males and 14,407 females), or 1 in every 2·8 of the total deaths, and 58 in every 10,000 of the population were referred to local diseases.

From diseases of the nervous system there died 8,518—4,776 males and 3,742 females; of these deaths, 4,100 (2,290 males and 1,810 females) were caused by convulsions. Of the foregoing, there were only 26 over 10 years of age. Apoplexy numbered 881 deaths—502 males and 379 females; paralysis, 1,710—939 males and 771 females; inflammation of the brain and its membranes, 498; epilepsy, 291; insanity, 181; chorea, 5; and brain disease unspecified, 852.

Diseases of the circulatory organs caused 3,760 deaths—1,986 males and 1,774 females; 80 of these were referred to pericarditis or inflammation of the heart's covering; 107—92 males and 15 females—to aneurism; and the remainder to heart disease unspecified.

Diseases affecting the respiratory organs, excluding phthisis or pulmonary consumption, caused 12,645 deaths—6,403 males and 6,242 females. Of these, 9,416 (4,561 males and 4,855 females) were ascribed to bronchitis; 1,647 (1,023 males and 624 females) to pneumonia or inflammation of the lungs; 97 to laryngitis or inflammation of the wind-pipe; 324 to pleurisy; 523 to asthma; and 638 to lung disease unspecified.

4,591 deaths (2,524 males and 2,067 females) resulted from diseases affecting the organs of digestion; of these, enteritis or inflammation of the bowels caused 530 deaths; liver disease, 1,061; hepatitis or inflammation of the liver, 239; jaundice, 157; stomach disease unspecified, 980; gastritis or inflammation of the stomach, 278; peritonitis, 294; ascites, 285; hernia, 133; ileus, 396, &c.

The deaths from diseases of the urinary organs amounted to 1,168—883 males and 285 females; of these, 253 were ascribed to nephria or Bright's disease; 108 to diabetes; 83 to ischuria; 80 to cystitis or inflammation of the bladder; 78 to nephritis or inflammation of the kidneys; 19 to stone, and 547 to kidney disease.

Diseases of the generative organs caused 133 deaths—5 males and 128 females.

208 deaths (122 males and 86 females) resulted from diseases affecting the organs of locomotion.

Affections of the tegumentary system resulted in 185 deaths.

IV. Developmental Diseases.

Diseases incidental to the growth and decay of the human frame caused 21,351 deaths—9,441 males and 11,910 females.

The number of deaths returned as resulting from old age was 15,997—6,956 males and 9,041 females. 238 persons (84 males and 154 females) were stated to have reached the advanced age of 100 years and upwards.

The premature births amounted to 220—117 males and 103 females.

Nine deaths (4 males and 5 females) were ascribed to cyanosis; of these, 2 females were certified as having reached the respective ages of 48 and 64 years.

Spina bifida was the cause of 12 deaths (8 boys and 4 girls), all under two years of age. 13 deaths were referred to other malformations.

261 deaths were caused by teething.

616 women (exclusive of 394 who died from metria) perished during or after childbirth.

For every 150 children born during the year 1 mother died.

V. Violent Deaths.

The number of deaths from violence amounted to 2,101—1,488 males and 613 females. Of these, 1,835 were accidental, viz.: 644 (495 males and 149 females) from fractures and contusions, 17 males and 1 female from gunshot wounds, 20 males and 8 females from cuts and stabs, &c., 451 from burns or scalds, 19 from poison, 393 from drowning—of those drowned 323 were males and 70 females, 76 from suffocation, and 206 from accidental causes unspecified.

84 deaths were homicidal; 112 (87 males and 25 females), suicidal.

Two men were executed during the year.

68 of the deaths from violence were not classified.

In 406 cases of sudden death (255 males and 151 females), the cause was unascertained.

The cause of 1 in every 37 of the total deaths was unspecified or ill-defined.

I am,
Sir,
Your obedient servant,
W. M. BURKE.

To

The Registrar-General.

COPY of CIRCULAR relating to REGISTRATION of MARRIAGES celebrated by the ROMAN CATHOLIC CLERGY, 26 and 27 Vic., cap. 90.

General Register Office, Dublin,
31*st December*, 1863.

SIR,

I request you will furnish each Parish Priest within your District—who may apply to you for the same—with *six blank* Forms of Certificates of Marriage, which you will carefully take from the Certificate Book forwarded to you, and also with *six* of the printed Envelopes, addressed to "The Registrar of Births, Deaths, and Marriages."

By this course—which has been strongly recommended to me by many Dignitaries of the Roman Catholic Church, and approved of by the Law Officers of the Crown*—the convenience of the Catholic Population, especially those of the poorer classes, will be greatly promoted in regard to the Registration of their Marriages.

A *further supply* of Certificates *will be forwarded on your application*—from which *blank Forms* will be furnished by you, from time to time, to those Parish Priests within your District who may require them. You will request each Rev. Gentleman obtaining the Certificates, to give you a receipt for them (on the accompanying Forms), in order that you may be able to account to me for all the Certificates intrusted to your care; and you will furnish me, at the end of each month, with the Names and Addresses of those Clergymen to whom you supply them. You will observe they are on *Water-marked* paper, with the words "Certificate of Marriage" printed thereon.

I beg to say that I feel assured you will discharge the duties of your office with zeal, discretion, and courtesy, and thus largely contribute to the success of the very Important Measures, in the carrying out of which you have so readily undertaken to assist by accepting the office of Registrar.

I am, Sir,
Your obedient Servant,
WILLIAM DONNELLY,
Registrar-General.

To the
Registrar of Births, Deaths, and Marriages,
District of ————

* The Right Honorable Thomas O'Hagan, Attorney-General (now Lord O'Hagan); and James A. Lawson, Esq., Solicitor-General—now a Judge of the Common Pleas.

INDEX OF SUPERINTENDENT REGISTRARS' DISTRICTS.

[The following Index furnishes a reference to the *Number* of each Superintendent Registrar's District in the Topographical Arrangement adopted in the Tables of Abstracts contained in the Report, in which the numbers run consecutively from 1 to 163.*]

* Thus, the number of Marriages in the Abbeyleix Superintendent Registrar's District may at once be ascertained by referring in the "*Abstract of Marriages*" to the Superintendent Registrar's District, numbered 75 (*see* page 36), and in like manner the number of Births and Deaths, of Deaths at different ages, &c., will be found by referring to the same Superintendent Registrar's District Number in the appropriate Tables.

INDEX OF REGISTRARS' DISTRICTS.

[The Number against each Registrar's District in the Third Column refers to the order in which it appears in the Arrangement of the Districts in the Tables of Abstracts; thus Abbey (120 : 4) is the 4th Registrar's District of the Tuam Superintendent Registrar's District, No. 120.]
